Applicant has not indicated what rate structure it intends to propose respecting its nonaffiliated customers. We are therefore not in a position to decide finally whether the rates it now proposes for its affiliated customers are appropriate. Nor are we able to determine the effect final approval of the proposed new rates might require with respect to rates applicable to its nonaffiliated customers. We shall therefore approve the instant proposal tentatively and require Applicant to file whatever rate structure it considers appropriate for its nonaffiliated customers in light of the new rate structure tentatively approved herein. In view of this disposition, it is unnecessary to consider City's objections at this time. Those objections, as well as any others, will be considered when we review the overall rate structure of Applicant in six months upon the filing herein required.

Since City's amendment to its petition to intervene withdrew its request for formal hearing in Docket No. CP67–6, it does not appear that any further action on the petitions to intervene is necessary.

Upon consideration of Applicant's proposal, we are of the opinion that the certificate requested by Applicant meets the requirements of the public convenience and necessity and we shall grant the authorization requested therein subject, however, to the following conditions: (1) any increase in the average cost of purchased gas to Applicant which might result from the gas purchase realignment authorized under this certificate shall not be allocated to Applicant's nonaffiliated customers in any future rate proceeding; (2) our issuance of this certificate shall not be construed as constituting final approval of Applicant's related proposed changes in rates or the basis therefor and shall not preclude this Commission, or any of Applicant's customers, from questioning the propriety of those rate changes in any future proceeding, and (3) Applicant shall file what it considers to be an appropriate rate structure applicable to its nonaffiliated customers within six months.

The questions considered herein relate only to the rate structure or rate design of Applicant's system. These questions will not delay consideration of the appropriate rate level of Applicant's rates, which is under active study at the present time.

At a hearing held on March 23, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, in-

**cluding the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,**

***The Commission finds:***

**(1) Applicant, Consolidated Gas Supply Corporation, a West Virginia corporation with its principal place of business in Clarksburg, West Virginia, was formed as a result of the merger of New York State Natural Gas Corporation and Hope Natural Gas Company, and is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in *Hope Natural Gas Co.* (33 FPC 150).**

**(2) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules, and regulations of the Commission thereunder.**

**(3) The rearrangement of gas purchase procedures, utilization of existing delivery points for Applicant's account, institution of a new storage service for The Peoples Natural Gas Company, and the filing and cancellation of appropriate rate schedules and service agreements necessary therefor, are required by the public convenience and necessity and a certificate authorizing these proposals should be issued as hereinafter ordered and conditioned.**

**(4) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (e), and (f) of Section 157.20 of such Regulations.**

***The Commission orders:***

**(A) A certificate of public convenience and necessity is issued to Applicant, Consolidated Gas Supply Corporation, authorizing the operations and acts indicated in paragraph (3) above, as more fully described in the application in Docket No. CP67-6, upon the terms and conditions of this order.**

**(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), and (f) of Section 157.20 of such Regulations.**

**(C) Applicant shall file the proposed tariff changes and service agreements, related to the certificate of public convenience and necessity, issued herein, in a form acceptable to the Commission, effective as of the date of this order or such later date as may be requested by Applicant.**

**(D) Any increase in the average cost of purchased gas to Applicant which might result from the gas purchase realignment authorized under this certificate shall not be allocated to Applicant's non-affiliated customers in any future rate proceeding.**

**(E) Although our issuance of the certificate herein necessarily allows Applicant to put the related rate changes into effect upon a proper filing thereof, as the certificate and rate proposals are interdependent, our issuance of the certificate is not to be construed as constituting final approval by the Commission of the rate form, rate levels, allocation and rezoning upon which the proposed rate changes are based, nor will the issuance of this certificate preclude this Commission, or any of Applicant's customers, from questioning the propriety of the rate changes proposed herein, in any future proceeding.**

**(F) Applicant shall file with the Commission, within six months from the date of acceptance of this order, revised tariff sheets to its FPC Gas Tariff, Original Volume No. 1, relating to its nonaffiliated customers. The Commission reserves the right to suspend this filing and enter upon a hearing to review**

Applicant's overall rate structure and to afford all parties affected an opportunity to present their views.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## EL PASO NATURAL GAS COMPANY, DOCKET NO. G-12135 AND NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP63-41

### ORDER CONSOLIDATING APPLICATION FOR CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY WITH SHOW CAUSE PROCEEDING AND SETTING DATE FOR HEARING

(Issued March 24, 1967)

On August 17, 1962, 28 FPC 344, the Commission ordered Northern Natural Gas Company (Northern) to show cause, if any there be, within 30 days from the date of issuance of the order, why the Commission should not find and determine that:

(1) Northern's sale to Pioneer Gas Company for resale in the State of Texas is a jurisdictional sale; and

(2) Northern should apply for a certificate of public convenience and necessity authorizing such sale.

On September 26, 1962, Northern filed an answer to the Order to Show Cause, denying that its sale to Pioneer of natural gas which was delivered for the account of Northern to Pioneer by El Paso Natural Gas Company (El Paso) from the latter's Plains to Dumas, Texas, pipeline, is subject to the jurisdiction of the Commission under the Natural Gas Act.

Action was withheld in this proceeding pending decision on an application for a declaratory order by United Gas Pipe Line Company involving jurisdiction over certain sales made by United in the "Florida Parishes" of Louisiana. Subsequent to our decision therein, United Gas Pipe Line Co., 30 FPC 560, the Court of Appeals for the 5th Circuit sustained the Commission's Opinion in *Louisiana Public Service Commission* v. *F.P.C.*, 359 F. 2d 525, cert. den., 385 U.S. 833, holding that sales by a pipeline in a state of production off an interstate pipeline were jurisdictional sales. Since the instant proceeding appears to present the same issue, and since Northern has not voluntarily filed an application for a certificate of public convenience and necessity, it is appropriate to now set the show cause proceeding for hearing.

On March 1, 1957, El Paso filed at Docket No. G-12135 its application for a certificate of public convenience and necessity as well as a request for a temporary certificate authorizing the delivery by El Paso to Pioneer for the account of Northern of up to 69,000 Mcf per day during the seasonal period from April 1 to October 1 of each of the years of 1957 through 1961 at points of delivery located along El Paso's Dumas line. By temporary certificate issued June 7, 1957, El Paso was authorized to render the service during the seasonal period of 1957. Thereafter, further temporary certificates were issued from year to year authorizing continuation of deliveries to Pioneer by El Paso, but increasing the amount authorized to 100,000 Mcf per day.

A permanent certificate to El Paso has been withheld pending resolution of the Order to Show Cause against Northern. For administrative purposes it is appropriate that El Paso's application in Docket No. G-12135 should be consolidated with the proceeding against Northern in Docket No. CP63-41.

*The Commission finds:*

(1) In view of the foregoing and upon the basis of the Commission's order to show cause issued August 17, 1962, and the answer thereto, it is necessary and appropriate to carry out the provisions of the Natural Gas Act that a hearing be held on the aforementioned order to show cause to determine why Northern should not be directed to apply for and obtain a certificate of public convenience and necessity authorizing the sale of natural gas to Pioneer Natural Gas Company.

(2) It is appropriate and in the public interest that the above-captioned matters be consolidated for hearing and decision as hereinafter ordered.

(3) The expeditious disposition of this proceeding may be effectuated by holding a prehearing conference, and to that end, a prehearing conference should be held on April 25, 1967, as hereinafter ordered.

*The Commission orders:*

(A) A public hearing to be held in a hearing room of the Federal Power Commission, 441 G Street, N.W., Washington, D.C., commencing May 16, 1967, at 10:00 a.m. (EDT) concerning the question as to whether Northern should be required to apply for and obtain a certificate of public convenience and necessity authorizing it to make the sale to Pioneer Natural Gas Company which it has previously made without authorization.

(B) The above-captioned matters are hereby consolidated for the purposes of hearing and decision.

(C) Pursuant to the provisions of Section 1.18 of the Commission's Rules of Practice and Procedure, a prehearing conference before a duly designated presiding examiner shall commence at 10:00 a.m. (EDT) on April 25, 1967, in a hearing room of the Federal Power Commission, 441 G Street, N.W., Washington, D.C., for the purpose of effectuating the expeditious disposition of these consolidated proceedings.

(D) The purpose of such conference shall be to consider all matters at issue in the above dockets, the manner in which evidence shall be presented, to fix dates for the distribution of such evidence, to enter into such stipulations of fact as the parties may agree upon, and to consider any and all matters which might contribute to an expeditous disposition of this proceeding.

(E) Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) on or before April 17, 1967. Protestants and Petitioners shall state with particularity the dockets in which they claim to have an interest.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## CITY OF HAMILTON, OHIO, DOCKET NO. CP65-402; TEXAS GAS TRANSMISSION CORPORATION, DOCKET NO. CP66-13; THE OHIO FUEL GAS COMPANY, DOCKET NO. CP66-207

### ORDER DENYING APPLICATIONS FOR REHEARING

(Issued March 24, 1967)

On January 24, 1967, 37 FPC 209, the Commission issued its Opinion No. 513 and accompanying order in this proceeding authorizing the City of Hamilton, Ohio, to purchase its entire natural gas requirements from the Texas Gas Transmission Corporation, rather than from either its present supplier, The Cincinnati Gas & Electric Company, or a competing supplier, The Ohio Fuel Gas Company. An appropriate certificate was issued to Texas Gas. Applications for rehearing were filed on February 23, 1967, jointly by Cincinnati Gas and the City of Cincinnati, and also by Ohio Fuel and Kentucky Gas Transmission Corporation. Upon due consideration of the various claims made in the rehearing applications we conclude that no modification is required or should be made in our Opinion and order.

In authorizing the future service by Texas Gas, we found that the evidence established that Hamilton and its customers will obtain significant economic benefits from the change in suppliers and that the benefits to Hamilton outweighed the harmful effects of the change on the competing suppliers and their customers. The bases for these findings are fully stated in the Opinion. We also rejected certain claims by Cincinnati Gas and Ohio Fuel that the question of who shall supply existing markets should not be opened for redetermination, *i.e.*, that the consideration should be solely with regard to new market increments, and that the certification of Texas Gas was not in the public interest as leading to a duplication of facilities and a resulting non-use of existing pipeline facilities. Finally, we held that we would not include a condition requiring Hamilton to secure State abandonment authorization as a condition precedent to the discontinuance of its present service arrangement.

Most of the arguments made in the rehearing applications were previously made and fully considered. Certain of the points made in the applications, however, require further comment.

Ohio Fuel contends that our judgment in the case erroneously was circumscribed by our misinterpretation of *Lynchburg*[1] and the "net market loss" test therein referred to, to the exclusion of a thorough consideration of the over-all public interest. To the contrary, our decision shows that we took full consideration of all relevant factors, including the foreseeable effects on Cincinnati Gas and Ohio Fuel and their customers, the diminished usefulness of the existing facilities, the economic justification for the construction of the new facilities and the needs and benefits to Hamilton and its consumers. In so doing, we have not disregarded the fact that certain fixed costs of Cincinnati Gas and Ohio Fuel may have to be borne by other customers. We did not, however, accept the inflated loss calculations advanced by these parties.

Further, it is asserted by Ohio Fuel and Cincinnati Gas that, in determining whether an existing supplier will suffer any detriment as a result of load diversion, consideration should not be given to possible future growth which it may experience. We do not here decide that speculative long-term potential growth is sufficient to offset immediate detriment and our decision was not predicated on any such finding. But we do think that potential growth, which is demonstrated to be not at all speculative, is very much a relevant consideration and it is to this that our opinion is addressed. As we stated therein:[2]

> The evidence is clear that Cincinnati Gas' loss of the Hamilton market will shortly be offset by an increase in Cincinnati Gas' other sales. These sales will be made at a better load factor than the present sale, and Cincinnati Gas will experience an actual reduction in its average cost of purchased gas without this load. There is no indication in the record that

---

[1] *Lynchburg Gas Co.* v. *F.P.C.*, 336 F. 2d 942 (CADC–1964).

[2] Opinion No. 513, pages 215, 216.

the loss of Hamilton will occasion any increase in rates to Cincinnati Gas' other customers or that they will be substantially harmed.

Cincinnati Gas and the City of Cincinnati would have us limit our certificate authority solely to new increments of supply without any possibility of reconsideration of past arrangements. In our opinion, such a construction would unjustifiably limit our authority under Section 7 of the Natural Gas Act and would not be in the public interest. The Act requires that we issue a certificate if the proposed service is or will be required by the present or future public convenience and necessity. Not only is there no prohibition to the issuance of a second certificate for an area already being served, but such a possibility is expressly recognized in Section 7(g). As noted in the Opinion, "a natural gas company does not have a permanently fixed or vested interest in its existing markets * * * If the overall public interest will be served by permitting a competing company to supply an existing market it should be permitted to do so."

Applicants request that we grant rehearing to receive evidence regarding a settlement proposal submitted by Ohio Fuel to staff and its jurisdictional customers in its rate proceeding at Docket No. RP66-7, not a part of this proceeding, which would have the effect of increasing the allocation of gas under Ohio Fuel's Winter Service rate schedule to Cincinnati Gas. The argument is made that the rate change inherent therein would directly affect the cost of gas to Cincinnati Gas and Hamilton, thereby showing a decreased economic detriment from the continued service by the existing supplier. The parties note in support that we considered changes in Texas Gas' rates which did not become effective until after the hearing in this proceeding had been concluded and assert that it is only fair and proper that the changes described in the settlement proposal be considered.

Even though the settlement proposal would make available to Cincinnati Gas 8,500 Mcf per day of Winter Service volumes, with a corresponding reduction in Contract Demand volumes, it is not final and may undergo many changes before it is submitted to the Commission for approval. Our Opinion explains why we considered it improper to take into account the original attempted allocation of Winter Service gas for the service to Hamilton. The reduction contemplated in the present proposal would have only a minimal effect on the purchased gas costs of either Hamilton or Cincinnati Gas, considering the latter's total gas supply, and would not materially alter our Opinion in this proceeding. The same would be true at any reasonable range within which the present proposal might yet be modified. The Texas Gas rate change stands on an entirely different footing since it has been approved as the currently effective legal rate, in contrast to the present situation which, as described by the parties, is only a proposal presented to the parties in an attempt at settlement of a pending case.

Although the facilities to be installed by Texas Gas were estimated to cost $7,816,000, its estimated incremental rate of return on the service to Hamilton would be 10.35 per cent in 1968 and 10.93 per cent in 1969,[3] significantly above the 6.5 per cent system-wide rate of return utilized in its last rate settlement in Docket No. RP67-10. These additional revenues will serve to benefit all of Texas Gas' customers, including Ohio Fuel.

*The Commission further finds:*

The assignments of error and grounds for rehearing set forth in the application for rehearing filed in this proceeding present no facts or legal principles which would warrant any change in or modification of the Commission's Opinion No. 513 and accompanying order issued January 24, 1967.

---

[3] These calculations are based on the G-4 rate in effect at the time the record was made and do not take into account the rate reduction referred to in the Opinion and which has the effect of reducing the 1968 estimated incremental return by 0.98%.

*The Commission orders:*

The applications for rehearing filed jointly by The Cincinnati Gas & Electric Company and the City of Cincinnati and by The Ohio Fuel Gas Company and Kentucky Transmission Corporation on February 23, 1967, are denied.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP67-148 (PHASE I)*

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued March 24, 1967)

On November 23, 1966, Northern Natural Gas Company (Applicant) filed in Docket No. CP67-148 (Phase I), as supplemented on March 13, 1967, an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities and the sale and delivery of an additional 47,637 Mcf of natural gas per day to existing resale customers, all as more fully set forth in the application, as supplemented, in this proceeding (Phase I).

Specifically, Applicant proposes to construct and operate (a) 11,000 compressor horsepower at its Bushton, Kansas, compressor station, (b) 5.1 miles of 3-inch branch line, together with metering and regulating facilities, in Minnesota, and (c) 46.6 miles of 26-inch to 36-inch pipeline loop at various locations in Oklahoma, Kansas and Iowa. The total estimated cost of these facilities is $9,623,929, which cost will be financed from funds on hand, reserve accruals and retained earnings.

Commencing with the 1967-68 heating season, Applicant proposes the following increases in the contract demands of existing customers:

| Distributor: | *Increase in contract demand (Mcf)* |
|---|---|
| Austin, Minn.—Austin Utilities | 57 |
| Cedar Falls, Iowa—M.U.B.T | 500 |
| Greeley Gas Co | 150 |
| City of Harlan, Iowa | 50 |
| Interstate Power Co | 900 |
| Iowa Electric Light & Power Co | 4, 491 |
| Iowa-Illinois Gas & Electric Co | 600 |
| Iowa Power & Light Co | 5, 475 |
| Iowa Public Service Co | 3, 500 |
| Iowa Southern Utilities Co | 120 |
| Minneapolis Gas Co | 6, 914 |
| Minnesota Natural Gas Co | 3, 500 |
| Nebraska Natural Gas Co | 300 |

---

*The application in this docket is divided into two Phases. This order pertains exclusively to Phase I of said application, as supplemented.

| Distributor—Continued | *Increase in contract demand (Mcf)* |
|---|---|
| New Ulm, Minn.—P.U.C. | 200 |
| North Central Public Service Corp. | 50 |
| Northern States Power Co. | 9,500 |
| Northwestern Public Service Co. | 550 |
| Omaha, Nebraska—M.U.D. | 4,805 |
| Owatonna, Minn.—M.P.U. | 300 |
| Town of Remsen, Iowa | 25 |
| Town of Sanborn, Iowa | 35 |
| Town of Sioux Center, Iowa | 50 |
| Superior, Wis.—W.L. & P. Co. | 500 |
| Watertown, S. Dak.—M.U. | 300 |
| Western Power & Gas Co. | 672 |
| Town of Woodbine, Iowa | 70 |
| Peoples Natural Gas Division | 4,023 |
| Total | 47,637 |

The proposed increased sales will be made pursuant to Applicant's appropriate effective rate schedules on file with the Commission.

On December 30, 1966, the Town of Brooklyn, Iowa, filed a petition to intervene in this proceeding; however, on February 23, 1967, said petition was withdrawn.

Several other petitions to intervene have been filed herein. None of said petitioners requests formal hearing, and each petitioner desires to intervene only in the event that a formal hearing is held herein. Inasmuch as the shortened procedure is being used herein, no further action on said petitions appears necessary.

After due notice, no other petition to intervene, notice of intervention or protest to the granting of the application, as supplemented, has been filed.

At a hearing held on March 23, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplement and exhibits (Phase I), submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Northern Natural Gas Company, a Delaware corporation having its principal place of business in Omaha, Nebraska, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G–280 (3 FPC 967).

(2) The facilities hereinbefore described, as more fully described in the application, as supplemented, in this proceeding (Phase I) are to be used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the proposed transportation and sales of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed construction and operation of the subject facilities and the proposed transportation and sales of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(6) The authorization hereinafter granted should be without prejudice to Applicant's right to request amendment of the subject order to authorize Phase II facilities.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Northern Natural Gas Company, to construct and operate the proposed facilities and to sell and deliver natural gas as hereinbefore described, all as more fully described in the application, as supplemented, in this proceeding (Phase I), upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b) (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation and the transportation and sales of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act within 12 months from the date on which this order issues.

(D) The authorization granted in paragraph (A) above is without prejudice to Applicant's right to request amendment of the subject order to authorize Phase II facilities.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## PACIFIC POWER & LIGHT COMPANY, DOCKET NO. E-7326

### ORDER AUTHORIZING ACQUISITION OF FACILITIES

(Issued March 24, 1967)

Pacific Power & Light Company (Applicant) filed an application on November 22, 1966, for an order, pursuant to Section 203 of the Federal Power Act, authorizing the acquisition of certain electric facilities from Hood River Electric Cooperative (Hood River).

Applicant is incorporated under the laws of the State of Maine with its principal place of business office in Portland, Oregon, and is engaged in the electric utility business in the States of Washington, Oregon, Wyoming, California, Montana and Idaho.

Hood River is an independently financed cooperative system incorporated under the laws of Oregon. It is engaged in the distribution of electric energy to ultimate consumers in Hood River County, Oregon. It has no generating facilities and purchases energy to meet its requirements from Bonneville Power Administration. In 1965 it delivered 31,737,524 kwh to 1,374 ultimate consumers. Both Applicant and Hood River own facilities for the distribution and sale of electric energy in substantially the same geographical areas in Hood River County.

The facilities to be acquired by the Applicant from Hood River consist of certain electric distribution systems and associated facilities owned, operated and maintained by Hood River in Hood River County, Oregon. The consideration to be paid by the Applicant for the facilities is the sum of $403,953. As part of the transaction, Applicant proposes to sell and convey to Hood River various electric distribution facilities owned, operated and maintained by the Applicant in Hood River County, Oregon. As consideration for the sale by Applicant, Hood River will pay the sum of $682,677. Applicant proposes to transfer approximately 631 customers to Hood River and Hood River proposes to transfer to the Applicant approximately 295 customers. Applicant represents that to the best of its knowledge the proposed acquisition will not have any effect upon any contract for the purchase, sale or interchange of any electric energy.

All of the 631 customers which will be transferred to Hood River will receive a decrease in rates except two street lighting accounts whose rates will not be changed. The 511 residential customers will have an estimated average monthly decrease of $1.80 or 15 percent. The 116 commercial customers will have an estimated average monthly decrease of $6.70 or 33 percent, and two industrial customers will have an estimated average monthly decrease of $223.00 or 21 percent. All of the 295 customers of Hood River which will be transferred to Pacific, will experience increases in rates. The 247 residential consumers will have an estimated average monthly increase of $2.55 or 21 percent, 47 commercial customers will have an estimated average monthly increase of $14.85 or 49 percent, and the only industrial customer will have an estimated average increase of $92.00 or 29 percent. On an overall basis, 631 consumers will receive a total monthly estimated reduction in charges of $2,143.00 and 295 consumers will receive a total monthly estimated increase in charges of $1,419.90.

The Applicant will pay $403,953 for electric facilities which have a depreciated original cost of $220,539.11 or $183,413.89 in excess of depreciated original cost. This excess will be an acquisition adjustment. From the sale of electric facilities which have a depreciated original cost of $626,385.35, the Applicant will receive $682,677, a book gain of $56,291.65. The Applicant proposes to charge to Account 435, Miscellaneous Debits to Surplus, the difference of $127,122.24 between the $183,413.89 acquisition adjustment on the plant acquired and the $56,291.65 book gain on the plant sold. The proposed transaction was set up in accordance with a statute of the State of Oregon which encourages neighboring utility systems to determine a common boundary between their service areas.

The principal result of this transaction is that there will be a definite boundary between the service areas of the two parties. Existing duplication of facilities will be removed and future duplication will be prevented. This will aid planning of future extensions in the area. By order dated January 12, 1967, the Public Utility Commissioner of Oregon approved the proposed transaction.

In approving the transactions the Oregon Commissioner noted that the proposed transfer will eliminate present and avoid future unnecessary duplication of electric facilities by each of the contracting parties, that the agreed allocation of territory and customers will promote efficient, economic and safe operation of the utility systems of both parties and that wasteful duplication of investments in poles, wiring and other plant will be eliminated and maintenance costs lowered.

Written notice of the application has been given to the Oregon Public Utility Commissioner, Wyoming Public Service Commission, Washington Utilities and Transportation Commission, California Public Utilities Commission, Montana Board of Railroad Commissioners, and Idaho Public Utilities Commission and to the Governor of each of those states. Notice has also been given by publication in the Federal Register on December 13, 1966 (31 F.R. 15713), stating that any person desiring to be heard or to make any protest with reference to the application should file a petition or protest on or before December 28, 1966, with the Federal Power Commission, Washington, D.C. 20426. No protest or petition or request to be heard in opposition to the granting of the application has been received.

*The Commission finds:*

(1) Applicant, a corporation, is a public utility within the meaning of Section 203 of the Federal Power Act, subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued March 28, 1962, *Pacific Power & Light Company,* Docket No. E-7025 (27 FPC 620).

(2) By the proposed transaction, Applicant will merge or consolidate its facilities subject to the jurisdiction of the Commission with part of those of Hood River, another person, within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(3) The proposed acquisition of facilities by Applicant, as described above, upon the terms and conditions set forth in the application, and subject to the provisions of this order will be consistent with the public interest as expressed in Section 203 of the Federal Power Act.

*The Commission orders:*

(A) The proposed acquisition by Applicant of the electric facilities referred to above and as described in the application is authorized and approved upon the terms and conditions and for the purposes set forth in the application subject to the provisions of this order.

(B) Applicant shall record the proposed transactions herein authorized and the facilities and properties referred to above as provided in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees.

(C) This authorization shall expire unless the transaction herein authorized and approved is consummated within 90 days from the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determinations of cost, or any matter whatsoever now pending or which may come before this Commission or any other regulatory body and nothing herein shall be construed as an acquiescence by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## DUKE POWER COMPANY, PROJECT NO. 2503

### ORDER APPROVING REVISED EXHIBIT L DRAWINGS

(Issued March 27, 1967)

On February 10, 1967, Duke Power Company, licensee for the proposed Keowee-Toxaway Project No. 2503 to be located on the Keowee, Little, Whitewater, Toxaway, Thompson, and Horsepasture Rivers, all tributaries of the Savannah River, filed for Commission approval revised Exhibit L drawings for the Keowee and Jocassee developments of the projects, pursuant to Article 27 of the license.

The drawings show changes in the design of the project structures for the Keowee development and the revised one-line diagrams for the Keowee and Jocassee developments. The revised drawings were submitted in accordance with Article 27 of the license which requires Commission approval of final design drawings before construction begins. Licensee stated in its letter of transmittal dated February 9, 1967, that it contemplates beginning construction in March, 1967.

There are a number of design changes which have been made, most of which are of a minor nature. The principal changes are those associated with the design of the dams and dikes of the Keowee development. These changes are the result of more detailed investigations of material availability and additional design analyses. Such changes consist of a modification of the surface slopes for the dams and dikes and minor realignment of the structures to conform with the topography of the respective sites for the structures. The Keowee and Little River dams under the design changes will have an upstream surface slope of 2.0 to 1.0 between the crest and elevation 772 feet, this portion of the slope being surfaced with riprap for protection against reservoir fluctuations. The remaining portion of the upstream face below elevation 772 feet will have a slope of 2.5 to 1.0. The downstream face of the dams will have a slope of 2.5 to 1.0 and a 60-foot wide berm at elevation 720 feet. The toe of the dams will be surfaced with riprap for protection against tailwater fluctuations. The several saddle dikes have the same design as the main dams except that the berm on the downstream slope is not included. Stability analyses have been made which show that the dam structures are adequately designed and will result in safe structures if construction is performed in accordance with sound engineering practices and if the materials used result in structures having factors of safety as specified on Exhibit L drawing FPC No. 2503–31.

Other changes to the project structures proposed by the licensee include increasing the length of the Little River Dam from about 1800 to feet to 2200 feet; locating the spillway 340 feet from the left abutment of the Keowee dam rather than 230 feet; decreasing the length of the power tunnel and penstock from about 1100 feet to 860 feet; and decreasing the penstock diameter from 26.5 feet to 26.17 feet.

The nuclear steam-electric-plant to be located on the Lake Keowee site, designated as "Site L," See Exhibit K (FPC 2503–4), has undergone certain design modifications. Principally, these modifications consist of relocating the intake and discharge canals for the condenser cooling water. The revised plans show that the intake canal will be located in the Little River portion of Lake

Keowee instead of on the Keowee River portion of the Lake. The discharge canal will be located in the Keowee River portion of the Lake at the site originally proposed for the intake facilities. The intake canal will now be farther away from the discharge canal and the revised arrangement should improve recirculation problems thereby reducing the thermal effect of the nuclear plant on the project reservoir.

In accordance with Article 44 of the license, the licensee has employed a board of three qualified consultants which has reviewed and approved the plans and specifications for the dams and dikes.

*The Commission finds:*

(1) The following described revised Exhibit L drawings conform to the Commission's Regulations and should be approved as part of the license for the project:

| Exhibit L | FPC No. | Title |
|---|---|---|
| Sheet 1 | 2503-29 | Keowee development plan. |
| Sheet 1A | 2503-30 | Do. |
| Sheet 2 | 2503-31 | Keowee development sections and details. |
| Sheet 5 | 2503-32 | Keowee and Jocassee developments' one-line diagrams. |

(2) Exhibit L drawings, Sheets 1, 2 and 5 (FPC Nos. 2503-11, -17 and -18) will be superseded and should be eliminated from the license.

*The Commission orders:*

(A) The revised Exhibit L drawings described in finding No. 1 above are hereby approved as part of the license for Project No. 2503 and the superseded Exhibits described in finding No. 2 above are hereby eliminated from the license for the Project.

(B) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of the foregoing order. In acknowledgment of the acceptance of the foregoing order, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## SIERRA PACIFIC POWER COMPANY

### ORDER ACCEPTING RATE SCHEDULE FILINGS EFFECTING RATE REDUCTIONS

(Issued March 27, 1967)

Sierra Pacific Power Company (Sierra), Reno, Nevada, on January 23, 1967, tendered proposed rate schedules for filing as part of its FPC Electric Tariff pursuant to the provisions of Section 205 of the Federal Power Act. These schedules would reduce Sierra's wholesale electric rates and charges to Truckee Public Utility District (Truckee), Truckee, California, Pacific Gas and Electric Company (PG&E), San Francisco, California, and California-Pacific Utilities Company (Cal-Pac), San Francisco, California, by an estimated total amount of $102,627 for the 12 months ending August 31, 1967. The proffered schedules would be effective as of February 1, 1967.

The proposed rate submittals would revise Sierra's Schedule R-1 for wholesale electric service rendered between 2.3 kv and 23 kv as well as Sierra's Schedule R-2 for wholesale electric service rendered at 60 kv. The changes are as follows:

| | R-1 | | R-2 | |
|---|---|---|---|---|
| | Present | Proposed | Present | Proposed |
| Demand charge: | | | | |
| First 600 kilowatts | [1] $2.20 | [1] $2.00 | [1] $2.10 | $1,000.00 |
| Additional kilowatts | [1] 1.90 | [1] 1.75 | [1] 1.80 | [1] 1.45 |
| Energy charge: | | | | |
| First 300 kilowatt-hours per kilowatt demand | [2] .775 | [2] .75 | [2] .76 | [2] .54 |
| Additional kilowatt-hours | [2] .585 | [2] .60 | [2] .57 | [2] .54 |

[1] Per kilowatt.
[2] Per kilowatt-hour.

At present Sierra renders wholesale electric service to Cal-Pac under Schedule R-2, to PG&E under Schedule R-1, and to Truckee under Schedules R-1 and R-2. The estimated effect of the proposed changes upon Cal-Pac, PG&E, and Truckee for the 12 months ending August 31, 1967, is as follows:[1]

| Customers | Present | Proposed | Reduction | Percent |
|---|---|---|---|---|
| Cal-Pac | $316,841 | $250,724 | $66,117 | 20.69 |
| PG&E | 38,602 | 36,598 | 2,004 | 5.81 |
| Truckee | 174,182 | 139,676 | 34,506 | [2] 19.18 |
| Total | 529,625 | 426,998 | 102,627 | 19.38 |

[2] Assuming all deliveries to Truckee at a single point under Schedule R-2 following completion of Truckee's voltage conversion program, the estimated reduction to Truckee for the 12 months ending Aug. 31, 1967, would be $37,977 (22.33 percent).

Sierra's proffered filings also include an Electric Service Agreement dated January 16, 1967, between Sierra and Truckee (Agreement). By its terms, that Agreement would supersede a prior service agreement dated February 1, 1966 between the parties currently on file with the Commission as part of Sierra's FPC Electric Tariff. The Agreement, effective for an initial term of five years, provides, among other things, that (1) Sierra will furnish all the electric requirements of Truckee at specified delivery points (two points at 60 kv and one point at 2.4 kv) until completion of Truckee's modernization, voltage conversion and interconnection program now in progress, at which time Truckee will receive its entire electric supply from Sierra at a new single 60 kv delivery point to be located at Sierra's substation in the Town of Truckee, Nevada County, California; (2) during the period of voltage conversion the reduced wholesale rates reflected in the proffered revisions will be applied as provided in Schedule R-1 and Schedule R-2, and thereafter at Schedule R-2;[2] (3) Sierra and Truckee will respect each other's service area in Nevada County, California, as defined in the Agreement and will not unnecessarily duplicate each other's electric facilities; and (4) Truckee will have the option to purchase from Sierra at original cost less related accrued depreciation the latter's distribution facilities now within the defined geographic limits of Truckee, a municipality of the State of California. Currently, Sierra and Truckee each provide electric utility service within the corporate limits of Truckee.

---

[1] In addition to furnishing Truckee, PG&E, and Cal-Pac with wholesale electric service, Sierra also interchanges electric power and energy with Truckee-Carson Irrigation District (TCID), Fallon, Nevada. TCID is served under Sierra's Rate Schedule FPC No. 8 rather than under Sierra's FPC Electric Tariff.

[2] As noted above R-2 applies to 60 kv deliveries.

By order issued concurrently herewith *Truckee Public Utility District* v. *Pacific Gas and Electric Company*, Docket No. E-7248, *infra*, p. 614, we are authorizing the withdrawal of a complaint by Truckee filed October 5, 1965. In that proceeding, Truckee had proposed other wholesale power supply arrangements. Essentially, Truckee proposed to secure power and energy from the Bureau of Reclamation, United States Department of the Interior, in California with wheeling to Truckee over certain transmission lines of PG&E and Sierra. Conferences held among representatives of Truckee, PG&E, Sierra, the Public Service Commission of Nevada, and the staff of this Commission led to a settlement proposal, which caused Truckee to seek withdrawal of its complaint.

*The Commission finds:*

It is necessary and appropriate for purposes of the Federal Power Act and the Commission's Regulations thereunder and good cause has been shown to accept the proffered rate schedules of Sierra to become effective as of February 1, 1967.

*The Commission orders:*

(A) The 30-day notice period as provided in Section 205 of the Federal Power Act and Section 35.3 of the Commission's Regulations thereunder is waived with respect to Sierra's proffered rate schedules as referred to above and designated in the Appendix hereto, and they are allowed to take effect as of February 1, 1967, all as indicated in that Appendix.

(B) The issuance of this order shall constitute full notice of the filing and publication of the rate schedules in question insofar as their effective dates are concerned.

(C) The effectuation of those provisions of the Electric Service Agreement, dated January 16, 1967, between Sierra and Truckee calling for a single delivery point and a single rate schedule, as referred to above, shall constitute changes by Sierra in service and rates which shall require timely notice in accordance with Section 205(d) of the Federal Power Act and Part 35 of the Commission's Regulations thereunder.

(D) Acceptance of the rate schedules as referred to in paragraph (A) above is without prejudice to any findings or order which has been or may hereafter be made by this Commission in any proceeding by or against Sierra. Moreover, nothing in this order shall be construed as constituting approval by this Commission of any service, rate, charge, classification, or any rule, regulation, contract, or practice affecting such service or rate provided for in the rate schedules referred to above and designated in the Appendix hereto; nor shall this order be deemed as recognizing any claimed contractual right or obligation affecting or relating to such service or rate.

## TEXAS EASTERN TRANSMISSION CORPORATION, DOCKET NO. RP65-59

### ORDER RELEASING REFUNDS IN PART

(Issued March 27, 1967)

On January 16, 1967, 37 FPC 100, we issued an order in this docket approving a rate reduction and refund proposal of Texas Eastern Transmission Corporation (Texas Eastern), and prescribing certain refunds.[1] We directed Texas Eastern to make immediate refund payments to all but nine[2] of its jurisdictional customers, and to retain monies refundable to the latter customers until the issuance of a further Commission order. The customers to whom these amounts are refundable were directed in paragraph (D) of the January 16 order to submit, on or before February 16, 1967, reports of their respective intentions regarding the disposition of the retained amounts. The reports filed in accordance with that paragraph indicate that a partial release by Texas Eastern of the retained refunds is now appropriate.

Algonquin Gas Transmission Company (Algonquin) and Transcontinental Gas Pipe Line Corporation (Transco) indicate in their reports that they will flow through to their customers the entire amounts to be received from Texas Eastern. Staff has reviewed the proposed plans of distribution, and has determined that they are in accordance with the companies' respective obligations. It is therefore appropriate that we authorize Texas Eastern to release to Algonquin and Transco the full amounts shown to be refundable to them in Appendix A of our order of January 16, 1967. Neither company sells gas to any natural gas company subject to the Commission's jurisdiction. It is also appropriate, therefore, that we direct Algonquin and Transco to flow through, in accordance with the plans set forth in their respective reports, all monies received from Texas Eastern pursuant to this order.

---

[1] Amended by Errata Notices issued January 17 and 25, 1967.

[2] Algonquin Gas Transmission Company, Consolidated Gas Supply Corporation, East Tennessee Natural Gas Company, The Manufacturers Light and Heat Company, The Ohio Fuel Gas Company, Tennessee Gas Transmission Company (now Tennessee Gas Pipeline Company, a division of Tenneco Inc.), Texas Gas Transmission Corporation, Transcontinental Gas Pipe Line Corporation, and United Natural Gas Company.

Texas Gas Transmission Corporation (Texas Gas) has indicated an intention to flow through to its customers the entire portion of its refund from Texas Eastern attributable to jurisdictional sales, and to retain the nonjurisdictional portion (less than 3 percent of the total). We are in agreement with this plan, and are therefore authorizing Texas Eastern to release to Texas Gas the full amount shown to be refundable to it in Appendix A of our January 16 order.

Texas Gas is currently retaining refunds received from other suppliers pursuant to previous orders of the Commission. We are today issuing an order in Texas Gas' Docket No. RP67-10 directing Texas Gas to release certain refunds and to retain others, *infra*, p. 612. That order authorizes Texas Gas to flow through the entire jurisdictional portion of the refund which it will receive from Texas Eastern pursuant to this order, with the exception of amounts refundable to three jurisdictional pipeline companies pending our determination of their intentions with respect to those amounts.

United Natural Gas Company (United Natural) has indicated an intention to flow through to its customers substantially all of the money to be received from Texas Eastern. We are therefore authorizing Texas Eastern to release the entire amount shown to be refundable to United Natural in Appendix A of our January 16 order.

United Natural's report of intended disposition indicates that two of its customers are jurisdictional pipeline companies.[3] Pending our determination of their intentions with regard to amounts refundable to them,[4] we are instructing United Natural to retain these amounts, and to flow through the rest of its refund from Texas Eastern in accordance with United Natural's report.

The reports filed by Tennessee Gas Pipeline Company (Tennessee) and East Tennessee Natural Gas Company (East Tennessee) indicate that these companies intend to retain the entire amounts refundable to them by Texas Eastern. In accordance with our practice during the pendency of the proceeding in Docket No. RP66-12,[5] we are directing Texas Eastern to continue its retention of the amounts refundable to both Tennessee and East Tennessee.

Three of the companies from whom we required refund reports, Consolidated Gas Supply Corporation, The Manufacturers Light and Heat Company, and The Ohio Fuel Gas Company, stated that, because their revenues and costs are currently under review by the Commission's staff, they are unable at this time to determine the extent to which they will flow through the amounts refundable to them by Texas Eastern. They request, therefore, that Texas Eastern be directed to continue its retention of those amounts pending the results of the Staff's studies. It is appropriate that we grant this request.

*The Commission orders:*

(A) Texas Eastern and its escrow agent are authorized to release and pay over to Algonquin Gas Transmission Company, Texas Gas Transmission Corporation, Transcontinental Gas Pipe Line Corporation, and United Natural Gas Company, within 30 days from the date of this order, the amounts shown to be refundable to those companies, respectively, in Appendix A of the Commission's order issued January 16, 1967, in the instant docket, together with net escrow earnings to the date of refund.

---

[3] Iroquois Gas Corporation and Pennsylvania Gas Company.

[4] We are requesting, by letter, a report of intended disposition from each of the two companies.

[5] See *Texas Eastern Transmission Corporation*, Docket No. RP66-12, orders issued December 5, 1966, 36 FPC 959, and February 13, 1967, 37 FPC 306.

(B) Within 60 days from the date of this order, Texas Eastern shall submit a report showing the amount received by each customer named in paragraph (A) above, together with a release from each customer. The allocable portion of the earnings of the escrow account shall be shown separately with respect to each customer.

(C) Algonquin Gas Transmission Company, Transcontinental Gas Pipe Line Corporation, and United Natural Gas Company (except as specifically set forth in paragraph (D) below), shall flow through the refunds received pursuant to paragraph (A) above in accordance with the plan set forth in their respective reports of intended disposition filed in compliance with paragraph (D) of our order of January 16, 1967, in the instant docket. Such flow-through payments shall be made within 30 days after receipt of Texas Eastern's payment, or within the time prescribed by an applicable settlement agreement, if any, whichever is later. Each company flowing through amounts received pursuant to this order shall submit a report showing the details of its refunds, together with releases from the recipient customers, within 30 days after the payments are made. (Texas Eastern's refund to Texas Gas Transmission Corporation is treated in our order issued today in Docket No. RP67-10.)

(D) United Natural Gas Company shall, pending further Commission order, retain and defer the flow-through of those portions of its refund from Texas Eastern received pursuant to paragraph (A) above, allocable to Iroquois Gas Corporation and Pennsylvania Gas Company. Such retention shall be treated in accordance with the methods set forth in paragraph (J) of the Commission's order issued April 21, 1965, in *Humble Oil & Refining Company*, Docket Nos. G-9287 and G-9288, *et al.*, 33 FPC 830, except that if United Natural elects to commingle the retained amounts with its general assets, the interest rate shall be 5½ percent per annum. A statement of the amounts retained pursuant to this paragraph and the manner of retention shall be included in the report filed by United Natural in compliance with paragraph (C) above, and copies of such report shall be served on both Iroquois Gas Corporation and Pennsylvania Gas Company.

(E) Texas Eastern and its escrow agent shall continue to retain the amounts refundable to Consolidated Gas Supply Corporation, East Tennessee Natural Gas Company, The Manufacturers Light and Heat Company, The Ohio Fuel Gas Company, and Tennessee Gas Pipeline Company, respectively. The continued retention of these amounts shall be governed by paragraph (C) of our order of January 16, 1967, in the instant docket.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## TEXAS GAS TRANSMISSION CORPORATION, DOCKET NO. RP67-10

### ORDER RELEASING REFUNDS IN PART

(Issued March 27, 1967)

On November 8, 1966, the Commission issued an order in this docket which approved a stipulation as to rates filed by Texas Gas Transmission Corporation (Texas Gas) on September 23, 1966. That order also accepted for filing certain revised tariff sheets, and required Texas Gas to file a report with the Commission setting forth amounts to be refunded to Texas Gas's customers in accordance with the Stipulation and its prior settlement agreements.

On January 16, 1967, we issued an order in Docket No. RP65-59, 37 FPC 100, which required Texas Gas to submit a report of its intended disposition of amounts refundable to it by Texas Eastern Transmission Corporation (Texas Eastern).

Texas Gas filed a report on January 30, 1967, in compliance with both orders. In addition to the amounts refundable by Texas Eastern in Docket No. RP65-59,[1] the report covers refunds heretofore paid to Texas Gas by Tennessee Gas Transmission Company[2] (under Docket Nos. G-17166 and G-19983) and by United Gas Pipe Line Company (under Docket Nos. RP60-2, RP61-18 and RP63-1).

Texas Gas proposes to flow-through to its customers substantially all of the jurisdictional portion of the refunds currently in its possession or to be received. Our review of this plan indicates that it is in accordance with Texas Gas' flow-through obligations. Accordingly, it is appropriate that we authorize Texas Gas to flow-through the amounts set forth in its report except as hereinafter provided.

Three of the customers to whom Texas Gas proposes to make refund payments[3] are natural gas companies subject to the Commission's jurisdiction. At the present time, we have no indication of the intentions of these three companies with respect to the amounts refundable to them by Texas Gas. In accordance with our usual practice, therefore, we are directing Texas Gas to retain the amounts due to these three customers pending further order.

*The Commission orders:*

(A) Except as specifically ordered in paragraph (B) below, Texas Gas and its escrow agent are authorized to release and pay over to the customers listed in its report filed January 30, 1967, the amounts shown therein to be refundable to such customers. Such payments shall be made within 30 days from the date of Texas Gas' receipt of the refund from Texas Eastern Transmission Corporation prescribed by our order issued today in Docket No. RP65-59.

(B) Texas Gas shall, pending further Commission order, continue to retain and defer the flow-through of those amounts shown in its report of January 30, 1967, to be refundable to Michigan Wisconsin Pipe Line Company, The Ohio Fuel Gas Company, and Texas Eastern Transmission Corporation. Such retention shall be treated in the manner heretofore adopted by Texas Gas with respect to these amounts.

(C) Within 15 days from the date on which the payments authorized in paragraph (A), above, are made, Texas Gas shall file with the Commission a report showing the amount received by each customer, together with a release from each recipient. The report shall show, also, the amounts retained pursuant to paragraph (B), above, and the manner of retention.

---

[1] The refund from Texas Eastern is being released by an order issued today in Docket No. RP65-59, *supra*, p. 610.

[2] Now Tennessee Gas Pipeline Company, a division of Tenneco Inc.

[3] Michigan Wisconsin Pipe Line Company, The Ohio Fuel Gas Company, and Texas Eastern Transmission Corporation.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## TRUCKEE PUBLIC UTILITY DISTRICT v. PACIFIC GAS AND ELECTRIC COMPANY, DOCKET NO. E-7248

### ORDER PERMITTING WITHDRAWAL OF COMPLAINT AND ANSWER THERETO

(Issued March 27, 1967)

This order grants the joint request of Truckee Public Utility District (Truckee), Truckee, California, and Pacific Gas and Electric Company (PG&E), San Francisco, California, for permission to withdraw Truckee's complaint and PG&E's answer thereto, and terminates the above-entitled proceeding. The joint request for withdrawal reflects the settlement of the issues raised by Truckee's complaint filed on October 5, 1965, against PG&E.

Truckee, a municipality of the State of California, owns and operates an electric distribution system in Nevada County, California. It purchases its entire electric supply at wholesale from Sierra Pacific Power Company (Sierra), Reno, Nevada. Truckee's complaint, filed pursuant to the provisions of Sections 205 and 206 of the Federal Power Act, proposed other wholesale power supply arrangements. Essentially, Truckee proposed to secure power and energy from the Bureau of Reclamation, United States Department of the Interior, in California with wheeling to Truckee over certain transmission lines of PG&E and Sierra.

The answer of PG&E opposing Truckee's complaint was filed on November 12, 1965. Comments on the complaint were filed by Sierra on November 10 and by the Public Service Commission of Nevada on November 15, 1965. Conferences held among representatives of Truckee, PG&E, Sierra, the Nevada Commission and the staff of this Commission led to the settlement proposal, under which Truckee, while remaining a customer of Sierra will *inter alia* receive power at reduced rates resulting in a reduction of costs to Truckee of approximately 20%.

The terms of the settlement proposal are set forth in an Electric Service Agreement, dated January 16, 1967, between Sierra and Truckee, which is the stated reason for the proposed withdrawal by Truckee and PG&E of their respective pleadings. By separate order issued concurrently herewith, *Sierra Pacific Power Company, supra*, p. 607, the Commission is accepting that Agreement for filing as part of Sierra's F.P.C. Electric Tariff under the provisions of Section 205 of the Federal Power Act.

The joint request of Truckee and PG&E to withdraw the complaint and answer thereto[1] was filed February 10, 1967, pursuant to the provisions of Section 1.11(d)(2) of the Commission's Rules of Practice and Procedure. By letter filed as of February 10, 1967, counsel for Sierra stated that it has no objection to the requested withdrawal of the complaint. A similar letter was filed by the Chairman of the Public Service Commission of Nevada as of February 10, 1967.

*The Commission finds:*

It is necessary and appropriate for the purposes of the Federal Power Act and the Commission's Rules of Practice and Procedure and good cause has been shown to permit withdrawal of (1) the complaint of Truckee Public

---

[1] The joint request is entitled "Notice of Withdrawal of Complaint and Answer."

Utility District filed October 5, 1965 and (2) the answer thereto of Pacific Gas and Electric Company filed November 12, 1965, and to terminate this proceeding.

*The Commission orders:*

Permission is granted for (1) Truckee Public Utility District to withdraw its complaint filed October 5, 1965, and (2) Pacific Gas and Electric Company to withdraw its answer thereto filed November 12, 1965, and the above-entitled proceeding is terminated.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## CITY OF HAMILTON, KANSAS AND CITIES SERVICE GAS COMPANY, DOCKET NO. CP67-190

### FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued March 28, 1967)

On December 29, 1966, the City of Hamilton, Kansas (Applicant) filed in Docket No. CP67-190 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Cities Service Gas Company (Respondent) to make physical connection of its facilities with the facilities of Applicant and to sell and deliver to Applicant up to 328 Mcf of natural gas per day for resale and distribution in the City of Hamilton and environs, Greenwood County, Kansas, all as more fully set forth in the application.

Specifically, Applicant proposes to construct and operate a distribution system and 6.5 miles of 4½-inch O.D. lateral pipeline which will extend south and east of Respondent's 6-inch pipeline to Applicant's proposed town border station. Respondent has agreed to construct 2.59 miles of the proposed lateral pipeline pursuant to its lateral line policy.

Applicant's estimated third year annual and peak day requirements are 24,450 Mcf and 328 Mcf, respectively. Said volumes of natural gas will be purchased pursuant to Respondent's rate schedule F-2 at an average rate of approximately 31.0 cents per Mcf.

The total estimated cost of the proposed project is $115,000, of which Respondent will invest $22,406, pursuant to its lateral line policy. Applicant proposes to finance its cost of construction through the issuance of 5 percent, 30-year gas revenue bonds.

On January 16, 1967, Respondent filed an answer to the application herein, stating that it has no objection to the issuance by the Commission of an order as requested by Applicant.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

*The Commission finds:*

(1) Respondent, Cities Service Gas Company, a Delaware corporation having its principal place of business in Oklahoma City, Oklahoma, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of December 28, 1943, in Docket No. G-298 (4 FPC 471).

(2) Applicant, City of Hamilton, Kansas, is a municipal corporation incorporated under the laws of the State of Kansas and is legally empowered to

construct and operate natural gas facilities and to sell and distribute natural gas in said community.

(3) It is necessary and desirable in the public interest that Respondent be directed to establish physical connection of its natural gas transportation system with the proposed facilities of Applicant and to sell and deliver up to 328 Mcf of natural gas per day to Applicant, as set forth in the application and as hereinafter ordered and conditioned.

(4) This order should be conditioned upon Applicant being prepared to receive natural gas from Respondent, as proposed, within one year from the date on which this order issues.

(5) The requirement that Respondent serve Applicant, as proposed, will not place any undue burden upon Respondent nor impair its ability to render adequate service to its existing customers.

*The Commission orders:*

(A) Respondent is directed to establish physical connection of its natural gas transmission system with the facilities to be constructed by Applicant and to sell and deliver up to 328 Mcf of natural gas per day to Applicant, all as hereinbefore described and as more fully described in the application in this proceeding.

(B) Applicant shall be prepared to receive natural gas from Respondent within one year from the date of this order.

(C) Respondent shall notify the Commission of the commencement of service within ten days thereof.

(D) Respondent shall execute and file with the Commission a service agreement with Applicant in accordance with the Commission's Regulations.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## PANHANDLE EASTERN PIPE LINE COMPANY, DOCKET NO. CP67-170

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND PERMITTING AND APPROVING ABANDONMENT OF FACILITIES

(Issued March 28, 1967)

On December 14, 1966, Panhandle Eastern Pipe Line Company (Applicant) filed in Docket No. CP67-170 an application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities, an increase in the reservoir gas limitation of the Howell Storage Field and the sale and delivery of natural gas to existing resale customers and for permission and approval to abandon in place certain facilities, all as more fully set forth in the application in this proceeding.

Specifically, Applicant proposes to construct and operate the following facilities:

(a) Approximately 46.6 miles of 30-inch fourth mainline loop east of Tuscola, Illinois.

(b) Installation of 3,400 compressor horsepower at the existing Tuscola, Illinois, station.

(c) The following lateral transmission lines:

(1) 18.5 miles of 10-inch loop line near Jefferson City, Missouri,

(2) 18.4 miles of 12-inch loop line near Champaign, Illinois, and

(3) 15.3 miles of 12-inch line near Crawfordsville, Indiana. This line will replace an existing 6-inch line which Applicant proposes herein to abandon in place, and

(d) Measuring station facilities and other appurtenances.

The proposed facilities will increase Applicant's daily pipeline capacity by approximately 135,000 Mcf for a total daily capacity of 2,434,000 Mcf.

Applicant also proposes a net increase of 130,020 Mcf in the contract demands of 50 of its existing resale customers. The proposed additional sales of gas will be made pursuant to Applicant's appropriate effective rate schedules on file with the Commission.

Applicant states that to supply the proposed increase in contract demands, it will rely on increased purchases from Trunkline Gas Company* and on increased deliveries from Howell Storage Field. Accordingly, Applicant requests authorization to increase the reservoir limitation of said storage field.

The total estimated cost of the proposed facilities is $11,071,000, which cost will be financed initially by short term bank loans. Permanent financing will be by the issuance of debentures.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on March 23, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorizations sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Panhandle Eastern Pipe Line Company, a Delaware corporation having its principal place of business in Kansas City, Missouri, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of September 23, 1942, in Docket Nos. G-200 and G-207 (3 FPC 273).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are to be used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the proposed transportation and sales of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed construction and operation of the subject facilities and the proposed transportation and sales of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

---

*By order issued in Docket Nos. CP66-131 and CP66-171 concurrently with the subject order, Trunkline is authorized to sell an additional 70,000 Mcf of gas per day to Applicant, *infra*, p. 618.

(6) The reservoir gas limitation of the Howell Storage Field should be increased from 29,000,000 Mcf to 30,000,000 Mcf.

(7) The facilities to be abandoned, as hereinbefore described, are subject to the jurisdiction of the Commission and the abandonment of such facilities is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(8) Such abandonment by Applicant, as hereinbefore described, is permitted by the public convenience and necessity, and an order authorizing and approving same should be issued as hereinafter ordered.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Panhandle Eastern Pipe Line Company, to construct and operate the proposed facilities and to sell and deliver natural gas as hereinbefore described, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation and the transportation and sales of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act within 1 year from the date this order issues.

(D) The reservoir gas limitation of the Howell Storage Field is increased from 29,000,000 Mcf to 30,000,000 Mcf.

(E) Superseding service agreements concerning the proposed sales shall be filed with the Commission in compliance with the Commission's Regulations under the Natural Gas Act.

(F) Permission for and approval of the abandonment by Applicant of facilities hereinbefore described, all as more fully described in the application in this proceeding, are granted.

(G) Applicant shall advise the Commission of the date of said abandonment within 10 days of the date thereof.

---

Before Commissioners; Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## TRUNKLINE GAS COMPANY, DOCKET NOS. CP66-131 AND CP66-171

### ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued March 28, 1967)

On November 30, 1966, Trunkline Gas Company (Petitioner) filed in Docket Nos. CP66-131 and CP66-171 a petition to amend the orders issued in said dockets on February 11, 1966, 35 FPC 224, and July 1, 1966, 36 FPC 1, respectively, by requesting authorization to construct and operate certain facilities and to increase sales for resale to certain customers, all as more fully set forth in the petition to amend.

By the order issued February 11, 1966, Docket No. CP66-131, Petitioner was authorized to install facilities and to provide a contract quantity for Consumers Power Company (Consumers) of 350,000 Mcf per day commencing November 1, 1966.

By the order issued July 1, 1966, Docket No. CP66-171, Petitioner was authorized to install facilities and to provide a contract quantity for Mississippi River Transmission Corporation (Mississippi) of 111,000 Mcf per day commencing November 1, 1966.

Petitioner seeks to amend the above-mentioned orders so as to authorize an increase in presently effective contract demands of the following listed customers as shown in the following tabulation:

| Customers | Rate schedule | Volumes—Mcf at 14.73 psia Sat. | | |
|---|---|---|---|---|
| | | Present contract demand | Proposed increase | Proposed contract demand |
| Consumers Power Co | P-2 | 350,000 | 75,000 | 425,000 |
| Mississippi River Transmission Corp | P-2 | 111,000 | 15,000 | 126,000 |
| Panhandle Eastern Pipe Line Co | P-1 | 470,000 | 70,000 | 540,000 |
| Clay City, Ill | SG-1 | 595 | 255 | 850 |
| McLeansboro, Ill | SG-1 | 2,600 | 500 | 3,100 |
| Clinton, Ky | SG-1 | 750 | 150 | 900 |
| La Center, Ky | SG-1 | 1,000 | 175 | 1,175 |
| Panola-Quitman Natural Gas District | SG-1 | 750 | 150 | 900 |
| Milford, Ill | SG-2 | 900 | 294 | 1,200 |
| Rensselaer, Ind | GS-2 | 2,700 | 1,300 | 4,000 |
| Total | | | 162,824 | |

Petitioner requests authority to construct and operate: 82.9 miles of 30-inch O.D. pipeline to loop portions of Petitioner's existing main transmission line between Bourbon, Illinois and the terminus of such line near Elkhart, Indiana; 229.2 miles of 36-inch O.D. pipeline and 5.5 miles of 30-inch O.D. pipeline to loop portions of Petitioner's existing main transmission lines between Longville, Louisiana, and Tuscola, Illinois; 17.2 miles of 24-inch O.D. pipeline to loop a portion of Petitioner's Lakeside-Longville, Louisiana, gathering line; 21.4 miles of 30-inch O.D. pipeline to loop a portion of Petitioner's Kaplan-Longville, Louisiana, gathering line; 1,050 additional horsepower at existing Compressor Station No. 313, Centerville, Louisiana; and 8,400 additional horsepower at existing Compressor Station No. 210, Kaplan, Louisiana. The proposed facilities will increase the transmission capacity of Petitioner's pipeline system to 1,230,000 Mcf per day.

The total estimated cost of the proposed facilities is $55,330,000, the permanent financing of which will be obtained from the sale of long-term securities and the issuance of additional common stock.

Petitions to intervene were filed by Consumers Power Company on December 22, 1966, and by Mississippi River Transmission Corporation on January 3, 1967. Consumers Power Company supports Applicant's requests. Mississippi River Transmission Corporation states it is not requesting a formal hearing in the proceeding.

Due notice of the filing of the petition to amend and opportunity for hearing thereon have been given by publication in the Federal Register on December 14, 1966 (31 F.R. 1577). No protest, petition to intervene in opposition, or notice of intervention has been filed in this proceeding concerning this amendment.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act, and the public convenience and necessity require that the Commission's orders issued February 11, 1966 in Docket No. CP66-131 and July 1, 1966, in Docket No. CP66-171 be amended as hereinafter ordered.

*The Commission orders:*

(A) The Commission's orders issued February 11, 1966, in Docket No. CP66-131 and July 1, 1966 in Docket No. CP66-171 are amended so as to authorize Petitioner to construct and operate the requested facilities and to sell and deliver the additional volumes of natural gas to its customers listed in the tabulation set forth hereinabove under the designated rate schedules, and as more fully set forth in the petitions to amend filed in Docket Nos. CP66-131 and CP66-171.

(B) Applicant and customers referred to in paragraph (A) above shall execute superseding service agreements in accordance with the Commission's Regulations reflecting the increase in daily contract quantity and file the same with the Commission.

(C) The facilities authorized by paragraph (A) above shall be constructed and placed in actual operation as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 12 months from the date on which this order issues.

(D) In all other respects said order shall remain in full force and effect.

---

## OPINION NO. 518

## GEORGIA POWER COMPANY, PROJECT NO. 2354

### OPINION AND ORDER CONFIRMING WITH MODIFICATION COMMISSION'S ORDER ISSUING LICENSE

(Issued March 29, 1967)*

*Syllabus*

1. Construction of new saddle-dike in 1956 at Mathis Terrora project works falls within purview of prohibition of Section 23(b) of Federal Power Act and backdating of license for North Georgia Development is called for by the facts and applicable precedent. P. 623.
2. Commission authority to backdate a license in a case involving unauthorized construction of a project works in violation of Section 23(b) of the Federal Power Act has been judicially upheld. P. 624.
3. Commission has repeatedly held that backdating license to date of construction of a project works is appropriate where such works involve replacement of an old dam by a new one. P. 624.
4. Whether or not Georgia Power agreed with Commission advice that North Georgia Development was subject to licensing requirements, it was under obligation to file a declaration of intention prior to construction of replacement dike. P. 625.
5. Under circumstances here, it is neither discriminatory nor a true penalty for Commission to treat Georgia Power in terms of its license as it would have been treated had it initially complied with statute. P. 625.

---

*Initial decision appears on p. 631. Rehearing granted by order issued May 26, 1967, 37 FPC 986. See Opinion No. 518-A and order issued June 6, 1968, modifying license, 39 FPC 930.

**6. Issuance of license for entire project accords fully with Commission precedent since record shows that dams and their generating and transmission facilities are integrated and together form a comprehensive plan for development of Tallulah-Tugalo watershed; that they actually develop 100 percent of the "head" of the watercourse; and that there is no reasonable basis in engineering, economics, conservation or law to require that each unit be licensed separately. P. 625.**

**7. Plain import of statute is that a hydro project, when considered as a complete unit, shall include transmission facilities necessary to carry power generated by it to a point of connection with distribution system or with an interconnected primary transmission system. P. 627.**

**8. Commission *finds Montana Power* controlling and includes contested lines as part of licensed project since they are necessary for carrying away power generated by hydro plants and lines are used principally for transmitting such hydro-generated power when plants are generating at full capacity. P. 627.**

**9. Use of transmission lines in nonpeaking periods to carry power from other sources is a logical and inevitable utilization in any system where hydro power is used for peaking; such dual utilization does not destroy essential nature of the lines as necessary component of complete hydro development. P. 629.**

**10. Present holding does not preclude possibility of future license amendments excluding some of the transmission lines from the license in event their function as primary project transmission lines is diminished. P. 629.**

**11. Considering applicant's argument that licensing of contested lines will be incompatible with public interest in event project is recaptured, Commission *notes* that not only is any project take-over speculative and conjectural but, even assuming take-over, there is no requirement or assurance that United States or a new licensee would wish to take over lines in question. P. 629.**

**12. Upon rehearing, Commission *confirms*, with modifications, prior order issuing major license under Section 4(e) of the Federal Power Act.**

**Commissioner Carver *dissenting* in part.**

***Tench C. Coxe* and *William H. Schroder* for Georgia Power Company.**

***John D. Lane* and *William J. Madden, Jr.* for the Staff of the Federal Power Commission.**

Before Commissioners: Lee C. White, Chairman; L. J. O' Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

BAGGE, *Commissioner:*

This proceeding involves an application for rehearing by the Georgia Power Company (applicant) on June 5, 1964, objecting to certain provisions of a license order issued by the Commission under Section 4(e) of the Federal Power Act on May 7, 1964 (31 FPC 1134), for applicant's North Georgia Development, Project No. 2354. The applicant questioned, among other points, the correctness of (1) the Commission's backdating of its license to January 1, 1956, and (2) the Commission's inclusion of 12 transmission lines of the applicant as part of the project works. The Commission granted rehearing on July 1, 1964.

On March 1, 1966, the Presiding Examiner, Robert M. Weston issued an initial decision in which he stated that the record did not disclose an adequate basis for backdating the applicant's license, and then held that under the precedent of the Commission's opinion in *Public Service Company of New Hampshire*, 27 FPC 830 (1962), the applicant's license should be made effective April 1, 1962. The Examiner also found that the 12 transmission lines of the applicant were not part of the project works.

The proceeding is before the Commission on the Examiner's decision, exceptions filed by staff, and the applicant's response. Staff contends that the applicant's construction of a saddle-dike in its Mathis Terrora reservoir in 1956 justifies the backdating of the applicant's license to January 1, 1956, and that the transmission lines at issue are primary lines within the meaning of Section 3(11) of the Federal Power Act and are therefore subject to the licensing authority of the Commission. For the reasons set forth below, we are of the opinion that staff's exceptions are well founded, and that the Examiner's decision on the issues of backdating and exclusion of the 12 transmission lines should be reversed.

### *Background*

On March 18, 1963, the Georgia Power Company of Atlanta, Georgia, applied for a license under the Federal Power Act for constructed Project No. 2354, known as the North Georgia Development, located on the Tallulah and Tugalo Rivers in Rabun, Habersham, and Stephens Counties, Georgia, and Oconee County, South Carolina. The Tallulah and Tugalo Rivers are tributaries of the Savannah River. The development consists of six dams and accompanying generating facilities, four of which are located on the Tallulah River in descending order, as follows: Burton, Nacoochee, Mathis Terrora, and Tallulah. The other two developments, Rugalo, and Yonah, are located in descending order on the Tugalo River. The dams and powerhouses were constructed over a fourteen-year period, beginning with Tallulah in 1913 and ending with the installation of generating units at Burton in 1927. In 1956 Georgia Power constructed an earth saddle-dike at the Mathis Terrora development, at a cost of $661,709, to replace an original concrete dike which had settled and had begun to rotate on its footing.

These six hydro dams develop the water power resources of the continuous flow of the Tallulah River-Tugalo River watercourse. Each dam backs water up to its upstream counterpart, and there is no undeveloped "head." The Burton project is operated for seasonal storage, and the other five downstream projects use this storage on a daily regulating basis. Georgia Power stated that the six projects operate "as an integrated unit to meet the peak load of the applicant's system and make the best use of the water." The total power capacity of the project is 166,420 kilowatts.

In our licensing order of May 7, 1964, we found that the applicant's project affects navigable water of the United States; that the Tallulah and Tugalo Rivers are streams over which Congress has jurisdiction under its authority to regulate interstate and foreign commerce; that the six dams and power installations of North Georgia Development constitute one project for licensing purposes; that under the criteria set forth in *Public Service Company of New Hampshire*, Opinion No. 357, 27 FPC 830 (1962), the applicant's license should have an effective beginning date of January 1, 1956, and a termination date of December 31, 1993; and that 12 transmission lines which Georgia Power had not included in its application should be included in the license as parts of the "project." We ordered annual charges under Section 10(e) of the Federal Power Act to be computed on the entire development beginning on January 1, 1956, and we also provided that Section 10(d) of the Act which relates to amortization reserves would be applicable to the entire development as of the effective date of the license.

### *The Backdating of Applicant's License*

We agree with staff that the applicant's construction of a new saddle-dike in 1956 at its Mathis Terrora project works falls within the purview of the prohibition of Section 23(b) of the Federal Power Act, and we find that the backdating of the applicant's license for the North Georgia Development is called for by the facts of this case, as well as by applicable precedent.

Section 23(b) of the Federal Power Act provides that it shall be unlawful for any person to construct, operate, or maintain any dam, powerhouse, or other works in any navigable water of the United States for the purpose of developing electric power without a license issued under the Act or a valid permit issued prior to the adoption of the Act in 1920. This section also provides that after 1935 no person shall construct a dam or other project works across, along, over, or in any non-navigable waters over which Congress has jurisdiction without first filing a declaration of such intention to construct with the Commission and provides the procedure for Commission determination of whether a federal license is necessary before construction can commence or whether the project work or works may be constructed without a license under the Federal Power Act upon compliance with State laws. The record in this case shows that in 1956 Georgia Power constructed the earth saddle-dike at the Mathis Terrora installation of its North Georgia Development without first filing a license application or a declaration of intention. Under these circumstances the backdating of the license of the North Georgia Development is consistent with the precedent of the Commission's opinion in *Public Service Company of New Hampshire*, 27 FPC 830, 832 (1962), also known as the *Androscoggin* opinion, where we stated:

> The construction of any project works subsequent to the enactment of Section 23(b) of the Act of 1935 without the concurrent filing of a license application or declaration of intention plainly violates that section. There is little room for dispute that licenses for such projects should be made effective not later than the date of construction of such project works.

The Commission's authority to backdate an applicant's license in a case involving an unauthorized construction of a project works in violation of Section 23(b) of the Federal Power Act has been upheld in *Central Maine Power Company* v. *Federal Power Commission*, 345 F. 2d 875 (CA1–1965); and in *Bangor Hydro-Electric Company* v. *Federal Power Commission*, 355 F. 2d 13 (CA1–1966).

Factually, the Mathis Terrora dike is a new project works of substantial size, measuring about 370 feet in length. It was built at a cost of $661,709 to replace an original saddle-dike which was considered to be no longer safe. Notwithstanding the Examiner's description of the construction as being in the nature of a repair job, the record shows that the new dike was erected downstream and separate from the original dike as a replacement works, and that the original dike was not at that time repaired, but in fact was breached after the completion of the new project works. Reference to Commission precedent shows that we have repeatedly held that the backdating of an applicant's license to the date of construction of a project works is appropriate where such project works involves the replacement of an old dam by a new one. See *Wisconsin Public Service Corporation*, 5 FPC 548 (1946); *Public Service Company of New Hampshire*, 27 FPC 830, 832 (1962); *The Northwest Paper Company*, 32 FPC 1413 (1964); *International Paper Company*, 33 FPC 291 (1965).[1] We find no basis in this record for according a different treatment to the applicant's replacement dike than we accorded the replacement dams in the cases listed above. The Commission's files show that the Secretary of the Commission advised Georgia Power long before the date of construction of the replacement dike that the North Georgia Development, including Mathis Terrora, was subject to the licensing requirements of the Federal Power Act. Whether Georgia Power agreed with this advice or not, it nevertheless was under an obligation to file a declaration of intention with the Commission prior to its construction of the replacement dike. See *Bangor Hydro-Electric Company* v. *Federal Power Commission*, 355 F. 2d 13 (CA1-1966); *cf. Wisconsin Public Service Corporation*, *supra*. Under these circumstances, as the court pointed out in *Central Maine Power Company* v. *Federal Power Commission*, 345 F. 2d 875 (CA1-1965), it is neither discriminatory nor a true penalty for the Commission to treat the applicant in the terms of its license as the Commission would have treated Georgia Power had the latter complied with the statute when it should have. Certainly, the Commission is justified in safeguarding its administration of the Act to avoid placing a premium on noncompliance with the requirements of the Act.

---

[1] Although the Commission has been consistent in its backdating policy with respect to project works constructed in violation of Section 23(b) of the Act, it appears that through error we have not been entirely consistent in effectuating that policy. In a brief order in *Central Maine Power Company*, 28 FPC 302 (1962), and without discussion, we failed to backdate the license for Project No. 2284 where a section of the dam was replaced in 1946 without the licensee's having complied with Section 23(b) of the Act. To the extent that this order can be said to be inconsistent with the conclusion in *Public Service Company of New Hampshire*, *supra*, reiterated herein, we believe that the views expressed in the above cases in which we have focused upon the problem, rather than in the brief order in *Central Maine*, must and should prevail.

Consideration has been given to the applicant's request that the backdating of its license, if found to be warranted, should be limited to its Mathis Terrora project works and should not be applied to the entire North Georgia Development. On this point we agree with staff that the six dams, generating facilities, primary transmission lines, and other installations of the North Georgia Development, although constructed separately at different dates, nevertheless constitute one project, and should be covered under one license with an effective date of January 1, 1956. The record shows that these dams and their generating and transmission facilities are integrated and together form a comprehensive plan for the development of the Tallulah-Tugalo watershed, that they actually develop 100 percent of the "head" of the watercourse, and that there is no reasonable basis in engineering, economics, conservation, or law to require that each unit of the development be licensed separately. The issuance of one license for the entire project is fully in accord with Commission precedent. See *The Montana Power Company*, 15 FPC 1330, 1335 (1956); *Alabama Power Company*, 18 FPC 257, 260 (1957); *Duke Power Company*, 20 FPC 360 (1958); *The California Oregon Power Company*, 23 FPC 59, 61 (1960).

The functional unity of the different facilities of the North Georgia Development was as fully operational in 1956, when the Mathis Terrora saddle-dike was replaced, as it is at the present time. Plainly, had Georgia Power met its statutory obligation in 1956 by filing a declaration of intention with the Commission prior to its construction of the Mathis Terrora dike, it would have enabled the Commission at that time to have considered the very same factual background which now leads us to find that the entire North Georgia Development should be covered under one license. There is no inequity in now placing the applicant in the very same position it would have occupied in 1956 had it then complied with the requirements of Section 23(b) of the Act.

### *The Transmission Lines*

The Commission found in its order of May 7, 1964, that the twelve transmission lines listed below, although not included in Georgia Power's application, were nevertheless parts of the "project" as defined in Section 3(11) of the Federal Power Act, and were to be included in the license.

| Lines | Kilovolts | Approximate length in miles |
|---|---|---|
| 1. Burton-Nacoochee | 38 | 3.8 |
| 2. Nacoochee-Terrora (2) | 38 | 6.0 |
| 3. Terrora-Dillard | 38 | 14.0 |
| 4. Terrora-Tallulah Lodge | 110 | 2.3 |
| 5. Tallulah Falls-Tallulah Lodge (2) | 110 | 2.0 |
| 6. Tugalo-Tallulah Lodge | 110 | 5.0 |
| 7. Tugalo-Commerce | 110 | 35.0 |
| 8. Yonah-Commerce | 110 | 29.0 |
| 9. Yonah-Commerce to Tallulah Lodge (tap) | 110 | 7.0 |
| 10. Tallulah Lodge-Elberton | 110 | 58.0 |
| 11. Tallulah Lodge-Gainesville | 110 | 34.0 |
| 12. Cornelia-Clarksville | 38 | 7.0 |
| Total | | 203.1 |

The Examiner held that the above lines are not primary lines under Section 3(11) of the Act, stating that although they "are indispensable currently for carrying power away from the hydro plants when generating," they are now used primarily for the purpose of transmitting and distributing power generated elsewhere to serve consumers in the area of the six hydro plants. In its exceptions staff maintains that the contested lines, other than Cornelia-Clarksville,[2] must be included in the license as parts of the North Georgia Development because their principal purpose is to carry power from the project plants when the latter are generating at full capacity, and that when so utilized, these lines do not carry power from other sources. For the reasons set forth below, we agree with staff.

Section 3(11) defines a licensed "project" as follows:

> project means complete unit of improvement or development, consisting of a powerhouse * * * and * * * the primary line or lines transmitting power therefrom to the point of junction with

---

[2] Staff recommended in its brief before the Examiner that the Cornelia-Clarksville 38 kv line be excluded from the license for the North Georgia Development.

> the distribution system or with the interconnected primary transmission system * * *

The plain import of the statute is that a hydro project, when considered as a complete unit, shall include the transmission facilities necessary to carry the power generated by it to a point of connection with a distribution system or with an interconnected primary transmission system. The applicant contended and the Examiner found that in this case the primary lines were limited to short stubs which carried energy from the hydro projects to six substations located near the project works. We find this concept unacceptable. Reference to Commission precedent shows that in 1939 the Commission rejected a substantially similar contention advanced by The Montana Power Company with respect to its Flathead plant transmission lines, Project Nos. 1407 and 5. The Montana Power Company there proposed to utilize 201 miles of transmission line to transmit energy from Flathead to points of junction with distribution systems at Thompson Falls, Missoula, and Anaconda, Montana. This 201-mile line did not extend all the way to the Flathead Project, but was connected by a line 1500 feet in length. Montana Power claimed that only the 1500-foot line was part of the licensed project, and that the 201-mile line was part of its interconnected primary transmission system. The Commission found that the 201-mile line, although serving as an interconnection between the distribution systems at Thompson Falls, Missoula, and Anaconda, was principally a primary line transmitting energy from Flathead to points of junction with these distribution systems, and that when carrying the maximum energy to be generated at Flathead, this line would not be able to carry any substantial amount of power from other sources to the distribution systems. The Commission accordingly concluded that this 201-mile line was part of the Flathead Project under Section 3(11). See 1 FPC 813 (1939). On appeal, the Commission's finding that the 201-mile line was a primary line because it would "serve principally as a primary line transmitting energy from the aforesaid Flathead plant to the points of junction with the distribution systems;" was sustained in *Montana Power Co.* v. *Federal Power Commission*, 112 F. 2d 371 (CA9–1940).

We find that the precedent of the *Montana Power Co.* case, *supra*, is controlling here in that the record shows that the contested lines listed below are necessary for carrying away the power generated by the applicant's hydro plants, and that these lines are used principally for the purpose of transmitting such hydro-generated power when the plants are generating at full capacity. In accordance with staff's recommendations we revise and consolidate the designation of these lines, reducing the total number from 12 to 9, as follows:

| Lines | Kilovolts | Approximate length in miles |
|---|---|---|
| 1. Burton-Nacoochee | 38 | 3.8 |
| 2. Nacoochee-Terrora (2) | 38 | 6.0 |
| 3. Terrora-Dillard | 38 | 14.0 |
| 4. Terrora-Tallulah Lodge | 110 | 2.3 |
| 5. Tallulah Falls-Tallulah Lodge (2) | 110 | 0.3 |
| 6. Tallulah Lodge-Tugalo-Commerce | 110 | 40.0 |
| 7. Tallulah Lodge-Yonah-Commerce | 110 | 36.0 |
| 8. Tallulah Lodge-Elberton | 110 | 58.0 |
| 9. Tallulah Lodge-Gainesville | 110 | 34.0 |

The above Tallulah Lodge-Tugalo-Commerce line is a combination of the two lines formerly designated as Tugalo-Tallulah Lodge and Tugalo-Commerce. The above Tallulah Lodge-Yonah-Commerce line similarly represents a combination of the two lines formerly known as Yonah-Commerce and Yonah-Commerce to Tallulah Lodge.

All of the lines enumerated above are required to carry the power generated by the six hydro plants of the North Georgia Development, an output of from 160,000 to 168,000 kilowatts[3] when the plants are generating at full capacity. At such times the power which is not used in the local areas adjacent to and north of the Burton, Nacoochee, and Terrora developments, flows to Tallulah Lodge, and from Tallulah Lodge such power and that generated at Tallulah Falls, Tugalo and Yonah flow south on the 110 kv lines to points of junction with Georgia Power's interconnected primary transmission system or distribution systems, *i.e.*, substations at Gainesville, Commerce, and Elberton, Georgia.

Inasmuch as Georgia Power uses the six hydro plants for peaking purposes, the 38 kv and 110 kv transmission lines of the project are utilized to deliver power and energy generated at other sources when the hydro plants are shut down during non-peaking hours, or when their use is limited during periods of low water flow. According to Georgia Power, the hydro plants carry no load for approximately 50 percent of the time, and do not operate at capacity for a greater portion of the remainder of the time. During such periods power produced elsewhere flows north from Gainesville, Commerce and Elberton to serve the demand in the area of the North Georgia Development. Although the power so imported is generally smaller in flow than the power exported by the hydro plants when generating at full capacity, the applicant argues that the essential purpose of its lines is established to be the transmission and distribution of power generated elsewhere to serve consumers in the area of the hydro plants, and that these lines therefore should not be considered as part of the project. We do not agree. It is plain that the North Georgia Development, as a hydro project, is not viable without the 38 kv and 110 kv transmission lines which are required to carry its power away from the generating sites. The use of these lines in non-peaking periods to carry power from other sources is a logical and inevitable utilization in any system where hydro power is used for peaking. This dual utilization does not, however, destroy the essential nature of the transmission lines as a necessary component of the complete hydro development.

---

[3] The power generated at each of the six hydro plants when operating at full capacity is listed as follows: "Burton, 7,000 kilowatts; Tallulah, 72,000 kilowatts; Nacoochee, 6,000 kilowatts; Tugalo, 45,000 kilowatts; Terrora, 17,000 kilowatts; Yonah, 21,000 kilowatts."

Generation in certain instances may be higher than the above figures.

In arriving at the above determination we deem it appropriate to point out that our present holding does not preclude the possibility of future license amendments excluding some of these lines from the license in the event their function as primary project transmission lines is diminished. See Commission order amending license for Project No. 405, *The Susquehanna Power Company and Philadelphia Electric Power Company*, 21 FPC 161 (1959). Other factual situations and changed conditions may call for different conclusions. The records to be made in future proceedings need not necessarily follow the particular factual analyses employed in this case.

Consideration has been given the applicant's argument that the licensing of the contested line will be incompatible with the public interest in the event the project is recaptured at the end of the license term by the United States or licensed to another entity. However, not only is any project takeover speculative and conjectural, but, even assuming takeover of the project works, there is no requirement or assurance that the United States or a new licensee would wish to take over the primary lines in question.

*The Commission further finds that:*

(1) The findings heretofore made with respect to Project No. 2354 on May 7, 1964, 31 FPC 1134, at 1135–1136, are, to the extent not modified above, confirmed except that the finding therein numbered (8) is amended to read as follows:

> (8) The following transmission lines are primary lines and are parts of the project as defined in Section 3(11) of the Act and should be included in the license:

| Lines | Kilovolts | Approximate length in miles |
|---|---|---|
| 1. Burton-Nacoochee | 38 | 3.8 |
| 2. Nacoochee-Terrora (2) | 38 | 6.0 |
| 3. Terrora-Dillard | 38 | 14.0 |
| 4. Terrora-Tallulah Lodge | 110 | 2.3 |
| 5. Tallulah Falls-Tallulah Lodge (2) | 110 | 0.3 |
| 6. Tallulah Lodge-Tugalo-Commerce | 110 | 40.0 |
| 7. Tallulah Lodge-Yonah-Commerce | 110 | 36.0 |
| 8. Tallulah Lodge-Elberton | 110 | 58.0 |
| 9. Tallulah Lodge-Gainesville | 110 | 34.0 |

(2) Electric energy generated at applicant's North Georgia Development is transmitted into Georgia Power's high voltage transmission system in which it is commingled with energy generated at other power sources of Georgia Power. Electric energy from this system is transmitted across state lines at various points including a point northeast of Tallulah Falls where the lines of Georgia Power interconnect with lines leading to the Duke Power Company in South Carolina.

(3) Applicant's six hydroelectric installations described in the Commission's order of May 7, 1964, completely develop at the present time a 29-mile stretch of the Tallulah and Tugalo Rivers, and the project works which comprise the North Georgia Development should be included in one license.

(4) The Examiner's findings on "Other Matters," set forth at pages, *infra*, 646, 647, of his initial decision in numbered paragraphs 1 through 3, should be confirmed.

*The Commission orders:*

(A) The Commission's order issued on May 7, 1964, 31 FPC 1134, is confirmed, except that the transmission lines therein enumerated in finding of fact number (8) are amended to include only those lines designated in finding of fact number (1) of this opinion and order.

(B) With respect to the transmission lines designated in finding of fact number (1) of this opinion and order, the Commission reserves the right to revise such designation at a later date by addition, deletion, or modification, so that the license of the project works shall include at such later date those transmission lines which at that time are utilized by the project as primary lines within the meaning of Section 3(11) of the Federal Power Act.

(C) The provisions of paragraph (C) of the Commission's order of May 7, 1964, which subject the license to the terms and conditions of Form L-3 (Revised November 1, 1963), shall, in respect of Article 26 of Form L-3, be revised to read as follows with respect to the license herein issued:

*Article* 26. The right of the Licensee and of its transferees and successors to use or occupy navigable water of the United States under the license for the purpose of maintaining the project works or otherwise, shall absolutely cease at the end of the license period, except that if the Licensee in accordance with then existing Commission regulations makes timely and sufficient application for a renewal or a new license, its license shall not expire until such application shall have been finally determined by the Commission.

*Commissioner Carver dissenting in part.*

CARVER, *Commissioner, dissenting* in part:

I would affirm the Examiner on one issue. Georgia Power Company was found by him to have responded reasonably to the invitation of this Commission in *Public Service Company of New Hampshire* (Androscoggin), 27 FPC 830, to seek a license for a constructed project "backdated" to April 1, 1962, for the purpose of computing Section 10(e) charges. The cases cited by the Examiner, particularly *Central Maine Power Company*, 28 FPC 302, squarely support his position. The discussion by the Commission about the "rule" in *Androscoggin* relates to a dictum contained in a footnote, and the rigidity of meaning ascribed to the word "construction" in Section 23(b) is a policy decision of the Commission today, not a command of the Congress of 1935.

I have assiduously reviewed all the prior cases on or near the subject, including those cited by the Examiner and by the Commission. I can only conclude that the wellsprings of the Commission's harshness today lie elsewhere. The casual calumny of the Commission which decided *Central Maine*, in effect charged with inadvertently overlooking a 257-foot dam replacement in an order issued within weeks of *Androscoggin*, leaves me speechless; to detail my analysis of the cases in the circumstances would be futile.

Therefore, I dissent.

## INITIAL DECISION

### OF THE PRESIDING EXAMINER ON LICENSE (MAJOR) FOR CONSTRUCTED HYDROELECTRIC PROJECT

(Issued March 1, 1966)

WESTON, *Presiding Examiner:* On the northeast, the State of Georgia is bounded from South Carolina by the Chattooga River, which joins the Tallulah River to form the boundary Tugalo River, which in turn joins other rivers and streams to form the Savannah, which bounds the two States to the sea.

Northeastern Georgia and the neighboring area of South Carolina is semi-mountainous, with elevations up to 3,000 (plus) feet. Standard atlases show at least two lakes in the area (Burton and Tallulah Falls), which have been formed in back of dams constructed in connection with hydroelectric projects of Georgia Power Company and its predecessors.

There are six dams in all, located at intervals over twenty-nine river miles, and using in the 38-mile reach of the Tallulah and Tugalo Rivers a fall of 1,198 feet in height from mean sea level. See Application filed March 18, 1963, pp. 1-2; Exhs. 48 and 100. Four of the dams are located on the Tallulah River, at points southwest of the Chattooga River, and entirely within the State of Georgia. They are, in descending order—

1. *Burton*. The dam, some 135 feet in height, was constructed in 1919,

impounding a 2,775 acre lake, with about 87,000 acre feet of usable storage in 50 feet of drawdown. The generating units were installed in 1927.

2. *Nacoochee.* The dam and powerhouse were constructed in 1926. About 90 feet in height, the dam impounds a 240 acre reservoir, with no seasonal storage.

3. *Mathis-Terrora.* The main dam and saddle-dike are at Mathis, and were constructed in 1915. The Terrora generating facilities were constructed in 1925. The dam is about 125 feet high, impounding about 834 acres of reservoir, with no seasonal storage.

4. *Tallulah.* The dam was constructed between 1911 and 1914. Generating capacity was finalized in 1920. The dam is about 140 feet high, and the lake has an area of about 63 acres, with no seasonal storage.

Two of the dams are located on the boundary Tugalo River. They are, in descending order—

5. *Tugalo.* The dam and generating facilities were built in 1923, just below the confluence of the Tallulah and Chattooga Rivers. The dam is about 170 feet high, and backs up a reservoir of about 597 acres.

6. *Yonah.* The dam and generating facilities were built in 1925. The dam is about 90 feet high, and impounds a reservoir of some 325 acres.

These six hydro dams completely develop the water power resources of the continuous flow of the Tallulah River—Tugalo River watercourse. Each dam in effect backs water up to its upstream counterpart. There is therefore no unused "head."[1]

Applicant succinctly describes how the North Georgia Development operates (Exh. 84):

> * * * Burton Project is operated for seasonal storage and the remaining five downstream projects make use of this storage on a daily regulating basis. The six projects comprising the development operate as an integrated unit to meet the peak load of the applicant's system and make the best use of the water.

Coordinated operation of the hydro plants is highly desirable for the sake of efficiency in water usage and consequent cost-saving. Impounded water from Burton which is released should be and is used successively by the lower hydro dams in its downstream flow.

In terms of land and water use, both for recreation areas (which have been highly developed and abound), and for "head," the North Georgia Development is concededly the "project"—using the term in the general sense —"best adapted to a comprehensive plan for improving or developing a waterway or waterways for the use or benefit of interstate or foreign commerce, for the improvement and utilization of waterpower development, and for other beneficial public uses, including recreational purposes," in the language of Section 10(a) of the Federal Power Act. Georgia Power's application of March 18, 1963 is for a single license for its "North Georgia Development" comprising "six hydroelectric projects." (Application, p. 1.) The matter was docketed and treated as an application for a single license, and a single license, designated as Project No. 2354, was issued by Commission order of May 7, 1964, 31 FPC 1134.

On brief, Georgia Power insists that the North Georgia Development should be designated and treated as six separate "projects" in the statutory sense, because they were not (1) authorized, or (2) constructed, at the same time, but at six separate intervals "beginning with Tallulah in 1913 and ending with the installation of generating units at Burton in 1927." (Br. 4, Application 1.) Furthermore, Georgia Power points out that each of the six hydro units is concededly (3) an entity complete and capable of operation by itself and sometimes (*e.g.*, in the case one or more of the other hydro plants is out of service) so operated; coordinated in normal operations but not necessarily to be regarded as one "project" in the statutory sense.

---

[1] Downstream from Yonah, the Federally-owned Hartwell dam backs water about 50 miles upstream, to complete the total water use.

The reason for the issue—one statutory project as six projects—is found in the provisions of the order issuing the license, next considered.

### *The Back-Dated License*

In its application, Georgia Power asked for a license for a term of fifty years from the date of its issuance. In its order of May 7, 1964, the Commission issued a license effective January 1, 1956 and terminating December 31, 1993. Annual charges under Section 10(e) "for the purpose of reimbursing the United States for the costs of the administration of this Part" (Part I of the Federal Power Act; originally the Federal Water Power Act) are, under the license, to be computed on the entire North Georgia Development beginning on January 1, 1956. The back-dated charges amount to $100,251.23. Additionally, by necessary implication, the license requires that the amortization reserve requirements of Section 10(d) of the Act have a starting point of January 1, 1956, applicable to the entire Development. The back-dating was not based on specific findings of fact, but was explained as being in accordance with "the criteria set forth in our April 25, 1962 Opinion No. 357 and order issuing license to Public Service Company of New Hampshire for Project No. 2288 (27 FPC 830)." The order notes that "an earth dyke was built at Mathis in 1956 to replace the original concrete dyke structure."

*The New Construction.* The fact is, that the back-dating of the license is supported by Staff on the basis of unauthorized[2] construction work performed in 1956 at the Mathis-Terrora unit of the North Georgia Development—the construction work consisting of the placement of an earth dam behind (downstream from) a concrete dike which was part of the 1914–1918 closure of the Tallulah River at Mathis.

The reservoir at Mathis originally consisted of (1) a concrete main dam across the river channels, and (2) a concrete dike which closed a depression, or "saddle," at one side of the natural basin and about 2,500 feet from the main dam. Some time prior to 1956, it was found that the dike had bowed in a downstream direction. The main body of the dike had settled and rotated to some degree on its concrete footing; the "rotation and settlement was continuing, and the cumulative movement made the integrity of the cut-off wall questionable. * * * a sudden failure of that foundation was possible with little or no prior warning from exterior surface appearances." (Tr. 157.)

Correction of the condition was by way of the earth dam, and the breaching of the original dike (which remains in place and otherwise intact) with slots.

It is clear and undisputed that the earthen replacement of the dike closure was not an improvement or addition to Georgia Power's productive property and capacity. The dike was located "just upstream from a Federal highway with attendant commercial and residential areas." The main reason for replacing the dike was "to eliminate the threat to life and property not owned by the applicant." (Tr. 159.)

---

[2] Section 23(b) of the Act makes it unlawful, *inter alia*, to construct dams on navigable waters without a license. Section 23(b) also requires that those intending to build dams "or other project works" on non-navigable waters "over which Congress has jurisdiction under its authority to regulate commerce" to file a declaration of intention, whereupon there is to be a mandatory Commission investigation. If on the investigation the Commission finds that the interests of interstate commerce would be affected, then the issue arises, whether or not the license should be granted.

The new saddle-dike cost $661,709.00. In 1956 dollars, this represents 2.86 percent of the total cost of the Mathis-Terrora facilities, and .69 percent of the cost of the entire North Georgia Development—which is itself a relatively minor generating property of Georgia Power. In the overall view, it must be apparent that the new dike is in the nature of a repair to one element in the existing hydro facility at Mathis-Terrora, rather than the creation of a new facility.[3]

Staff contends that characterization of the nature and extent of the work done at Mathis is irrelevant; "the inquiry, in the language of Section 23(b), is simply whether Applicant constructed a project work in 1956." (Br. 17.) Further, since the Mathis saddle-dike was replaced without either declaration of intention or application for license under 23(b), back-dating of the license for all six hydro units is warranted, because "had the Applicant filed a declaration in 1956 as the law required it would have been required to pay charges from that year for all of the North Georgia Development." (Br. 27.) These simple facts and contentions form the first issue.

*The Androscoggin case and antecedent policy.* At the outset, it is well to note that, had Georgia Power filed a declaration in 1956, it is by no means clear that the Commission would have asserted jurisdiction over the Mathis project, or over the other units in the Development. As summarized in *Androscoggin*, the policy established on May 19, 1958 in *Carolina Aluminum Company*, 19 FPC 704, which "was foreshadowed by the Commission's decision in *Montana Power Company*, 15 FPC 1330 (April 23, 1956)" was, to issue "50 year licenses effective as of the date on which its jurisdiction over the river in question was determined" on the view that "the Act does not require any company to apply for a license until such time as an authoritative determination has been made that the stream in which the company operates is navigable." *Public Service Company of New Hampshire*, ("Androscoggin") 27 FPC 830, 835 and footnote 8, p. 836. It is entirely uncertain and speculative what the Commission would have ruled on the navigability question, had the matter been presented by Georgia Power's hypothetical declaration in 1956 that it proposed to replace the Mathis saddle-dike.[4]

The essential facts of the *Androscoggin* case are these: (a) The original dam, known as the Gorham Project, was built in 1894, and rebuilt in 1903, 1927 and 1928. Other changes in the facilities were made during the intervening years, and the turbines were replaced in 1937. (b) By order issued July 24, 1958 in *New Hampshire Water Resources Board*, 20 FPC 99, the Commission found that the Androscoggin River was a navigable watercourse throughout its entire length. (c) In 1958 and 1959, without Section 23(b) notice or other relationship to the Commission, Public Service Company of New Hampshire removed the entire Gorham Project dam and replaced it with a new dam. (d) On December 27, 1960, Public Service Company of New Hampshire applied for a license for the project.

On these facts, the Commission made the license, issued April 25, 1962, effective as of July 1, 1958 "the first day of the month in which we determined jurisdiction" over the Androscoggin River in the *New Hampshire Water Resources Board* case cited above. This action was based on applicant's (27 FPC at 834):

---

[3] As will further appear, the rather inflexible rules applied by Commission Staff for back-dating because of new construction should in fairness hinge in part on a realistic appraisal by the Staff of the nature and extent of the construction.

[4] The question of navigability or other jurisdictional basis was reserved in Georgia Power's application filed March 18, 1963, and it was stated that the application was filed to avoid litigation. Jurisdiction was conceded in the reply brief filed October 11, 1965 "in view of the recent decision of the Supreme Court in *Federal Power Commission v. Union Electric Company,* 381 U.S. 90 (1965)."

> flagrant breaches of statutory duty * * * when it (a) failed to apply for a license even after our determination of jurisdiction over the Androscoggin in Docket No. E-6807; and (b) replaced its dam without filing either a license application or a declaration of intention, one or the other of which submission was required by Section 23(b) whether the Androscoggin was navigable or not. In the latter connection, it should be pointed out that if Applicant, subsequent to 1935, had built an entirely new project without securing the requisite authorization, we would not hesitate to adopt the date of such construction as the effective date of its license. We see no reason for different treatment merely because the unauthorized construction took the form of a replacement of an existing facility.

The Commission continued by announcing a general rule, applicable to the case at bar (27 FPC at 834):

> * * * In future cases which do not involve a prior finding of navigability as to the subject river, an unauthorized construction subsequent to 1935 or other unusual circumstances (e.g., the incurrence by the Commission of substantial administrative, investigative, or litigative expenses directly attributable to the applicant's recalcitrance) our policy will be to tender licenses effective as of the beginning of the month in which the present order is issued, *i.e.,* April 1, 1962. Our reason for not making future licenses effective as of the date of their issuance is that to do so might encourage still further delay in filing the license applications which the law requires.

It is clear that Georgia Power relied on this language when it filed its application of March 18, 1963. (Tr. 160.) Georgia Power's petition is for a license effective April 1, 1962 rather than July 1, 1956. What are the precedents?

In *Western Massachusetts Electric Company,* 32 FPC 129, the Commission, pursuant to application filed December 31, 1962, on July 15, 1964 licensed a constructed project on the Deerfield River. The Commission found that in 1945, there had been construction "to enhance the stability of the dam and to improve its hydraulic characteristics," although no "major changes" had been made in the project works since 1935. (32 FPC at 129.) The Commission issued a license effective April 1, 1962.

According to the record in the case at bar, the 1945 physical changes in the *Western Massachusetts* case were actually "extensive," and "in the same class with that of Mathis." (Tr. 162-163, describing changes to spillway, volumes of water accommodated and face of dam.) Yet the license was not back-dated.

In *Central Maine Power Company,* 28 FPC 302, the Commission, pursuant to application filed October 20, 1960, on August 8, 1962 licensed a constructed project on the Androscoggin River. The Commission found that "Apparently there have been no major additions or alterations to the project structures since 1920." (28 FPC at 302.) The Commission issued a license effective July 1, 1958, "the first day of the month in which we determined the Androscoggin River to be a navigable water," and terminating December 31, 1993, in accordance with the *Androscoggin* principles discussed above.

According to Georgia Power's interpretation of the evidence in *Central Maine,* a timber crib section of the dam there under consideration had been replaced in 1946 by a new concrete section about 257 feet long. (Br. 18, citing Exhibit L to Central Maine's application.) Staff agrees with this interpretation, citing the Commission's finding, 28 FPC at 302, that "the concrete section on the Brunswick side was constructed in 1946 to replace a portion of the old dam." Staff says that the Central Maine construction "warranted a back-dated license," but that the "mistake" there made does not justify departure in the case at bar from "the criteria of *Androscoggin*." (Reply Br., p. 4.)

On analysis, it would seem more appropriate to conclude, as does Georgia Power, that in the Commission's language, "construction" warranting back-dating prior to April 1, 1962 means *major additions or alterations to the project structures*, as quoted above, rather than necessary repair work as done in the *Central Maine* case and at Mathis in the case at bar. According to Staff's contention, the Commission 3½ months after issuing *Androscoggin*, issued an inconsistent decision in *Central Maine*, involving the same river. This contention cannot be accepted. Note that the Commission's language about "unauthorized construction in the form of a replacement," to paraphrase part of the first main quotation, above, from *Androscoggin*, is in the context of a hypothetical situation in which an applicant post-1935 has built an entirely new project without Commission approval. Certainly back-dating because of replacement must have some limits; minor items of equipment in a pre-1935 project are no doubt constantly being replaced and would not appropriately trigger the application of a retroactive license with important adverse financial consequences.

Other cases abound; each turns on its own facts. *Central Maine Power Company*, 32 FPC 334, 733, affirmed 345 F. 2d 875 (CA1-1965), involved an old project that was "in ruins" when rehabilitation started in 1937, and the new generators commenced operations in 1939 and 1950. The license was therefore made effective January 1, 1938. *Bangor Hydro-Electric Company*, 33 FPC 278, rehearing denied July 12, 1965, affirmed January 13, 1966, 355 F. 2d 13 (CA1-1966), involved the construction of a new powerhouse in 1938–1939, apparently adding 3,000 kilowatts to the existing 5,400 kilowatts (see 33 FPC at 278 and 280); the license was therefore made effective January 1, 1938. *Niagara Mohawk Power Corporation*, 32 FPC 1404, Opinion No. 481 on rehearing issued November 15, 1965, on appeal to CADC, No. 19887, principally involved back-dating of certain projects only to the date when the Commission determined that the project rivers were navigable; and also involved one project newly constructed in 1941 on the navigable Erie Canal, which therefore received a license effective July 1, 1941. *The Northwest Paper Company*, 32 FPC 1413, rehearing granted by order of February 5, 1965, involved a timber crib dam "replaced by a concrete structure including modern flood control gates" in 1948–1949, wherefore the license was made effective July 1, 1948.

*Other factors bearing on application of Androscoggin rules.* A. In speaking of "flagrant breaches of statutory duty" warranting back-dating, 27 FPC at 834, the Commission introduces a factor in the nature of *scienter* as having a bearing on the issue.[5] In this connection, it is to be remembered, first that the rivers in the case at bar, unlike the Androscoggin, have never been found to be navigable. Second, that like, the Public Service Company of New Hampshire, had either chosen to do so, Georgia Power could have filed with the Commission notice of its intention to reconstruct the Mathis saddle-dike in 1956. Third, that as to the Georgia Power situation, it is by no means clear and certain that the Commission would, upon the occurrence of such a filing, have taken jurisdiction to license the entire North Georgia Development, or even the Mathis-Terrora project. See the *Carolina Aluminum* case cited above, and discussion of Commission policy in the 1950's in the *Androscoggin* decision, 27 FPC at 835–836; *cf. contra*, Staff speculation, Br. 26–27. There is no showing, and no facts basing the conclusion from the present record, that Georgia Power was guilty of a gross or flagrant disregard of the requirement to file notice of the proposed Mathis construction work, in the context of the 1956 regulatory atmosphere.

---

[5] Webster's Third New International Dictionary defines "flagrant" as "extremely, flauntingly, or purposefully conspicuous usually because of uncommon evil, unworthiness, unpleasantness or truculence."

B. In its discretion, the Commission in April, 1962 adopted certain criteria warranting back-dating for certain constructions of project works after 1935. These criteria were not predicated upon a rule-making proceeding, which would have attracted industry-wide notice and consequent opportunity to participate. See Section 4 of the Administrative Procedure Act, governing "any agency statement of general or particular applicability and future effect designed to implement, interpret, or prescribe law and policy." (APA, Section 2(c) definition.) In such a proceeding, a variety of specific factual circumstances would have been elicited as background for Commission evaluation as to the proper ultimate coverage of the rule. It is, of course, fruitless to speculate what the Commission would have provided in such a rule. But in applying *Androscoggin* principles, there is undoubtedly room for the exercise of sound discretion insofar as the facts of a given case, not considered by the Commission in that case, may warrant. Otherwise, these principles really amount to a retroactive application of new Commission policy on applicants who have had no notice or opportunity to be heard.

*Conclusion.* Under the circumstances of the case at bar, the record does not disclose an adequate basis for back-dating the license of the North Georgia Development, or of any unit in that Development, because the replacement of the Mathis saddle-dike was not a major addition to or alteration of the project structures. The license will, in accordance with the rule laid down in *Androscoggin* (27 FPC at 834) be made effective as of the beginning of the month in which that decision (which, as we have seen, prompted the instant application) was issued; *i.e.*, April 1, 1962. There is no issue as to the termination date for the license, which is December 31, 1993.[6]

*One Project or Six Projects?* Georgia Power devotes considerable space in its briefs, and displays legal ingenuity, in arguing that each of its Tallulah-Tugalo River hydro units is a separate statutory project. Stripped of characterization, its argument is based on the fact that the six units were not authorized at the same time or constructed at the same time, and that each unit is capable of independent operation.

These considerations are not important. The important thing is, that in terms of efficient hydro-electric operations and the recreational and other features of the shorelines, applicant must, consonant with its obligations as a public utility, coordinate and master plan at all times its release of water beginning at Burton and ending at Yonah.[7] And under Section 10(a) of the Act, the Commission must adopt and license as the "project" the planned development which—

---

[6] The advancement of the termination date "gives adequate weight to the unlicensed history" of the North Georgia Development prior to April 1, 1962, for the reasons spelled out in *Androscoggin*, 27 FPC at 833–834.

[7] Undoubtedly, Yonah also coordinates with the Federal Hartwell project located downstream, the waters of which back up nearly to the Yonah Dam. If Hartwell were also in the Georgia Power system, it would no doubt also be part of the "project."

> in the judgment of the Commission will be best adapted to a comprehensive plan for improving or developing a waterway or waterways for the use and benefit of interstate or foreign commerce * * * [and for other beneficial purposes].

The overriding considerations bearing on the "judgment of the Commission" are that six units are (1) integrated, (2) actually develop 100 percent of the "head" of the water-course, (3) have no reasonable basis in engineering, economics, conservation, law or other pertinent considerations to be treated separately in respect of licensing, and (4) form the comprehensive plan for the development of the watershed. They are therefore one project.[8] *The Montana Power Company*, 15 FPC 1330, 1335; *Alabama Power Company*, 18 FPC 257, 260; *Duke Power Company*, 20 FPC 360; *California Oregon Power Company*, 23 FPC 59, 61; *Pacific Gas & Electric Company*, 2 FPC 516; *Georgia Power Company* 21 FPC 296; and *Arkansas Power & Light Company*, 26 FPC 549.

### *The Transmission Lines*

The order of May 7, 1964, found that the "following described transmission lines which were not included in the application for license are parts of the 'project' as defined in Section 3(11) of the Act and should be included in the license * * *":

| Lines | Kilovolts | Approximate length (miles) |
|---|---|---|
| 1. Burton-Nacoochee | 38 | 3.8 |
| 2. Nacoochee-Terrora (2) | 38 | 6.0 |
| 3. Terrora-Dillard | 38 | 14.0 |
| 4. Terrora-Tallulah Lodge | 110 | 2.3 |
| 5. Tallulah Falls-Tallulah Lodge (2) | 110 | 2.0 |
| 6. Tugalo-Tallulah Lodge | 110 | 5.0 |
| 7. Tugalo-Commerce | 110 | 35.0 |
| 8. Yonah-Commerce | 110 | 29.0 |
| 9. Yonah-Commerce to Tallulah Lodge (tap) | 110 | 7.0 |
| 10. Tallulah Lodge-Elberton | 110 | 58.0 |
| 11. Tallulah Lodge-Gainesville | 110 | 34.0 |
| 12. Cornelia-Clarksville | 38 | 7.0 |
| Total | | 203.1 |

On brief, the Commission Staff has revised its designations in part and has dropped the contention that the Cornelia-Clarksville line is part of the project. As revised, the lines in issue are designated as follows:

The Burton-Nacoochee, the two Nacoochee-Terrora, the Terrora-Dillard, the Terrora-Tallulah Lodge, and the two Tallulah Falls-Tallulah Lodge lines remain as in the order of May 7, 1964, except that the two last-named lines are given an approximate length of 0.3 mile. Tugalo-Tallulah Lodge and Tugalo-Commerce lines (items 6 and 7 above) are combined under the designation Tallulah Lodge-Tugalo-Commerce, with a length of about 40 miles. Yonah-Commerce and Yonah-Commerce to Tallulah Lodge are combined under the designation Tallulah Lodge-Yonah-Commerce, extending about 36 miles. The Tallulah Lodge-Elberton and -Gainesville lines remain as before, but the Cornelia-Clarksville line "should not be included in the license." (Staff Brief, p. 56.)

---

[8] Georgia Power correctly contends that this conclusion of fact does not necessarily mean, as Staff would have it, that the Mathis construction work, if it warrants back-dating under *Androscoggin*, requires back-dating of the whole license. For project accounting purposes, the Mathis unit could be set off separately.

The Commission order of May 7, 1964 does not state the basis on which it was decided that the given lines were part of the project. Under Section 3(11) of the Act, there should be included in the licensed project works:

> The primary line or lines transmitting power therefrom [from the power house and other parts of the hydro unit] to the point of junction with the distribution system or with the interconnected primary transmission system * * *.

The problem is, that all of the lines in question sometimes transmit power *from* the six hydro units when they are generating, and also transmit power to and through the substations which form a part of such hydro units when they are not generating at all or not generating enough power to supply the load served off such lines—almost all of the time on almost all of the lines, as we shall see. There are a great variety of transmission situations that can and do occur, depending on transient and everchanging circumstances such as: the water levels back of the project dams, the load in the vicinity, the amount of other generation from Georgia Power plants, and the receipts of power from Duke Power and other companies in the southeastern United States power grid. Most of the time, power is being supplied to the communities and customers served off the designated lines* from sources other than generation from the six hydro units; *i.e.*, the flow is towards and through the six substations and the hydro plants, mostly from steam plant generation and an intertie with Duke Power Company at the Tallulah Lodge substation. Georgia Power considers the 38 kv lines listed above as part of its "primary distribution system" and the 110 kv lines as part of its "primary transmission system." (Exh. 29.)

In order to visualize the physical situation, it should be noted that the generating equipment in each of the six hydro units connects primarily with its own transmission substation located nearby. The substation and all connections leading from the generating equipment up to it are concededly part of the hydro project works. In a typical case—

> The transmission substation is located at the entrance or west end of the power house and consists of steel frames, buses, disconnecting switches and cable necessary to control station from switchboard. The substation connects to a single 38,000 volt line. The transmission lines [*i.e.*, leading through the substation] are excluded from the project. (Burton Project, Exhibit M to Application filed March 18, 1963.)

Thus, depending upon what generation is "on the line," the power flowing through the transmission line in the substation may be power produced from the project hydro plant, or power produced elsewhere, or a mixture of the two. Only when the project plants are operating at system peaks can we visualize the lines as being saturated with project power and delivering power to Gainesville, Commerce and Elberton.

*Legislative history.* The legislative history is of little or no help in determining what Congress meant in distinguishing the "primary line" of the hydro unit, which is part of the project works, from the lines which are part of the "distribution system" or "interconnected primary transmission system." There is no reference in the debates or elsewhere to the specific language of Section 3(11), which first appeared in House Report 715 on S. 1419, 65th Cong., June 28, 1918, from the Committee on Water Power. However, there is some background.

---

* The communities include Dillard, Rabun Gap, Mountain City, Clayton, Tiger, Wiley, Clarksville, Habersham, Cornelia, Gainesville, Toccoa, Commerce, Tallulah Falls, Hartwell, Elberton, and many more. Population in the area is growing, and load is growing at a rate of over 8% per year.

Between 1912 and the enactment of the Federal Water Power Act in 1920, several points of view developed as to the proper scope of recapture—that is, as to the principal point involved in the Section 3 definitions. Early viewpoints would have envisaged recapture of extensive transmission facilities from the hydro dam to the distribution system, or facilities dependent on power developed under the license. See National Waterways Commission Report of March 25, 1912 (Senate Document 469); S. 8033, 62d Cong. (Cong. Record, February 17, 1913, p. 3267); H.R. 16053, 63d Cong., as amended (Cong. Record, July 23, 1914, p. 13240); H.R. 16673, 63d Cong.; S. 322, 64th Cong.; S. 1419, 65th Cong.

Senator Norris, speaking against extensive recapture—the point of view contained in S. 322, 64th Cong.—said (Cong. Record, March 1, 1916, p. 3354):

> My amendment, it will be seen, limits that part of the transmission system that must be taken to the transmission system from generating plant to initial point of distribution. This is a vastly different thing from the bill as it now stands. As it now stands the bill in this respect provides for additional things to such an extent that the taking over is absolutely impractical and in effect makes the grant perpetual.

Representative Kent of California said, in regard to the broad recapture provisions (Cong. Record, July 5, 1916, pp. 10454–55):

> I feel that this bill if enacted may be wrapped around the legs of posterity like so much barbed wire when they try to escape from it. In order to recover the property we may be forced to buy everything dependent for its usefulness upon the power generated * * *.

There is a further indication that Congress did not envisage a broad takeover of lines connected to hydro units. In the debate on S. 1419 (*supra*), referring to the language later incorporated into Section 3(11), the following colloquy took place (Cong. Record, September 3, 1918, p. 9908):

> MR. ANDERSON. I have some curiosity to know why the gentlemen in his amendment excepted transmission lines and distribution lines.
>
> MR. SIMS. The bill itself practically excepts them. Both the bill handed to us by the President and the bill brought to us by Mr. Merrill excepts them—one not to exceed the actual cost and the other the net investment * * *. I cannot think that they would want to sever it from any other project property except the transmission lines and distribution plants, because in the transmission one line may be 10 miles and another 100 miles, and one a high tension line and another a low tension line, and the distributing plants may be much larger in some places than in smaller places. The object is to bring the power plant itself into control of the United States rather than the distributive facilities or the transmission lines.
>
> MR. ANDERSON. What would be the value of a water power severed from the transmission line?
>
> MR. SIMS. What would be the value of a transmission line severed from the water power? That would be left to negotiation; the Government certainly would not destroy, dismantle and stop the transmission of electricity.

It is true, but unimportant in considering this colloquy, that Mr. Sims' amendment dealt with annual charges rather than being "directly related to the recapture problems." (Staff Reply Brief, p. 8.) The general sense of the debates and the legislative proposals, read in connection with the language of Section 3(11) as finally adopted, looks towards a restrictive rather than a broad coverage of the term "primary line" includible in the given project. It was clear to Senator Norris and to Mr. Sims in 1918, and it would seem clear in 1966, that insofar as recapture is concerned, there has been no contemplation of a broad construction of a Government purpose to take over transmission and service systems linked to the hydro projects.

*Authorities.* In *Montana Power Company* v. *Federal Power Commission*, 112 F. 2d 371 (CA9–1940), the Commission had denied Montana Power's application for a minor part transmission line license designated as (prospective) Project No. 1407, and had authorized the line as an amendment of the license for the existing Flathead Project No. 5, on a finding that the line "will serve principally as a primary line transmitting energy from the aforesaid Flathead plant to points of junction with the distribution systems of the applicant at Thompson Falls, Missoula, and Anaconda, Montana, in addition to serving as an interconnection between those distribution systems * * *. (*Montana Power Co.*, 1 FPC 813, 814, June 13, 1939.)

This finding was based on the further finding that when carrying "the maximum energy that can be generated at the Flathead plant, after that project has been completed and is operating at its ultimate installed capacity, the transmission line cannot carry any substantial amount of power from other sources" to any of the distribution systems mentioned above. (1 FPC at 814.)

The court affirmed, on the basis that the Government findings were supported by substantial evidence and had a "rational basis," in that (112 F. 2d at 374):

> A rational basis for the Commission's conclusions might be the low cost of Flathead power. From experience the Commission may know, or be perfectly sure, that power generated at the government project at Flathead will be sold at a cost so low that the entire output thereof will be constantly in demand. If so, it can be seen that the line in question will be used for the transmission of that power. At any rate, we cannot say that there is no rational basis for the conclusions of the Commission.

The Commission order contains no *rationale* supporting the findings; the opinion of the Ninth Circuit does not explore the subject in satisfactory depth. Georgia Power's brief points out facts developed from the record in the *Montana Power* case: Flathead was a "*base load* project operating at 100% load factor," and, referring to the existing Thompson Falls-Flathead line and the Flathead-Missoula-Anaconda proposed line, the project "alone was expected to utilize all the capacity of these lines all the time." (Br. 21–23.) There is a real distinction between this situation and the present circumstances, where (1) about half the time, none of the six hydro units operate at all, therefore furnish no project power at all into the lines in question; (2) for about 80–90 percent of the time, no project power reaches Staff's contended termini of the lines at Gainesville, Commerce and Elberton, but the power flow is from other generation to serve load in the vicinity of the hydro dams; and (3) there is no showing that the lines were constructed for, or serve the principal purpose of, conveying hydro power away from the hydro project.

Staff's proposed application of the "existing judicial interpretations" covering the distinction between primary project lines and distribution/interconnected primary transmission lines is not a model of clarity. According to Staff, project lines should be defined as follows (Tr. 268)—

(1) The line must connect a hydroelectric project with the point of junction with the distribution system or with the interconnected primary transmission system.

(2) The line must serve to transmit electric energy from the hydroelectric project in question.

(3) Although the line may serve not only as a part of a hydroelectric project but also as part of a primary interconnected system, nevertheless, if the line is a primary line directly connected with a project and serves to transmit energy therefrom to a point of junction with a distribution system or with the interconnected primary system, the line should be included in the study as to whether it should be recommended for inclusion as a part of the project.

It is apparent that points (1) and (2) merely restate the statute and the issue. All of Georgia Power's lines connect with the North Georgia Development; much of its system line to the south, southwest and southeast of Gainesville, Commerce and Elberton (termini suggested by Staff) transmit electric energy generated in the Development. Point (3) comes close to the present situation, but is of no concrete help. For instance, what standards are disclosed for the guidance of the student who makes the "study as to whether it [the line] should be recommended for inclusion as a part of the project?"[10]

Actually, as contended by Georgia Power (Reply Br. 9), Staff in this case is proceeding on the novel theory that the primary line, subject to recapture and the other burdens cast by the Act on the "project works," extends to the most distant points on an interconnected system which will be reached by project power at full generation. The novelty of the theory is of course not fatal if the theory is supported by substantial considerations of statutory interpretation, but these have not yet appeared.

Pragmatic tests of statutory interpretation are suggested by the opinion in *Pacific Power & Light Co.* v. *Federal Power Commission*, 184 F. 2d 272 (CADC-1950). There, a transmission line ran between applicant's hydro project and another generating plant, and crossed lands owned by the United States. The Company applied for a license for that part of the line which crossed Government land, and the Commission "declined to issue the amendment, on the ground that it had no jurisdiction to do so." (184 F. 2d at 273.)

The stipulated issue, whether the Commission had jurisdiction to license transmission lines conveying hydroelectric energy and crossing Government land "regardless of the basic nature, purpose and function to be served by such lines," necessarily implied that the line was not a primary project line, and the Court held that this line was not a "project work" subject to license. The Court further observed (184 F. 2d at 275):

> Reservoirs, power houses, and transmission lines merely as such were not the considerations which led Congress to pass the Act. The concern of Congress was in the development of water resources.

* * * * * * *

---

[10] It would seem that Staff's definition is in accord with a Commission memorandum dated October 27, 1944 (Exhibit 102) which recites similarly vague "criteria" or "tests" of what lines should be included in a given project, and continues:

> It should be borne in mind that conditions are constantly changing and lines which come within the definition of "project" today may not be so classified at some future time. However, if a line is included, the United States might be in a better bargaining position upon recapture if it wanted the line than if the line had been left out of the project works originally.
>
> The Commission has decided as a matter of policy to include lines within project works where they meet the tests outlined above. Where there is doubt as to whether such tests are fully met, such doubt should be resolved in favor of inclusion. * * *

This memorandum of October 27, 1944 is mentioned in this Decision for purposes of enlightment, but has not been used or considered in arriving at a decision of the issues herein, because it appears to be an internal communication not having the intent or effect of controlling or influencing the legal issues, which must be decided on the facts of record and openly published policy.

> The stipulated question is whether the Commission has authority over the line regardless of its nature, purpose or function. Our answer is that, unless the nature, purpose and function of the line is such as that it is a part of a power project, it does not fall within the statutory definitions which establish the authority of the Commission, and is not to be forcibly enveloped in the statutory language by the compulsion of a congressional purpose inadequately expressed.

Let us, therefore, examine the "nature, purpose and function of the lines here in question, by reference to the actual use of such lines.

*Further review of facts and conclusions from record.* In 1964, the best hydro year on record, the North Georgia Development did not supply any net power at all to Gainesville, Commerce or Elberton during the peak months of June, July, August and September. There was a net flow of power north from these points, to serve local needs in the area of the Development. (Tr. 405.)

In 1956, a relatively dry year, the Development generated 258.6 million kwh, while the load to the north of Gainesville, Commerce and Elberton amounted to 425.5 million kwh. No deliveries could have been made to these communities during 11 of the 12 months in 1956. (Tr. 406.)

In 1963, an average hydro year, the six plants in the Development carried approximately full load only 3 percent of the time, (Tr. 407) and carried no load at all for about 50 percent of the time. The direction of power flow over the lines in the vicinity of the six plants varies, depending on the amount of generation, *pro tempore*, by Georgia Power on the one hand and its interconnected systems—T.V.A., Duke Power and South Carolina Electric and Gas —on the other hand, but while the hydro plants are not generating, it is clear that the lines in question are functioning as transmission and distribution lines, not as primary project lines (Tr. 409.)

During the 50 percent of the year 1963 when some power was produced by the Development, power nonetheless usually flowed north from Gainesville, Commerce and Elberton to serve demand in the area of the Development.

The use of the Development is also curtailed by two factors—the age of the plants, which brings about mechanical failures and out-of-service conditions for substantial periods of time, and the heavy use of the reservoir-lakes for recreation during June, July, August and the first part of September. "These are the critical months in which the Georgia Power Company system has the greatest demand not only for capacity but for energy also. Even so, it has been the policy, of the Company in recent years to maintain these lakes at full pond during the summer, and to draw them down only in case of an extreme emergency that cannot be handled otherwise." (Tr. 413.)

It appears quite clearly that the nature, purpose and function of the lines under consideration are primarily for transmission and distribution of power generated elsewhere to serve consumers in the area of the six hydro plants in northeastern Georgia—at least, as of the current era. But the lines are also indispensable currently for carrying power away from the hydro plants when generating. The record does not disclose the primary function and purpose of the lines when first installed. What has been the Commission practice in prior cases?

*Analysis of a situation picked at random.* To date, there has never been developed in Commission literature a *rationale* of project "primary lines." Therefore, it has become appropriate to examine specific licenses as issued by the Commission, to see what the actual practice has been. No clear pattern emerges from this examination of precedents. However, to take a random instance, it is noted that in *Central Maine Power Company*, 32 FPC 334, rehearing denied 32 FPC 733, affirmed 345 F. 2d 875 (CA1–1965), the licensee was ordered to amend its license "to include the following described transmission facilities: the 6.9 kv generator leads and the 115 kv transmission line from the 6.9/115 kv substation to the Wyman-Gulf Island 115 kv line." (32 FPC at 336.) This line appears to be a very short stub, extending from Central Maine's "Williams Project" in the Kennebec River, which functions to connect Williams with Central Maine's 115 kv transmission grid. See FPC Bureau of Power, "Principal Electric Facilities, Northeastern," 1964, Government Printing Office; see also Exh. J-2, General Map, to application in the *Central Maine* case.

As appears to be almost universally the case, no issue was raised as to the inclusion or exclusion of this Williams to Wyman-Gulf Island stub, and there is no discussion of the matter in the Commission orders. The existence of this Commission required condition, however, led to further examination of Central Maine's "primary" lines, as distinguished from distribution or interconnected primary transmission lines, as denominated in the licensing history of this utility.

In the *Harris Project*, 13 FPC 1076, located in the sparsely populated north of the State, 29 miles of 115 kv line from the project to Wyman was included in the license.

In the *Bar Mills Project*, 15 FPC 1402, a 38 kv tap to applicants' grid was included.

In the *Androscoggin, Deer Rips* and *Gulf Island Projects*, 28 FPC 64, no lines were included.

In the *Shawmut Project*, 31 FPC 486, no lines beyond the substation (step-up transformers), were included.

In the *Weston Project*, 32 FPC 1111, no lines were included.

In the *Wyman Project*, 32 FPC 1279, lines to the switching structure were included.

Central Maine, on this showing, has only an insignificant amount—29 miles out of 686.1 pole miles in its 115 kv grid—of "primary" line in its licensed projects. Yet analysis of this company's Annual Report to the Federal Power Commission for 1964 (Form No. 1) shows that Central Maine's licensed hydro projects furnish a substantial portion of its system requirements over several hundreds of miles of line.[11] The Commission's position in licensing Central Maine appears to be quite inconsistent with Staff's position in the case at bar.

*Analysis of statistics.* As of 1945, there were 25 privately owned electric companies with hydraulic plant capacity in kws exceeding steam plant capacity.[12] Growth capacity in the succeeding years has been provided mostly by steam. For all 25 companies:

---

[11] Central Maine has: 4 steam plants, total capacity 262,000 kw (227,000 kw base load), located near the coast; 14 hydro plants, total capacity 250,065 kw, located inland, principally in the sparsely settled north. Steam furnished 48.90% of 1964 energy, hydro 41.62%, purchases 94.8%. Monthly peaks ranged from 404,075 kw in May to 502,872 kw in December. At system peak, some hydro power must flow over Central Maine's 115 kv grid at least as far south as Augusta (Maxcy switching station). Yet no lines in the grid south of Wyman (*e.g.*, to Farmington, Livermore Falls, Rumford, Detroit, Bucksport, Winslow, Augusta and Lewiston) are included in Central Maine's hydro licenses. The 29 miles of line from Harris to Wyman appears to be a rather long tap, or stub, joining Harris to the Central Maine system.

[12] These were: Alabama Power Company, California Electric Power Company, Pacific Gas & Electric Company, Southern California Edison Company, Ltd., Idaho Power Company, Bangor Hydro Electric Company and subsidiaries, Central Maine Power Company, New England Power Company, Minnesota Power & Light Company, The Montana Power Company, Public Service Company of New Hampshire, Central Hudson Gas & Electric Company, Rockland Light & Power Company, Carolina Power & Light Company, Nantahala Power & Light Company, Portland General Electric Com-

| | 1945 | 1955 | 1963 |
|---|---|---|---|
| Hydraulic capacity—kilowatts | 4,312,233 | 6,210,769 | 9,008,606 |
| Steam capacity—kilowatts | 1,989,218 | 7,475,322 | 16,715,925 |
| Total capacity—kilowatts* | 6,308,045 | 13,742,658 | 25,892,670 |
| Hydraulic capacity—percent of total | 68.4 | 45.2 | 34.8 |
| 100 percent hydraulic companies | 5 | 2 | 2 |

*Total includes small non-hydro and -steam capacity; generally internal combustion.

From this one table, a number of inferences can be drawn relevant to the issue of the proper definition of "primary line" in the case at bar. Using Staff's criteria (which, for emphasis, will be restated later in this section):

1. A major portion of the transmission grids of each of the 25 companies would be primary lines subject to the burdens of the Act.

2. As of 1945 five companies, and as of 1963 two companies, would consist largely, if not entirely, of primary lines, assuming no major purchases of electricity.

3. The Section 3(11) distinction between the "primary line and the "distribution system/interconnected primary transmission system" is fluid and ever-changing; it is dependent on the facts for the time being as to what lines primarily transmit hydro power at system peak.

4. There is a steady attrition in number and percentage of primary line as steam generation steadily takes over the predominant part of total capacity.

5. In licensing a given project, neither the Commission nor the licensee would know what lines were to be subject to Commission jurisdiction as part of the project during the life of the license, or subject to recapture at the expiration of the license.

6. Amendment of licenses to add or subtract primary line would become a significant part of the work of the Commission. Annual changes in kinds of generating capacity, load centers and system peaks would base claims by licensees and Staff for redefinition of primary lines.

7. A depressing effect would result on the development of new hydroelectric projects insofar as such projects would serve peaking loads into existing or future transmission lines now newly defined as "primary." See Applicant's Reply Brief, pp. 26-27, referring to the proposed Laurens Shoals project on the Oconee River.

* * * * * *

Staff's criteria for the inclusion of lines in a licensed project may be summarized as follows: all lines are to be included which, at the time of system peak, primarily transmit energy from the hydro generators to those certain system substations or switching structures on applicant's general transmission/distribution system where the hydro power blends with a predominant flow of energy generated from steam or other sources.

The considerations adduced so far indicate that these criteria are entirely too broad to be either (a) acceptable legally or (b) feasible in operation.

*The public or consumer interest.* Finally, as part of the pragmatic tests as to the propriety of including the lines in question as part of the "project

---

pany, South Carolina Electric and Gas Company, Utah Power & Light Company, Central Vermont Public Service Corp., Green Mountain Power Company, Northern States Power Company, (Wisc.), Wisconsin Michigan Power Company, Pacific Power & Light Company, Puget Sound Power & Light Company and The Washington Water Power Company.

This and all other material in this section is derived from "Statistics of Electric Utilities in the United States, 1963" (issued by the Federal Power Commission, 1965, Government Printing Office).

works," we should examine the question as to the useful purpose to be served by inclusion or exclusion.

Georgia Power testifies that inclusion "will undoubtedly introduce delays and additional costs in our construction program," because its system in the area is growing rapidly, and, citing particular examples of current changes to the lines (Tr. 63):

> * * * Growth requires changes in generating capacity, transmission and distribution lines, and substations. If the twelve lines are licensed it will be necessary to get permission from the Commission before making any changes in them. This would require unnecessary work, particularly in administration and accounting, and probably cause delays in the accomplishment of the necessary system changes.

The expense, inconvenience and time-lag involved in obtaining Commission approval of line changes is not a major consideration in most circumstances. But it is of importance in the case at bar, because Staff advances no useful purpose whatsoever served by the inclusion of the lines as "primary," or jurisdictional. In the event of Government recapture of the North Georgia Development, it will neither benefit nor detriment the consumers if the lines in question are excluded from the project works. If current conditions persist after takeover, the Government will undoubtedly sell the project power to Georgia Power Company at the transmission substations; as Congressman Sims foresaw in 1918 "the Government certainly would not destroy, dismantle and stop the transmission of electricity." (Legislative history, *supra*. p. 640.)

*Conclusion.* It is abundantly clear from the foregoing that Congress must have had in mind in using the term "primary line" the stub line (of whatever length) appurtenant, to the "complete unit of improvement or development" which constitutes the "project." An analogy may well be made to the case of the railroad siding appurtenant to, and part of, the facilities of a manufacturing plant. The "primary line or lines transmitting power" from the hydro generating equipment, part of the project works envisaged by Section 3(11) of the Act, are held to be the lines which feed energy from such equipment into the general electrical system of the licensee. Here, this is accomplished at the six substations located near the project works, which are properly included by Georgia Power as part of such works. The transmission lines passing through such substations were properly excluded from the project in Georgia Power's application, and the proposed license will be amended accordingly.

### *Other Matters*

1. On brief, Georgia Power has not pressed its contentions, made in its application for rehearing, concerning the propriety of certain of the Articles in the Commission's standard Form L-3, "Terms and Conditions of License for Constructed Project Affecting Navigable Waters of the United States," 30 FPC 1658, revised November 1, 1963, issued contemporaneously with *South Carolina Electric & Gas Company*, 30 FPC 1338, 1346, 1349.

2. Staff voluntarily suggests a basis for changing Article 26 of Form L-3 "to conform to Section 9(b) of the Administrative Procedure Act and the policy implied therein." (Br. 53-54.) The change spells out the licensee's right to continue licensed operation until determination of its application for renewal, if any. The change will be incorporated in the amendments to the license hereinafter ordered.

3. In view of the decision issued January 28, 1966 in *Rumford Falls Power Company* v. *Federal Power Commission*, 355 F. 2d 683 (CA1-1966), the license condition suggested in the Commission's order of April 7, 1965, 33 FPC 711,

"Joint Use of Water Power Project Works or Parts Thereof for certain Water Supply Purposes," Docket No. R-249, will not be imposed. The record in the case at bar contains no evidence or argument as to the propriety of such a condition for the North Georgia Development, and no basis for an inference that such a condition might be appropriate.

### *Findings of Fact*

The findings of fact heretofore made herein on May 7, 1964 (31 FPC 1134, at 1135-1136) are hereby confirmed, except that finding of fact number (8) is deleted and the subsequent findings (9), (10) and (11) are renumbered (8), (9) and (10).

### ORDER

WHEREFORE, *it is ordered*, subject to review by the Commission, that:

(A) The order heretofore made herein on May 7, 1964 (31 FPC 1134, at 1136-1139) is hereby confirmed, except that

(B) The license granted in paragraph (A) of such order is effective as of April 1, 1962 (rather than January 1, 1956) and terminating December 31, 1993.

(C) The provisions of paragraph (C) of such order, which subject the license to the terms and conditions of Form L-3 (Revised November 1, 1963), shall, in respect of Article 26 of Form L-3, revise the terms and conditions there set forth, in respect of the license herein issued, to read as follows: *Article 26*. The right of the Licensee and of its transferees and successors to use or occupy navigable waters of the United States under the license for the purpose of maintaining the project works or otherwise, shall absolutely cease at the end of the license period, except that if the Licensee in accordance with then existing Commission regulations makes timely and sufficient application for a renewal or a new license, its license shall not expire until such application shall have been finally determined by the Commission.

(D) The provisions of additional Article 28 of such order, imposing annual charges, are effective for the period beginning April 1, 1962 (rather than January 1, 1956), and otherwise at the rates and terms contained in such additional Article 28.

(E) The provisions of additional Article 30 are deleted and the subsequent additional Articles 31, 32 are renumbered 30 and 31.

ROBERT M. WESTON,
*Presiding Examiner.*

## SOUTHERN NATURAL GAS COMPANY, DOCKET NO. CP67-175

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued March 29, 1967)

On December 19, 1966, Southern Natural Gas Company (Applicant) filed in Docket No. CP67-175, as supplemented on December 29, 1966, and February 16, 1967, an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities in order to receive and transport natural gas purchased from Shell Oil Company (Shell)* in the West Delta Blocks 105 and 133 Fields, offshore Louisiana, and the transportation of natural gas for plant use, fuel, loss and shrinkage to Shell's proposed processing plant, all as more fully set forth in the application, as supplemented, in this proceeding.

Specifically, Applicant proposes the following:

(a) To construct and operate approximately 31.9 miles of 18-inch pipeline extending south from Bay Huertes gate on Applicant's existing West Block 30 Line to Block 104 in West Delta Block 105 Field;

(b) To construct and operate approximately 9.9 miles of 12¾-inch pipeline extending southwest from Block 104 to Block 122 in West Delta Block 133 Field;

(c) To construct and operate approximately 11.5 miles of 26-inch loop pipelines between Lake Washington Field and the Mississippi River on Applicant's Lake Washington Line;

(d) To construct and operate a multiple line crossing of the Mississippi River; and

(e) To install and operate various valve assemblies, and related facilities, located on Applicant's existing West Delta Block 30 Line near Lake Washington Field, to enable Applicant to deliver gas to Shell for processing and to accept the redelivery of gas after such processing. (Shell will pay Applicant two cents per Mcf for the shrinkage resulting from processing and fuel use.)

The estimated cost of the proposed facilities is $10,967,870, which cost will be financed initially by bank loans which will be repaid from cash from current operations or from permanent financing. An additional cost of $195,500 for the aforementioned valves to effect delivery to and receive gas from Shell's plant will be reimbursed by Shell.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application, as supplemented, has been filed.

At a hearing held on March 29, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplements and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Southern Natural Gas Company, a Delaware corporation having its principal place of business in Birmingham, Alabama, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of October 6, 1942, in Docket No. G-296 (3 FPC 822).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the proposed transportation of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act

---

*On March 24, 1967, Shell in Docket No. CI67-808 was granted a temporary certificate authorizing the proposed sale to Applicant. The proposed sale will be made pursuant to a contract between Applicant and Shell, dated October 3, 1966, as amended.

and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed construction and operation of the subject facilities and the proposed transportation of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(2), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Southern Natural Gas Company, to construct and operate the proposed facilities and to transport natural gas as hereinbefore described, all as more fully described in the application, as supplemented, in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(2), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within one year from the date on which this order issues.

---

## OPINION NO. 519

## NORTHERN NATURAL GAS COMPANY, DOCKET NOS. CP65-1, CP65-91, CP65-338; NATURAL GAS PIPELINE COMPANY OF AMERICA, CP65-169; TRANSWESTERN PIPELINE COMPANY, PHASE II, CP65-208, CP65-236, CP65-237

### OPINION AND ORDER GRANTING AND DENYING CERTIFICATES

(Issued March 30, 1967)*

### *Syllabus*

1. In comparative hearing, Northern's proposal to construct and operate separate pipeline is preferred to Transwestern proposal to exchange gas with Northern since record shows Northern's unit costs to be lower, except at initial level of service. PP. 655-657.
2. In approving Natural's proposal to construct and operate separate pipeline—as opposed to Transwestern's proposal—Commission notes that an exchange agreement is designed for mutual benefit, while here, proposed exchange would result in more detriments than benefits to Natural; thus exchange cannot be approved because of its benefits to Transwestern. P. 657.

---

*Initial decision appears on p. 677. Opinion No. 519-A and order issued May 31, 1967 denying rehearing, 37 FPC 1005.

3. **Commission cannot allow customers in one part of the country to pay more for gas in order to benefit gas consumers in other areas. P. 657.**
4. **In addition to unreliability for future of Transwestern's rates, principal objections to its proposal relate to Natural's need to develop and expand its gas supply—if dependent on Transwestern for gas supplies, Natural could be under a severe competitive disadvantage. PP. 658, 659.**
5. **In light of disparities existing between Northern and Natural, case here is particularly unsuited for experimentation with novel notion of jointly-owned pipeline. P. 660.**
6. **Commission *finds* that long term advantages resulting from certification of two separate pipelines, as proposed, outweigh possible short term advantages which might be realized through construction of joint pipeline. P. 661.**
7. ***Rejecting* Transwestern proposal and City of Chicago's joint pipeline suggestion, Commission *finds* that public interest requires certification of separate facilities for Northern and Natural. P. 661.**
8. **In view of prior experience with development of reserves in Permian Basin, and fact that Northern's most recent reserve showing is nine months old, Northern is required to file up-to-date data establishing adequacy of 26-inch line to transport proven reserves from Delaware Basin, or alternatively amendment of its application for appropriately sized line. P. 662.**
9. **Evidence on potential reserves of Panhandle area was properly excluded. P. 662.**
10. **Examiner properly overruled objections to proffered evidence on transmission costs—while there may be infirmities in such evidence, it relates to the weight rather than admissibility. P. 662.**
11. **In a proceeding under Section 7 of the Natural Gas Act, Commission *grants* and *denies* applications for certificates of public convenience and necessity.**

**Commissioner Ross *dissenting.***

O'CONNOR, *Commissioner*:

This proceeding concerns the proposals of Northern Natural Gas Company (Northern) and Natural Gas Pipeline Company of America (Natural) to construct and operate facilities to connect large supplies of contracted gas reserves in the Delaware Basin to their pipeline systems and the alternative proposals of Transwestern Pipeline Company (Transwestern) to transport through its West Texas and Panhandle lateral lines volumes of gas for Northern or Natural. Northern and Natural oppose Transwestern's application, preferring to construct their own facilities. The City of Chicago advocates a joint pipeline owned by Northern and Natural. The proceedings are now before us upon the initial decision of Presiding Examiner Allen C. Lande issued June 22, 1966, in which he issued, subject to review by the Commission, separate certificates to Northern and Natural and denied the proposals by Transwestern and the City of Chicago.

### PROCEDURAL AND FACTUAL BACKGROUND

The present case involves Phase II of several applications consolidated by Commission orders issued March 16 and May 12, 1965. Phase I dealt with a system expansion of Natural in Docket No. CP65–169 and an interim exchange agreement between Natural and Transwestern in Docket Nos. CP65–320 and CP65–325. The Examiner's decision granting certificates was issued August 3, 1965, and the Commission order adopting the Examiner's decision on August 13, 1965 (34 FPC 507).

After El Paso, Northern was the second pipeline to purchase natural gas in the Permian Basin. It now purchases about 20 percent of the Permian gas moving in interstate commerce, yet it has no connection between its mainline facilities and its Permian Basin facilities. It has obtained its gas by means of an exchange and transportation arrangement under which it utilizes the line of El Paso Natural Gas Company running from Plains, Texas, in the Permian Basin to Dumas in the Texas Panhandle area. Northern has now contracted with producers in the Coyanosa and Gomez Fields of the Delaware Basin, Texas, which is within the Permian Basin area, for 2.6 trillion cubic feet of gas reserves and is continuing to negotiate for more reserves. The Plains-Dumas line is presently fully utilized and cannot accommodate these volumes.

In order to obtain access to its Permian Basin reserves Northern filed the application involved here. In Docket No. CP65-1 filed July 1, 1964, it seeks a certificate authorizing the construction and operation of 42 miles of 24-inch pipeline to transport Coyanosa gas to its existing Permian Basin facilities at Kermit, Texas, at an estimated cost of $3,392,600, and has been granted a temporary certificate for this line. In Docket No. CP65-338 filed April 23, 1965, Northern seeks authorization for 12 miles of 24-inch pipeline to connect its Gomez Field reserves with the line proposed in Docket No. CP65-1 at an estimated cost of $1,015,600. In Docket No. CP65-91 filed October 6, 1964, it has applied for authorization to construct and operate some 365 miles of 26-inch pipeline and other facilities, which would connect its Permian Basin facilities with its main transmission system at Beaver, Oklahoma. The line would initially carry 225,000 Mcf per day but would be designed to have an optimum capacity of 450,000 Mcf per day. The estimated cost of the 26-inch pipeline is $33,013,500 and of all facilities proposed by Northern is $37,421,700.

Natural is in a somewhat similar situation. Its original Amarillo line built in 1931, and since expanded, extends from the Panhandle Field of Texas to the Chicago area. In recent years Natural has been unable to acquire sufficient additional reserves in the Panhandle area to balance its ever expanding needs. Therefore, it has acquired reserves in the Permian area and plans to acquire further reserves, for it believes that area has a vast potential for producing additional supplies of gas. The present application would allow Natural to construct facilities to connect its Amarillo line with its reserves in the Permian Basin.

In Phase I of these proceedings Natural was authorized to construct lines extending northeasterly from the Indian Basin and Dagger Draw Fields in the Permian Basin to a point of interconnection, in Eddy County, New Mexico, but these facilities are not now interconnected with Natural's Amarillo line. Rather they are interconnected with the Transwestern West Texas lateral and are used for the interim interchange of gas with Transwestern approved by the Commission on August 13, 1965, in Docket No. CP65-1 (34 FPC

507). In Docket No. CP65–169 filed December 11, 1964, Natural proposes to construct 230 miles of 24-inch pipeline and 26.2 miles of 20-inch pipeline extending from the existing terminus of the Amarillo line at compressor station 112 in Moore County, Texas, to a point in Eddy County, New Mexico, where connection will be made with the Indian Basin and Dagger Draw facilities. Natural also requests authorization to construct 3.5 miles of 8-inch lateral in Roosevelt County, New Mexico, to receive gas from the Bluitt Field, 5.93 miles of 30-inch loop line on the Amarillo line, and other appurtenant facilities, all at an estimated cost of $20,618,000. The initial capacity of Natural's proposed main Permian line would be 168,530 Mcfd, but it is designed for a future capacity of 450,000 Mcfd by the addition of compression.

Transwestern's system consists principally of a 30-inch pipeline which connects with two 24-inch supply laterals near Roswell, New Mexico, and extends westward to the California border where it delivers gas to Pacific Lighting Service and Supply Company. One supply lateral, called the Panhandle lateral, extends northeast from Roswell into the Panhandle-Hugoton-Anadarko areas of Texas and Oklahoma; the other, called the West Texas lateral extends southeasterly to the Permian Basin.

Transwestern has intervened and has proposed an exchange service with Natural and Northern by which Transwestern's Panhandle lateral would be used to serve Northern and Natural and their Midwestern customers rather than Transwestern's customers in California. On their part Northern and Natural would deliver to Transwestern volumes of gas, which would be available to serve Transwestern's customers in California. Certain additional facilities would be required on Transwestern's West Texas lateral to transport Natural's and Northern's gas to the point of intersection with the Panhandle lateral.

In Docket No. CP65–237 filed February 9, 1965, Transwestern proposes to take delivery of up to 158,000 Mcf of gas per day from Natural at a point of intersection between Natural's Indian Basin facilities and Transwestern's 24-inch West Texas lateral approximately 54.8 miles southeast of Roswell, New Mexico, and into its 8-inch Bluitt lateral, which is attached to its Panhandle lateral. Transwestern proposes to redeliver equivalent volumes to Natural at a point on its main Amarillo line at a point downstream from Natural's proposed Permian line delivery point. The estimated cost of Transwestern's facilities, taking into account those already certificated in the *Gulf Pacific* case[1] is $3,431,000.

---

[1] *Transwestern Pipeline Company*, 36 FPC 176, Opinion No. 500, Docket No. CP63–204, *et al.*, issued July 26, 1966.

In Docket No. CP65-236 filed February 9, 1965, Transwestern proposes to take delivery of up to 225,000 Mcfd of gas from Northern at the point of interconnection of Northern's proposed Gomez and Coyanosa facilities and Transwestern's 24-inch West Texas lateral and to redeliver equivalent volumes at Northern's Beaver compression station in Beaver County, Oklahoma. Transwestern's cost for facilities would be $17,787,000. In Docket No. CP65-208 Transwestern proposed to construct a line to connect Northern's Kermit reserves with the Coyanosa Field; however, after Northern received temporary authorization in CP65-1 to build this line, Transwestern did not go forward with its proposal. Transwestern also proposes a combined exchange service with both Natural and Northern that is no different from that proposed in the separate dockets.

The City of Chicago, as well as the Suburban Rate Authority, advocate a single large pipeline to transport the Permian gas to the systems of Northern and Natural rather than separate pipelines but did not present any evidence on this matter. Although the Minneapolis Gas Company introduced studies made by Northern on such a joint pipeline, as discussed below, both Chicago and Suburban asked that the record be reopened to receive further evidence on this question.

The hearings in Phase II commenced on October 25, 1965, and, after continuances, terminated on January 21, 1966. The Examiner's decision was issued June 22, 1966. In it he issued, subject to review by the Commission, a certificate to Northern and to Natural to do what they proposed, denied the applications of Transwestern and refused to reopen the record to give further consideration to Chicago's joint pipeline proposal. The Examiner was of the opinion that Transwestern's showing with respect to its proposed service to Natural alone was better than its showing with respect to both Northern and Natural, but any cost advantage which Transwestern would have over Natural would probably vanish as the level of service increased. Furthermore, he thought that Natural should have independent access to the Permian Basin. The Examiner found that the joint pipeline would cost Northern slightly more than Northern's separate line, and this difference would increase still further if the load factor on the joint line should decrease. He thought this suggestion had been fully explored and that no further inquiry was warranted.

Exceptions to the Examiner's decision were filed by Transwestern, City of Chicago, and People of the State of California and the Public Utilities Commission of California. Briefs opposing exceptions were filed by Northern Illinois Gas Company, Illinois Power Company, Commission staff, Wisconsin Southern Gas Company, Inc., Natural, Northern, Central Illinois Electric & Gas Company, Iowa-Illinois Gas & Electric Company, and jointly by The Peoples Gas

Light and Coke Company and North Shore Gas Company. Motions for oral argument were filed by Transwestern and California.

Northern has shown that its proposal is economically and financially feasible and that it has an expanding market for the gas. It will be necessary for its proposed pipeline to carry 225,000 Mcfd immediately and 450,000 Mcfd by the fourth year of operations. It has also shown that it has adequate reserves under contract in the Coyanosa and Gomez areas of the Delaware Basin which is part of the Permian Basin area, and that the area has an excellent potential for future expansion.

Likewise, Natural has shown that its project is financially and economically feasible, that it has expanding markets and needs additional sources of gas, and that it has sufficient gas supplies for the initial use of the line but will need further reserves as the line is brought up to full capacity. We think that Natural may properly expect to procure such reserves because of the prolific nature of the Permian area. Apart from the alternative proposal made by Transwestern and the questions raised by Chicago with respect to a joint line discussed below, no substantial exception was taken to the Examiner's determination that the proposals of Northern and Natural meet the conventional requirements of public convenience and necessity, and in this respect, we specifically adopt his discussion and conclusions.

### TRANSWESTERN'S PROPOSED EXCHANGE

Transwestern has proposed an arrangement that it contends would offer economies for the benefit of itself, Natural, Northern and their customers. Transwestern, however, recognizes that there is no substantial cost difference between its proposal and Northern's proposal and therefore does not except to the Examiner's decision insofar as it grants a certificate to Northern. The record indicates that Transwestern's unit costs and proposed exchange rate will be lower than Northern's unit costs for its separate pipeline at the initial level of service (225,000 Mcfd), but will be higher than Northern's separate costs at higher levels of service. Under these conditions we can see no reason for requiring the Transwestern-Northern proposal, even apart from the disadvantages of such an exchange, as discussed below, and we shall adopt the Examiner's conclusion that Transwestern's proposal to serve Northern be denied.

With respect to its proposal to exchange gas with Natural the principal basis of Transwestern's argument is an alleged cost spread between the exchange service which it proposes and Natural's own costs. Thus for proposed deliveries of 158,000 Mcfd Transwestern's facilities would cost $3,431,000 but Natural's alternative facilities would cost $20,618,000. The cost of service for the Transwestern project on an incremental basis is substantially less at all levels of service.

Transwestern developed proposed rates for the exchange of gas with Northern and Natural based on incremental costs and value of service. Transwestern's proposed monthly charge to Natural represents the incremental cost of service for the facilities which it would be required to add to its existing system, and the proposed commodity charge represents one-half the difference between the incremental unit cost of Transwestern's project and the incremental unit cost of the alternative Natural project. Transwestern's proposed monthly charge would be $68,000 plus 3 cents per Mcf for the first 100,000 Mcf exchanged and one cent per Mcf for volumes in excess of this amount.

Assuming an exchange only with Natural and the delivery of the full volume of 640,000 Mcfd to the California companies as permitted Transwestern in the *Gulf Pacific* case,[2] Transwestern's witness testified that the monthly charge would be $30,500 and the additional charge 3.6 cents per Mcf. At the proposed 158,000 Mcfd level of service and a 66 2/3 percent load factor Transwestern's rate would amount to 4.46 cents as opposed to the 7.48-cent unit cost of a separate operation by Natural by its method of computation. At a higher level of service, 450,000 Mcfd, Transwestern's rate is estimated under its method to be 3.60 cents and Natural's cost to be 4.82 cents. Natural's method of determining cost for its own service was incremental in concept in that it was based upon the cost of operating its proposed Permian Line.

The staff developed a method for computing Transwestern's costs for serving both Northern and Natural. It was based on Transwestern's total cost of service for all of Transwestern's facilities which would be used in rendering the proposed service and the Mcf-mile method of cost allocation. At both the initial level of service, 158,000 Mcfd for Natural and 225,000 Mcfd for Northern, and at the proposed 450,000 Mcfd level for each company, Transwestern's unit costs were substantially less than the costs shown by Natural for its separate project. However, when Transwestern's witness applied the staff method, using a 6 2/3 percent rather than 6 1/4 percent rate of return, to Transwestern's costs in an exchange with Natural alone, the Transwestern unit cost at the 450,000 Mcfd level of service was found to be 4.70 cents per Mcf, only a little less than the 4.82-cent separate cost found by Natural.

Natural argues that incremental methods of determining costs have been rejected by the Commission for ratemaking purposes and should be rejected here. However, using what are, in effect, incremental methods Natural derived costs for Transwestern on the basis of jointly-used facilities and the Mcf-mile method of allocation, and, as we have seen, derived its own cost on the basis of its proposed Permian line. The results showed, using several methods, that its costs would be lower than Transwestern's except at the lowest (158,000 Mcfd) level of service. As the Examiner said, "Any cost advantage which Transwestern would have over Natural would be short-lived, and would probably vanish long before 450,000 Mcf per day pipeline capacity would be reached."

---

[2] *Transwestern Pipeline Company, supra.*

The distance traveled by the gas had considerable bearing on cost. If Transwestern must deliver Permian gas under its exchange agreement, the gas would have to travel northwest on its West Texas lateral to Roswell, New Mexico, and then continue northeastward at right angles on the Panhandle lateral. Taking the distance from the junction of Natural's Dagger Draw and Indian Hill laterals to Transwestern's point of delivery to Natural about 26 miles downstream from its station 112 which is in Moore County, Texas, the distance is about 378 miles, while Natural's proposed separate line, and present facilities would involve transporting the gas only about 318 miles.

While we have referred to some of the cost computation made on the record in order to delineate the contentions of the parties, it is not necessary to make a determination as to the validity of any one method or to compute costs on our part, for we are of the opinion that our determination should not be based on such computations. The Examiner rejected the use of an incremental method of cost allocation in determining whether to certificate the Transwestern proposal or the separate Natural proposal, but for the reasons stated below it is not necessary for us to reach this question.

Transwestern argues that its proposed rates under the exchange agreement will generate revenues in excess of its incremental cost of service, and, as a result, Transwestern has agreed with its California customer, Pacific Lighting Service and Supply Company, to reduce its proposed price to Pacific Lighting. Such advantage to Transwestern and its customers should properly be considered in determining whether the proposed exchange agreement would benefit Transwestern as well as Natural. However, an exchange agreement is properly designed for mutual benefit. A benefit on one side therefore may not properly be used to offset a detriment on the other, and we find that there are more detriments to Natural than benefits to Natural and therefore cannot approve the exchange because of benefits to Transwestern. As we said in the *Rock Springs* case, *El Paso Natural Gas Co.*, 30 FPC 77, 90, we cannot allow the customers in one part of the country to pay more for this gas in order to benefit gas consumers in other parts of the country.

While the rates proposed by Transwestern reflect low incremental costs, they are subject to future hazards. In its proposed rate schedule Transwestern specifically reserves the right to propose such changes in its rates and services as it deems necessary. On an allocated cost basis the record indicates that as the volumes of exchange are increased whatever cost advantage inures to Transwestern at the 158,000 Mcfd level of service may disappear or be reversed at 450,000 Mcfd. The witness for Transwestern did not know whether he would be able to recommend continuation of the proposed rate after the first step-up in deliveries to 225,000 Mcfd expected in 1969. Since the proposed 158,000 Mcfd level of service will soon prove inadequate, it is not possible to rely on the continuation of Transwestern's proposed rate based on incremental costs.

Furthermore, the exchange arrangement presupposes, generally, that 140,000 Mcfd of gas will be available from the Panhandle area for delivery to Natural (or Northern) without long transportation. Transwestern's witness stated that he did not know how long Transwestern would be able to deliver up to 140,000 Mcfd from the Panhandle area to Natural. We note that Transwestern, subject to the requirements of the Natural Gas Act with respect to interstate sales, is free to make additional sales of its gas in the Panhandle area.

Even though an exchange of gas would be entirely possible without any Panhandle gas, it would necessarily be done at higher cost although Transwestern's Panhandle lateral has a sufficient optimum single line capacity of 370,000 Mcfd. As contemplated by Transwestern, if 140,000 Mcfd of gas is delivered from Panhandle sources, at the initial 158,000 Mcfd level of service, only 18,000 Mcfd would have to be transported northeastward in Transwestern's Panhandle lateral. If instead of the 18,000 Mcfd Transwestern were to transport 158,000 Mcfd for Natural from its Permian Basin supply points, it would have to install additional facilities costing $2,395,000. Larger deliveries of Permian Basin gas to Natural would entail even greater costs. This would result in a very substantial increase in cost over the $3,431,000 project proposed by Transwestern which would depend upon 140,000 Mcfd from the Panhandle area.

In addition to the unreliability for the future of Transwestern's proposed rates, the principal objections to the Transwestern proposal relate to the needs of Natural to develop and expand its gas supply. Natural has shown that, without reference to the St. Louis market, it will need at least 135,000 Mcfd to 185,000 Mcfd of additional pipeline capacity each year for the next three years. Because of the requirements of its contracts with producers Natural expects to take at least 200,000 Mcfd on a peak day from existing Permian Basin sources and about 75,000 Mcfd more each year from the same area.[3] While Natural has other sources of gas in the Texas Gulf Coast and Southern Louisiana areas, these do not provide alternatives for all of the market served by its Amarillo line, so that it is necessary for Natural to acquire and utilize Permian reserves.

In this context it is a handicap to Natural that when it needs more deliveries of gas from the Permian Basin, but not sufficient to justify independent construction of facilities, it will have to approach Transwestern, which is its competitor for gas supplies. Since this is an exchange arrangement not only does Natural have to obtain greater deliveries from Transwestern, but it must make greater deliveries to Transwestern. While we may assume that Transwestern would use its best efforts in behalf of Natural, it also owes a duty to its other customers, Cities Service Gas Company and Pacific Lighting, to obtain and keep available sufficient gas supplies to meet its obligations. Therefore, if Natural is dependent on Transwestern for gas supplies it could be under a severe competitive disadvantage in its ability to obtain the necessary gas to effect the additional exchange with Transwestern.

In contrast, if Natural were entirely responsible for obtaining its own supplies, it would not have to cooperate with its competitor but could aggressively enter into contracts with producers. It could make use of the budget-type authorizations provided in §157.7(b) of the Commission's Regulations, but this would not be possible if it were obtaining its gas deliveries from Transwestern. In short, to obtain a flexible gas supply and access to the prolific Permian Basin, Natural should be permitted to build its own pipeline. This would not preclude Natural and Transwestern some time in the future from entering into an exchange agreement.

### THE JOINT PIPELINE PROPOSAL

The City of Chicago contends that consideration should be given to the possibility that a single pipeline owned and operated jointly by Natural and Northern, rather than the proposed separate lines could result in substantial savings in transporting gas from the new fields in Permian Basin to existing main line facilities. Chicago suggests that the existing record indicates that such savings are likely and that, at least before the possibility is abandoned, the Commission should reopen the record to require the applicants and the Commission's staff to explore the question more thoroughly.

The Examiner found that with respect to studies of a joint line the record "has been satisfied on its basic points." He continued, "The possibility of a joint line has been raised and examined and the sound reasons for its rejection have been given on the record and in the briefs." He predicated this finding on the fact that a joint line, rather than resulting in substantial cost savings, would, when analyzed on a comparable basis, cost Northern more than would its proposed separate line. Further, he noted that "should Natural's flows on a peak day basis not keep up with Northern's *or* should Natural's load factor be less than 67 percent, as projected, Northern's costs would be increased substantially." For these and other reasons we agree that the joint proposal must be rejected.

---

[3] At this rate. Natural would reach 450,000 Mcfd in approximately four years instead of 8 or 10 years as estimated by staff (Transcript 1616).

The hearing record reveals that both Natural and Northern gave consideration to the possible advantages of a joint pipeline but both, independently, decided that the conceivable advantages thereof were outweighed by the disadvantages. Northern and Natural produced their studies and working papers. Northern's studies, which were introduced in evidence by the Minneapolis Gas Company, showed the costs of 30 and 34-inch joint pipelines under various conditions of load compared with Northern's proposal for a separate pipeline. The Northern study indicates that under conditions which in actuality could not reasonably be expected to exist, between one-half cent and one cent per Mcf could be saved by constructing a single 34-inch pipeline to carry the volumes of gas Northern and Natural seek to transport through their proposed 26-inch and 24-inch lines. The difficulty with any such showing, as Northern's witness pointed out, is that based on the individual characteristics of each company, conditions favorable to a joint transportation effort not only do not presently exist, but are almost certain to become less likely of achievement as the two pipeline's needs and operations diverge over periods of time. The Natural study was not put into the record, though Natural's work papers were made available to Chicago which chose not to pursue the matter.

The evidence in the record demonstrates, above all, the extreme difficulty of any effort to evaluate the relative utility of a nonexistent joint facility with specific proposals for separate lines. In light of the disparities which exist between Northern and Natural this case is particularly unsuited for experimentation with the novel notion of a jointly owned pipeline. For example, Northern projects that it will utilize 225,000 Mcf per day of capacity in the first year of operation. Natural, in that same year, expects to take 158,700 Mcf. This poses a complex allocation problem which is complicated even further as the ratio of takes deviates in later years. With the addition of each increment of gas, the allocation would have to be revised, an eventuality which would necessarily breed uncertainty.

We do not mean to suggest that joint transportation facilities can never be shown to be more in the public interest than separate facilities. There may well be instances where the advantages of joint facilities will outweigh the obvious loss in certainty and flexibility for the individual participants. This, however, is not such a case. In addition to the reasons already noted, the two pipelines are, along with El Paso and Transwestern (who have their own individual lines in the area) competitors for the large new reserves coming on the market in the Permian Basin.[4] Northern has already filed (in CP67-10) for authority to construct facilities necessary to attach new reserves in the Hamon field of the Permian Basin. Both companies can be expected to make future additions, albeit at different rates and at different times. Therefore, it appears that to require Northern and Natural to construct and operate a joint pipeline facility would only inhibit their potential development.

Nothing in the record or of which we can take official notice indicates that in this case reopening the record would achieve anything beyond delay. In short, on this record, we find that the long term advantages which will result from certificating two separate lines outweigh the possible short term advantage which might be realized through the construction of a joint pipeline.

Based upon the foregoing we find that both the Transwestern transportation proposal and the City of Chicago's suggestion that a joint pipeline should be constructed must be rejected and that the public interest requires the certification of separate facilities for Northern and Natural. Accordingly, Northern and Natural's applications will be certificated.

There is one matter which we believe requires further consideration. Based on the record in this proceeding it is clear that Northern's proposed pipeline would be adequate to handle its proven reserves in the Delaware Basin which support its application. However, based upon our knowledge of the prolific nature of the Delaware Basin, we are concerned as to whether it might be in the public interest for Northern to construct a larger diameter pipeline rather than perhaps having to loop the 26-inch line in the near future.

If fully compressed, the 26-inch line could be efficiently operated to accommodate 450,000 Mcfd. Based upon Northern's proven reserves as of July 1966, the time of the filing of its Hamon application (CP67-10), it is now obligated to take approximately 340,000 Mcfd.[5] If allowance is made for the 25 percent swing provided for in Northern's contracts, Northern would have required a line sufficient to transport 425,000 Mcfd as of July 1966. A 26-inch line would be adequate to handle this load; however, it is not adequate if Northern's estimate of probable reserves is added to the proven reserves.[6] Furthermore, Northern's application in CP67–260 filed March 10, 1967, shows that it plans to transport 476,000 Mcfd through the proposed line during the 1967–1968 heating season. Therefore, in view of our prior experience with development of reserves in the Permian Basin, and the fact that Northern's most recent showing of reserves is now nine months' old, we believe Northern should be required to file up-to-date data establishing the adequacy of the 26-inch line to transport the proven reserves from the Delaware Basin or, alternatively, file an amendment to its application in this docket for an appropriately sized line.

---

[4] Oil and Gas Journal, June 13, 1966.

[5] This obligation arises out of Northern's contracts which obligate it to take daily quantities at the ratio of 1 to 8,000 of proven reserves. The daily contract obligation automatically increases as the estimate of proven reserves increases.

As already indicated, we have rejected the suggestion that a joint pipeline would be a feasible alternative to the separate lines being certificated here. If it is ultimately determined that it would be more desirable for Northern to construct a line larger than its proposed 26-inch line, any joint pipeline would also have to be larger than the 34-inch line on which the joint line studies are based. A larger diameter joint pipeline would make the joint proposal even less attractive. The unit cost of operation decreases as the diameter of a pipeline increases. However, the incremental decreases are much smaller for the larger sizes of pipe. Thus the difference in unit cost for example between a 30-inch and a 36-inch line is less than half the difference between a 26-inch and a 34-inch line. This lessening in the incremental unit cost would make a larger joint line more undesirable than the 34-inch line which we have rejected.

## EVIDENTIARY MATTERS

Transwestern objects to the Examiner's exclusion of evidence on the potential of the Panhandle area. The evidence, as various parties argued, did not appear to be proper rebuttal. Apart from this, there is nothing to show the extent of Transwestern's interest in the Panhandle gas and we take notice that a greater part of the Panhandle reserves are owned by companies other than Transwestern, so that the reserves may not be available in any case for the proposed exchange.

Transwestern also objects to the Examiner's overruling its objections to certain evidence on transmission cost submitted by Natural's witness. While there may be infirmities in the evidence, we agree with the Examiner that these relate to the weight of the evidence rather than its admissibility. At any rate our determination here is not dependent on the computations of cost comparisons found in the record.

---

[6] Inclusion of the probable reserves would increase Northern's daily contract obligations to 473,390 Mcfd and its daily contract maximum to 591,737 Mcfd.

### ALLEGED ERROR ON FINANCING

Transwestern contends that the Examiner and the staff have misinterpreted its evidence on financing in that they concluded that a proposed 5 1/2 percent $25 million issue of debentures would be in addition to a presently outstanding $40 million issue of 5 percent debentures so that the percentage of debt in Transwestern's capitalization would become unduly high. While the evidence is somewhat confusing on the point, Transwestern appears to be correct that the new issue of debentures would be used to retire the older issue.

### ORAL ARGUMENT

In view of the full presentation of the issues involved in these proceedings in the briefs before the Examiner, exceptions and answers to exceptions, oral argument is not necessary and would further delay the completion of these proceedings.

*The Commission further finds*:

(1) The applicants, Northern Natural Gas Company, Natural Gas Pipeline Company of America, and Transwestern Pipeline Company are engaged in the transportation of natural gas in interstate commerce and the sale in interstate commerce of natural gas for resale, subject to the jurisdiction of the Federal Power Commission, and each of them is a "natural-gas company" as defined in the Natural Gas Act.

(2) All of the transportation of natural gas authorized herein will be made in interstate commerce for resale for ultimate public consumption subject to the jurisdiction of the Commission.

(3) Northern Natural Gas Company is able and willing properly to do the acts and to perform the service proposed in its applications under Docket Nos. CP65-1, CP65-91, and CP65-338, and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the facilities proposed by Northern Natural Gas Company in said applications are required by the public convenience and necessity and a certificate therefor as hereinafter ordered and conditioned should be issued.

(5) Natural Gas Pipeline Company of America is able and willing to do the acts and to perform the service proposed in its application under Docket No. CP65-169 to the extent that they are included in Phase II of this proceeding, and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(6) The construction and operation of the facilities proposed by Natural Gas Pipeline Company of America in its application under

Docket No. CP65-169, to the extent that they are included in Phase II of this proceeding, are required by the public convenience and necessity and a certificate therefor as hereinafter ordered and conditioned should be issued.

(7) Public convenience and necessity require that the certificates issued herein and the rights granted thereunder be granted without prejudice to the determination in any future proceeding before the Federal Power Commission in which Natural Gas Pipeline Company of America or Northern Natural Gas Company is a party of what portion of their total system facilities, respectively, should be included in their rate bases.

(8) The applications of Transwestern Pipeline Company under Docket Nos. CP65-208, CP65-236, and CP65-237, should be denied because the service and the operation and construction of facilities which it proposes in said applications are not, and will not be required by the present or future public convenience and necessity.

*The Commission orders:*

(A) Transwestern Pipeline Company's applications under Docket Nos. CP65-208, CP65-236, and CP65-237 are denied.

(B) A certificate of public convenience and necessity is issued to Northern Natural Gas Company authorizing it to construct and operate pipeline facilities from a point of connection with Northern Natural Gas Company's existing compressor station in Beaver County, Oklahoma, to the Coyanosa Field and the Gomez Field in southwest Texas, as described in Northern Natural Gas Company's applications under Docket Nos. CP65-1, CP65-91 and CP65-338, for the transportation of natural gas in interstate commerce upon the terms and conditions of this order.

(C) Within 20 days Northern shall file with the Commission data showing that its proven reserves in the Delaware Basin for which it has contracted as of the date of this certificate (whether or not the sale has been certificated by the Commission) are such that they can be handled by a 26-inch pipeline. If its proven reserves are of such a volume to require a larger-sized line, the 26-inch line shall not be constructed and Northern shall file an amendment in this docket for an appropriate sized line. The filings made pursuant to this subparagraph shall be served upon all parties and no construction shall commence until further order of the Commission.

(D) A certificate of public convenience and necessity is issued to Natural Gas Pipeline Company of America authorizing it to construct and operate pipeline facilities from a point of connection with Natural Gas Pipeline Company of America's existing Amarillo line in Moore County, Texas, to Natural's line connecting to the Dagger Draw and the Indian Basin in southeastern New Mexico, as described in Natural Gas Pipeline Company of America's application under Docket No. CP65-169, for the transportation of natural gas in interstate commerce upon the terms and conditions of this order.

(E) The certificates granted herein and the exercise of any right thereunder are conditioned upon compliance by Natural Gas Pipeline Company of America and Northern Natural Gas Company, respectively, with all applicable Regulations of the Commission under the Natural Gas Act and particularly Section 157.20 of those Regulations.

(F) Each applicant to whom a certificate is issued herein shall report promptly in writing and under oath the dates of commencement and completion of construction of facilities authorized herein and the date of commencement of service through such facilities. Such reports shall be filed with the Commission within 15 days after the completion of construction authorized herein.

(G) A certificate issued herein shall be void unless the applicant to whom the certificate is issued accepts it in writing filed with the Commission within 10 days after the date of issuance of this order.

(H) The decision of the Presiding Examiner is adopted as the decision of the Commission to the extent not inconsistent herewith.

(I) Exceptions not granted herein are denied.

(J) Oral argument is denied.

Commissioner Ross *dissenting.*

Ross, *Commissioner*, *dissenting:*

There comes a time when it is no longer advantageous to the public to permit individual parties to use or condemn land without consideration of more economic and socially desirable alternatives. For the electric industry, the *Scenic Hudson* case,[1] with its emphasis on transmission line routing and alternative sources of power, marked the timeliness of a complete approach, including all reasonable alternatives, in considering the licensing of projects in the public interest.

The same approach is now equally applicable to the gas pipeline industry, particularly in the certificate area. Gas pipelines must have rights-of-way and must expend considerable amounts of capital to get the gas to their ultimate consumers. Rights-of-way can mean disruption of a landowner's use of property, and thoughtless expansion of expensive pipelines can lead to higher prices for ultimate consumers who eventually bear the cost in the pipeline's rate base. One alternative to eliminating duplication of rights-of-way and pipelines in the gas industry is the construction of joint pipelines.

---

[1] *Scenic Hudson Preservation Conference, et al. v. F.P.C., and Consolidated Edison Co. of N.Y., Inc.*, 354 F. 2d 608 (CA2-1965).

The advantages are clear: less social disruption and costs because only one right-of-way and one pipeline are involved. There is the added advantage that the technology of the industry is such that larger diameter pipelines usually result in economies of scale that are reflected in lower unit costs to the ultimate buyer.

Both Northern and Natural, in the present proceedings, apparently considered the possibility of a joint or combined pipeline.[2] Both have approximately the same sources—reserves in the Permian Basin; both had to transport that gas approximately 300 miles northward to the same destination—the Panhandle area, where each presently has transmission lines practically overlapping each other's. However, both parties filed for separate pipelines, traversing parallel routes, sixty miles apart, to their transmission lines in the Panhandle.

At the request of an intervenor, the Minneapolis distribution companies, Northern produced its working papers for a 30-inch and a 34-inch joint pipeline, and these were presented in the record. The papers indicated potential, sizeable savings in capital and operating costs. A joint line of 30 inches, serving each company with 300,000 Mcfd had capital costs of $55.4 million, of which $27 1/2 million was allocated to Northern.[3] A joint, 34-inch line with a capacity of 600,000 Mcfd would total approximately $61 million, of which Northern was allocated approximately $30.4 million.[4] With added capital costs to provide 450,000 Mcfd level for each party (total: 900,000 Mcfd), the maximum projection by either party in this case, Northern showed a total cost of $73.9 million for a 34-inch joint line, of which $37.8 million was allocated to Northern.[5]

A separate, 26-inch line for Northern to deliver 450,000 Mcfd would cost $44.2 million. Operating costs were similarly estimated to be lower for a joint or combined line with savings to Northern alone of $880,000 annually at the 450,000 Mcfd level. The total costs of Natural's proposed facilities, designed to serve 450,000 Mcfd with compression, is $35.1 million. Thus, the total costs for the two separate lines to deliver 900,000 Mcfd would be approximately $79.3 million. Contrasted with the $73.9 million for a 34-inch joint line to deliver an equal amount, the two separate lines would add approximately $5 million more to the rate base of Natural and Northern.

It is little wonder that the intervenors representing municipalities and distribution companies wished to pursue the alternative of a joint pipeline in the hearings. However, when counsel for the City of Chicago attempted to compare the cost differentials between Northern's proposal for a separate line and the joint line in the working papers, Northern's counsel stated:

---

[2] In this case, a joint line is a line owned jointly by Northern and Natural. A combined line is a line that would be owned and operated by Northern, who would transport gas for Natural.

[3] Exhibit 135, p. 4.

[4] *Id.*, p. 10.

[5] *Ibid.*

> * * * frankly, I don't believe any of these studies (Exhibits 135-138) have been explored to the point where they really and truly can be said to be on a comparable basis in every respect * * *[6]

Northern's own policy witness also described the working papers as strictly preliminary studies. As stated by the witness, "We didn't even go to the point of figuring what Natural's costs would be. We abandoned it prior to that point."[7]

Moreover, when Chicago's counsel attempted to elicit further information on the joint pipeline from the sole witness familiar with the only exhibits pertaining to a joint line, the Examiner sustained Northern's objections to Chicago's line of questioning and told Chicago's counsel that there was "no need to cross-examine this witness on something he is not sponsoring."[8]

There is little indication in the record that the interveners could have elicited variations on the joint pipeline proposal from the companies themselves. This is reflected by the following statements of Northern's counsel:

> We have presented the studies; we have duplicated our working papers and it seems to me if somebody wants to put affirmative evidence on from that point, it is up to them and *not* to Northern. (Emphasis added)[9]

The City of Chicago and the Suburban Rate Authority then sought assistance from the Commission Staff by directing a motion to order an independent study by Staff on the joint pipeline issue. When the Examiner inquired as to the feasibility of such a study by Staff, he was informed by Staff counsel that Staff was "unable to provide the type of study * * * requested." The reasons given were the unavailability of Staff due to "other current assignments of high priority" and "of greater importance, the Staff has never had, nor has now, the resources available to it to perform this assignment."[10]

In response, Chicago's counsel stated:

> There is no evidence pertaining to Natural's study, and I think one was made—I am not too sure of it, but the City feels that the Staff acts as a referee in these proceedings, more or less taking an independent and unbiased position, with an eye towards the public interest, convenience and necessity. That

[8] *Ibid.*, p. 1756.
[9] Transcript, p. 1760.
[10] *Ibid.*, p. 3645.

> is why the motion was directed at the Staff. We feel that since the pipeline was abandoned by both companies, we feel that any evidence submitted by them might tend to be weighted in favor of their now pending applications, rather than to the feasibility and economic convenience of such a joint study. That is why I renew the motion for the reasons mentioned on Wednesday and I won't be repetitious, sir.[11]

Chicago's motion was then denied; it has been renewed by Chicago in its briefs to the Examiner and to the Commission on exceptions to the Examiner's decision.

Thus, it can be seen that a perfectly possible alternative was left high and dry. No record was made from which the joint proposal could be resuscitated full-blown at a later time if the Commission decided it to be in the public interest.

The majority expresses concern whether Northern's 26-inch line is any longer adequate in view of the increase in Northern's reserves in the Delaware Basin and its contract requirements. Northern estimated that it would utilize a fully-compressed 26-inch line in its fourth year of operation, or for 1969–1970. Here we are at the beginning of 1967, however, and Northern's present contract provisions would call for a contract maximum of 590,000 Mcfd.

Rather than remanding the case to take account of the obvious, significant changed circumstances, the majority grants certificates to both Natural and Northern to construct pipeline facilities, finding public convenience and necessity served, as required by the statute. *But*, the majority requires Northern to tell the Commission within 20 days whether a 26-inch line is still appropriate. Moreover, the majority, in essence, says: "Don't worry, Northern, you've got a certificate for a line (or the notion of some line); just assure us that you won't build a line that's too small because that would disprove our original finding that your line, as proposed, was in the public interest."

It is clear to me that these maneuvers are designed to sidestep further consideration by the Staff or the Commission of the record on the joint pipeline issue in light of the new reserves situation. By characterizing Northern's probable showing as an amendment rather than a new application, the majority places the City of Chicago in an impossible situation. First, the City must wait 20 days to find out what Northern will file; then, in the remaining 10 days left, it must assess Northern's statement, plan its strategy in view of any new evidence, decide whether to petition for rehearing, and if granted, to write briefs to meet the new evidence.[12] At the same time, it must juggle consideration as to the certification of Natural, *i.e.*, whether to contest the Commission's decision with regard to Natural in court if the Commission rejects a petition for rehearing on the issue. Meanwhile, back at the Commission, the only matter left before the Commission is Northern's application, or amended application. Will Chicago have standing to contest the amended application? After all, its bird has flown the coop. Even if the City had the resources and stamina to play this procedural game with the Commission, the burdens the majority decision places on this intervener and on subsequent courts is too much. Anyone familiar with this record knows that the Northern, Natural and the joint pipeline proposals cannot be separated; they are of one fabric and must be so considered. There is no justification on the record for the flat statement made by the majority that "a larger diameter joint pipeline would make the joint proposal even less attractive." The comparison of economic gains from a separate 26-inch line and a separate 24-inch line to possible gains from a 36-inch line were simply not discussed anywhere. How such an unknown quantum as the 36-inch line can become "more undesirable" than an already-shadowy 34-inch line proposal is simply beyond substantiation by the majority on the basis of the record in this case.

---

[11] *Ibid.*, p. 3646.

[12] There is a statutory requirement of 30 days in which a party must file for rehearing.

In addition to the "procedural" obstacles the majority would throw in the way of the City, the majority cannot escape the fact that this record is without a presentation of a possible alternative joint line study by Natural, without an independent analysis by Staff showing total benefits to all parties and without a truly comparable study of a joint line in the words of the party sponsoring the sole exhibits on a joint pipeline. In addition, the fact that we have 4-year projections by the companies of their takes and markets in the record that have proved decidedly inaccurate within a 2-year period leads me to question the certainty with which the majority seems able to find Northern's project in the best public interest. I, for one, do not feel the record so complete on the joint pipeline issue that I can reject further consideration and certificate two projects, one of uncertain dimensions, that may well moot the issue for all intents and purposes.

In the *Scenic Hudson* case, the court reminded the Commission that "the right of the public must receive *active* and *affirmative* protection *at the hands of the Commission.*" (emphasis added)[13] Part of that active and affirmative protection includes a full record. As noted by Northern in Docket Nos. CP66–212, CP66–215 (*Great Lakes* case):

> The strained efforts of Great Lakes, *et al.* to find technical distinctions between the cited cases (*Michigan Consolidated Gas*

---

[13] *Scenic Hudson, supra.*, p. 620.

*Co.* v. *F.P.C.; City of Pittsburgh* v. *F.P.C.*, and *Scenic Hudson Preservation Conference* v. *F.P.C.*) and the instant situation reflect a misunderstanding of the broad scope and nature of the Commission's responsibility and duty in both certificate and licensing proceedings. The cases clearly hold that in both types of proceedings the Commission is charged with the primary responsibility and duty to protect the public interest and that its vision is not to be limited to the horizons of the private parties to the proceedings. In all three cases, Commission orders granting certificates and licenses were set aside by the Courts and remanded to the Commission for its failure to give consideration to the alternative plans presented to it even after the hearing record was closed.[14]

Furthermore, Northern stated that "only the Federal Power Commission car decide and it *must* have before it a *complete record* containing all available information in order to render an appeal proof decision." (Emphasis added)[15] In a footnote, Northern added that "an aggrieved party could * * * claim error on the part of the Commission for its failure to consider evidence regarding the Staff's 'Public Interest Project'" which was introduced by Staff for the first time in its brief in that case.

Northern pointed out that Staff's Public Interest Project was a "possible" and "available" alternative similar to that proposed in *Scenic Hudson*, despite the fact that there was no record evidence to support the project.[16] Had the Examiner in *Great Lakes* refused to reopen the record for additional evidence on Staff's project, Northern stated that the Examiner could only dismiss the competing applications or the Commission would have to remand the case to explore and evaluate properly the Staff's project. In view of the delays that would arise, Northern requested that the record be reopened. I couldn't agree more with just such an approach in this case, in view of the similar circumstances of both cases. For these reasons, my dissent is directed at future interveners who will be forced, if the Staff is not required by the Commission to implement the *Scenic Hudson* standard, to present full cases on alternatives before the Commission.

*Transwestern's Proposed Exchange*

There have been indications that Transwestern no longer stands willing to provide service to Natural as proposed in this consolidated hearing. However, Transwestern has not filed anything to notify the Commission of any change in intentions, which I presume would have been done. Therefore, I am assuming for purposes of answering the majority's decision, that Transwestern's position in the record has not changed.

---

[14] See Answer of Northern, *et al.*, to Appeal of Great Lakes Transmission Co. * * * from Ruling of Presiding Examiner, in Docket Nos. CP66–110, CP66–212, *et al.*, at p. 8.

[15] *Ibid.*, at p. 9.

[16] *Id.*

I cannot agree with the majority's rationale in rejecting Transwestern's exchange proposal with Natural. Transwestern's proposal would deliver 140,000 Mcfd from its Panhandle reserves to Natural's transmission system in the Panhandle. In exchange, Natural would deliver 140,000 Mcfd from its Permian reserves into that part of Transwestern's transmission line which extends from the Permian Basin westward. The amounts above 140,000 Mcfd required by Natural would be flowed mainly through Transwestern's existing Panhandle lateral northwards from Natural's Permian reserves to its transmission line in the Panhandle.

Transwestern's line in the Permian Basin to the Panhandle area is already built. Under normal operation conditions, it carries 140,000 Mcfd over a line that can carry 370,000 Mcfd optimum with compression. Under an "interim" arrangement, approved by the Commission in 34 FPC 507, the line is carrying 10,000 Mcfd in a westward direction. The balance is being made up by an exchange agreement whereby Natural's Permian gas is flowing to Transwestern's Western markets and Transwestern's Panhandle reserves are being delivered to Natural's main transmission system in the Panhandle area, which is closer to Natural's market.

If Natural's pipeline is approved, this will create a cross-haul situation with two separate pipelines of approximately 250 miles in length, one bearing gas from north to south for Southwestern customers; the other bearing gas from south to north for Midwestern customers of Natural. On the other hand, an exchange arrangement along the lines proposed by Transwestern would continue the exchange described above for 140,000 Mcfd and utilize Transwestern's existing line to carry Natural's gas from its Permian reserves to the Panhandle.

There is some question as to the scheduled takes by Natural from its Permian reserves; the City of Chicago questioned the even more basic issue of whether Natural needed the Permian reserves at all. The Staff estimated that it would be 8–10 years before Natural would reach the 450,000 Mcfd volumes for which it is designing its pipeline. The unutilized capacity on Natural's line will have to be borne by Natural's customers in its rate base. The sums involved are considerable. Transwestern's project facilities would cost $3.4 million and Natural's facilities $20.6 million. The estimates for facilities at every level of service including the 450,000 Mcfd level, show that Transwestern's facilities would be cheaper than Natural's. At the

450,000 Mcfd level, there is a difference of $17.7 million.[17] As for levels beyond 450,000 Mcfd, the Transwestern arrangement is capable of a maximum 510,000 Mcfd (140,000 Mcfd from Panhandle exchange and 370,000 Mcfd from Natural's Permian reserves over Transwestern's lateral), or enough to take care of Natural's supply requirements from the Permian Basin for some time.[18]

In view of the sizeable differences in cost between Transwestern's and Natural's proposals, it is extraordinary to me that the majority finds it unnecessary to make any cost determinations because of "other grounds." One such ground is the uncertainty of Transwestern's ability to deliver 140,000 Mcfd from its Panhandle reserves. In order to support the statement of its policy witness that Transwestern would be able to deliver 140,000 Mcfd from its Panhandle reserves, Transwestern attempted to introduce additional evidence as to the availability of new reserves in the Panhandle region. Its proffer of evidence was denied by the Examiner. It is well-known to this Commission that development is continuing in the Panhandle and nearby Anadarko regions. Presumably, Transwestern will be in as good a position to acquire these new reserves as any other pipeline. Certainly, the majority gave this much credit to Natural's management when certificating a separate pipeline for Natural in the Permian Basin which would have an ultimate capacity of 450,000 Mcfd although the present showing of availability of reserves to Natural relates only to the 158,000 Mcfd initially proposed by Natural.

Surely, the weight of the evidence that Transwestern will not be able to maintain the 140,000 Mcfd level—with the absence from the record of Transwestern's proffer to show new development in the Panhandle—is not overwhelming. Indeed, the fact that Transwestern is seeking to sell gas from the Panhandle indicates some excess of gas over needs, rather than a deficit position, as the majority indicates. If the supply issue is believed to be critical, an exchange agreement could have been conditioned on a "best-efforts" condition on Transwestern's part.

Other reasons given by the majority for preferring the Natural proposal to Transwestern's include the "hazards" of future, possible rate increases by Transwestern and the "severe competitive disadvantage" that Transwestern's proposal would impose on Natural. Thus, it seems that the majority would require a guaranty by Transwestern of stable rates to Natural over some given length of time. Since there is no reason to suspect that Transwestern's costs will increase any more than any other pipeline's, it would appear that the majority's concern is aimed at the allegedly volatile nature of Transwestern's incremental rates. If this is the case, however, there is little reason for the majority's apprehensions for Transwestern's facilities are, for the most part, built; their costs are known. The costs of the additional facilities that will be built as Natural's load increases are in the record and were fully allocated to Natural in the rates proposed by Transwestern. Moreover, had the majority applied the Staff's computation of rates rather than Transwestern's—which rolled in the costs of the entire eastern portion of the Transwestern system utilized by Transwestern to serve Natural—the costs for the Transwestern service would have been lower than those rates proposed by Transwestern. In sum, it is hard to discern what the majority views as such a danger *** could it be inability to regulate just and reasonable rates for Transwestern?

---

[17] *Transwestern Pipeline Co.*, Brief on Exceptions, at p. 22.

[18] Natural estimated that its annual pipeline capacity growth was expected to be 135,000 Mcfd—185,000 Mcfd over the next three years.

As for the "severe competitive disadvantage" that would befall Natural, the majority is hard pressed to describe how that would occur. The majority concedes that it must "assume that Transwestern would use its best efforts in behalf of Natural," but somehow its duties to its present customers, Cities Service and Pacific Lighting, will preclude Transwestern from performing satisfactorily toward Natural. It has never been my understanding that subsequent customers of a pipeline receive a lesser priority of service than previous customers, yet that is presumably what the majority believes to be the case. Moreover, the Transwestern gas in the Panhandle area is limited to 140,000 Mcfd for Natural; additional supplies have always been assumed by Transwestern to be forthcoming from Natural's reserves in the Permian Basin. If the majority is attempting to say that Natural would have difficulty in causing Transwestern to loop or add compression on its Panhandle lateral, I find this argument of little merit. Any reluctance on Transwestern's part could have been mitigated by a condition that Natural had the right, subject to Commission approval, to increased volumes carried by the Panhandle lateral by constructing the facilities itself. This very same condition exists in a contract between El Paso and Northern for the transportation by El Paso of Northern's gas from the Permian Basin.

The majority does not lack positive reasons in favor of Natural's separate proposal, however. It cites the freedom of Natural to avoid cooperating with its competitor and to enter aggressively into contracts with producers. Where cooperation makes such good sense, as in this case—with evident savings to customers of both Transwestern and Natural—I find the majority's enthusiasm in this matter puzzling. First, it is well-known to the majority that lack of access to the Permian Basin has not halted Natural and Northern from entering into contract with producers there.

As to the second reason, is "flexibility" or the freedom not to coordinate even if there are considerable savings to the consumers to prevail above everything? After all, the majority did not even find it necessary to make cost comparisons in this case between Transwestern and Natural's proposals to estimate monetary savings to the consumers. It was simply enough that Natural didn't want to coordinate its facilities with Transwestern.

The fact of the matter is, Natural has to file with the Commission for any additional increments since its present application calls only for a certificate to deliver 158,000 Mcf.[19] There is no more of a regulatory burden to Natural if Transwestern were also a party to a proceeding to deliver more gas to Natural, from Natural's own reserves. In the words of one intervener, "*** the regulatory process is not an impediment to effective functioning by Natural under Transwestern's proposal. Regulation is a fact of life with which both Transwestern and Natural have been successfully conducting their businesses."[20]

To their credit, the majority seems to recognize the validity of the preceding intervener's argument by their sole statement that "this (certification of Natural) would not preclude Natural and Transwestern sometime in the future from entering into an exchange agreement." In view of Staff counsel's statement that Natural is not expected to fill its line for 8–10 years and the other prolific areas from which Natural may draw to supply its market other than the Delaware Basin, the majority's single statement is of little comfort. In the interim, all the advantages that could have flowed from utilization of Transwestern's excess capacity will have been irretrievably lost to the consumer.

There is another alternative which the majority did not discuss in its opinion. Staff counsel during the hearings inquired into the possibility of a sale by Transwestern of its Panhandle lateral to Natural and received a negative response from the Transwestern witness. In my opinion, a Transwestern proposal conditioned to permit additional looping or compression by Natural in the event that Transwestern would refuse to provide for additional deliveries of Natural's gas from the Permian and possibly a condition to require best efforts or at least no discrimination among Transwestern's customers in the Panhandle would probably provide a satisfactory arrangement for Natural to get its reserves out of the Permian Basin economically and still provide adequate safeguards. On the other hand, had I shared some of the doubts of the majority as to the ability of Natural and Transwestern to maintain a satisfactory transportation agreement as proposed herein, I believe the sale to Natural of Transwestern's Panhandle lateral would have been preferable to certification of a separate pipeline for Natural. The lateral would most likely have been used solely for purposes of transporting Natural's gas anyway and its use as proposed by Transwestern would have eliminated the need to construct another new pipeline where an existing one would suffice.

---

[19] Any loophole provided by the Commission's budget-type authorizations to a party was not intended by me to be a favorable aspect for that party in a competitive hearing, contrary to the majority's opinion.

[20] Brief on Exceptions for the People of the State of California and the Public Utilities Commission of the State of California, p. 9.

### *Rates*

Various rates reflecting different cost allocations were presented by the parties as reflected in the following schedule:

[In cents]

| Level of service at 66⅔ percent L.F. | Natural | Transwestern | Staff (to reflect rolled-in costs) | |
|---|---|---|---|---|
| | | | 6¾ percent | 6¼ percent |
| 158,000 Mcfd | 7.84 | 4.46 | 4.01 | |
| 225,000 Mcfd | 6.46 | 4.12 | | |
| 300,000 Mcfd | 5.26 | 3.59 | | |
| 375,000 Mcfd | 4.98 | 3.56 | | |
| 450,000 Mcfd | 4.82 | 3.60 | 4.70 | 4.57 |

The difference in rates at the initial level of service could mean over half a million dollars annually to Natural's customers. In addition, the California customers of Transwestern will probably receive a lower rate from fuller utilization of Transwestern's lines and consequently lower overall costs because a lower border price for gas will mean lower intrastate California gas prices. Yet the majority chose only to "refer * * * to some of the cost comparisons made on the record in order to delineate the contentions of the parties," because of the overwhelming weight of the "other grounds" discussed previously.

Before I can accept the majority's conclusion that the pipelines can individually pursue their ways despite the sizeable potential savings to the consumers in this case, I feel a thorough examination of the various rates presented is a necessity.

Transwestern's rate combines the incremental cost and sharing-of-the-benefits principles. Presumably, the application of these principles is novel in the gas industry; it is not so novel in the electric industry. The intent of Transwestern's rates is to increase utilization of existing facilities. If this can be accomplished without occasioning injury to any of the parties, the validity of its use seems evident. Here, Transwestern has an exchange situation which, if approved, will literally free an existing pipeline, the Panhandle lateral, for another use. The present customers of Transwestern are paying the fixed costs of the lateral now; any contribution to these costs by procuring a new user will lower the costs for the present customers. Transwestern fixed this "contribution" at half the difference between Natural's incremental costs and Transwestern's incremental costs. The rate proposed by Transwestern incorporated the cost of adding new facilities to the existing facilities plus the contribution. The end result is that Natural gets volumes of gas equivalent to that proposed by its separate line at lower costs and the California consumers of Transwestern may get a rate reduction as a result of the added revenues.

It is important to note that the California interests, in their Brief of Exceptions, objected to the Examiner's statement that California had some "misgivings" about Transwestern's project. The California interests stated that "California supports Transwestern's proposal in Docket No. CP65-237 without misgivings because it believes that proposal to be in the public interest * * * California simply pointed out to the Examiner, on brief, that it seeks to achieve a reduction in Transwestern's rates to its existing California customers to reflect the benefits to be derived from the exchange. These benefits must sooner or later be realized by the ultimate consumers of natural gas in California, whose protection is the primary aim of the Natural Gas Act." [21]

The major objections to Transwestern's method of computing rates come from the Staff and Natural. Staff used the rolled-in cost method, which takes the cost of all Transwestern's facilities east of Roswell and allocates the cost among the parties on an Mcf-mile basis. The resulting rate is even lower than the proposed Transwestern rates and considerably lower than Natural's rates. Natural's rates are based on building its separate facilities and it objects to Transwestern's rates as unstable. However, under either the Staff or Transwestern's method, the rates are considerably lower than Natural's and it is difficult to see how either method would lead to higher rates than those proposed by Natural. Therefore, I cannot reject Transwestern's proposal, as the majority can, when its certification would, under any foreseeable outcome of the rate case which would follow certification, lead to lower rates for Natural's customers than the project being certificated today.[22]

Finally, I would object to the inference in the majority's opinion that incremental rates should be rejected simply because they, like every other rate, are subject to change in the future. The 1967 Annual Report of the Council of Economic Advisers, in its section on regulatory policy, states:

> The broad issues are often the same as for the nonregulated sectors. Regulation like other Government policies, must not be diverted to protecting the established positions of particular

---

[21] California, Brief on Exceptions, p. 10.

[22] California requested a rate case if Transwestern's application were granted.

> firms or industries at the expense of economic efficiency. Nor must excessive reliance on *uniform prices* preclude the use of price differences to achieve the best use of capital intensive technologies. [Emphasis added] [23]

Transwestern has presented a rate schedule that appears to have considerable merit and appears reasonable in view of the facts of this case, *e.g.*, the schedule of takes by Natural; the avoidance of cross-hauling; the benefits to the California consumers. Although final resolution of all the issues is to be left to a rate case, enough was said in the record to warrant more affirmative consideration of Transwestern's proposal by the majority.

## INITIAL DECISION

## OF THE PRESIDING EXAMINER GRANTING AND DENYING CERTIFICATES UNDER SECTION 7(C) OF THE NATURAL GAS ACT

(Issued June 22, 1966)

LANDE, *Presiding Examiner:* We are now concerned only with the issues and matters presented for consideration and decision in Phase II of this proceeding. This concerns the proposals of Northern Natural Gas Company (Northern) and Natural Gas Pipeline Company of America (Natural) to construct and operate facilities to connect large supplies of contracted gas reserves in the Delaware Basin to their respective pipeline systems and the alternative proposals of Transwestern Pipeline Company (Transwestern) to transport certain volumes of gas for Northern and/or Natural by means of Transwestern's existing and certain proposed facilities. Northern and Natural oppose Transwestern's application, preferring to construct their own facilities and transport their own gas. All three applicants are natural gas companies as defined in the Act. Northern's and Natural's applications on the one hand and Transwestern's on the other are mutually exclusive.

This consolidated proceeding is to determine, among other things, the more desirable manner of meeting the long-term needs for natural gas in the vast northeastern section of the midwest area served by Northern and Natural. The central issue is which of the applicants better meets the requirements of Section 7 of the Natural Gas Act. In other words, does "the present or future public convenience and necessity" require certification of Northern's and Natural's or of Transwestern's proposal?

The record shows, and it is undisputed, that Northern's and Natural's projects present no serious problems as to design, location, financing, gas reserves, storage facilities, cost, markets and economic feasibility. The hotly disputed matters relate to Transwestern's application to render the proposed service to either Northern or Natural or to both of them. Northern and Natural consider Transwestern's proposal detrimental to their own interest and to that of their customers. The cost of service under the alternative proposals is one of the prime factors to be considered in deciding whether the public convenience and necessity require that Northern's and Natural's gas be transported from the Permian Basin to the Texas Panhandle through pipeline facilities constructed, owned and operated by Northern and Natural or through Transwestern's facilities. Differences between costs of service presentations reflect in part differences in investment in facilities to render the service. Cost-of-service computations and witnesses were presented by Transwestern, Natural, Northern, and the Commission's staff. Each of the applicants and the staff used methods of computing costs embracing different cost allocations, different assumptions, and different classifications of facilities and cost and, consequently, reached different results. These different approaches will be discussed herein and the selection of applicants will be made on the basis of the preponderance of cost evidence coupled with the broader considerations of public convenience and necessity.

---

[23] 1967 Annual Report of the Council of Economic Advisers, p. 117.

### *History of the Proceeding*

By Commission orders issued March 16 and May 12, 1965, various certificate applications were consolidated for hearing and decision under the above dockets. The hearings were held in two phases. Phase I dealt with a conventional system expansion of Natural in Docket No. CP65-169 and an interim exchange arrangement between Natural and Transwestern in Docket Nos. CP65-320 and CP65-325. The Presiding Examiner's decision in Phase I granting certificates as requested was issued on August 3, 1965, and the Commission's order adopting the Examiner's decision was issued on August 13, 1965, 34 FPC 507.

This Initial Decision is concerned only with the issues and matters presented for consideration and decision in Phase II of this proceeding. The record in Phase II shows that Northern actively seeks to procure new gas supplies and attach them to its system for transportation to its markets. It has contracted with producers in the Coyanosa and Gomez Fields of the Delaware Basin, Texas, for some 2.6 trillion cubic feet of gas reserves and is continuing to negotiate for additional reserves. After having contracted for a substantial quantity of the Coyanosa gas in the spring of 1964, Northern filed an application in Docket No. CP65-1 for a certificate authorizing the construction and operation of some 42 miles of 24-inch pipeline to transport this Coyanosa gas to its existing Permian Basin facilities at Kermit, Texas. Presently Northern's Permian Basin facilities are not directly connected to its main system. Its gas is brought to its main system by way of an exchange and transportation arrangement with the El Paso Natural Gas Company. During the summer of 1964, Northern contracted for additional reserves in the Coyanosa Field and, on October 6, 1964, filed an application in Docket No. CP65-91 for authorization to construct and operate some 365 miles of 26-inch pipeline and related facilities which would connect its present Permian Basin facilities (and those applied for in Docket No. CP65-1) with its main transmission system at Beaver, Oklahoma. In this application Northern stated that it was also negotiating with Humble Oil & Refining Company for large additional reserves in the Gomez Field which is 12 miles south of the Coyanosa Field. A contract for these reserves was executed on November 4, 1964. The purpose of this new line is to provide means of attaching and utilizing Northern's reserves in the Delaware Basin and also to provide a direct connecting link between Northern's present extensive Permian supply facilities and its main pipeline system.[1] The line was designed to have an optimum capacity of 450,000 Mcf per day.

On April 23, 1965, an application was filed by Northern in Docket No. CP65-338. By this application Northern seeks authorization to construct and operate some 12 miles of 24-inch pipeline to connect its Gomez Field reserves with the line proposed in Docket No. CP65-1.

---

[1] The Permian Basin is a geographic term applied to the general producing region of West Texas and Southeastern New Mexico. The Delaware Basin is a geologic province within the larger Permian Basin area.

Meanwhile, Natural had contracted for reserves in another area of the Permian Basin north and west of Northern's gas and, on December 11, 1964, filed an application in Docket No. CP65-169 for authorization to increase its sales and expand its system. Included in this application were the pipeline facilities required to transport its new Permian Basin supplies to its existing system.

On November 27, 1964, Transwestern filed a Petition to Intervene in Docket Nos. CP65-1 and CP65-91 stating that its pipeline, designed to flow gas in a generally westerly direction, was operating at substantially less than optimum capacity and that it would file applications seeking authorization to expand its supply laterals and provide Northern with a service which would eliminate the need for the construction and operation of the south to north facilities proposed by Northern. On January 11, 1965, Transwestern filed its application in Docket No. CP65-208, a proposed alternative to Northern's application in Docket No. CP65-1. On February 9, 1965, Transwestern filed its applications in Docket Nos. CP65-236 and CP65-237 proposing alternatives to Northern's application in Docket No. CP65-91 and Natural's application in Docket No. CP65-169, insofar as it concerned new Permian Basin facilities. Transwestern proposes to take delivery of such volumes of gas at points on its existing West Texas lateral and to redeliver equivalent volumes to Natural and Northern in the Panhandle area by transportation and exchange. Under its proposals here, Transwestern's Panhandle gas reserves will be delivered to Natural and/or Northern in the Panhandle area. Transwestern's service to California will be maintained by exchange volumes delivered to Transwestern in the Permian area. The flow of Transwestern's Panhandle lateral will be reversed in order to transport whatever additional volumes are required for the redelivery of equivalent volumes.

The hearing on Phase II commenced on October 5, 1965, and continued intermittently for nineteen days of hearing. There were 33 interveners besides the applicants. Final briefs were filed on May 4, 1966.

### *The Controversy*

Northern and Natural wish to expand their facilities for transporting natural gas from the Permian Basin to their customers in the Midwest. Ordinarily they would have had little difficulty in obtaining the necessary certificates. They readily meet the certification requirements of the Natural Gas Act. They presented proper evidence about their technical, economical and financial qualifications. However, Transwestern has submitted to the Commission a counterproposal suggesting that Northern and Natural utilize the unused capacity of its pipeline which was originally designed to serve the need of Southern California customers. Transwestern proposes rates which under a cursory examination should appeal to Northern and even more so to Natural. As will be discussed later, Transwestern's charges are attractive during the first year or two of service, circuity notwithstanding.[2] Subsequently, the cost of providing additional facilities to meet the anticipated growth in demand of gas changes the picture. When the Mcf daily requirement increases, Transwestern's proposal may or may not remain attractive to Northern and Natural. Had the parties been able to reach a mutual understanding, it is quite likely that such an agreement would have been approved by the Commission. However, both Northern and Natural refuse to accept Transwestern's offer. They claim that the rates proposed by Transwestern are "inducement rates" for the initial period of operations which are not likely to remain in force for any appreciable length of time. They contend that Transwestern's rates are subject to increase under pressure from the California customers and also as the outcome of surveillance of regulatory authority. Furthermore, Northern and Natural would rather not enter into binding obligations with Transwestern, their competitor for gas in the Permian Basin area.

---

[2] The transportation distance from Coyanosa to Beaver via Northern's facilities is only 406 miles as compared to a distance of 533 miles via Transwestern's facilities.

Transwestern demonstrated during the hearing that its offer was a sincere one. This company is obviously anxious to make greater utilization of its facilities and would undoubtedly make a best effort to stand by the proposed "inducement" rates. Northern's and Natural's argument that the transportation proposal is not acceptable because of competitive reasons is not convincing. Although competition is an important consideration it does not appear to be controlling when the use of some other company's facilities results in a significant saving. Thus so far Northern has been successful in obtaining substantial Permian Basin gas without having its own pipeline connecting its Permian facilities to its main line transmission facilities in Oklahoma. The record shows that companies similarly situated have done business before whenever it was worth their while. Here, Northern and Natural evidently do not think that it is worth their while. As will be detailed later, their numerous customers intervened in this hearing and strenuously opposed Transwestern's proposal.

We shall first discuss Northern's and Natural's proposals and then deal with Transwestern's counterproposal as well as the positions of the various interveners herein.

### *Northern's Proposal*

In Docket No. CP65-1, Northern seeks authorization to construct a 42-mile 24-inch line from the Coyanosa Field to a point on its present Permian Basin system at Kermit, Texas, where it will connect with the new 26-inch line proposed in Docket No. CP65-91 as well as with Northern's present Permian Basin facilities. The total cost of the Coyanosa to Kermit facilities is estimated to be $3,392,600 including interests and overheads. These facilities have been constructed under a temporary certificate issued September 24, 1965. The facilities for which authorization is sought in Docket No. CP65-338 consist of 12.1 miles of 24-inch line and appurtenant facilities which will connect the Gomez Field to the Coyanosa to Kermit Line. The cost thereof is estimated at $1,015,600 including interest and overheads.

In its application in Docket No. CP65-91, Northern proposes to construct and operate 364.9 miles of 26-inch pipeline running from Kermit, Texas, to Northern's existing main line station at Beaver, Oklahoma. In the first year of operation one 4000 horsepower compressor station will be required to handle the peak day flows of 225,000 Mcf. The total cost of the pipeline and compressor as applied for in this application is $33,013,500.

The total cost of facilities for which authorization is sought herein by Northern is $37,422,700. The adequacy of the proposed facilities and the reasonableness of such costs are not disputed.

Northern's Witness Peirce testified about the total incremental cost of service per Mcf for the first four years of operation of the new supply system. He said that while the first year cost of service is 7.34 cents per Mcf transported, by the fourth year, when the optimum efficiency of the 26-inch line is realized, the total incremental transportation cost of service per Mcf, for an average haul of well over four hundred miles, is 4.5 cents.

In addition to the incremental cost of service for the new supply facilities, Northern presented a systemwide cost of service for the first three years of operation which showed that, including the facilities proposed herein and those that will be required to transport the full 450,000 Mcf per day as projected, its systemwide rate of return will be 6.20 percent in 1966, 6.28 percent in 1967 and 6.36 percent in 1968.

Northern estimates that by the end of 1974 its saleable contract demand capacity based upon the requirements of its existing customers alone will exceed two and one-half million Mcf per day. Further, the full potential market that will be available to Northern in 1974 is nearly three and one-half million Mcf per day. Northern will allegedly require transportation capacity of 225,000 Mcf per day to carry its Delaware Basin gas to its main line at Beaver, Oklahoma, in the year 1966; by the fourth year of operation, 1969, it will require the expanded capacity of 450,000 Mcf per day.

Northern produced copies of its contracts held in the Coyanosa and Gomez areas of the Delaware Basin, Pecos County, Texas. Net acres under contract to Northern in the Coyanosa Field total 9,006; net acres contracted in Gomez Field total 7,287. The contracts provide for a price of 16 cents per Mcf with one-cent escalation every five years to a maximum price of 20 cents per Mcf. Each contract has a term of 25 years and provides for the delivery of high pressure (1000 psig) pipeline quality gas at the outlet of a treating plant.[3]

After a build-up period, Northern's basic obligation in both fields is to take the residue gas volumes remaining from production of one Mcf for each eight thousand Mcf of recoverable reserves. Estimates of the gas reserves in the Coyanosa and Gomez Fields were presented by Witness Miller. The total estimated dedicated proved and probable reserves of pipeline quality gas in both fields are 2 trillion, 601 billion, 299 million cubic feet as of December 31, 1964. Of this total volume, the reserves attributable to Gomez Field are 1 trillion, 226 billion, 527 million cubic feet. The reserves attributable to Coyanosa are 1 trillion, 374 billion, 772 million cubic feet of gas. Mr. Miller testified that all of the reserves that he attributed to Coyanosa could now be considered proved and that of the probable reserves attributable to the Gomez Field more than one-half will be proved within eighteen months and that all will be available within three years. Northern submits that it needs the Delaware Basin reserves presently under contract. Northern's Witness Brady prepared a ten-year input summary using Northern's minimum take obligation for each source of supply as established by contract or by state regulation. Mr. Brady concluded that, on a minimum take basis, the total of the input by sources meets the system input requirements until the year 1970, at which time deficiencies will occur and that without Delaware Basin supplies, Northern would need to search and contract for an equal amount of reserves in some other area.

Witness Plourde described Northern's plan for financing and described its outstanding securities. The gist of his testimony is that funds for the proposed facilities and for other construction projects will be obtained from the sale of $20,000,000 of sinking fund debentures and from internal sources such as reserve accruals, retained earnings and cash-on-hand. He was of the opinion that the cost of the facilities can be financed as proposed. No party desired to cross-examine Mr. Plourde, and nobody contested Northern's ability to finance its facilities.

---

[3] Northern submits that the prices and quality provisions are in conformity with the prices and related quality limits set in Opinion No. 468, *Area Rate Proceeding, et al.*, Docket No. AR61-1, *et al.*, 34 FPC 159, issued August 5, 1965.

The record shows that the Coyanosa and Gomez Fields constitute major gas supply acquisitions in an area which promises an excellent potential for large future gas supplies. In 1953, Northern's subsidiary, Permian Basin Pipeline Company, began to purchase gas from producers in the Permian Basin and to transport and sell 300,000 Mcf per day of such gas to Northern.[4] Gas purchased and transported by Permian was delivered to Northern at Plains in Yoakum County, Texas, 200 miles south of the southern terminus of Northern's pipeline system at Dumas in Moore County, Texas. In lieu of Northern building a line from Plains to Dumas, Northern entered an exchange arrangement with El Paso Natural Gas Company for the delivery of equivalent volumes of gas to Northern at Dumas because El Paso had a 24-inch line extending from Plains in Yoakum County, Texas, to Dumas, in Moore County, Texas, where a connection with Northern's main line could be made. In addition, El Paso controlled reserves located at or near the Dumas end of this line which in the absence of this exchange would have been transported south to Plains by El Paso. Under the terms of the Northern-El Paso agreement, Permian delivered the 300,000 Mcf per day to El Paso at the Plains Station and El Paso redelivered equal volumes to Northern at Dumas.

In addition to the El Paso exchange volumes of up to 575,000 Mcf, Northern alleges that it will have available from the Delaware Basin by 1970, an additional 450,000 Mcf per day. Thus, of an estimated 1969 system saleable capacity of 2,314,142, over a million Mcf per day or more than 44 percent of inputs for sales will be from the Permian Basin as compared to approximately 30 percent at the present time and 27 percent in 1953.

In view of Northern's increasing dependence upon the Permian Basin as a source of new gas supplies, Northern asks for maximum efficiency and flexibility in the integration of those supplies into its extensive pipeline system. Northern declares that it can properly and effectively integrate its Permian supplies with its other supplies only if it is allowed to construct its own pipeline which would be interconnected with its existing Permian facilities.

The record shows that Northern did consider the economics of reasonable alternative methods of having its future Permian Basin supplies transported to its main line at Beaver including enlarging the exchange with El Paso and a new exchange with Transwestern.[5] Northern concluded that the proposed 26-inch line from Kermit to Beaver would be more economical than any of the alternatives and would put Northern in a more advantageous position to contract for future gas supplies. The opponents failed to prove defects in said conclusion.

Northern presented proper evidence about its technical, economical and financial qualifications. All told, Northern fully met the certification requirements of the Natural Gas Act. But for Transwestern's proposal, discussed later, it is necessary to find that it is in the public interest to approve Northern's certificate applications herein.

### *Natural's Proposal*

Natural proposes to construct 230 miles of 24-inch pipeline and 26.2 miles of 20-inch pipeline from the existing terminus of its Amarillo Line at compressor station 112 in Moore County, Texas, to a point in Lea County, New Mexico, where connection will be made with the 43.8 miles of 20-inch pipeline extending northeasterly from the Indian Basin and Dagger Draw Fields of the Permian Basin constructed under authorization issued in Phase I of these proceedings. Other facilities include 5.93 miles of 30-inch loop line on the Amarillo Line immediately north of station 112, 3.5 miles of 8-inch lateral pipeline perpendicular to the proposed 24-inch line in Roosevelt County, New Mexico, to receive gas from the Bluitt Field, and miscellaneous, appurtenant facilities. The total estimated cost of these facilities is $20,618,000. The Permian Basin line is designed to transport approximately 450,000 Mcf per day after the addition of compression and will have an initial, unpowered capacity of 168,000 Mcf per day. The Permian Basin extension will provide a direct link between Natural and its markets and the vast gas reserve potential of the Permian Basin region of southeastern New Mexico and West Texas.

---

[4] *Permian Basin Pipeline Company,* 12 FPC 85, 95 (1953). Permian was later merged into Northern. See 24 FPC 1208 (1960).

[5] Exhibits Nos. 135–138 are studies of the alternatives considered other than Transwestern which was considered separately.

Witness Poole testified that the increasing needs of Natural's customers will require Natural to expand peak day pipeline capacity in the order of 135,000 Mcf to 185,000 Mcf each year for at least the next three years. Mr. Poole emphasized that this projection represents minimum growth and does not include additional sales in the large St. Louis market or any sales to new market areas or customers. Mr. Poole testified that gas requirements of Natural's markets would increase by 58 billion cubic feet from 1966 to 1968, and that a similar rate of growth would continue for at least three to four years beyond 1968. Natural's system wide rates of return on its net investment in utility plant, gas production advances and gas stored underground noncurrent, for the last full year preceding installation of the proposed facilities, and the first three years after, were estimated by Mr. Poole as follows: 1965–6.43 percent; 1966—6.83 percent; 1967—6.54 percent; 1968—6.53 percent.

Natural's ability to finance, construct and operate the services proposed herein was not in dispute. Witness Burns testified that Natural has carried on a vigorous program to secure for its markets any reserves developed in the existing Amarillo Line supply area within economic reach of the line. The Panhandle area, still the principal source of Amarillo Line supplies, also serves as a primary fount of supply for such commercial and industrial centers of the midwest and midcontinent area, as Detroit, Milwaukee, Omaha, Minneapolis, and Denver, and it also provides large volumes of gas for intrastate markets. Mr. Burns testified that ten other major pipeline companies compete with Natural for any new reserves developed in the existing Amarillo Line supply area and, in addition, there are strong intrastate purchasers, such as Oklahoma Natural Gas Company, Pioneer Natural Gas Company and industrial users. Mr. Burns testified that the Amarillo Line has many sources of gas that, although adequately backed by reserves, are past their prime in deliverability. For example, Natural's own leases in the Texas Panhandle, which have been providing gas for over 30 years, and other such sources, have been declining in peak day availability. Natural has concerned itself with this problem for several years and has been working diligently to restore this flexibility.

The need of the Amarillo Line to tap a new source of large-volume, long-term reserves is unchallenged. It is also not disputed that the Amarillo Line supply problems, if allowed to continue unchecked, will have serious consequences. Most serious of all, Mr. Burns testified, is the fact that someday, Natural would be unable to adequately supply its markets. Such a failure of supply would do inestimable damage. "It would have disastrous effects not only for Natural, its customers, and their millions of gas consumers, but also for the untold number of persons in Natural's market area whose jobs or investments depend upon an adequate supply of natural gas." The 24-inch, 26-inch and 36-inch pipelines comprising the Amarillo Line represent the largest portion of the several hundred million dollars which Natural has invested in pipelines.

Natural submitted evidence that it decided upon an extension to the Permian Basin after a lengthy study had demonstrated that of all the possible supply areas to which the Amarillo Line might have been extended, the Permian Basin stands out above all the others when viewed from the standpoint of the gas reserves that have been and are being developed. Natural's opinion regarding the vast reserve potential of the Permian Basin was confirmed by DeGolyer & McNaughton, a firm of consulting petroleum engineers, which advised Natural that the Permian Basin is one of the two most promising regions for discovery and development of new, large volumes of high deliverability of gas in the United States. Mr. John H. Murrell presented extensive testimony and exhibit material demonstrating the tremendous reserve and high deliverability potential of the Permian Basin area.

Setting forth the company's plans for reserve acquisitions in the Permian Basin, Mr. Burns testified that Natural intended to acquire large volumes of new long-term reserves in the Permian Basin within the next four to five years. He testified further that Natural intended to vigorously pursue acquisition of reserves in the Permian Basin area, as it has done in the past in its existing areas of supply, adding annual increments of approximately 75,000 Mcf per day until the maximum capacity of the line is reached. Mr. Burns testified further that he intended to draw upon Permian Basin supply sources to greatly ameliorate the Amarillo Line flexibility problems. "By scheduling continuous takes from Permian Basin reserves at or near maximum contract rates during the winter heating season, and by correspondingly reducing Permian Basin takes to minimum contract volumes during the offpeak season, Natural will be able to attain a very substantial amount of needed flexibility in its pipeline operation, particularly as the Permian Line approaches the 450,000 Mcf peak day level."

Mr. R. W. Lindgren described Natural's planning that went into the design of the Permian Basin Line. These studies considered several alternatives, with various size lines, to determine comparative initial and ultimate cost and initial and ultimate capacity. These studies led to selection of the facilities proposed by Natural in this application, which have been designed to carry approximately 450,000 Mcf per day after the addition of compression, with an initial capacity of 168,000 Mcf per day to transport the initial volumes of gas available to Natural under its present contracts with producers in the Permian Basin. Mr. Lindgren testified further that as the proposed 24-inch line is expanded to handle additional supplies, the economies of volume will become operative and the overall unit cost of service on the line will continue to decrease until the economic limit or ultimate capacity of at least 450,000 Mcf per day is reached. "In sum, the proposed Permian Basin Line provides ready, economical expansibility to transport the large volumes of new long-term reserves which Natural will contract for in the Permian Basin over the next four to five years."

The Commission staff feels that Natural's presentation is unduly hopeful. Staff Counsel submit that Mr. Burns was probably overly optimistic in his prediction as to the rapidity with which the use of the Permian line would be built up to its optimum peak capacity of 450,000 Mcf per day, and did not give sufficient weight to the manner in which Natural intends to use Permian gas to satisfy Natural's market need. Staff Counsel say that his later testimony implies a much more gradual build-up of the load on the Permian line than was expressed in his earlier testimony that a peak day figure of 450,000 Mcf of gas would be reached on the Permian line within the next three to five years.

Staff Counsel submit that their conclusions regarding the low load factor on the Permian line most of the year and how long it will take to reach the line's optimum capacity do not question Natural's ultimate need for Permian gas. They do indicate, however, the need to protect gas consumers by conditioning any certificate that may be issued to Natural in this proceeding to provide that the certificate is granted without prejudice to the determination in any future proceeding before the FPC in which Natural is a party of what portion of Natural's facilities shall be included in its rate base.

In conclusion, Natural presented proper evidence about its technical, economical and financial qualifications. Natural fully met the certification requirements of the Natural Gas Act. Unless this finding is negated by Transwestern's counterproposal discussed below, it appears in the public convenience and necessity to approve Natural's applications herein.

### *Transwestern's Counterproposal*

Transwestern's proposals encompass three separate projects:

a. To serve the requirements of Natural by the delivery to Natural of equivalent volumes of gas purchased by Natural in the Indian Basin, Dagger Draw and Bluitt areas of New Mexico;

b. To serve the requirements of Northern by the delivery to Northern of equivalent volumes of gas purchased by Northern in the Coyanosa and Gomez Fields in Pecos County, Texas; and

c. A separate project to serve the combined requirements of both Natural and Northern.

The facilities which Transwestern is required to install to perform the exchange service herein proposed are affected by the outcome of the decision in *Transwestern Pipeline Company, et al.*, Docket No. CP63–204, *et al.* This proceeding is pending before the Commission on exceptions to a Presiding Examiner's decision. Transwestern has made its instant presentation showing the required facilities and related cost both on the assumption that its applications in CP63–204, *et al.* will be granted, and also on the assumption that they will be denied, and the additional exchange facilities added to Transwestern's present system. Transwestern's cost estimates are, therefore, presented in several alternatives.

Transwestern proposes to take delivery of up to 158,000 Mcf of gas per day from Natural at a point of intersection with Natural's Indian Basin facilities and Transwestern's 24-inch West Texas lateral; this is approximately 54.8 miles southeast of Roswell and into its 8-inch Bluitt lateral. Transwestern will redeliver equivalent volumes to Natural at a point on its main Amarillo line 26 miles downstream from the terminal point of its proposed Permian line. Transwestern's proposed rate to Natural is: (a) A monthly charge of $68,000; and (b) An additional charge of 3 cents per Mcf for the first 100,000 Mcf per day exchanged on an annual basis and one cent per Mcf for volumes exchanged annually in excess of that amount.

Transwestern submits that at an approximately 66⅔ percent load factor, Natural's cost under Transwestern's project would be 5.02 cents per Mcf. Natural's corresponding cost through its proposed facilities would allegedly be 7.84 cents per Mcf. At the full 158,000 Mcf per day delivery level Natural's cost under Transwestern's project would be 3.68 cents per Mcf while its cost through its own facilities would allegedly be 5.23 cents per Mcf. The estimated cost for the proposed additional facilities, assuming approval of its applications in CP63-204, *et al.*, is $3,431,000. Transwestern's estimated cost for facilities assuming denial of its pending applications is $6,022,000.

Transwestern proposes to take delivery of up to 225,000 Mcf of gas per day from Northern at the point of intersection of Northern's proposed Gomez and Coyanosa facilities and Transwestern's 24-inch West Texas lateral; Transwestern will redeliver equivalent volumes to Northern at its Beaver Compressor Station in Beaver County, Oklahoma. Transwestern's proposed rates to Northern is as follows: (a) a monthly charge of $260,000, and (b) an additional charge of 1.5 cents per Mcf for the first 150,000 Mcf per day exchanged on an annual basis and one cent per Mcf for volumes exchanged annually in excess of that amount. The estimated cost for the proposed additional facilities, assuming approval of Transwestern's applications in CP63-204, *et al.*, is $17,787,000. Transwestern's estimated cost for the required facilities assuming denial of such applications is $21,171,000. Transwestern contends that at the assumed 450,000 Mcf per day level, Transwestern's facility cost would be approximately $34,226,000.

The service proposed by Transwestern under the combined Natural and Northern projects is about the same as proposed in the individual projects. The facilities required to serve both Natural and Northern are somewhat different, however, from the facilities required to serve these companies on an individual basis. The total cost of these facilities, depending upon the certification of Transwestern's projects in CP63-204, *et al.*, is estimated from $27,160,000 to $30,669,000.

It was submitted that during January 1966, Transwestern experienced deliveries from Panhandle reserves on a simultaneous basis of 330,000 Mcf per day. On a nonsimultaneous basis deliveries from this area have been as high as 600,000 Mcf per day.

Transwestern also submitted cost estimates covering the facilities required to render the proposed exchange service on the assumption that there was "no gas available" for exchange in the Panhandle. Under these circumstances, as under the exchange assumption, the entire capacity of Transwestern's existing 24-inch Panhandle lateral would be available for deliveries from Permian reserve sources.

Transwestern's financing plans cover the construction proposed in CP63-204, *et al.*, for increased service to Pacific, as well as construction to provide the proposed service up to 158,000 Mcf per day to Natural and up to 225,000 Mcf per day to Northern.

Transwestern proposes to finance the service for Northern and Natural by issuing first mortgage bonds up to $20,000,000 and 5½ percent debentures. Transwestern's Witness Koros said that the bonds could be sold at an interest rate of 5¼ percent. He stated that Transwestern has no firm commitment with respect to any portion of its financing, but that he has discussed the financing plans shown in its exhibits with Metropolitan Life Insurance Company, which holds approximately 97 percent of Transwestern's outstanding 5¼ percent mortgage bonds, and the insurance company indicated an interest in purchasing all or a portion of the first mortgage bonds which Transwestern would issue to finance the projects. The 5½ percent subordinated debentures, due in 1979, which Transwestern proposes to issue in amounts up to $25 million, will be in addition to $40 million of 5 percent subordinated debentures, due in 1969, presently outstanding.

The Commission staff points out that if the financing shown in Transwestern's exhibits should be consummated, debt securities would comprise 77 percent of its total capitalization. The Commission has said that the amount of debt securities should not be greater than 75 percent of total capitalization.[6] Accordingly, Staff Counsel recommend that if a certificate is issued authorizing Transwestern to render service to either Natural or Northern, that it be conditioned to require Transwestern to refrain from paying any dividends on its common stock until the amount of its debt securities is reduced and maintained at not over 75 percent of its total capitalization. Transwestern submits that its projects are economically feasible, because the incremental revenues allegedly exceed incremental costs.[7]

### *The Midwestern Interveners*

Central Illinois Electric and Gas Company, City of Chicago, Illinois Power Company, Iowa-Illinois Gas and Electric Company, Iowa Public Service Company, Iowa Southern Utilities Company, Minnesota Natural Gas Company, Northern Illinois Gas Company, Northern Indiana Public Service Company, Suburban Rate Authority, Peoples Gas Light and Coke Company, North Shore Gas Company, and Wisconsin Southern Gas Company, Inc., have filed briefs in which they submit that Transwestern's proposed service would isolate their supplier pipelines from gas supply and would delay the expansions upon which they as customers depend to serve their markets. They allege that Transwestern's proffered services are not really less expensive: that they are, instead, "a proposal which would rob the Midwest to pay California." Finally, several of those customers have argued that even if Transwestern's service were somewhat less expensive, that would not outweigh other competitive and red tape disadvantages inherent in Transwestern's proposal.

Northern Illinois Gas Company, the largest customer of Natural, supports the position taken by Natural and emphasizes the importance to it and its approximately 915,000 customers that Natural have direct access to the natural gas reserves of the Permian Basin, thereby avoiding the dangers which Northern Illinois sees in the permanent exchange agreement proposed by Transwestern.

Northern Illinois alleges that the ability of Natural to continue to make a prompt and flexible response to its needs depends on Natural obtaining direct access to the reserves of the Permian Basin. The contest lies over the adequacy of Transwestern's proposal to fulfill the purposes of Natural's application. Northern Illinois claims that Transwestern's proposal would seriously abridge the advantages which Northern Illinois would enjoy if Natural were to gain its desired direct access to the Permian Basin. The particular interests of the California gas consumers in this proceeding is prompted by a temporary excess capacity in Transwestern's Panhandle System. Northern Illinois thinks that Transwestern's excess capacity will be absorbed in the next few years by the growing demands of the California market. Therefore, the interests of the California gas consumers here are at best short-term interests. The interests of the Midwestern consumers, on the contrary, are long-term interests because of the importance to them of gaining direct access to a new source of gas reserves in the Permian Basin. Northern Illinois argues that the long-term needs of the Midwestern consumers outweigh in this case the temporary or short-term benefits which the California consumers would allegedly receive if Transwestern's proposal is adopted.

---

[6] *Houston Texas Gas and Oil Corporation* and *Coastal Transmission Corporation*, 16 FPC 118, 140.

[7] *Northern Natural Gas Company* (Opinion No. 463, issued June 2, 1965) Docket No. CP64-255 (Phase II) 33 FPC 1163; *Northern Natural Gas Company, et al.* (Opinion No. 404, 1963) 30 FPC 859; *Kansas-Nebraska Natural Gas Company, Inc., et al.* (Opinion No. 389, 1963) 29 FPC 1058.

Illinois Power Company, another large customer of Natural and Northern, argues that approval of Transwestern's application would involve customers of Natural and Northern in all of Transwestern's rate cases. "Illinois Power already participates in rate proceedings of its five pipeline suppliers. It does not want to become embroiled in another series."

Illinois Power says that the record in this case shows: when a rolled-in cost method of allocation is employed, Transwestern's rate to Natural is at least as much as, and probably exceeds, Natural's own cost of produced gas. All the expert witnesses (except Transwestern's) allegedly agreed—whatever else they may have disputed—that Transwestern's rate would have to equal or exceed Natural's cost of production.

Iowa-Illinois Gas and Electric Company also has serious reservations as to the method of determination of the "initial rate" proposed by Transwestern. Since the "initial rate" proposed by Transwestern is not a firm rate, and was determined on a basis not currently supported by this Commission, it appears certain that before a firm rate could be determined, a complete rate case would have to be heard. "The lengthy proceedings required by such a hearing would impose unnecessary hardship on Iowa-Illinois it being unable to determine with certainty the final costs to them and the ultimate customers."

Peoples Gas Light and Coke Company and North Shore Gas Company argue that they are unable to discern any benefit in having Transwestern, a Southern California oriented pipeline and a competitor for gas reserves, stand between their pipeline supplier and its Permian Basin sources of supply.

Transwestern's proposal allegedly stems from a temporary condition on its system resulting from the failure of the Southern California market to develop as rapidly as expected. It is apparent that as the California load does in fact develop, as it undoubtedly soon will, Transwestern will conclude, either on its own volition or at the urging of the California interests, that it can no longer cooperate in efforts to move Permian Basin gas to Midwestern markets. "Transwestern could not be compelled to construct facilities or to divert existing capacity to Peoples and North Shore's needs."[8] Construction of Natural's own line at that point may not be capable of accomplishment in time to permit Peoples and North Shore to satisfy their customers' demands for more gas. In any event, Peoples and North Shore argue that the public interest requires that they or their Illinois customers not be subjected to such extensive control by Transwestern and other parties whose economic interests lie in other regions of the country.

The Suburban Rate Authority suggests that if the problems with the Panhandle lateral are so serious that Transwestern and its existing customers are willing to accept less than the full cost that would be allocated to the service of transporting Permian Basin gas through this line, it should have conditioned its proposed service so that neither Northern nor Natural would ever have to pay such fully allocated costs.

The Suburban Rate Authority says that it would not oppose Transwestern's proposed service from a cost standpoint if there were positive assurance that Northern's cost would always be less than the other alternatives now available to it. "If Transwestern is convinced of its need to improve the utilization of its system, it should be able to suggest a satisfactory solution to the problem of giving such assurance. Other than fixed price contracts, there is no precedent for such a rate guarantee, and the administrative problems in determining the costs that otherwise would have been incurred are numerous and complex."

---

[8] *Granite City Steel Co.* v. *F.P.C.*, 320 F. 2d 711 (CADC–1963).

Until there is some positive protection against higher costs to Northern, The Suburban Rate Authority is opposed to the use of Transwestern's facilities for the transportation of Northern's Permian Basin gas.

### *The Jointly-Owned Pipeline Proposal*

The City of Chicago questions the large expenditure of funds which would be required to construct these separate pipeline facilities. It argues that there is no imminent need to introduce Permian gas into Natural's system at this time, when it has reserves readily available in areas where facilities already exist. If, however, it is decided that there is a need for this gas in the systems of Natural and Northern, the City contends that there is no justification for separate parallel facilities in the same geographical area. To certify separate pipeline facilities, would result in unwarranted duplication of service and economic hardship on the consumers. The City of Chicago argues that the two proposed pipelines would parallel each other, traversing the same general geographic area, and would only be sixty miles apart. Due to the geographic proximity and same general direction of the proposed structures, a single large diameter pipeline would allegedly eliminate duplication of service and of costs.

The brief of The Suburban Rate Authority also favored a jointly-owned pipeline. However, neither the City of Chicago nor The Suburban Rate Authority submitted any evidence in support of their proposal.

Similarly, the Commission staff was unable to supply evidentiary support for a jointly-owned pipeline:

> MR. KNIGHT: Mr. Examiner, in response to the Examiner's request of January 19, transcript page 3300, I have been advised by the Staff that it is unable to provide the type of study that has been requested. Although the Staff has several employees that are qualified to perform this type of work, they simply are not available because of other current assignments of high priority. But of greater importance, the Staff has never had, nor has now, the resources available to it to perform this assignment. I am referring here to automatic data processing and other computer equipment in common use by the industry in its pipeline design procedures. * * * (Tr. 3645)

Both Natural and Northern claim that they have thoroughly exhausted all possible alternatives, and that each management has decided on the separate pipeline allegedly to be in the best interest of the company and the consumer.

During the proceeding, Mr. R. D. Grimm, Northern's policy witness, testified that management had considered "other alternatives." One of these alternatives which had been investigated was that, in lieu of separate facilities, Natural and Northern could construct and operate a joint-pipeline. This proposal was the subject of several cost studies made by Northern's staff and testified to by Mr. R. L. LoChiano. The alternative pipeline was to consist of a 26-inch leg from Kermit, to a point near the eastern edge of Lea County, New Mexico. At that point, it was an equal distance from the Indian Basin facilities of Natural and Northern's facilities. Here the system combines and the larger joint-line was to run northward an equal distance between both Natural and Northern's proposed pipelines, terminating at a point equidistant from Northern's Beaver Station and Natural's Station 112.

The cost studies prepared by Northern, were admitted into evidence and marked "Exhibits 135 through 138"; these Exhibits were comparative cost studies between Natural's proposed pipeline and Northern's proposed pipeline and a jointly-owned line at various flows ranging from 300,000 Mcf per day to 900,000 Mcf per day. The gas volume in the jointly-owned pipeline in the projected studies was to be equally apportioned so that in the first year flow of 300,000 Mcf per day, Northern would account for 150,000 Mcf per day and Natural would account for 150,000 Mcf per day.

With regard to alternative lines considered by Natural, Mr. Lindgren, testified that "a number of studies were made to determine the feasibility of constructing a new line into the Permian Basin area. These studies were large in number and differed with respect to timing, line size, point of origin, point of termination and therefore length." He described in detail the various studies which Natural had made and the results of these studies, and was cross-examined on the studies at length.

Natural's work papers on a joint line were also produced and given to the City of Chicago and the other parties. Additionally, Mr. Lindgren was prepared to answer questions regarding the work papers. However, when he appeared for cross-examination in the answering phase, neither the City of Chicago nor any other party took that opportunity to question him on the joint line.

Northern's jointly-owned pipeline studies are in the record and indicate that the lowest cost per Mcf "joint" or "combined" system (basically a combined 34-inch line which would have been owned by Northern and which would have been located approximately equidistant between Natural's and Northern's reserves) when put on a comparable basis with Northern's proposed 26-inch line—same pressures, same temperatures and projected load factors—would apparently cost Northern at least one-tenth cent per Mcf more than its individual proposed system.

Northern convincingly submits that should Natural's flows on a peak day basis not keep up with Northern's *or* should Natural's load factor be less than 67 percent, as projected, Northern's costs would be increased substantially. These considerations are important when it is kept in mind that the staff doubts both Natural's ability to build-up its takes and its ability to maintain its projected 67 percent load factor and the City of Chicago even doubts Natural's need for Permian Basin gas at all.

Minneapolis Gas Company points out that "the existence of a more desirable alternative is one of the factors which enters into a determination of whether a particular proposal would serve the public convenience and necessity," *City of Pittsburgh* v. *Federal Power Commission*, 237 F. 2d 741, 751 (CADC–1956), that the Federal Power Commission "is under a statutory duty to give full consideration to alternative plans," *Scenic Hudson Preservation Conference* v. *Federal Power Commission*, 354 F. 2d 608 (CA2–1965). However, it argues that the statutory duty of "full consideration" has been met by the comparative hearing in this case and the legal requirements of the *City of Pittsburgh* and *Scenic Hudson* cases are satisfied.

Minneapolis Gas Company contends that a critical defect of Transwestern's proposal is that it is not, in fact, an "alternative" to the service contemplated by Northern in Docket No. CP65–91. An "alternative" is defined as "an opportunity for choice between two things, courses or propositions, either of which may be chosen, but not both." Transwestern's proposal, however, does not offer the same service as that contemplated by Northern and does not present an opportunity for choice between two possibilities, "either of which may be chosen." An integral part of Northern's proposal therefore is a gas supply system which initially will transport 225,000 Mcf per day, but which can easily and economically be expanded to 450,000 Mcf per day in the fourth year of operation to meet the future gas requirements of its customers. On the other hand, Transwestern's proposal covers the transportation of 225,000 Mcf per day, but is silent on how it would deliver additional volumes in the future. The additional facilities described in Transwestern's rebuttal evidence by its Witness Wooten were allegedly presented only for cost comparison purposes and, according to Minneapolis Gas, do not purport to represent how Transwestern would expand its facilities to deliver additional volumes to Northern. As to the future expansion of Transwestern's facilities for the delivery of additional volumes to Northern, Transwestern's proposal is an unknown. Therefore, Transwestern's proposal in Docket No. CP65-236 does not contain all of the essential elements contained in Northern's proposal in Docket No. CP65-91 and should be denied. Transwestern's characterization of its project as an "alternative" to Northern's is based upon "a comparison of apples and oranges."

Minnesota Natural Gas Company contends that Northern's proposal better serves the public interest in the long run than the limited exchange service proposed by Transwestern because Northern can supply 450,000 Mcf of gas per day to its system on more advantageous terms than can Transwestern. While Transwestern's initial rate appears to be superficially attractive, it is illusory and will be shortlived. The Natural Gas Act entitles a pipeline to just and reasonable rates. Minnesota Natural Gas contends that the question as to how Northern plans to meet its long-term gas needs is one which lies basically in the discretion of the company's management.[9]

Accordingly, the Examiner finds and concludes that the suggestion of Chicago that this already long proceeding be further delayed while the Commission's staff spends more time on studies which Northern has already made, is not very helpful now. The record shows that the matter of a joint line has been satisfied on its basic points. The possibility of a joint line has been raised and examined and the sound reasons for its rejection have been given on the record and in the briefs. The City of Chicago and The Suburban Rate Authority have had ample opportunity to cross-examine the witnesses of Natural and Northern regarding their decision to reject the joint line as well as the opportunity to present their own witnesses on the matter. In the circumstances, a complete record on the joint line has been made in this proceeding. Thus, the requirements of *Scenic Hudson Preservation Conference* cited by the City of Chicago, have been met, and no further inquiry into this collateral point is warranted.

### *California Interest*

Southern California Gas Company, Southern Counties Gas Company of California and Pacific Lighting and Supply Company (The Pacific Lighting Companies) intervened in these proceedings as the major jurisdictional customer of Transwestern.

During the course of the hearings, the differences between Transwestern and The Pacific Lighting Companies were resolved through negotiation and compromise, resulting in the letter agreement of October 27, 1965. The agreement anticipates that certification of Transwestern's exchange proposals would produce substantial benefits to Transwestern's existing customers and that Transwestern would pass those benefits on to its customers as such benefits accrue. Under these circumstances The Pacific Lighting Companies support Transwestern's proposal herein.

---

[9] *Natural Gas Pipeline Company of America*, 16 FPC 80, 83.

The State of California and the Public Utilities Commission of California (California) also filed a brief supporting Transwestern, but expressing misgivings. Their brief points out that Transwestern's cost of service of the facilities necessary to deliver Permian gas is reflected in the rates that have been paid and are being paid by the California consumer. Transwestern's competitive applications, if approved, will require that its facilities formerly used in service to California now be utilized to supply the needs of Northern or Natural or both. The brief contends that as a matter of equity the California consumer should not pay for facilities that have been put to a use totally unrelated to service rendered to him. California argues that the letter agreement does not provide for specific rate relief to California based on excess revenues attributable to the exchange proposals involved in this proceeding, but would provide for rate reductions only if an application for a certificate authorizing additional service to California in a separate and distinct proceeding is granted. California says: "As for rate relief based on excess revenues generated by the exchange, the agreement, at best, merely sets the stage for negotiations between the parties."

Under these circumstances California asserts that the matter of reduction of rates because of increased revenues would best be resolved by means of a formal rate proceeding. California submits that this Commission has stated that it will consider the effect of a certificate for a new sale upon the rates charged to existing customers, and order the seller to reduce or change its rates to such other customers as a condition to the grant of the certificate, where the immediate effect of Commission action certificating a new sale may be to harm existing jurisdictional customers.[10] California contends that the principle developed by the cited cases applies equally to a situation where a new *service* such as that proposed by Transwestern might have an immediate detrimental effect upon existing jurisdictional customers. California concludes that the circumstances in these proceedings require that the Commission, upon certification of Transwestern's exchange proposals, contemporaneously order an investigation of Transwestern's rates pursuant to the provisions of Section 5(a) of the Natural Gas Act.

### *Cost of Transwestern's Proposed Service*

Transwestern's costing method requires detailed discussion. Northern, Natural and the Commission staff each took issue with Transwestern's value of service approach. Each presented expert witnesses who applied conventional cost allocation studies to Transwestern's cost of service, to determine whether it would be more or less than Northern's and Natural's incremental cost of providing their own respective service. As mentioned before, each party used different methods of computing costs embracing different cost allocations, different assumptions, and different classifications of facilities and costs and, therefore, reached somewhat different results. However, all but Transwestern are unanimous in their opinions that in the very near future Transwestern's proposal will prove uneconomical. For a general appraisal of the allocations herein, it will suffice to review the staff's cost of service computation and then to comment on the other main contentions.

---

[10] *Colorado Interstate Gas Company,* 33 FPC 281 (1965); *Panhandle Eastern Pipe Line Company,* 30 FPC 1260 (1963).

Staff witness Horton first developed a cost of service for Transwestern's facilities for the proposed service and then determined what portion of the total cost of service was applicable to Northern and to Natural. He used a portion of Transwestern's existing facilities plus the estimated incremental facilities necessary to transport the volumes at different levels for each company. The Mcf-mile method of cost allocation was used, and the volume levels used were (1) delivery of 225,000 Mcf per day to Northern and 158,000 Mcf per day to Natural, and (2) delivery of 450,000 Mcf per day to each.

In describing his methods in determining Transwestern's costs, Mr. Horton said he believed "the entire transmission system east of Transwestern's Compressor Station 9 should be considered." He also eliminated the cost of Station 9 on the basis that it is used solely for transporting gas to California.

Mr. Horton adjusted the depreciation reserve from Northern's exhibit since that exhibit assumed the 900,000 Mcf per day level would not be reached immediately; his adjustment made allowance for the accumulated depreciation reserve for the incremental facilities when the ultimate level of 900,000 Mcf per day for each year prior to the year that level is reached.

Mr. Horton has broken down the proposed Transwestern cost of service between transportation and exchange services; the mileage for the transportation service being the actual miles of haul, and the exchange service being assigned costs equal to average system costs, exclusive of the costs allocated to the transportation service. He said he considered 140,000 Mcf per day as exchange, this being the amount available in the Panhandle area for delivery to Northern and Natural which would not have to be physically transported from point of receipt on the west Texas lateral; and further said, "The cost to be assigned exchange service should not be too low as to give Northern and Natural a free ride. However, it should be less than the cost for the transportation service * * * (and) the amount assigned appears to be a reasonable compromise."

Total transmission cost of service was allocated among all customers served by the jointly used facilities in proportion to the product of the miles of haul and the volumes of gas hauled.

Assuming facilities constructed by Transwestern to carry daily volumes up to 158,000 Mcf for Natural and up to 225,000 Mcf for Northern; and assuming the transportation of Natural's gas at 66⅔ percent load factor; Transwestern's cost of service on behalf of Natural would be 4.66 cents per Mcf computed by the staff's method. This is to be compared with 5.02 cents as derived by the use of Transwestern's rate form. If Natural should construct its own facilities and transport its own gas, its comparable unit cost per Mcf would be 7.84 cents according to Natural's witness Mr. R. W. Chapin.

Assuming the construction by Transwestern of facilities to enable Transwestern to deliver volumes of gas up to 450,000 Mcf per day to Northern and the same amount to Natural, making a total of 900,000 Mcf per day; and further assuming the operation of the facilities for the delivery of gas to Natural at 66⅔ percent load factor; Transwestern's cost of serving Natural would be 4.30 cents per Mcf as computed by the staff's method. Transwestern did not offer in evidence a rate computed under its rate form at the 900,000 Mcf per day level. If Natural should construct its own facilities to transport up to 450,000 Mcf of gas per day, its unit cost at approximately 66⅔ percent load factor would be 4.82 cents per Mcf according to Natural's witness Chapin.

The staff exhibits show allocation of costs and unit costs of service only under combined projects in which it is assumed that Transwestern would perform service for both Natural and Northern. Transwestern's witness E. N.

Howard used the staff's method to compute costs for Natural separately on the assumption that Transwestern would be authorized to perform the service for Natural only. Mr. Howard stated that he followed the method outlined by staff witness Horton, except in place of a 6¼ percent rate of return, Mr. Howard used a 6⅞ percent rate of return.

Mr. Howard testified that at the 158,000 Mcf per day level, operating at 66⅔ percent load factor, the costs allocated to Natural by the staff's method, but using a 6⅞ percent rate of return instead of 6¼ percent, would be 4.01 cents per Mcf. That is 1.01 cents per Mcf lower than Transwestern's proposed initial rate of 5.02 cents per Mcf for service to Natural only as computed by Mr. Ransom's method, and 3.83 cents lower than Natural's 7.84 cents per Mcf cost at this level.

At the 450,000 Mcf per day level, Transwestern's cost of serving Natural alone, using staff's method of cost allocation, would be 4.70 cents per Mcf as compared with Natural's cost of 4.82 cents per Mcf at that level, a difference of 0.12 cent.

Mr. Horton, staff witness, compared Transwestern's proposed rate with staff's unit cost and with the incremental unit cost claimed by Northern and Natural assuming they had constructed their own pipeline, the resulting figures indicating, he said, "that Transwestern can render service for Northern and Natural during the first year cheaper than either pipeline company could perform the service for itself. It indicates that at the 900,000 Mcf per day level Transwestern can render the service for Natural cheaper than Natural could perform the service for itself. However, at the 900,000 Mcf per day level Northern could perform the service for itself cheaper than Transwestern could perform it."

The above shows that on cost per Mcf basis Transwestern's proposal quickly sheds its inducement features.

Transwestern made a better showing with respect to part of its offer, namely, service for Natural alone; however, the fact remains that it fell short even on that part of its proposal. Transwestern alleged that since its proposed rates to Northern and Natural are above incremental costs but below the alternative costs of building new facilities it is consistent with the Commission's decision in *Permian Basin Pipeline Company, et al.* (Opinion No. 249, 1953), 12 FPC 85, 98. However, the rate involved in the cited *Permian Basin* decision was apparently arrived at in a compromise settlement among the participants in that proceeding. No other party voiced any objection to it, and the Commission allowed the rate to stand without any analysis of the nature of the transaction involved or of the basis for the rate. Without the concurrence of all parties concerned, Transwestern simply will not be able to make the "inducement" rates last for any worthwhile period of time.

Transwestern's attempt to derive support from the Advisory Committee Report No. 22 of the Federal Power Commission Power Survey, Part II (1964) does not change the picture either. The Advisory Report has little relationship to the proposal of Transwestern, which, on the one hand, would impair the ability of Natural and Northern to serve their own customers, and, on the other hand, would, by means of the special rate scheme, force the California consumer to pay for facilities that have been permanently devoted to full-time service for other markets. The Report concludes that a rate which recovers just the cost of a given facility is not unjust and reasonable when the consumers of the first utility have, at all times, either direct or indirect benefit of the pooled facilities. In the present case, however, the California consumers would not be benefiting noticeably from some of the facilities for which they would be charged under Transwestern's rates. They would be called upon to continue to bear a portion of the cost of the Panhandle lateral, even though that facility would be dedicated to long-term, full-time service for the consumers served by Natural's and Northern's customers.

Similarly, the cited *Southwestern Public Service Co.*, Opinion No. 451 (March 2, 1965) 33 FPC 343, does not support Transwestern's proposal either. In *Southwestern*, a power company which had agreed to accept a low return on sales to its cooperative customers sought, in "compensation," to include an added element of return in its rates to its investor-owned customers, arguing that under such an approach it would earn a reasonable return on all of its wholesale business, considered as a group. The Commission rejected this "averaging" argument, holding:

> Such an averaging goes beyond what is permissible in rate-making at least in the circumstances of this case. It is one thing to say that Southwestern may voluntarily make rate concessions which are justified in the public interest to one group of its customers, but it is quite another to say that it may do so at the expense of its other customers. It seems to us that each group of wholesale customers has a right to service at just and reasonable rates and that, ordinarily, the others may not be compelled to bear the burden of such rate concessions. (33 FPC 343 at 356)

As stated before, the State of California has already objected to the California consumer bearing the burden of Transwestern's proposed rate, and has requested that the "Commission upon certification of Transwestern's exchange proposals contemporaneously order an investigation of Transwestern's rates pursuant to the provisions of Section 5(a) of the Natural Gas Act."

Transwestern says that the Commission is committed to no single method of developing rates. The only requirement is that the end result make sense. Transwestern takes the position that the Commission should make pragmatic adjustments in the exercise of its regulatory functions as are required and that when the end result is consistent with "reasonable judgment" judicial inquiry is at an end. Transwestern made a *prima facie* case that its proposed rate could be approved by the Commission provided the rate had been acceptable to Northern and Natural, and provided further, that there was no opposition from the prospective customers. The impasse is reached when an attempt is made to demonstrate that Transwestern's proposal has a preponderance of favorable public convenience and necessity aspects, and that therefore it must be approved by the Commission to the exclusion of Northern's and Natural's own proposals and contrary to the desire of most other parties herein. Regrettably, the cost allocation methods proposed by Transwestern do not satisfy the other parties nor the staff of the Commission. There appears little need for an extended discussion on the particular details of all the contradictory cost allocation methods proposed by the various parties. All of them were based on sundry assumptions of facts and future estimates. However, for the sake of completeness the Presiding Examiner did discuss briefly the various costing methods. This was done without necessarily agreeing or taking issue with every theory posed herein. It was brought out here primarily to show the climate of the controversy and to demonstrate that while reasonable parties can have reasonable disagreements about the proper costing methods of service, the weight of the evidence presented herein does not warrant a decision ordering a "shotgun venture" which the parties do not wish to consummate. Moreover, Northern and Natural foresee serious and unwarranted complication in such a "shotgun venture," and there is genuine and unavoidable distrust between the Midwestern customers of Northern and Natural and the California customers of Transwestern.

### *Findings and Conclusions About the Incremental Cost Allocation*

The incremental cost comparisons upon which Transwestern bases its entire case vary substantially, depending upon the assumptions made as to (a) whether Northern or Natural or both would be served, (b) the maximum daily volume of gas to be transported, (c) whether Transwestern's proposed facilities in CP63-204, *et al.*, would be authorized and (d) the adequacy of Transwestern's gas reserves in the Panhandle area. Generally, and before substantial increase in demand, Transwestern's incremental costs appear to be lower than the incremental costs of Northern and Natural, because Transwestern's proposed service utilizes existing facilities on its system. That might be significant if the cost of Transwestern's service were to be based on incremental costs exclusively. However, such is not the case. In a future contested rate determination proceeding the cost to Northern and Natural is more likely to be based on an allocation of Transwestern's total costs to the service.

The applicants and the staff have put into the record their analyses as to how Transwestern's costs is most likely to be allocated to the proposed service by the Commission. The various procedures used produce a wide range of results. The various presentations have been discussed above. It is not necessary to evaluate each of the allocation studies in order to cope with the fundamental problem. The wide divergence of results shows that the cost that eventually will be allocated to the proposed service is extremely uncertain. The only allocation method that produces a significant cost saving to Northern is the "incremental cost—value of service" approach used by Transwestern. Both Northern and Natural argue convincingly that such a method has little chance of being accepted by the Commission. Transwestern's method alone holds out the hope of any significant savings. Transwestern's argument that cost allocation is not an exact science and that no one method can lay claim to being the right method is not persuasive herein, because of well established Commission precedents. In brief, Transwestern has not proven that its proposal will produce a significant and enduring cost saving to Northern, since it could not show that its cost allocation would be acceptable to the Commission. Transwestern no doubt would stand by its proposed rate levels. However, it is apparent from the record that Transwestern's customers are not about to remain submissive for any length of time while Midwestern customers enjoy a gas rate advantage by utilizing facilities originally designed to meet the future need of California.

If Northern were required to pay more for Transwestern's service than would be incurred under its own project, the Midwestern gas consumers would be in effect subsidizing Transwestern's service to southern California. There is no justification for such a finding. Transwestern's problems are not the doing of Northern's or Natural's customers. Clearly, it is not in the public interest to burden Midwestern customers for the sole purpose of giving Transwestern an opportunity to obtain better utilization of its facilities. It is recognized that Transwestern has temporary problems in finding a more efficient use of its Panhandle lateral. Its Panhandle reserves were seriously questioned in these proceedings, and their relatively small size appears to detract from the value of that lateral for moving gas. Because of the circuitous route the gas must take in going to Roswell, the Panhandle lateral cannot, on a full cost basis, compete for transportation of Permian gas to the Panhandle area with a new line following a more direct route.

Staff counsel hopefully suggests that the authorization of Natural's proposal need not preclude the future of use of Transwestern's line for the transportation of Natural's gas. If Natural should reach the 450,000 Mcf per day optimum operation of its Permian line and, thereafter, need additional peak capacity, which could be obtained on its own line only by looping, it might be that the use of Transwestern's facilities would then be more feasible economically than looping Natural's Permian line. A decision on such a matter, of course, would have to be made in the light of conditions existing at the time the need arises. Natural's witness Lindgren pointed out that expanding pipeline capacity by looping is more expensive than increasing capacity by adding compression. Since, according to Natural's witness Burns, Natural intends to swing heavily on its Permian Basin gas supply to meet the wintertime needs of its customers and to reduce takes in the summer to the contract minimums, it is not improbable that after the expansion of Natural's Permian line capacity to its optimum of 450,000 Mcf per day, it would be preferable to supply Natural's winter need for Permian Basin gas by using Transwestern's facilities instead of looping Natural's Permian line.

The Examiner finds that regardless of whether or not conditions in the future would warrant the use of Transwestern's facilities to supplement Natural's Permian line capacity, the decision herein must be made solely on the basis of the evidence presented by the parties.

Having studied and evaluated all the evidence, briefs and arguments presented herein, the Examiner adopts the staff's recommendation to deny Transwestern's proposal in this proceeding.

The proposal by Transwestern to render service to Northern for volumes up to 225,000 Mcf per day will not be adequate for Northern, Northern's evidence shows that it will need facilities capable of transporting 450,000 Mcf per day in the fourth year. Although Transwestern in Article IX of its Pro Forma Rate Schedule offers to construct additional facilities if required to transport volumes greater than 225,000 Mcf per day, nothing definite is proposed with regard to such facilities or the changes for such transportation.

While it appears that Transwestern may be able to transport first year volumes at a lower cost than Northern can transport them, benefits to Northern, as well as to its customers, of Northern owning and operating its own line, even for first year volumes, outweight these cost advantages. The evidence herein readily warrants a finding that Transwestern's application to serve Northern should be denied.

According to the staff's presentation, the evidence indicates that Natural would be using the optimum capacity of its proposed Permian line within ten years. Any cost advantage which Tranwestern would have over Natural would be short-lived, and would probably vanish long before 450,000 Mcf per day pipeline capacity would be reached. Tranwestern bases its case on an apparent cost advantage at *initial* 158,000 Mcf per day and *initial* 225,000 Mcf per day levels. It offered no assurance of long-run cost advantage. In its proposed Rate Schedule X-7 Transwestern provides, in Article X, that it "shall have the *right to propose* to the Federal Power Commission such *changes* as it deems necessary *in the rates and terms of service* provided herein," and, in Article IX, that if Natural should require volumes greater than 158,000 Mcf on any day, Transwestern will apply to the Commission for authorization to install and operate the required additional facilities for such additional volumes, *"at appropriate rates and conditions of service."*

The staff properly contend that those proposed contract provisions make it uncertain as to how long Transwestern's cost advantage would continue even at the lowest proposed pipeline capacity since Transwestern reserves the right to file a higher rate at any time. Furthermore, the evidence indicates that the 158,000 Mcf per day capacity on which the Rate Schedule X-7 rate is based would be inadequate almost before it is put into use or soon thereafter.

Additional volumes would soon be required and the charges set forth in Article IV of Rate Schedule X-7 would soon be superseded by whatever "appropriate rates and conditions of service" Transwestern could persuade the Commission to approve. At that time, however, Transwestern would no longer have its present incentive to show a cost advantage such as that on which it bases its present proposal and we have no reason to believe that it would be persuaded by any compunction to seek a new rate which would continue such cost advantage.

The staff properly concludes that the public interest requires that Natural be able to increase its takes of Permian Basin gas as needed to satisfy its customers requirements without unnecessary impediment and expense. Natural and Transwestern would be rivals for Permian Basin gas. Natural serves an area with cold winters, contrasting sharply with the climate in Transwestern's California market. Natural would incur much greater delay and expense in obtaining increased supplies of gas through Transwestern's facilities than through its own facilities.

Whenever Natural would need larger volumes of Permian Basin gas that would make it necessary to increase pipeline capacity, it would have to request Transwestern to construct the additional pipeline facilities that would be needed to transport the larger volumes and negotiate a new agreement with Transwestern, which would include new charges and other terms.

Transwestern would then have to file an application with the Federal Power Commission for a certificate authorizing it to transport increased volumes of gas for Natural and to construct additional facilities as needed.

That would raise questions regarding the allocation of costs of the new facilities, the effect of the proposed expansion on the thermal content of gas delivered to Transwestern's various customers, and other matters. Many interests would be affected. There would be inevitably several interveners in every such proceeding, including Pacific Lighting and Cities Service and probably El Paso, in addition to public utility commissions, municipalities, and distributing company customers of some of the major interveners. That would make a formal hearing necessary.

Furthermore, Natural could be expected to intervene to protect its interests in many proceedings involving Transwestern in which it would not intervene if it were not a transportation customer of Transwestern.

In conclusion, the application of Transwestern to serve Natural and/or Northern is denied because the service and operation and construction of facilities which it proposes in said application is not, and will not be, required by the present or foreseeable future public convenience and necessity.

### ADDITIONAL FINDINGS AND CONCLUSIONS

Upon consideration of the entire record in this proceeding, including the pleadings, the evidence and the briefs of the participants, it is found and concluded, in addition to the findings and conclusions heretofore stated, that:

(1) The applicants, Northern Natural Gas Company, Natural Gas Pipeline Company of America, and Transwestern Pipeline Company are engaged in the transportation of natural gas in interstate commerce and the sale in interstate commerce of natural gas for resale, subject to the jurisdiction of the Federal Power Commission, and each of them is a "natural-gas company" as defined in the Natural Gas Act.

(2) All of the transportation of natural gas authorized herein will be made in interstate commerce for resale for ultimate public consumption subject to the jurisdiction of the Commission.

(3) Northern Natural Gas Company is able and willing properly to do the acts and to perform the service proposed in its applications under Docket Nos. CP65-1, CP65-91, CP65-338, and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the facilities proposed by Northern Natural Gas Company in said applications are required by the public convenience and necessity and a certificate therefor as hereinafter ordered and conditioned should be issued.

(5) Natural Gas Pipeline Company of America is able and willing to do the acts and to perform the service proposed in its application under Docket No. CP65-169 to the extent that they are included in Phase II of this proceeding, and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(6) The construction and operation of the facilities proposed by Natural Gas Pipeline Company of America in its application under Docket No. CP65-169, to the extent that they are included in Phase II of this proceeding, are required by the public convenience and necessity and a certificate therefor as hereinafter ordered and conditioned should be issued.

(7) Public convenience and necessity require that the certificates issued herein and the rights granted thereunder be granted without prejudice to the determination in any future proceeding before the Federal Power Commission in which Natural Gas Pipeline Company of America or Northern Natural Gas Company is a party of what portion of their total system facilities, respectively, should be included in their rate bases.

(8) The applications of Transwestern Pipeline Company under Docket Nos. CP65-208, CP65-236, and CP65-237, should be denied because the service and the operation and construction of facilities which it proposes in said applications are not, and will not be required by the present or future public convenience and necessity.

## ORDER

WHEREFORE, *It is ordered*, subject to review by the Commission on appeal or on its own motion, as provided by its Rules of Practice and Procedure, that:

(A) Transwestern Pipeline Company's applications under Docket Nos. CP65-208, CP65-236, and CP65-237 are denied.

(B) A certificate of public convenience and necessity is issued to Northern Natural Gas Company authorizing it to construct and operate pipeline facilities from a point of connection with Northern Natural Gas Company's existing compressor station in Beaver County, Oklahoma, to the Coyanosa Field and the Gomez Field in southwest Texas, as described in Northern Natural Gas Company's applications under Docket Nos. CP65-1, CP65-91 and CP65-338, for the transportation of natural gas in interstate commerce.

(C) A certificate of public convenience and necessity is issued to Natural Gas Pipeline Company of America authorizing it to construct and operate pipeline facilities from a point of connection with Natural Gas Pipeline Company of America's existing Amarillo line in Moore County, Texas, to Dagger Draw and the Indian Basin in southeastern New Mexico, as described in Natural Gas Pipeline Company of America's application under Docket No. CP65-169, for the transportation of natural gas in interstate commerce.

(D) All authorizations granted herein are without prejudice to the determination in any future proceeding before the Federal Power Commission in which

Natural Gas Pipeline Company of America or Northern Natural Gas Company is a party of what portion of their total system facilities, respectively, shall be included in their rate bases.

(E) The certificates granted herein and the exercise of any right thereunder are conditioned upon compliance by Natural Gas Pipeline Company of America and Northern Natural Gas Company, respectively, with all applicable Regulations of the Commission under the Natural Gas Act and particularly Section 157.20 of those Regulations.

(F) Each applicant to whom a certificate is issued herein shall report promptly in writing and under oath the dates of commencement and completion of construction of facilities authorized herein and the date of commencement of service through such facilities. Such reports shall be filed with the Commission within 15 days after completion of construction authorized herein.

(G) A certificate issued herein shall be void unless the applicant to whom the certificate is issued accepts it in writing filed with the Commission within 10 days after the date of issuance of this order.

ALLEN C. LANDE,
*Presiding Examiner.*

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## OFFICIAL NOTICE OF FACTS, DOCKET NO. R-318

## ORDER NO. 339

### AMENDING RULES OF PRACTICE AND PROCEDURE

(Issued March 31, 1967)

The Federal Power Commission by this order is amending its Rules of Practice and Procedure by clarifying § 1.26(d) concerning the official notice of facts.

The Commission's present rule on official notice states that official notice may be taken of "technical or scientific facts of established character peculiarly within the general knowledge" of the Commission. This rule was promulgated shortly before the Administrative Procedure Act took effect (Order No. 132, 18 CFR 1.26(d)) and appears to be a paraphrase of early drafts of the Act. We believe that § 1.26(d) is ripe for revision.

Experience, court cases and the legislative history of section 7(d) of the Administrative Procedure Act indicate that our present rule on the use of official notice is restrictive. The patterns of growth of both the electric power and natural gas industries challenge us to achieve procedural improvements to ensure the effective performance of the Commission's regulatory functions.

Expeditious proceedings have long been recognized as a means to this end. In the judicial sphere, the doctrine of judicial notice was developed as one tool to meet this need for expedition. The administrative adaptation of judicial notice is commonly called "official notice." The use of this different term emphasizes the significant difference between the two doctrines. Professor Davis persuasively argues: "The customary assumption that official notice is merely the administrative counterpart of judicial notice and should therefore be governed by essentially the same principles is fundamentally unsound * * *." Davis, Official Notice, 62 Harv. L. Rev. 537 (1949). The fundamental functional difference between court and agency would appear to be in the role of each as fact-finder. The essence of the judicial process, the adversary system, makes the court a passive arbiter in the search for justice between both parties. An administrative agency on the other hand is charged with an affirmative duty to seek out all relevant and material facts in establishing policy. See *Scenic Hudson Preservation Conf.* v. *F.P.C.*, 354 F. 2d 608 (CA2–1966). And as the Supreme Court has stated: "The process of keeping informed as to regulated utilities is a continuous matter with commissions." *Market Street Ry. Co.* v. *Railroad Commission of California*, 324 U.S. 548, 562 (1945).

As early as 1904, the Supreme Court recognized the unique factfinding needs of administrative agencies. See *I.C.C.* v. *Baird*, 194 U.S. 25, 44. The Attorney General's Committee on Administrative Procedure, whose studies led to enactment of the Administrative Procedure Act, recognized that protection of the public interest "makes it necessary to keep open the channels for the reception of all relevant evidence which will contribute to an informed result." *Final Report*, S. Doc. No. 8, 77th Cong., 1st Sess., 70 (1941). In a similar vein the Attorney General's Manual on the Administrative Procedure Act, pp. 79–80, (1947), explains: "The process of official notice should not be limited to the traditional matters of judicial notice but extends properly to all matters as to which the Agency by reason of its functions is presumed to be expert * * * ."

The Legislative history of the Administrative Procedure Act, S. Doc. No. 248, 79th Cong., 2nd Sess., 1946, indicates that Congress intended the permissible scope of official notice to be broader than the Commission's present rule. An early House bill read: "The taking of official notice as to facts beyond the proof adduced * * * shall be unlawful unless of a matter generally recognized or scientific knowledge of established character * * * ." *Id.* at 143. Another version limited official notice to "any matter of generally recognized fact or any technical or scientific fact of established character * * * . *Id.* at 174.

The Administrative Procedure Act, section 7(d), as passed by Congress, eliminated these restrictive phrases and provides instead that "where any agency decision rests on official notice of a material fact not appearing in the evidence in the record, any party shall on timely request be afforded an opportunity to show the contrary.

The present Commission rule may result in an unnecessarily restrictive approach towards official notice in Commission proceedings. This could increase hearing time to the detriment of practitioners, respondents or applicants, and the public. Agencies may take official notice of facts at any stage in a proceeding—even in the final decision" (Attorney General's Manual on the Administrative Procedure Act, 80 (1947)), however, the earlier in a proceeding notice is taken, the greater the "opportunity to show the contrary" of the noticed fact and the fairer the entire procedure.

Therefore, any participant requesting the taking of official notice subsequent to the conclusion of a hearing will henceforth be required to set forth clearly the reasons asserted as justifying his failure to make the request prior to the close of the hearing. This requirement in no way limits the rights of participants to make such requests before the conclusion of a hearing or of the examiner or the Commission to take official notice after the conclusion of a hearing.

Since we have a duty to consider all relevant facts (see *Scenic Hudson Preservation Conf.* v. *F.P.C.*, 354 F. 2d 608 (CA2–1966)), while at the same time affording an opportunity to contest all issues (see *U.S.* v. *Pierce Auto Freight Lines Inc.*, 327 U.S. 615 (1946)) we believe it important that available evidentiary means be fully utilized in developing a record.

The present amendment is intended to permit and encourage the use of official notice to the fullest extent allowed by the Administrative Procedure Act in accordance with the policy of sections 15(b) of the Natural Gas Act (15 U.S.C. 717n(b)) and 308(b) of the Federal Power Act (16 U.S.C. 825g(b)) and consistent with administrative fairness. The presiding examiners are encouraged to utilize official notice as an expeditious aid in regulating the course of hearings.

Official notice "has no other effect than to relieve one of the parties * * * of the burden of resorting to the usual forms of evidence." (*Ohio Bell Tel. Co.* v. *P.U.C.*, 301 U.S. 292, 301 (1937)). Therefore, "the matters thus noticed become a part of the record and, unless successfully controverted, furnish the same basis for findings of fact as does 'evidence' in the usual sense" (Attorney Generals' Manual on the Administrative Procedure Act at 80). Of course, the material to be noticed must meet the requirements of § 1.26(a) of the Rules of Practice and Procedure as to relevancy and materiality, against unduly repetitious or cumulative evidence, and as coming within the test of affecting "reasonable and fair-minded men in the conduct of their daily affairs."

The information in the Commission's public files contains material that is often useful in the decision-making process. Such information in the public official records of the Commission should, in appropriate circumstances, be considered pursuant either to paragraph (c) or (d) of § 1.26 of the Rules of Practice and Procedure.

This rule combines both the rule of procedure and of evidence. The Administrative Procedure Act sets out the procedural rule, while this order and the new § 1.26(d) set out evidentiary guidelines for the taking of official notices in a procedurally fair manner.

*The Commission finds:*

(a) Since the amendment here adopted involves a matter of Commission practice, no prior notice thereof is required by section 4 of the Administrative Procedure Act.

(b) The revision of § 1.26(d), here adopted, is necessary and appropriate for the purposes of the Federal Power and Natural Gas Acts.

*The Commission*, acting pursuant to the authority granted in sections 15 and 16 of the Natural Gas Act, as amended (52 Stat. 829, 830; 15 U.S.C. 717n, 717o) and sections 308 and 309 of the Federal Power Act, as amended (49 Stat. 858; 16 U.S.C. 825g, 825h), *orders:*

(A) Paragraph (d) of § 1.26, Part 1, Subchapter A, Chapter I of Title 18 of the Code of Federal Regulations is revised to read as follows:

§ 1.26 Evidence.

* * * * * * *

(d) *Official notice of facts.* Official notice may be taken by the Commission and the presiding examiner of such matters as might be judicially noticed by the courts of the United States, or any matters as to which the Commission by reason of its functions is an expert. Any participant shall, on timely request, be afforded an opportunity to show the contrary. Any participant requesting the taking of official notice after the conclusion of the hearing must set forth the reasons claimed to justify failure to make the request prior to the close of the hearing.

(Secs. 15, 16, 52 Stat, 829, 830; secs. 308, 309, 49 Stat. 858; 15 U.S.C. 717n, 717o; 16 U.S.C. 825g, 825h)

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## PANHANDLE EASTERN PIPE LINE COMPANY, DOCKET NO. CP66-50

### ORDER VACATING DATES FOR SUBMISSION OF EVIDENCE AND FOR HEARING

(Issued March 31, 1967)

In Opinion Nos. 510, 36 FPC 1107, and 510-A, 37 FPC 314, the Commission provided for further evidentiary hearings in this proceeding whereby Panhandle Eastern Pipe Line Company (Panhandle) seeks a certificate of public convenience and necessity to make a direct sale of natural gas to H. K. Porter Company, Inc. (Porter). In opposition thereto, the City of Fulton, Missouri, seeks an order under Section 7(a) of the Natural Gas Act directing Panhandle to provide the City with a supply of interruptible gas so that the City may serve Porter. The necessity for additional evidentiary hearings has been delineated in Opinion Nos. 510 and 510-A. Pursuant thereto, prehearing conferences were held before the Presiding Examiner on February 28, and March 10, 1967, at which times additional information was requested of the applicants. Panhandle refused to supply certain specific items, and the Presiding Examiner ruled that it need not do so.

On March 16, 1967, the City of Fulton filed with the Commission an appeal from this ruling, contending that the data sought "relates to issues for which the Commission remanded the case, and is necessary for the preparation by the City of its direct case." Panhandle on March 28, 1967, and Porter on March 23, 1967, filed their replies to the City's appeal.

In order to allow the Commission sufficient time to consider and decide the City's appeal, and to allow the parties sufficient time to prepare their cases in the light of the decision, it is necessary to postpone the submission of prepared testimony and the commencement of hearing beyond the dates set by the Presiding Examiner. The period of postponement will be fixed in accordance with later order of this Commission.

*The Commission finds:*

It is necessary and appropriate to the proper administration of the Natural Gas Act and resolution of pertinent issues in this proceeding that the appeal of the City be allowed as specified herein and that the dates previously set by the Presiding Examiner for submission of prepared testimony and hearing be vacated and reset as provided herein.

*The Commission orders:*

The dates previously set by the Presiding Examiner for submission of prepared testimony and hearing are vacated.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## UNITED FUEL GAS COMPANY, DOCKET NO. G-10658

### ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued March 31, 1967)

On January 16, 1967, United Fuel Gas Company (Petitioner), filed in Docket No. G-10658 a petition to amend the order issued in said docket on September

18, 1956, 16 FPC 978, as amended by the order issued October 27, 1964, 32 FPC 1221, by authorizing an increase in the delivery of a maximum daily quantity of natural gas on an interruptible basis for a specific period to one of its industrial customers, all as more fully set forth in the petition to amend.

By the order issued in the instant proceeding on September 18, 1956, Petitioner was authorized to deliver a maximum of 35,000 Mcf of natural gas per day to E. I. du Pont de Nemours Company (du Pont), Belle, Kanawha County, West Virginia. By the amending order issued October 27, 1964, Petitioner was authorized to increase its deliveries to du Pont to a maximum of 60,000 Mcf per day.

Petitioner now requests that it be authorized to deliver to du Pont for the period from April 1, 1967, through October 1, 1967, a maximum daily quantity of 70,000 Mcf in order that du Pont may effectuate certain changes in its plant facilities.

Due notice of the filing of the petition to amend and opportunity for hearing thereon have been given by publication in the Federal Register on February 1, 1967 (32 F.R. 1147). No protest, petition to intervene, or notice of intervention other than a notice of intervention filed by the Public Service Commission of West Viriginia on February 23, 1967 and withdrawn on March 15, 1967, has been filed in the proceeding concerning this amendment.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued September 18, 1956, as amended October 27, 1964, in Docket No. G-10658 be further amended as hereinafter ordered.

*The Commission orders:*

(A) The Commission's order issued September 18, 1956, as amended October 27, 1964, is further amended so as to authorize Petitioner to transport and deliver up to 70,000 Mcf of natural gas daily on an interruptible basis to du Pont in lieu of the 60,000 Mcf of interruptible natural gas presently authorized.

(B) The increase in the limitation of the volume of natural gas to be delivered to du Pont, from 60,000 Mcf/d to 70,000 Mcf/d granted herein shall expire on October 1, 1967.

(C) The certificate order issued in Docket No. G-10658 is amended on the express condition that the interruptible service authorized herein shall be curtailed or interrupted to the extent required to meet existing or future contract maximum obligations of Petitioner for firm service to its customers.

(D) In all other respects said order shall remain in full force and effect.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## WISCONSIN ELECTRIC POWER COMPANY, DOCKET NO. E-7336

### ORDER AUTHORIZING ACQUISITION OF COMMON STOCK

(Issued March 31, 1967)

Wisconsin Electric Power Company (Applicant) filed an application on February 9, 1967, pursuant to Section 203 of the Federal Power Act seeking authority to acquire $13,000,000 in par amount of common stock of its subsidiary, Wisconsin Power Company (Subsidiary).

Applicant is incorporated under the laws of Wisconsin with its principal business office at Milwaukee, Wisconsin and is engaged principally in the electric utility business in southeastern Wisconsin.

The Subsidiary is incorporated under the laws of Wisconsin with its principal business office at Milwaukee, Wisconsin and is engaged principally in the electric utility business in east-central and north-eastern Wisconsin and in the upper peninsula of Michigan. All of the outstanding shares of Common Stock of Subsidiary are presently owned by the Applicant.

Applicant seeks authority to acquire $13,000,000 in par amount of Common Stock of Subsidiary, of which $10,000,000 (500,000 shares—par value $20 per share) is to be purchased for cash at the par amount thereof and $3,000,000 (150,000 shares—par value $20 per share) is to be delivered by Subsidiary to Applicant as a Common Stock dividend. It is proposed that the $10,000,000 of Common Stock will be issued in amounts and at intervals between March 27, 1967 and December 31, 1967 as required to meet construction expenditures of Subsidiary.

The Applicant, in 1966, transferred $3,000,000 in cash to the Subsidiary to enable it to pay for part of its construction program which amount is now to be converted into Common Stock. This is to be accomplished by the Subsidiary's payment of a stock dividend of 150,000 shares of Common Stock, par value $20 per share, total par value $3,000,000.

The Subsidiary's 1967 construction program calls for the expenditure of approximately $23.7 million. The major terms which will be financed in part by the proposed issuance include $16.1 million for work on the 450 mw nuclear plant at Point Beach, Wisconsin; $1.6 million for a 77 mile, 345 kv line from Stiles, Wisconsin to Plains Substations in Michigan; and $202,000 for a 20 mile, 345 kv line from Point Beach plant to Forest Junction Substation in Wisconsin.

Applicant represents that the proposed undertaking, including the acquisition by Applicant of the Common Stock of Subsidiary, is reasonable and consistent with the public interest since the proceeds to be paid by Applicant to Subsidiary will be expended by that company for additions to its utility plant, thereby benefiting the public served by it and Applicant further represents that the purchase price to be paid for the 500,000 shares of Common Stock which it proposes to purchase is reasonable and bears a fair relationship to the sums invested in the utility assets underlying the stock to be acquired.

Written notice of the application has been given to the Michigan Public Service Commission, the Wisconsin Public Service Commission and to the Governors of those States. Notice was also published in the Federal Register on February 28, 1967 (32 F.R. 3373), stating that any person desiring to be heard or to make any protest with reference to said application should on or before March 10, 1967, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). No protest or petition or request to be heard in opposition to the granting of the application has been received. The Public Service Commission of Michigan and the Public Service Commission of Wisconsin approved the transaction by orders issued March 1, 1967 and March 13, 1967, respectively.

*The Commission finds:*

(1) Applicant, a corporation, is a public utility within the meaning of Section 203 of the Federal Power Act subject to the jurisdiction of the Commission as heretofore determined and set forth in the Commission's order

**issued October 31, 1956, *Wisconsin Electric Power Company, et al.* (16 FPC 1145).**

**(2) Subsidiary, a corporation, is a public utility within the meaning of Section 203 of the Federal Power Act subject to the jurisdiction of the Commission as heretofore determined and set forth in the Commission's order issued September 17, 1958, *Wisconsin Michigan Power Company, et al.* (20 FPC 358).**

**(3) By the proposed transaction, Applicant will acquire securities of another public utility within the meaning and subject to the requirements of Section 203 of the Federal Power Act.**

**(4) The proposed acquisition of the securities of Subsidiary by Applicant as recited above, upon the terms and conditions specified in the application and subject to the provisions of this order will be consistent with the public interest as expressed in Section 203 of the Act for the reasons set forth above.**

**(5) The period of public notice in this matter is reasonable.**

***The Commission orders:***

**(A) The proposed acquisition of the securities of Subsidiary by Applicant, as described above, is hereby authorized and approved upon the terms and conditions as set forth in the application, subject to the provisions of this order.**

**(B) Applicant shall record the transaction as provided in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees.**

**(C) This authorization shall expire unless the transaction herein authorized is consummated within 90 days from the date of issuance of this order.**

**(D) This authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuations, estimates or determinations of cost, or any other matter whatsoever now pending or which may come before this Commission or any other regulatory body, and nothing herein shall be construed as an acquiescence by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted.**

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## WILLIAM HARVEY DENMAN, TRUSTEE, ET AL. v. J. M. HUBER CORPORATION, DOCKET NO. RI67-113; MOBIL OIL CORPORATION v. CARL F. MATZEN, ET AL., DOCKET NO. RI67-114; WESTERN NATURAL GAS COMPANY v. ELMER HENNIGH, ET AL., DOCKET NO. RI67-310

### ORDER CONSOLIDATING PROCEEDINGS AND SETTING MATTERS FOR HEARING

(Issued April 3, 1967)

William Harvey Denman, Trustee, *et al.* (Denman), has filed a petition *inter alia*, for a declaratory order (Docket No. RI67-113) that this Commission does not have jurisdiction over the amount of gas royalties payable to them by J. M. Huber Corporation (Huber), their lessee, under the terms of certain oil and gas leases covering land in Hutchison and Carson Counties, Texas. Huber, subject to the Commission's jurisdiction, sells the gas product produced from those leaseholds to the Northern Natural Gas Company (Northern).

Denman's petition was filed following the Fifth Circuit's decision in *Huber Corp.* v. *Wm. Denman, et al.*, 367 F. 2d 104. In that case the lessors had sought royalty payments computed on the basis of actual "market price," rather than on the basis of the rates that were being collected by Huber from Northern. The court agreed that the lessors, as a contractual matter, were entitled to royalty payments computed on the basis of actual "market value" but held (367 F. 2d at 121):

> Specifically, the District Court should refer further action including fixing of the actual market price pending invocation by the parties of a ruling by the FPC: (1)(a) as to the jurisdiction of the FPC over payment for royalties for gas sold for resale and transported in interstate commerce, (b) the status of a royalty interest owner's transaction as a sale under the Act where incident to a sale for resale and transportation in interstate commerce, (c) the status of the royalty interest owner's transaction in this case as a sale under the Act; (2) if it should be determined that the FPC has jurisdiction and that at some stage or time the royalty transaction for payment therefor constitutes a sale under the Act (a) the filing requirements, if any, for certification and if required by whom and when, (b) the extent, if any, to which prior application to and approval by FPC is required as to (i) the type, kind or nature of the royalty clause, (proceeds, market price, etc.), the percentage thereof (e.g., ⅛th, ¼th, etc.), (ii) monetary payments which are or will likely be in excess of relevant FPC ceilings. [footnote omitted]

Subsequent to the filing of the Denman petition the Mobil Oil Corporation and the Western Natural Gas Company filed complaints raising the same jurisdictional question with respect to their numerous royalty contracts in Kansas' Hugoton field. The complaints were filed in response to suits instituted against Mobil and Western Natural in the Kansas Courts wherein their lessors claim that they are entitled to royalty payments computed on the basis of "values" which exceed the producers' effective rates.

Though there may be certain factual differences, the same basic question is presented by the complaints filed by Mobil and Western Natural and the Denman petition: can persons contractually entitled to royalty payments for natural gas sold for resale in interstate commerce be classified as "natural-gas companies" within the meaning of the Natural Gas Act and subject to the jurisdiction of the Commission. It is therefore appropriate to consolidate these proceedings for hearing as hereinafter ordered. The issuance of this hearing order should not be viewed as the enunciation of the Commission's tentative position that we have jurisdiction over royalty owners. The Commission has not as yet made any such determination of the jurisdictional question and will not until consideration of this proceeding.

The hearing in these cases shall be confined to resolving whether the Commission has jurisdiction over a landowner's royalty interest in natural gas leaseholds and, if answered in the affirmative, how such jurisdiction should be implemented. More specifically the parties should address themselves to the method which should be used in computing gas royalty payments and what additional filing requirements, if any, should be imposed and upon whom.[1]

The hearing will not be concerned with whether, assuming that the Commission has jurisdiction over royalty interests, such jurisdiction extends to royalty interests owned by a state, the United States, or their agencies. It is sufficient to note here that, even if the Commission has jurisdiction over other holders of royalty interests, there is still a further question as to whether such governmental entities could be classified as persons within the definition of "natural-gas companies" in Section 2(6) of the Act. Since none of the complaints relate to royalty interests held by such entities, and there is no suggestion that the underlying problem of royalty contract construction relates to such interests, it is not necessary to resolve that jurisdiction question here.

The Examiner will consider the questions raised in Docket No. RI67-114 with respect to helium only as the facts on this subject bear upon the royalty interests of landowners in natural gas leaseholds. These will in no way require consideration of any question foreclosed to this Commission's jurisdiction by the Helium Act (74 Stat. 918), 50 U.S.C. Sec. 167l.

Contractual issues relating to the specific royalty payments to which any particular lessor is entitled under this lease agreement will not be the subject of this hearing. Moreover, the hearing will not be concerned with the effective rate problem presented in Western Natural's complaint.

We shall provide for a prehearing conference at which the factual matters to be resolved by formal evidentiary hearing, if any, will be ascertained. It is hoped that all matters which can be resolved without the necessity for a formal presentation will be settled by stipulation.

Denman has requested that the hearing be held in Fort Worth, Texas. Matzen has requested that the hearing be held in Hugoton, Kansas. Both requests are predicated on the desirability of having individual landowners in attendance. However, in view of the widesweeping significance of this proceeding and in the expectation that it will be attended by interested groups from all parts of the country, we find that it would be inappropriate to schedule the hearing outside of Washington, D.C.

The State of Texas has filed notices of intervention in Docket Nos. RI67-113 and RI67-114. The State Corporation Commission of the State of Kansas has filed similar notices in Docket Nos. RI67-114 and RI67-310.

*The Commission orders:*

(A) Pursuant to the authority of the Natural Gas Act, particularly Sections 4, 5, 7, 14, 15 and 16 thereof, the Commission's Rules of Practice and

---

[1] For example, assuming that the lessor-lessee sale is jurisdictional it may, nevertheless, not be necessary for the royalty owners to make any filing with this Commission. See Section 154.91(e) of our Regulations under the Natural Gas Act.

Procedure and the Regulations under the Natural Gas Act (18 CFR, Chapter I), Docket Nos. RI67-113, RI67-114 and RI67-310 are consolidated and a public hearing shall be held on the issues set forth in the body of this order.

(B) A presiding examiner, to be hereinafter designated by the Chief Hearing Examiner, shall preside at both the prehearing conference and the hearing.

(C) Pursuant to the provisions of Section 1.18 of the Commission's Rules of Practice and Procedure, a prehearing conference shall commence at 10:00 a.m., (EDT) on May 9, 1967, in a hearing room of the Federal Power Commission, 441 G Street, N.W., Washington, D.C., for the purpose of effectuating this order.

(D) Following the prehearing conference, the Presiding Examiner shall give notice of the date of hearing and shall prescribe such other procedures as he deems appropriate in the disposition of these matters.

(E) Notices of intervention or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the Rules of Practice and Procedure (18 CFR 1.8 and 1.37(f)) on or before April 24, 1967. Persons who do not wish to participate formally but nevertheless desire to have their views presented may file *amicus* briefs provided that they indicate their intention to file such a brief by the aforementioned date. The presiding examiner shall prescribe the date by which such briefs are to be filed.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## EL PASO NATURAL GAS COMPANY, DOCKET NO. RP67-9

### ORDER ACCEPTING REVISED TARIFF SHEETS FOR FILING, WAIVING NOTICE REQUIREMENTS, APPROVING STIPULATION AND AGREEMENT AND REQUIRING REFUNDS

(Issued April 3, 1967)

On January 26, 1967, El Paso Natural Gas Company (El Paso), tendered for filing revised tariff sheets, to become effective January 1, 1967, and a "Stipulation and Agreement".[1] The proposed tariff revisions reflect rate decreases which will reduce the annual jurisdictional revenues of El Paso's Southern and Northwest Divisions by $11,820,063 and $3,597,004, respectively, based on estimated sales for the twelve-month period ending December 31, 1967.[2]

El Paso's Stipulation and Agreement contains provisions whereby the company proposes to (1) adopt the principles set forth in Opinion No. 417, *Alabama-Tennessee Natural Gas Company*,[3] relating to the flow-through of the benefits derived from taking tax deductions based on the use of liberalized depreciation, and (2) undertake specific rate reduction and refund obligations, as set forth more fully below.

---

[1] Subsequent to January 26, El Paso entered into discussions with certain customers and interested state commissions, as a result of which El Paso modified its proposals on February 20, 1967. The terms discussed herein are those set forth in El Paso's February 20 revision.

[2] The revised tariff sheets also adopt a pressure base of 14.73 psia for the Southern Division. The pressure base for the Northwest Division is already at 14.73 psia.

[3] 31 FPC 208 (1964), aff'd., 359 F. 2d 318 (CA5-1966), cert. denied, 385 U.S. 847 (1966).

In Opinion No. 500,[4] we granted to El Paso a certificate of public convenience and necessity and required the company to effect certain rate reductions in connection therewith. We also noted in that opinion that further proceedings would be initiated regarding the applicability of the *Alabama-Tennessee* principles to El Paso.

Accordingly, on August 30, 1966, 36 FPC 558, we issued an order in this docket directing El Paso to show cause why its rates should not be reduced to that level resulting from the flow-through of the actual liberalized depreciation tax reductions in 1965 and the reduction of rate base by the accumulated reserve balance in Account 282 ("Accumulated Deferred Income Taxes—Liberalized Depreciation") as of December 31, 1965.

El Paso submitted the instant proposals, after conference with certain customers, interested state commissions, and representatives of our Staff, to comply with the requirements of Opinion No. 500 and those of our show cause order. In addition to the immediate rate reductions described above, totaling $15,417,067, El Paso's Stipulation and Agreement sets forth terms which may be summarized in principal part as follows:

(i) *Liberalized Depreciation (Article III)*. As of January 1, 1967, El Paso shall discontinue the use of deferred tax accounting for liberalized depreciation and shall adopt "flow-through" accounting. In this connection, El Paso has submitted a plan for disposition of the balance in Account 282 in accordance with Opinion No. 417 under which it will be permitted to amortize the balance in Account 282 at December 31, 1966, over a period of 13-1/3 years by crediting Account 411 ("Income Taxes Deferred in Prior Years—Credit") and debiting Account 282. This increase in pipeline income has in turn been reflected in the reduction of rates herein. In any rate or certificate proceeding involving El Paso, its rate base shall be reduced by the average balance in Account 282.

El Paso reserves the right to take advantage of any changes which may occur with respect to the principles set forth in the *Alabama-Tennessee* and *Midwestern*[5] cases, whether through legislation, court decision, change in Commission policy, or otherwise.

(ii) *Contingent Refunds—Suppliers' Rates (Article IV)*. El Paso shall flow-through the jurisdictional portions of any refunds it receives attributable to gas purchased during the periods commencing November 1, 1963 (Southern Division), and January 1, 1964 (Northwest Division), which are not subject to refund obligations under El Paso's agreement dated November 1, 1963, and December 31, 1963.

El Paso shall flow-through the jurisdictional portion of any refunds it receives attributable to gas purchased on and after January 1, 1967, which result from reductions in gas supplier rates below the levels in effect on December 31, 1966. This provision shall not apply to refunds resulting from increases in suppliers' rates becoming effective on or after January 1, 1967, unless such refunds relate to increases utilized to offset reductions in rates pursuant to the contingent rate reduction provisions set forth below, nor shall it apply to refunds resulting from costs of gas from sources of supply connected to El Paso's system on or after January 1, 1967. The disposition of those refunds which El Paso has no specific obligation to flow through, however, shall be governed by the applicability of such principle as may be finally established in the proceeding now before the Commission in Docket No. RP66-12.

---

[4] *Transwestern Pipeline Company, et al.*, Docket No. CP63-204, *et al.*, issued July 26, 1966, 36 FPC 176.

[5] *Midwestern Gas Transmission Company, et al.*, Docket No. RP61-19, *et al.*, Opinion No. 497, issued July 15, 1966, 36 FPC 61.

(iii) *Contingent Rate Reductions—Suppliers' Rates (Article V).* El Paso agrees that if, during the period commencing January 1, 1967, and ending on the first date on which a rate increase filed by El Paso becomes effective, a reduction is made in any supplier's rate in effect on December 31, 1966, for which contingent rate reductions are not required by its 1963 Stipulations, El Paso shall file appropriate changes in its rate schedules to reflect the effect of the jurisdictional portion of the reduction. Such reductions may be offset to the extent of any increase in the cost of gas supplied to El Paso which may become effective on or after January 1, 1967.

(iv) *Deferred Rate Reduction and Refunds—Tax Rate Increase (Article VI).* El Paso shall reserve a portion of the proposed rate reduction until January 1, 1968, to offset a possible increase in the corporate income tax rate from 48% to 50.88%. The portion being reserved is 0.08¢ per Mcf in the Southern Division and 0.10¢ per Mcf in the Northwest Division. If an increase in the income tax rate has not been enacted or become effective on or before January 1, 1968, El Paso will further reduce jurisdictional rates, effective January 1, 1968, by the amount so reserved and refund the amounts accumulated during the period commencing January 1, 1967, with interest at 7 percent. If Congress enacts an increase in the corporate income tax rate from 48% to 50.88% on or before January 1, 1968, no rate reduction will be filed.

The portions of the rate reductions which are reserved may also be used to offset additional amounts of Federal taxes which are payable as a surcharge computed as a percentage of El Paso's Federal income taxes, provided that El Paso shall reduce its rates and make refunds as provided above if Congress has not enacted such surcharge on or before January 1, 1968.

If Congress enacts a tax rate increase or surcharge, and such enactment is made effective subsequent to January 1, 1967, or imposes additional taxes amounting to less than the equivalent of an increase in the corporate income tax rate from 48% to 50.88%, or if the increase is enacted for a limited time, then El Paso shall make appropriate rate reductions and/or refunds as set forth in Article VI.

(v) *Rate Reduction Filings (Article VII).* The revised tariff sheets filed with El Paso's Stipulation and Agreement shall be made effective January 1, 1967, upon the issuance by the Commission of an order approving the Stipulation. Any amounts collected from El Paso's jurisdictional customers after January 1, 1967, in excess of the reduced rates set forth in the revised tariff sheets will be refunded without interest thirty days after the issuance of such order.

After due notice of the proposed settlement, comments were received from the Public Utility Commissioner of Oregon, the Washington Utilities and Transportation Commission, and the Wyoming Public Service Commission. No objections were set forth in these responses.[6]

---

[6] The Washington Utilities and Transportation Commission requested that Northwest Pipeline Corporation be made a signatory to El Paso's proposed filing. In view of the present status of the El Paso divestiture proceeding, however, such concurrence is not appropriate.

Our review of the documents and data submitted in support of the proposed Stipulation and Agreement, including the cost of service data utilized for such purposes, indicates that El Paso has fully complied with the requirements of the show cause proceeding in Docket No. RP67-9, and with the rate reduction portions of the Commission's order accompanying Opinion No. 500. The proposed settlement is proper and in the public interest.

*The Commission finds:*

(1) The settlement of this proceeding on the basis of the Stipulation and Agreement filed by El Paso on January 26, 1967, and amended by its filing of February 20, 1967, is proper and in the public interest and should be approved and made effective subject to the terms and conditions hereinafter ordered.

(2) Good cause exists for waiving the requirements of Part 154 of the Commission's Regulations under the Natural Gas Act in order that the revised tariff sheets filed with El Paso's Stipulation and Agreement may become effective as of January 1, 1967, as hereinafter provided.

*The Commission orders:*

(A) The provisions of Part 154 of the Commission's Regulations under the Natural Gas Act are hereby waived subject to the terms and conditions of this order and the revised tariff sheets tendered for filing with the above-described Stipulation and Agreement are accepted for filing to become effective as of January 1, 1967.

(B) The Stipulation and Agreement filed by El Paso on January 26, 1967, amended on February 20, 1967 (incorporated herein by reference and made a part of this order), is approved and made effective, subject to the terms and conditions of this order.

(C) El Paso shall comply fully with each of the obligations it has assumed in the Stipulation and Agreement approved in paragraph (B) above.

(D) Within 30 days of the effective date of this order, El Paso shall refund to its jurisdictional customers any amounts collected from said customers on and after January 1, 1967 in excess of the amounts which it would have collected had the revised tariffs accepted in paragraph (A) above, been in effect at all times from and after January 1, 1967. Such refunds shall be made without interest, in accordance with the terms of Article VII of El Paso's Stipulation and Agreement.

(E) Within 15 days of making the refunds prescribed in paragraph (D) above, El Paso shall report to the Commission, in writing and under oath, the amount of the refund made to each of its customers, and shall serve a copy of such report upon each of the customers receiving a refund. Concurrently, El Paso shall file with the Commission releases from its customers showing receipt of the appropriate amounts.

(F) Within 15 days from any date upon which El Paso makes further refund payments (accompanied by reports to recipient customers and to the Commission) pursuant to Articles IV, V or VI of its Stipulation and Agreement, El Paso shall file with the Commission copies of releases, signed by those customers to whom it has made such payments, acknowledging receipt of the amount refunded.

(G) This order is without prejudice to any findings or orders which have been made or may hereafter be made by the Commission and is without prejudice to any claims which may be made by the Commission, by the Respondent, by the Commission Staff, or by any other party affected by this order, in any proceedings now pending or hereafter instituted by or against El Paso or any other persons or parties affected by this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## MICHIGAN WISCONSIN PIPE LINE COMPANY, DOCKET NO. CP66-208

### ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 3, 1967)

On January 11, 1967, Michigan Wisconsin Pipe Line Company (Petitioner) filed in Docket No. CP66-208 a petition and supplement thereto on February 3, 1967, to amend the order issued in said docket on May 24, 1966, 35 FPC 777, as amended by the orders issued September 2, and September 12, 1966, 36 FPC 571, 617, respectively, by authorizing the increase in the Maximum Daily Quantity of natural gas delivered to two of its customers, all as more fully set forth in the petition to amend.

By the order issued May 24, 1966, Petitioner was authorized, *inter alia*, to increase deliveries of natural gas to certain customers. By the amending order of September 2, 1966, Petitioner was authorized to increase deliveries of natural gas to certain customers one of which was the City of Bloomfield, Iowa.

By the instant petition to amend Petitioner requests authorization to increase the Maximum Daily Quantity of natural gas delivered to the City of Bloomfield, Iowa (Bloomfield) by an additional 150 Mcf for a total of 1,750 Mcf per day, and to increase the Maximum Daily Quantity of natural gas delivered to Illinois Power Company (Illinois Power) by an additioual 400 Mcf per day for a total of 5,870 Mcf. Service agreements dated December 27, 1966 and filed January 11, 1967 supersede prior agreements of Bloomfield and Illinois Power dated March 18, 1966, and March 17, 1966, respectively. Petitioner requests that the new service agreements be accepted for filing effective as of January 1, 1967. To eliminate possible overrun penalties the superseding service agreements are accepted for filing effective as of January 1, 1967.

Due notice of the filing of the application to amend and opportunity for hearing thereon have been given by publication in the Federal Register on January 31, 1967 (32 F.R. 1106). No protest or petition to intervene has been filed in the proceeding concerning this amendment.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act, and the public convenience and necessity require (1) that the Commission's order issued May 24, 1966 in Docket No. CP66-208 be amended as hereinafter ordered, and (2) the executed superseding service agreements filed with the Commission on January 11, 1967 be accepted for filing, effective January 1, 1967.

*The Commission orders:*

(A) The Commission's order, issued May 24, 1966 in Docket No. CP66-208 is amended by authorizing Michigan Wisconsin to increase maximum daily quantities as requested by Petitioner and shown hereinbefore, all as hereinbefore described and as set forth in the subject petition to amend.

(B) The service agreements filed with the Commission on January 11, 1967, are accepted for filing, effective as of January 1, 1967.

(C) In all other respects said order shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## MISSISSIPPI POWER & LIGHT COMPANY, DOCKET NO. E-7334

### ORDER AUTHORIZING ACQUISITION OF FACILITIES

(Issued April 3, 1967)

Mississippi Power & Light Company (Applicant) filed an application on January 19, 1967 for an order, pursuant to Section 203 of the Federal Power Act, authorizing the lease and purchase from Southwest Mississippi Electric Power Association (Southwest) of a three-phase, wood pole, 115 kv transmission line, 0.8 miles in length, extending from the Applicant's existing Vicksburg-Natchez 115 kv line to a substation of Southwest near Lorman, Mississippi.

Applicant is incorporated under the laws of Mississippi with its principal business office at Jackson, Mississippi and is engaged in the generation, transmission, purchase, distribution, and sale of electric energy in 45 of the 82 counties in the State.

Southwest owns and operates a cooperative distribution system serving rural areas and small communities in ten counties in the southwestern corner of the State of Mississippi. Southwest has no generating facilities and purchases its entire energy requirements from Applicant. In 1965, Southwest received 60,807,500 kwh from Applicant and delivered 51,769,281 kwh to 10,718 retail customers.

Under an Agreement for Purchase of Power, dated May 31, 1966, between the Applicant and Southwest, the latter agreed to purchase electric energy from the Applicant at a substation to be constructed by Southwest near Lorman, Jefferson County, Mississippi. To provide for the delivery of this energy, the Applicant and Southwest on the same date entered into a related Agreement for the Construction, Lease and Purchase of a Transmission Line.

Under this latter Agreement the Applicant agreed to construct for the account of Southwest, a three-phase, wood pole, 115 kv transmission line, 0.8 miles in length from the Applicant's existing Vicksburg-Natchez 115 kv line to the substation of Southwest near Lorman, Mississippi. After completion of the transmission line, Southwest agreed to pay to the Applicant an amount equal to the Applicant's cost of the line. The line has been constructed at a cost of $58,473.70.

As of the date Southwest reimburses the Applicant for the cost of the line, Southwest will lease the line to the Applicant for a period of ten years at an annual rent of 2½% of the amount paid by Southwest for the line. In addition, under the same Agreement, the Applicant agreed to purchase the line over the ten-year period of the lease by making annual payments of 7½% of the amount paid by Southwest for the line. Upon receipt by Southwest of the tenth and last payment, title to the line free of all liens and encumbrances is to be transferred to the Applicant.

Annual rent of 2½% of the cost of the line will mean that the Applicant will pay rent of $1,461.84 each year for ten years. Applicant proposes to charge these payments to Operation Expense, Account 567-Transmission Rents. Southwest will use an annual depreciation rate of 2½% on its books. Therefore, the Applicant will only reimburse Southwest for depreciation and this will mean that the Applicant will be charging the same amounts to Rents as it would be recording as Depreciation if the facilities were recorded on the

Applicant's books, assuming use of the same depreciation rate. Annual purchase payments of 7½% of cost will be $4,385.53 each year for ten years. On the books of the Applicant, these payments will be charged to Account 186-Miscellaneous Deferred Debits, an asset account. At the end of the ten-year period, the balance in Account 186-Miscellaneous Deferred Debits will equal the depreciated original cost of the line. The Applicant will then record the acquisition by a debit to Account 101-Electric Plant in Service, for the original cost; by a credit to Account 186-Miscellaneous Deferred Debits, to close this account; and by a credit to Account 108-Accumulated Provision for Depreciation of Electric Plant in Service, for the difference between the amount debited to Account 101 and the amount credited to Account 186.

From an operational viewpoint, Applicant represents that its ownership of the line is preferable and in the public interest. The circuit breakers at Natchez and Vicksburg will operate to clear any fault on the Natchez-Vicksburg line and on the tap to Lorman Substation. Applicant now has air patrol of its own transmission lines. Patrolling of the tap to Lorman Substation can be done at a negligible increase in Applicant's cost of this service. Applicant also has greater resources in equipment and personnel for transmission line maintenance than Southwest. On its latest borrowing, Applicant paid an interest rate of 5%. Using this rate, as basis for comparison, the proposed transaction will result in an annual interest saving to the Applicant of about $1,330 per year.

Written notice of the application has been given to the Governor of the State of Mississippi and to the Public Service Commission of that State. Notice was also published in the Federal Register on February 4, 1967 (32 F.R. 2482) stating that any person desiring to be heard or to make any protest with reference to the application should on or before February 20, 1967, file with the Federal Power Commission petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). No protest or petition or request to be heard in opposition to the granting of the application has been received. The Mississippi Public Service Commission approved the transaction by an order issued April 5, 1966.

*The Commission finds:*

(1) Applicant, a corporation, owns and operates facilities for the transmission and sale at wholesale of electric energy which is generated in the States of Arkansas, Louisiana, and Tennessee and consumed in the State of Mississippi, all of which facilities are in addition to, and do not include, facilities used for the generation of electric energy or facilities used in local distribution or only for the transmission of electric energy in intrastate commerce or solely for the transmission of electric energy consumed wholly by the transmitter. Applicant, therefore, is a public utility within the meaning of that term as used in Section 203 of the Federal Power Act.

(2) By the proposed transaction, Applicant will merge or consolidate its facilities subject to the jurisdiction of the Commission with those of Southwest, another person within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(3) The proposed lease and acquisition of facilities by Applicant, as described above, upon the terms and conditions set forth in the application, and subject to the provisions of this order will be consistent with the public interest as expressed in Section 203 of the Federal Power Act.

*The Commission orders:*

(A) The proposed lease and acquisition by Applicant of the aforementioned electric facilities, all as described above, is authorized and approved upon the terms and conditions and for the purposes set forth in the application subject to the provisions of this order.

(B) Applicant shall record the proposed transaction herein authorized and the facilities and properties referred to above as provided in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees and as set forth above in this order.

(C) This authorization shall expire unless the transaction herein authorized and approved is consummated within 90 days from the date of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determination of cost, or any matter whatsoever now pending or which may come before this Commission or any other regulatory body and nothing herein shall be construed as an acquiescence by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP64–150

### ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 3, 1967)

On February 3, 1967, Natural Gas Pipeline Company of America (Petitioner) filed in Docket No. CP64–150 a petition to amend the order of the Commission in said docket issued November 8, 1965, 34 FPC 1258 (Opinion No. 480), and as amended by the order issued February 7, 1966, 35 FPC 189, which authorized the development of its Sayre Storage Field by the construction and operation of necessary facilities and the construction and operation of certain field gathering and transportation facilities, all as more fully set forth in the petition to amend.

Petitioner states that due to problems encountered in reworking the originally authorized gas wells and its discovery that the additional oil wells should be reworked, it has been unable to complete its well reworking program and put its Sayre Storage Field into operation within the time prescribed by the Commission's order of November 8, 1965, as amended in this proceeding, and Petitioner therefore requests that the Commission extend the time for completion of construction of all facilities to December 1, 1967.

Petitioner estimates the new, total cost of constructing the proposed and already authorized facilities at $6,699,140, an increase of $1,641,140 from the originally proposed cost of $5,058,000.

Due notice of the filing of the petition to amend and opportunity for hearing thereon has been given by publication in the Federal Register on February 15, 1967 (32 F.R. 2914). No petition to intervene, notice of intervention, or protest to the granting of the petition to amend has been filed.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued November 8, 1965 in Docket No. CP64–150 be further amended as hereinafter ordered.

*The Commission orders:*

(A) The Commission's order issued November 8, 1965 in Docket No. CP64–150 is further amended to authorize Petitioner to rework 47 wells, drill 2 wells and to extend the time for completion of construction of all facilities to December 1, 1967.

(B) In all other respects said order shall remain in full force and effect.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## UNITED GAS PIPE LINE COMPANY, DOCKET NO. CP66–280

### ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 3, 1967)

On March 14, 1967, United Gas Pipe Line Company (Petitioner), filed in Docket No. CP66–280 a petition to amend the order issued in said docket on July 7, 1966, 36 FPC 28, so as to extend the time to July 7, 1967, within which the condition set forth in paragraph (C) of such order must be complied with, all as more fully set forth in the petition to amend.

By order issued July 7, 1966, the Federal Power Commission granted Petitioner a certificate of public convenience and necessity authorizing the construction and operation of approximately 7.35 miles of 8-inch pipeline and appurtenant facilities beginning at main line valve on Petitioner's 30-inch Offshore to Kosciusko main line at approximately Milepost 190.7 and extending in an easterly direction to end at a point in the Southeast ¼ of Section 26, Township 8 North, Range 21 West, Lawrence County, Mississippi.

Paragraph (C) of said order provided that the transportation of gas as authorized by the certificate was to commence within three months of July 7, 1966. By letter dated August 31, 1966, the Acting Secretary of the Commission granted an extension of such date to April 7, 1967.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued July 7, 1966 in Docket No. CP66–280 be amended as hereinafter ordered.

*The Commission orders:*

(A) The Commission's order issued July 7, 1966 in Docket No. CP66–280 is amended so as to extend the time for completion of the authorized facilities to July 7, 1967.

(B) In all other respects said order shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## ARKANSAS LOUISIANA GAS COMPANY, DOCKET NO. CP67-197

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 4, 1967)

On January 9, 1967, Arkansas Louisiana Gas Company (Applicant) filed in Docket No. CP67-197 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas transmission facilities for the transportation and delivery of natural gas in interstate commerce to an industrial customer, all as more fully set forth in the application.

Applicant requests authorization to construct and operate approximately 500 feet of 4-inch market lateral and related facilities, extending from Applicant's existing 10-inch Line AM-22 to the site of the plant of Union Carbide Corporation (Union Carbide) in Garland County, Arkansas. By means of these facilities Applicant proposes to supply Union Carbide's estimated interruptible requirements of 4,800 Mcf of gas per day, at a maximum, and 1,642,500 Mcf of gas per year.

The total estimated cost of the proposed facilities is $12,900, which cost will be financed from cash on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on March 30, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, and exhibits submitted in support of the authorization, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Arkansas Louisiana Gas Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued January 26, 1943, in Docket No. G-252 (3 FPC 910).

(2) The proposed construction and operation of facilities and transportation and delivery of natural gas as hereinbefore described, and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities and transportation and delivery of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs

(a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to the Applicant in this proceeding, authorizing the construction and operation of facilities and the transportation and delivery of up to 4,800 Mcf daily of natural gas as more fully described in the application and exhibits in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation and the transportation of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 3 months from the date on which this order issues.

(D) The certificate issued is granted on the express condition that (1) the facilities authorized shall not be used to transport more than 4,800 Mcf daily of interruptible gas to Union Carbide Corporation's said plant and (2) the interruptible service authorized herein shall be subject to any curtailment or interruption required to meet existing or future contracted maximum delivery obligations of Applicant for firm service to its customers.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## THE MANUFACTURERS LIGHT AND HEAT COMPANY, DOCKET NO. CP67-202

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 4, 1967)

On January 16, 1967, The Manufacturers Light and Heat Company (Applicant) filed in Docket No. CP67-202, as supplemented on February 20, 1967, an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities for a new delivery point for an existing customer, the Stroudsburg Gas Company, and the sale and delivery of natural gas for resale in and about the borough of Delaware Water Gap, Smithfield Township, Monroe County, Pennsylvania, all as more fully set forth in the application, as supplemented, in this proceeding.

Specifically, Applicant proposes to construct and operate a sales measuring station on its 14-inch line in Smithfield Township and to deliver gas at said point to Stroudsburg's Delaware Water Gap Division for resale in said borough. Delaware Water Gap's third-year peak day and annual natural gas requirements are 335 Mcf and 36,945 Mcf, respectively.

The total estimated cost of the proposed facilities is $11,340, which cost will be financed from funds on hand.

Applicant renders natural gas service to Stroudsburg under Applicant's FPC Gas Rate Schedules CDS-1 and WS.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application, as supplemented, has been filed.

At a hearing held on March 30, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplement, and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, The Manufacturers Light and Heat Company, a Pennsylvania corporation having its principal place of business in Pittsburgh, Pennsylvania, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 29, 1944, in Docket No. G-593, *et al.* (4 FPC 821).

(2) The facilities hereinbefore described, as more fully described in the application, as supplemented, in this proceeding, are to be used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the proposed transportation and sale of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities and the proposed transportation and sale of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(6) Applicant should file with the Commission a revised service agreement with Stroudsburg to cover the proposed additional delivery point.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued authorizing Applicant, The Manufacturers Light and Heat Company, to construct and operate the proposed facilities and to sell and deliver an additional 335 Mcf of natural gas per day to Stroudsburg as hereinbefore described, all as more fully described in the application, as supplemented, in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Commission's

Regulations under the Natural Gas Act, within three months from the date on which this order issues.

(D) Applicant shall file with the Commission a revised service agreement with Stroudsburg to cover the proposed additional delivery point.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## MISSISSIPPI RIVER TRANSMISSION CORPORATION, DOCKET NO. G–863

### FINDINGS AND ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 4, 1967)

On November 23, 1966, Mississippi River Transmission Corporation (Applicant) filed in Docket No. G–863, as supplemented on January 9, 1967, an application to amend the Commission's order issued December 8, 1947, 6 FPC 280, in said docket, as amended, by authorizing Applicant to transport and deliver up to 1,500 Mcf of natural gas per day, on a firm basis, to Shell Oil Company (Shell) for use in the latter's refinery at Wood River, Madison County, Illinois, all as more fully set forth in the application to amend, as supplemented, in this proceeding.

The order of December 8, 1947, among other things, authorized Mississippi River Fuel Corporation, Applicant's predecessor in interest, to transport and deliver natural gas on an interruptible basis to Shell for use at the Wood River refinery. Applicant now proposes to deliver gas on both an interruptible and firm basis to Shell. Applicant states that Shell proposes to utilize the firm gas to provide safe and economical control of the pressure in the Wood River refinery fuel gas system.

No new facilities are required for the proposed project.

Due notice of the filing of the application to amend and opportunity for hearing thereon has been given by publication in the Federal Register on December 13, 1966 (31 F.R. 15712). No protest or petition to intervene has been filed in this proceeding.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued December 8, 1947 in Docket No. G–863, as amended, be further amended as hereinafter ordered.

*The Commission orders:*

(A) The Commission's order issued December 8, 1947 in Docket No. G–863, as amended, is further amended by authorizing Applicant to transport and deliver up to a maximum of 1,500 Mcf of natural gas per day, on a firm basis, to Shell Oil Company for use in the latter's refinery at Wood River, Madison County, Illinois, all as hereinbefore described and as set forth in the application to amend, as supplemented.

(B) Applicant shall advise the Commission of the date of the commencement of the service authorized in paragraph (A) above within 10 days of such date.

(C) The authorization herein shall not entitle the industrial customer to whom firm deliveries are authorized to any priorities to additional gas for meeting any future increases in its requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

(D) In all other respects said order, as amended, shall remain in full force and effect.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## VILLAGE OF SIMS, ILLINOIS AND TRUNKLINE GAS COMPANY, DOCKET NO. CP67-223

### FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued April 4, 1967)

On February 7, 1967, the Village of Sims, Illinois (Applicant) filed in Docket No. CP67-223 an application, as supplemented on February 21, 1967, pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Trunkline Gas Company (Respondent) to make physical connection of its facilities with the facilities of Applicant and to sell and deliver to Applicant up to 242 Mcf of natural gas per day for resale and distribution in the Village of Sims, and along the proposed supply line, Wayne County, Illinois, all as more fully set forth in the application.

Applicant proposes to construct a distribution system and approximately 4 miles of 2-inch supply and distribution pipeline extending eastwardly from Respondent's 26-inch transmission pipeline to the Village of Sims. Rural customers will be served by short line taps from the proposed supply lateral.

On February 16, 1967, the Board of Trustees of the Village of Sims issued Ordinance No. 108 approving the construction and operation of the proposed municipal gas distribution system.

Applicant's estimated third-year annual and peak day natural gas requirements are 22,050 Mcf and 242 Mcf, respectively. Respondent will sell and deliver said gas requirements to Applicant pursuant to Respondent's presently effective Rate Schedule SG-1 at approximately 35.6 cents per Mcf on a firm basis.

The total estimated cost of Applicant's proposed facilities is $120,000, including approximately $41,000 for the 2-inch supply lateral. Applicant proposes to finance the construction of its proposed facilities through the sale of 30-year gas revenue bonds, as authorized by the aforementioned Ordinance No. 108.

On March 8, 1967, Respondent filed a reply stating that it has no objection to rendering the natural gas service requested by Applicant if the Commission so authorizes.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

*The Commission finds:*

(1) Respondent, Trunkline Gas Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of April 29, 1949, in Docket No. G-882 (8 FPC 250).

(2) Applicant, Village of Sims, Illinois, is a municipal corporation incorporated under the laws of the State of Illinois and is legally empowered to construct and operate natural gas facilities and to sell and distribute natural gas in said community.

(3) It is necessary and desirable in the public interest that Respondent be directed to establish physical connection of its natural gas transportation system with the proposed facilities of Applicant and to sell and deliver up to 242 Mcf of natural gas per day to Applicant, as set forth in the application and as hereinafter ordered and conditioned.

(4) This order should be conditioned upon Applicant being prepared to receive natural gas from Respondent, as proposed, within one year from the date on which this order issues.

(5) The requirement that Respondent serve Applicant, as proposed, will not place any undue burden upon Respondent nor impair its ability to render adequate service to its existing customers.

*The Commission orders:*

(A) Respondent is directed to establish physical connection of its natural gas transmission system with the facilities to be constructed by Applicant and to sell and deliver up to 242 Mcf of natural gas per day to Applicant, all as hereinbefore described and as more fully described in the application in this proceeding.

(B) Applicant shall be prepared to receive natural gas from Respondent within one year from the date of this order.

(C) Respondent shall notify the Commission of the commencement of service within ten days thereof.

(D) Respondent shall execute and file with the Commission a service agreement with Applicant in accordance with the Commission Regulations.

## SOUTHERN UNION GAS COMPANY, DOCKET NO. G-513; DEL NORTE NATURAL GAS COMPANY, CP66-104; EL PASO NATURAL GAS COMPANY AND EL PASO GAS TRANSPORTATION CORPORATION, CP66-105; DEL NORTE NATURAL GAS COMPANY, CP66-106

### ORDER GRANTING INTERVENTION, ESTABLISHING PROCEDURE AND FIXING A DATE FOR PREHEARING CONFERENCE

(Issued April 4, 1967)

On October 12, 1965, Del Norte Natural Gas Company (Del Norte) filed in Docket No. CP66-104 an application requesting an order of the Commission authorizing Del Norte to export natural gas from the United States to the Republic of Mexico (Mexico). In Docket No. CP66-106, filed the same day, Del Norte requested a permit authorizing the operation, maintenance and connection of facilities at the International Boundary between the United States and Mexico for the exportation of natural gas to Mexico. By these applications, Del Norte proposed to succeed to Southern Union Gas Company (Southern Union) in the exportation and sale of natural gas which was authorized by the Commission on January 2, 1945, in Docket No. G-513, 4 FPC 826.[1] Also on

---

[1] Southern Union filed an application to vacate the related Presidential Permit and Authorization for exportation of gas to Mexico.

October 12, 1965, El Paso Natural Gas Company (Gas Company) and El Paso Gas Transportation Corporation (Transportation Corporation) filed in Docket No. CP66–105 a joint application for permission and approval to abandon the sale of natural gas to Southern Union and for a certificate of public convenience and necessity authorizing the sale and delivery of natural gas to Del Norte. As a result of this new arrangement Del Norte would continue to supply natural gas to Juarez Gas Company, S.A. (Juarez Gas) in Ciudad Juarez, Chihuahua, Mexico, while also serving this area through a new distributor, Gas Natural de Juarez, S.A. (Juarez Natural).

Notice of these applications was issued on October 28, 1965 (30 F.R. 14022). Juarez Gas' petition to intervene in each docket was denied. On December 29, 1965, 34 FPC 1588, the Commission granted the requests made by Del Norte, Southern Union Gas Company, and Transportation Company in Docket Nos. G–513, CP66–104, CP66–105 and CP66–106. An application for rehearing and a stay by Juarez Gas was denied. However, Juarez Gas' petition for review to the United States Court of Appeals for the District of Columbia Circuit was granted and by order of March 14, 1967, the Court remanded the case to the Commission to reopen the case for further proceedings which would afford Juarez Gas and all proper parties "the opportunity to develop a complete record on all issues bearing on the public interest and public convenience and necessity."

In light of the Court's decision it is appropriate that we grant intervention to Juarez Gas and we shall do so.

In order to expedite the proceeding and to crystallize those matters upon which a hearing should be held we shall require each party to the proceeding to file a statement specifying issues in this case. Furthermore, we shall order that a prehearing conference be held thereafter to offer an opportunity to the parties to attempt to further limit the issues in this proceeding, to stipulate as to evidentiary matters, to resolve those issues which are capable of resolution on agreed evidence, and to use any other means possible to dispose of this proceeding in the most expeditious manner consistent with the requirements of due process and the Natural Gas Act. Following such conference, the Presiding Examiner shall set this matter for an early hearing and shall specify such other procedure as he deems necessary to promptly bring this matter to a proper conclusion.

*The Commission finds:*

(1) It is desirable to allow Juarez Gas Company, S.A. to intervene in these proceedings in order to show what further action may be appropriate under the circumstances in the administration of the Natural Gas Act.

(2) The processing of this proceeding will be expedited by the filing of statements of proposed issues by the participants herein, and by the convening of a prehearing conference thereafter.

*The Commission orders:*

(A) Juarez Gas Company, S.A. is permitted to intervene in this proceeding subject to the Rules and Regulations of the Commission.

(B) The parties to the proceeding shall submit in writing on or before April 10, 1967 a statement specifying the issues which they believe have been raised by the above-docketed applications. Said statement of issues shall be served on the other parties to the proceeding and the Commission staff in accordance with the Commission's Rules.

(C) A prehearing conference shall be held on April 17, 1967, at 10:00 a.m. (EST) before a presiding examiner of the Commission, in a hearing room of the Federal Power Commission, 441 G Street, N.W., Washington, D.C., for the purpose of discussion and limitation of issues, stipulation as to facts, the possible resolution of issues by stipulation, and such other means as may be available to expedite the proceeding.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## EL PASO NATURAL GAS COMPANY, DOCKET NO. CP67-122; CAPITAN-CARRIZOZO NATURAL GAS ASSOCIATION, DOCKET NO. CP67-213; RUIDOSO NATURAL GAS COMPANY, INC., DOCKET NO. CP67-236

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND ISSUING DECLARATIONS OF EXEMPTION

(Issued April 5, 1967)

On November 1, 1966, El Paso Natural Gas Company (El Paso) filed in Docket No. CP67-122 an application and supplement thereto on January 3, 1967, pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities, the acquisition by purchase from Capitan-Carrizozo Natural Gas Association (Association) and operation of certain facilities to be constructed by Association, and the sale and delivery of natural gas to Association for resale, all as more fully set forth in the application and supplement thereto.

El Paso and Association have undertaken a project which will result in natural gas service becoming available to the communities of Capitan, Carrizozo, Ruidoso, Ruidoso Downs and to other areas of Lincoln County, New Mexico. The proposed project contemplates the following: (1) the construction and operation by El Paso of a measuring and regulating station to be located adjacent to its Permian-San Juan crossover pipeline system in Lincoln County, New Mexico; (2) the construction by Association of approximately 44 miles of 4½-inch O.D. transmission pipeline extending southwesterly from El Paso's proposed measuring and regulating station along a route passing adjacent to the community of Capitan to a point of termination approximately 10 miles north of the community of Ruidoso, approximately 19 miles of 4½-inch O.D. transmission pipeline extending northwesterly from the community of Capitan to a point of termination at the community of Carrizozo, and approximately 3.5 miles of 4½-inch O.D. transmission pipeline extending southwesterly from the community of Capitan to a point of termination near Fort Stanton; (3) the construction by Association of distribution systems in the communities of Capitan and Carrizozo and other areas otherwise situated along its transmission system; (4) the acquisition by El Paso of the initial 7.9 miles segment of Association's proposed pipeline; (5) the sale and delivery of gas by El Paso to Association for resale and sale for resale; (6) the sale and delivery of natural gas by Association to Ruidoso Natural Gas Company, Inc. (Ruidoso Gas) for transportation to and resale and distribution in the communities of Ruidoso and Ruidoso Downs.

On August 12, 1966, Association in Case No. 821, was authorized by the New Mexico Public Service Commission to construct and operate natural gas lines and distribution systems in Lincoln County, New Mexico to provide gas service to the communities of Capitan, Carrizozo and environs.

On July 18, 1966, in Case No. 882, Ruidoso Gas was authorized by the New Mexico Public Service Commission to provide service to Ruidoso, Ruidoso Downs and environs.

The New Mexico Public Service Commission certified on November 2, 1966, that it was and is exercising rate regulatory jurisdiction over Association. Similar certification was made on February 10, 1967, with respect to Ruidoso Gas. Association and Ruidoso Gas have both received all necessary local authorizations.

The estimated natural gas requirements of the new market to be served are stated to be as follows:

| Community | Peak day | Third year in Mcf, annual volume |
|---|---|---|
| Capitan | 474 | 60,143 |
| Carrizozo | 501 | 53,196 |
| Ruidoso | 2,521 | 261,832 |
| Ruidoso Downs | 425 | 42,850 |
| Shrinkage | 36 | 10,300 |
| Total sales | 3,957 | 437,321 |

Such deliveries are proposed to be initiated by El Paso in accordance with and at rates contained in El Paso's Rate Schedules A-2, B-3, and D-3, FPC Gas Tariff, Original Volume No. 1.

The estimated cost of El Paso's proposed measuring and regulating station is $7,585 and the estimated cost of the pipeline segment proposed to be acquired by El Paso is $72,245 for a total of $79,830 which cost will be financed through current working funds.

The total estimated cost of the facilities proposed to be constructed by Association, less the cost of facilities to be acquired by El Paso, is $655,055. Ruidoso Gas estimates the cost of its facilities to be $837,000.

Pursuant to Section 1(c) of the Natural Gas Act, Capitan-Carrizozo Natural Gas Association (Association), a New Mexico corporation, filed on January 26, 1967 an application for exemption from the provisions of the Natural Gas Act for the facilities, transportation and sale for resale of natural gas within the State of New Mexico.

Association plans to maintain and operate in the State of New Mexico a pipeline having diameters of 4 inches and 2 inches and approximately 67 miles in length from Section 34, T. 3 S., R. 15 E., NMPM, along a route passing near the Village of Capitan, New Mexico, to a terminus in Section 15, T. 10 S., R. 13 E., NMPM, approximately 10 miles north of Ruidoso, New Mexico, together with distribution facilities to serve the communities of Capitan and Carrizozo. Association will buy natural gas from El Paso to be used in its facilities described above, which will be delivered at the juncture of El Paso's line with Association's lines described above. The natural gas so received by Association will be ultimately consumed within the State of New Mexico. Association's facilities will be located within the State of New Mexico.

Pursuant to Section 1(c) of the Natural Gas Act, Ruidoso Natural Gas Company, Inc. (Ruidoso Gas), a New Mexico corporation, filed on February 23, 1967 an application for exemption from the provisions of the Natural Gas Act for the facilities, transportation and sale of natural gas within the State of New Mexico. Ruidoso Gas plans to maintain and operate in the State of New Mexico a pipeline having diameters of 6 inches, 4 inches and 2 inches and approximately thirteen miles in length, beginning in Section 15, Township 10 South, Range 13 East, N.M.P.M., located approximately 10 miles north of Ruidoso and extending therefrom into Ruidoso and the Village of Ruidoso Downs in Lincoln County, New Mexico, together with distribution facilities to serve the two communities and other users of gas within Lincoln County. Ruidoso Gas will buy gas from Capitan-Carrizozo Natural Gas Association, at a point approximately 10 miles north of Ruidoso, New Mexico. All the natural gas so received by Ruidoso Gas will be ultimately consumed within the State of New Mexico and all of its facilities described herein will be located within the State of New Mexico.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application and supplement thereto, has been filed.

At a hearing held on March 30, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and supplement in Docket No. CP67-122 and applications in Docket Nos. CP67-213 and CP67-236 submitted in support of the authorizations sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, El Paso Natural Gas Company, a Delaware corporation having its principal place of business in El Paso, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of October 29, 1942, in Docket No. G-242 (3 FPC 85).

(2) The proposed acquisition of facilities from Association, the construction and operation of facilities, and sale of natural gas for resale in interstate commerce, as hereinbefore described, and as more fully described in the application and exhibits in this proceeding are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed acquisition of facilities, construction and operation of facilities, and sale of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon El Paso's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (d)(2), (d)(3), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to the Applicant, El Paso Natural Gas Company, in this proceeding authorizing the construction and operation of facilities, the acquisition and operation of facilities and sale for resale and delivery of natural gas to Capitan-Carrizozo Natural Gas Association, all as more fully described in the application and exhibits herein, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon El Paso's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (d)(2), (d)(3), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized to be constructed and operated by El Paso shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 12 months of the date on which this order issues.

(D) By reason of the proposed operations and services of Capitan-Carrizozo Natural Gas Association related in Docket No. CP67-213, and Ruidoso Natural Gas Company, Inc. in Docket No. CP67-236, and the certifications of the New Mexico Public Service Commission regarding its rate regulatory jurisdiction thereof, the Commission declares Capitan-Carrizozo Natural Gas Association and Ruidoso Natural Gas Company, Inc., and their facilities and services, exempt from the provisions of the Natural Gas Act and the orders, rules and regulations of the Federal Power Commission issued thereunder.

(E) El Paso shall file an executed service agreement with Association in accordance with the Commission's Regulations reflecting the terms and conditions of service to Association and the volumes of natural gas involved.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## KENTUCKY WEST VIRGINIA GAS COMPANY, DOCKET NO. CP67-199

### FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT OF FACILITIES

(Issued April 5, 1967)

On January 12, 1967, Kentucky West Virginia Gas Company (Applicant) filed in Docket No. CP67-199 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon its Camp Branch-Rockhouse Creek delivery point, Letcher County, Kentucky, one of the four regular delivery points utilized for the delivery of natural gas to Inland Gas Company, Inc. (Inland) pursuant to an exchange agreement between the parties, all as more fully set forth in the application.

Specifically, Applicant proposes to abandon approximately 4,824 feet of 2-inch pipeline, metering facilities and appurtenances connecting 2 wells in Letcher County, Kentucky with Inland's facilities.

Both Applicant and Inland have four regular delivery points which are employed in their exchange of natural gas. In addition to the regular delivery points, each has an equalizing or balancing delivery point. Changed operations by Inland have resulted in increased takes by Inland from one of Applicant's delivery points resulting in an imbalance in exchange volumes which in turn, has required abnormal use of the equalizing or balancing delivery facilities.

Applicant proposes to achieve a more uniform exchange by eliminating its Camp Branch-Rockhouse Creek delivery point.

No abandonment of service is proposed and none will result from the authorization requested herein.

Inland has expressed its agreement with Applicant's proposal.

The original cost of the facilities proposed to be abandoned was $5,699.11. The estimated cost of removal is $1,290 and the salvage value of the facilities is estimated to be approximately $1,790.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

At a hearing held on March 30, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Kentucky West Virginia Gas Company, a West Virginia corporation having its principal place of business in Ashland, Kentucky, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of January 4, 1944, in Docket No. G–272 (4 FPC 476).

(2) The facilities to be abandoned, as hereinbefore described, and as more fully described in the application in this proceeding, are used in the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and abandonment of such facilities is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The abandonment by Applicant, as hereinbefore described, is permitted by the public convenience and necessity and an order approving same should be issued as hereinafter ordered and conditioned.

*The Commission orders:*

(A) Permission for and approval of the abandonment by Applicant of the facilities hereinbefore described, all as more fully described in the application in this proceeding, are granted upon the terms and conditions of this order.

(B) Applicant shall advise the Commission of the date of said abandonment within ten days thereof.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## DONNELL DRILLING COMPANY, DOCKET NO. RI67–347

### ORDER ACCEPTING AMENDATORY AGREEMENT, PROVIDING FOR HEARING ON AND SUSPENSION OF PROPOSED CHANGE IN RATE, AND REQUIRING THE FILING OF A RATE SCHEDULE QUALITY STATEMENT

(Issued April 6, 1967)

On March 9, 1967, Donnell Drilling Company (Donnell)[1] tendered for filing a proposed change in its presently effective rate schedule for sales of natural gas subject to the jurisdiction of the Commission. The proposed change, which constitutes an increased rate and charge, is contained in the following designated filing.

*Description*: (1) Amendatory Agreement, dated October 26, 1957;[2] (2) Notice of Change, dated March 6, 1967.

*Purchaser and Producing Area*: El Paso Natural Gas Company (Levelland Field, Hockley County, Texas (Railroad District No. 8–A) (Permian Basin Area).

---

[1] Address is: 1220 Denver Club Building, Denver, Colorado 80202.

[2] Amends contract to provide for continuation of delivery of casinghead gas to Levelland Plant; changes pressure base from 16.4 to 14.65 psia; sets forth new pricing schedule and deletes favored-nation provision from the contract; extends term of contract for 20 years from January 1, 1960, and amends tax provision to provide for partial reimbursement for all tax increases after January 1, 1950, instead of date of contract (October 1, 1949).

*Effective Date:* (1) April 10, 1967;[3] (2) April 10, 1967.[3]

*Rate Schedule Designation:* (1) Supplement No. 8 to Donnell's FPC Gas Rate Schedule No. 1; (2) Supplement No. 9 to Donnell's FPC Gas Rate Schedule No. 1.

*Amount of Annual Increase:* (2) $764.

*Effective Rate:* 10.0¢ per Mcf.

*Proposed Rate:* 18.0¢ per Mcf.[4]

Donnell, a producer-respondent in Opinion No. 468, proposes a renegotiated rate increase from 10.0¢ to 18.0¢ per Mcf, amounting to $764 annually, for a sale of residue gas derived from casinghead gas to El Paso Natural Gas Company from the Levelland Plant in the Permian Basin Area of Texas. The proposed increased rate exceeds the applicable area base rate of 14.5¢ per Mcf prescribed by Opinion Nos. 468 and 468–A, 34 FPC 159, 1068. Donnell has not submitted a quality statement establishing the applicable area ceiling rate for the subject sale. Under the circumstances, we believe that Donnell's proposed rate increase to 18.0¢ per Mcf should be suspended for five months from April 10, 1967, the date of expiration of the statutory notice, as hereinafter ordered.

The proposed changed rate and charge may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

Concurrently with the filing of its notice of change in rate, Donnell submitted an amendatory agreement dated October 26, 1969, which deletes the favored-nation provisions in the contract and establishes a new periodic escalation pricing schedule, which provides the basis for the proposed rate increase. The amendatory agreement has been designated as Supplement No. 8 to Donnell's FPC Gas Rate Schedule No. 1. We believe that it would be in the public interest to accept for filing Donnell's aforementioned amendatory agreement to become effective on April 10, 1967, the date of expiration of the statutory notice, but not the proposed rate contained therein which will be suspended as indicated below.

Except for the stay of the moratorium in Opinion No. 468, Donnell's rate filing would be rejectable because the proposed rate is in excess of the applicable area ceiling determined in Opinion No. 468. If the moratorium is ultimately upheld upon judicial review, Donnell's rate increase will be rejected *ab initio*.

*The Commission finds:*

(1) Good cause has been shown for accepting for filing Donnell's proposed Amendatory Agreement dated October 26, 1959, designated as Supplement No. 8 to Donnell's FPC Gas Rate Schedule No. 1, and for permitting such supplement to become effective on April 10, 1967, the date of expiration of the statutory notice.

(2) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the proposed change, and that Supplement No. 9 to Donnell's FPC Gas Rate Schedule No. 1 be suspended and the use thereof deferred as hereinafter ordered.

*The Commission orders:*

(A) Donnell's Amendatory Agreement dated October 26, 1959, designated as Supplement No. 8 to Donnell's FPC Gas Rate Schedule No. 1, is accepted for filing and permitted to become effective on April 10, 1967.

---

[3] The stated effective date is the first day after expiration of the statutory notice.

[4] Renegotiated rate increase.

(B) Pursuant to the authority of the Natural Gas Act, particularly Sections 4 and 15 thereof, the Commission's Rules of Practice and Procedure, and the Regulations under the Natural Gas Act [18 CFR, Chapter I], a public hearing shall be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of the proposed increased rate and charge contained in Supplement No. 9 to Donnell's FPC Gas Rate Schedule No. 1.

(C) Pending a hearing and decision thereon, the above-designated rate supplement is hereby suspended and the use thereof deferred until September 10, 1967, and thereafter until such further time as it is made effective in the manner prescribed by the Natural Gas Act.

(D) Neither the supplement hereby suspended, nor the rate schedule sought to be altered thereby, shall be changed until this proceeding has been disposed of or until the period of suspension has expired, unless otherwise ordered by the Commission.

(E) Donnell shall file with the Commission as a condition of this order within 30 days of the date of issuance of this order a statement setting forth either that the residue gas sold under the subject rate schedule accords with all pipeline quality standards established in Opinion Nos. 468 and 468-A, or in which respects the residue gas deviates from such standards; the agreed cost to the purchaser to bring it to the pipeline quality standards established there with respect to each quality deviation; any upward or downward Btu adjustment; and the resulting applicable area rate for the gas. Such statement shall be signed by both the seller and the purchaser. If the seller and the purchaser are unable to agree upon any or all of the particulars entering into the computation of the applicable area rate, the seller shall file the statement herein required which shall indicate the absence of agreement and supply the information required to compute the applicable area rate as well as the contentions of the parties with respect to the quality and amount of the adjustment for any item in dispute. The purchaser may file a separate statement setting forth its views within the period herein provided.

(F) Notices of intervention or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the Rules of Practice and Procedure [18 CFR 1.8 and 1.37(f)] on or before May 24, 1967.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## INDEPENDENT PRODUCERS—TRANSFER OF PRODUCING ACREAGE—PROCEDURE, DOCKET NO. R-319

## ORDER NO. 340

### STATEMENT OF GENERAL POLICY

(Issued April 6, 1967)*

The Commission is aware that in those cases where an independent producer holding a certificate of public convenience and necessity transfers all or part of his producing acreage to another some questions exist as to whether Commission authority to abandon acreage is needed when the acreage is already dedicated to interstate commerce.

---

*Published in the Federal Register on April 14, 1967 (32 F.R. 5990).

Where a *complete* succession of interest in properties takes place and a sale is continued by the assignee to the same purchaser, the Commission has held that no application to abandon service need be filed under section 7(b) of the Natural Gas Act since the successor in interest must apply for a certificate of public convenience and necessity to continue the sale because, in effect, there is no abandonment. *Kenneth McCullough, et al.*, Docket No. G-11701, *et al.*, issued March 7, 1958. Accordingly, no application to abandon should be filed by the predecessor in interest.

Where there is an assignment of *a part* of the producing acreage, and the successor is required to obtain Commission certificate authorization, the assignor need not apply to amend his existing certificate; the Commission automatically will amend the certificate of the assignor at the time it issues one to the assignee. However, a producer who transfers part of his acreage to another still must file the instruments of assignment as a supplement to his FPC rate schedule, as provided by §154.97 of the Commission's Regulations under the Natural Gas Act.

In those cases where the assigned acreage is not productive at the time of transfer, the assignor must obtain Commission authorization to delete such acreage, either pursuant to an application to amend his existing certificate to delete the assigned acreage or by filing an application under section 7(b) of the Natural Gas Act to abandon service from that acreage, unless, within one year from the date of the assignment the successor in interest files an application for certificate authorization to sell the gas for resale in interstate commerce.

*The Commission finds:*

(1) The statement issued herein concerns a matter of procedural policy which does not require notice or hearing under section 4(a) of the Administrative Procedure Act.

(2) It is appropriate and in the public interest in administering section 7 of the Natural Gas Act to set forth the Commission policy with respect to the matter here under consideration.

*The Commission*, acting under the authority of the Natural Gas Act, as amended, particularly sections 7(c), 7(e), and 16 thereof (52 Stat. 825, 830; 56 Stat. 83; 15 U.S.C. 717f(c), 717f(e), 717o), *orders:*

(A) Effective upon the issuance of this order, Part 2, General Policy and Interpretations, Chapter I, Title 18 of the Code of Federal Regulations as amended by adding a new §2.64 to read as follows:

§2.64 *Independent Producers—Transfer of Producing Acreage—Procedure*

(a) A natural gas producer who transfers all or part of his producing acreage to another does not have to apply for an amendment to his existing certificate of public convenience and necessity authorizing the sale if the new producer is required to obtain a certificate to sell gas from the property, *i.e.*, in those cases where gas is being produced from the assigned acreage or, if the acreage is non-productive at the time of transfer if the assignee initiates a sale for resale in interstate commerce. In those cases where the assigned acreage is not productive at the time of transfer, the assignor must obtain Commission authorization to delete such acreage, either pursuant to an application to amend his existing certificate to delete the assigned acreage or by filing an application under section 7(b) of the Natural Gas Act to abandon service from that acreage, unless, within one year from the date of the assignment the successor in interest files an application for certificate authorization to sell the gas for resale in interstate commerce.

(b) A producer who transfers part of his acreage to a successor must file the instruments of assignment as supplements to his FPC rate schedules, as required by §154.97 of this chapter. The successor producer must obtain certificate approval to continue the sale and must file the gas purchase contracts and instruments of assignment as his own rate schedules, as required by §154.92(d) of this chapter.

(B) Part 157 of the said Title 18 is amended by inserting, between the heading and paragraph (a) of §157.30, the following cross reference:

(§157.30 Abandonment of service.)

(See §2.64 of this chapter)

(a) * * *

(Secs. 7, 16, 52 Stat. 825, 830; 56 Stat. 83; 15 U.S.C. 717f(c), 717f(e), 717o).

(C) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

---

Before Commissioners: Lee C. White, Chairman; Carl E. Bagge and John A. Carver, Jr.

## COMMUNITY PUBLIC SERVICE COMPANY, DOCKET NO. E-7337

### ORDER AUTHORIZING ISSUANCE OF PROMISSORY NOTES

(Issued April 10, 1967)

Community Public Service Company (Applicant) filed an application on February 13, 1967 seeking an order, pursuant to Section 204 of the Federal Power Act, authorizing the issuance of short term unsecured promissory notes in the maximum principal amount of $8,000,000.

Applicant is incorporated under the laws of Texas and is engaged in the generation, purchase, transmission, distribution and sale of electric energy through 17 electric systems in Texas and 3 in New Mexico. These systems serve 101 communities in Texas and 12 communities in New Mexico.

The notes are to be issued to banks in Fort Worth or elsewhere in Texas and in New York City. They are to be issued from time to time prior to November 1, 1969, and each new or renewal note will mature within 120 days from date of issue. The notes are to bear interest at a rate in effect for such loans in Fort Worth or elsewhere in Texas or in New York.

The proceeds from the new notes will be used to reimburse the Applicant's treasury for construction expenditures which have been made and to furnish a portion of the funds for the Applicant's construction programs. These programs have estimated costs of $9,371,000 for 1967, $4,313,000 for 1968, and $4,518,000 for 1969. The 1967 program includes $3,220,000 for part of the cost of a 22 mw generating plant at Lordsburg, New Mexico, and $4,325,000 for distribution plant; the 1968 program includes $3,467,000 for distribution plant; and the 1969 program includes $3,789,000 for distribution plant.

Written notice of the application has been given to the New Mexico Public Service Commission and to the Texas Railroad Commission and to the Governor of each of those States. Notice has also been given by publication in the Federal Register on March 2, 1967 (32 F.R. 3480) stating that any person desiring to be heard or to make any protest with reference to the application, shall file petitions or protests on or before March 10, 1967, with the Federal Power Commission, Washington, D.C. 20426. No protests, petition or request to be heard in opposition to the granting of the application has been received.

*The Commission finds:*

(1) Applicant, a corporation, is a public utility within the meaning of Section 204 of the Federal Power Act, subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued April 24, 1963, *Community Public Service Company*, Docket No. E-7084 (29 FPC 829).

(2) The proposed issuance of Promissory Notes in the aggregate principal amount of $8,000,000, all as described above, will constitute an issuance of securities within the purview of Section 204 of the Act.

(3) The proposed issuance of Promissory Notes in the aggregate principal amount of $8,000,000, all as described above, will be in excess of 5% of the par value of the other securities of Applicant, and, therefore, will not be exempt by virtue of Section 204(e) from the requirements of Section 204(a) of the Act.

(4) Applicant is not organized and operating in a State, under the laws of which the issue here involved is regulated by a State Commission within the meaning of Section 204(f) of the Act, and the proposed issuance is, therefore, not exempt by virtue of that Section from the requirements of Section 204 of the Act.

(5) The proposed issuance of Promissory Notes will be exempt from the competitive bidding requirements of Section 34.1a of the Commission's Regulations under the Federal Power Act by reason of Paragraph 34.1a(a)(2) thereof.

(6) The proposed issuance of securities, as hereinafter authorized, will be for a lawful object, within the corporate purposes of Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance of service by Applicant as a public utility, and which will not impair its ability to perform that service, and is reasonably necessary and appropriate for such purposes.

(7) The period of public notice given in this matter is reasonable.

*The Commission orders:*

(A) The proposed issuance of Promissory Notes in the aggregate principal amount of $8,000,000 outstanding at any one time, whether an original issue or a renewal note, upon the terms and conditions and for the purposes set forth in the application, all as described above, is hereby authorized, subject to the provisions of this order.

(B) This authorization is expressly conditioned upon the final maturity of all notes to be issued pursuant thereto being not later than November 1, 1969.

(C) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determinations of cost or any other matter whatsoever now pending or which may come before this Commission.

(D) Nothing in this order shall be construed to imply any guarantee or obligation on the part of the United States in respect to any security to which this order relates.

Before Commissioners: Lee C. White, Chairman; Carl E. Bagge and John A. Carver, Jr.

## IOWA ELECTRIC LIGHT AND POWER COMPANY, DOCKET NO. E-7342

### ORDER AUTHORIZING ISSUANCE OF PROMISSORY NOTES

(Issued April 10, 1967)

Iowa Electric Light and Power Company (Applicant), filed an application on February 27, 1967, seeking authority pursuant to Section 204 of the Federal Power Act to issue short-term Notes in an aggregate amount not to exceed $18,000,000.

Applicant is incorporated under the laws of the State of Iowa with its principal business office at Cedar Rapids, Iowa, and is engaged in the electric utility business in 51 counties in the State of Iowa.

The Notes to be issued by the Applicant will evidence loans from commercial banks and will have maturities not in excess of one year from their dates of issuance and in any event not later than December 31, 1968. The interest rate will be at the prime rate in effect at the time of the borrowing. The Commission, in an order issued on March 25, 1966, Docket No. E-7269, authorized Applicant to issue up to $18,000,000 in short-term notes, 35 FPC 414. The notes were to be issued to The First National Bank of Chicago, The Northern Trust Company of Chicago, and to other banks. They were to be issued either originally or upon renewal from time to time as the need for funds arose and they were to have maturity dates not in excess of one year from dates of issuance with all notes maturing on or before December 31, 1967. The notes were to bear interest at the prime rate in effect on dates of issuance. The Applicant issued notes from time to time and now has notes outstanding in the total amount of $6,400,000.

Under the application filed on February 27, 1967, the Applicant has requested authorization to issue the same amount of notes to the same banks on the same terms, with the exception that the final maturity date for the notes is to be extended from December 31, 1967 to December 31, 1968.

The proceeds from the issuance of these Notes will be used to furnish a portion of the funds for the Applicant's 1967 construction program which has an estimated cost of $18,637,500. The largest items in this program are $8,648,000 for completion of a 140 mw Prairie Creek Generating Unit, $4,755,000 for additions to electric distribution facilities, and $2,716,000 for additions to gas distribution facilities. The Applicant plans to redeem all of the notes out of the proceeds of the sale of long term securities to be marketed sometime in 1967, the exact nature, the date of issuance and sale of which have not as yet been determined.

Written notice of the application has been given to the Iowa State Commerce Commission, Minnesota Railroad and Warehouse Commission, the Colorado Public Utilities Commission, the Nebraska State Railway Commission and to the Governors of those states. Notice of the application was also published in the Federal Register on March 14, 1967 (32 F.R. 4036) stating that any person desiring to be heard or to make any protest with reference to the application, should on or before March 24, 1967 file petitions or protests with the Federal Power Commission, Washington, D.C. 20426. No protest or petition has been filed.

*The Commission finds:*

(1) Applicant, a corporation, is a public utility within the meaning of Section 204 of the Federal Power Act, subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued August 29, 1966, Iowa Electric Light and Power Company, Docket No. E-7305 (36 FPC 543).

(2) The proposed issuance of Promissory Notes in the aggregate principal amount of $18,000,000, all as described above, will constitute an issuance of securities within the purview of Section 204 of the Act.

(3) The proposed issuance of Promissory Notes in the aggregate principal amount of $18,000,000, all as described above, will be in excess of 5% of the par value of the other securities of Applicant, and, therefore, will not be exempt by virtue of Section 204(e) from the requirements of Section 204(a) of the Act.

(4) Applicant is not organized and operating in a State, under the laws of which the issue here involved is regulated by a State Commission within the meaning of Section 204(f) of the Act, and the proposed issuance is, therefore, not exempt by virtue of that Section from the requirements of Section 204 of the Act.

(5) The proposed issuance of Promissory Notes will be exempt from the competitive bidding requirements of Section 34.1a of the Commission's Regulations under the Federal Power Act by reason of Paragraph 34.1a(a)(2) thereof.

(6) The proposed issuance of securities, as hereinafter authorized, will be for a lawful object, within the corporate purposes of Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance of service by Applicant as a public utility, and which will not impair its ability to perform that service, and is reasonably necessary and appropriate for such purposes.

(7) The period of public notice given in this matter is reasonable.

*The Commission orders*

(A) The proposed issuance of Promissory Notes in the aggregate principal amount of $18,000,000 outstanding at any one time, whether an original issue or a renewal note, upon the terms and conditions and for the purposes set forth in the application, all as described above, is hereby authorized, subject to the provisions of this order.

(B) This authorization is expressly conditioned upon the final maturity of all notes to be issued pursuant thereto being not later than December 31, 1968.

(C) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determinations of cost or any other matter whatsoever now pending or which may come before this Commission.

(D) Nothing in this order shall be construed to imply any guarantee or obligation on the part of the United States in respect to any security to which this order relates.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## UNION TEXAS PETROLEUM, DOCKET NO. G–13221, ET AL. AND SOUTHWEST GAS PRODUCING COMPANY, ET AL., G–20046 AND CI66–210

### ORDER REJECTING OFFER OF SETTLEMENT

(Issued April 10, 1967)

On February 21, 1967, Southwest Gas Producing Company, Inc., *et al.* (Southwest)[1] submitted an Offer of Settlement in Docket No. G–20046 proposing to make refunds of the difference between the rate it received for gas sold to Transcontinental Gas Pipe Line Corporation from the North Starks Field, Calcasieu and Beauregard Parishes, South Louisiana, and 20.625¢, the rate which had been approved in producer settlements during the pendency of the *Union Texas Petroleum* proceeding.

On November 20, 1959, Southwest received an unconditioned temporary certificate to sell gas in Docket No. G–20046 at a rate of 22.05¢, inclusive of 2.05¢ tax reimbursement. The temporary certificate was amended, effective January 18, 1962, to reflect a contractual reduction in rate to 21.05¢. In *Union Texas Petroleum*, Opinion No. 435, 32 FPC 254, Southwest was granted a permanent certificate to make the proposed sale at a rate of 20.0¢, inclusive of tax reimbursement. In view of the depletion of its gas reserves, sales and deliveries from the North Starks Field ceased prior to December 1964 and on October 28, 1965 in Docket No. CI66–210 the Commission granted authorization for the abandonment of the sale.

Southwest now proposes to refund all amounts collected above 20.625¢ from January 1, 1960 until deliveries ceased in 1964, except those amounts above 20.625¢ paid to royalty interests. Southwest alleges that the question of whether refunds should be required is still pending in the courts, that in failing to make a settlement offer during the pendency of the *Union Texas Petroleum* proceeding it had relied upon prior Commission decisions and custom in not requiring refunds where there was an unconditioned temporary certificate, that the sale has already ceased and that this is, consequently, a unique situation which would not be of a precedential nature, and that it has sustained a substantial loss in the North Starks Field.

On February 28, March 3 and March 16, 1967, Brooklyn Union Gas Company, The Philadelphia Gas Works Division of the United Gas Improvement Company, Public Service Electric and Gas Company, and Long Island Lighting Company filed letters with the Commission in opposition to Southwest's Offer of Settlement.

Since the Commission has already decided the proceeding on its merits, *Union Texas Petroleum*, *supra*, and there is opposition to the settlement herein,[2] we shall reject the Offer of Settlement.

*The Commission orders:*

The Offer of Settlement submitted by Southwest Gas Producing Company, Inc., *et al.*, on February 21, 1967, is rejected.

---

[1] Southwest filed on behalf of Ashland Oil & Refining Company, Midwest Oil Corporation and Monla Gas Company, Inc.

## COLORADO INTERSTATE GAS COMPANY, DOCKET NO. CP61-143; NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP61-149; ARKANSAS LOUISIANA GAS COMPANY, DOCKET NO. CP61-163

### ORDER AMENDING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 11, 1967)

On February 23, February 20, and February 8, 1967, Colorado Interstate Gas Company (Colorado) in Docket No. CP61-143, Natural Gas Pipeline Company of America (Natural) in Docket No. CP61-149 and Arkansas Louisiana Gas Company (Arkansas Louisiana) in Docket No. CP61-163, respectively, filed petitions to amend the Commission's order issued January 3, 1963, in Docket No. CP61-143, *et al.*, 29 FPC 8, as amended on December 30, 1963, 30 FPC 1615, June 2, 1964, 31 FPC 1333, May 25, 1965, 33 FPC 1065, and September 12, 1966, 36 FPC 613. By the instant filing, Petitioners request that the subject order, as amended, be amended further so as to extend from May 1, 1967 to May 1, 1968, the authorized duration of the short-term interruptible sale of natural gas by Colorado to Arkansas Louisiana and the related exchange of natural gas among Colorado, Arkansas Louisiana and Natural, all as more fully set forth in the respective petitions to amend.

The subject order, as amended, authorized Colorado to sell pursuant to its Rate Schedule X-12 up to 35,000 Mcf of natural gas daily to Arkansas Louisiana from the Mocane Laverne area in the Oklahoma Panhandle on a short-term interruptible basis and the exchange of equivalent volumes of natural gas between Colorado and Natural in order to effect said sale. Deliveries are made to Arkansas Louisiana by Natural pursuant to Natural's Rate Schedule X-8 at a point in Grady County, Oklahoma for the account of Colorado, and equivalent volumes are delivered by Colorado to Natural pursuant to Colorado's Rate Schedule X-14 at an interconnection between their two systems in Beaver County, Oklahoma. In accordance with Colorado's Rate Schedule X-12, the subject sale of gas to Arkansas Louisiana is made at a rate of 18 cents per Mcf.

The volumetric limitations of 35,000 Mcf, 18,000 Mcf and 10,000 Mcf for maximum day, average day and minimum day, respectively, will remain unchanged. Said limitations were authorized by the May 25, 1965 amendment to the subject order.

On March 7, 1967, in accordance with letter agreements between the parties, Natural filed a revision to its Rate Schedule X-8 extending the term of the subject sale and exchange of gas through April 30, 1968. Colorado states that it will timely file changes to its Rate Schedules X-12 and X-14 in order to extend the term of the sale and exchange to May 1, 1968.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued in Docket No. CP61-143, *et al.* on January 3, 1963, and amended on December 30, 1963, June 2, 1964, May 25, 1965, and September 12, 1966, be amended further as hereinafter ordered and conditioned.

*The Commission orders:*

**(A) The Commission's order issued in Docket No. CP61-143, *et al.* on January 3, 1963, and amended on December 30, 1963, June 2, 1964, May 25, 1965, and September 12, 1966, is amended further so as to extend from May 1, 1967 to May 1, 1968, the authorized duration of the short-term interruptible sale of natural gas by Colorado Interstate Gas Company to Arkansas Louisiana Gas Company and the related exchange of equivalent volumes of natural gas between Colorado Interstate Gas Company and Natural Gas Pipeline Company of America, as hereinbefore set forth and as more fully set forth in the respective petitions to amend filed in this proceeding.**

**(B) Natural Gas Pipeline Company of America's revised Rate Schedule X-8 is accepted for filing, effective as of the date of this order.**

**(C) The authorization granted by paragraph (A) above is conditioned upon the filing by Colorado Interstate Gas Company of revised tariff sheets to its Rate Schedules X-12 and X-14 in accordance with the Commission's Regulations under the Natural Gas Act.**

**(D) In all other respects the subject order, as amended, shall remain in full force and effect.**

---

Before Commissioners: Lee C. White, Chairman; Carl E. Bagge and John A. Carver, Jr.

## EL PASO NATURAL GAS COMPANY, DOCKET NO. G-8934

### ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 11, 1967)

On December 27, 1966, El Paso Natural Gas Company (Petitioner) filed in Docket No. G-8934 a petition to amend the order of the Commission issued in said docket on November 25, 1955 (Opinion No. 289, 14 FPC 157) so as to authorize Petitioner to sell and deliver natural gas to an existing distribution customer, Washington Water Power Company (Water Power) for resale to Potlatch Forests, Inc. (Potlatch), in lieu of the presently authorized transportation and delivery to Potlatch on a direct interruptible basis.

Petitioner will continue to use the same delivery point to Potlatch, but will deliver the natural gas for the account of Water Power for resale to Potlatch, under Petitioner's DL-1 Rate Schedule, instead of making the present direct delivery on an interruptible basis to Potlatch.

Petitioner proposes to increase its firm daily deliveries to Water Power in the Lewiston area from 68,500 therms to 295,000 therms, of which Water Power will sell up to 200,000 therms daily to Potlatch.

Due notice of the filing of the application to amend and opportunity for hearing thereon has been given by publication in the Federal Register on January 18, 1967 (32 F.R. 586). No petition to intervene, notice of intervention, or protest to the granting of the application has been filed.

*The Commission finds:*

**(1) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission order issued November 25, 1955 in Docket No. G-8934 be further amended as hereinafter ordered.**

(2) It is appropriate in the administration of the Natural Gas Act and in the public interest that revised Exhibits A and B to the firm service agreement of September 26, 1961 with Water Power be accepted for filing effective on the date of issuance of this order.

*The Commission orders:*

(A) The Commission's order issued November 25, 1955 in Docket No. G-8934 as amended is further amended so as to authorize Petitioner (1) to sell and deliver natural gas to Water Power for resale to Potlatch, and to operate the facilities necessary therefor, as requested by Petitioner in its said petition to amend and (2) to terminate the direct sale and delivery of natural gas to Potlatch.

(B) Petitioner's revised Exhibits A and B to its firm service agreement of September 26, 1961 with Water Power is accepted for filing effective on the date of issuance of this order.

(C) The amendment authorized by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with applicable Commission Regulations under the Natural Gas Act and particularly the conditions set forth in Section 157.20 of such Regulations.

(D) In all other respects said order shall remain in full force and effect.

---

Before Commissioners: Lee C. White, Chairman; Carl E. Bagge and John A. Carver, Jr.

## EL PASO NATURAL GAS COMPANY, DOCKET NO. CP64-99

### FINDINGS AND ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 11, 1967)

On January 30, 1967, El Paso Natural Gas Company (Petitioner) filed in Docket No. CP64-99 a petition to amend further the order of the Commission issued in said docket on February 18, 1964, 31 FPC 422, as amended on August 7, 1964, October 21, 1964, December 15, 1964, 32 FPC 539, 1152, 1424, June 2, 1965, 33 FPC 1160, and June 27, 1966, 35 FPC 1087, by authorizing Petitioner to continue to participate, as to its one-third interest, in certain additional testing activities of the Jackson Prairie Storage Unit, including an increase in the volumetric limitation on the inventory of gas in said storage reservoir from 3,000,000 Mcf (14.73 psia) to 7,500,000 Mcf (14.73 psia), for a period continuing through December 31, 1968, or until divestiture of Petitioner's Northwest Division System, whichever first occurs, all as more fully set forth in the subject petition to amend in this proceeding.

The order of February 18, 1964, as amended, authorized Petitioner to construct and operate certain facilities; to sell and deliver natural gas to Washington Natural Gas Company (Washington Natural) and Washington Water Power Company (Water Power) and, with respect to Petitioner's one-third interest therein, to share in the cost of facilities to be constructed and operated by Water Power, all solely for the purpose of testing the Jackson Prairie Storage Unit, Lewis County, Washington. The order, as amended, also limited gas inventory in the storage reservoir to 3,000,000 Mcf (14.73 psia). The authorization, as amended, is for a period ending June 30, 1967, or until divestiture of Petitioner's Northwest Division System, whichever first occurs.

Petitioner, Washington Natural, and Water Power, the latter continuing as Storage Unit Operator, have agreed to increase their individual commitments from $2,000,000 to $3,600,000 to finance the proposed expanded testing program. The proposed continued testing will require (a) the drilling of 18 new wells, (b) pipeline facilities necessary for gas injection-withdrawal and water withdrawal and disposal, (c) an additional 1,100 horsepower compressor, and (d) a portable type dehydrator unit. The estimated cost for the extended testing program, inclusive of the amount of $5,683,600 jointly expended through December 31, 1966, is $10,789,350.

Petitioner states that the continued testing of the storage field is required to further test the pressure performance and water encroachment characteristics and feasibility of storage utilization of Zones 2A and 2B–C of the storage area.

Due notice of the filing of the petition to amend further and opportunity for hearing thereon has been given by publication in the Federal Register on February 15, 1967 (32 F.R. 2913). No protest or petition to intervene has been filed in this proceeding.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued February 18, 1964, in Docket No. CP64–99, as amended, be further amended as hereinafter ordered.

*The Commission orders:*

(A) The Commission's order issued February 18, 1964, in Docket No. CP64–99, as amended, is further amended by authorizing:

(1) With respect to Petitioner as an undivided one-third interest participant, the extension of the period for joint testing of the Jackson Prairie Storage Reservoir through December 31, 1968, or until divestiture of Petitioner's Northwest Division System, whichever first occurs;

(2) The increase in the volumetric limitation on the inventory of gas in the storage reservoir from 3,000,000 Mcf (14.73 psia) to 7,500,000 Mcf (14.73 psia); and

(3) The expansion of the testing facilities and activities of the Jackson Prairie Storage Reservoir as proposed with Petitioner increasing its one-third commitment to $3,600,000.

(B) In all other respects said order, as amended, shall remain in full force and effect.

---

Before Commissioners: Lee C. White, Chairman; Carl E. Bagge and John A. Carver, Jr.

## HOME GAS COMPANY, DOCKET NO. CP67–222

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND PERMITTING AND APPROVING ABANDONMENT OF FACILITIES

(Issued April 11, 1967)

On February 6, 1967, Home Gas Company (Applicant) filed in Docket No. CP67–222 an application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities replacing facilities proposed to be abandoned and for permission and approval to abandon certain other facilities, all in Allegany and Steuben Counties, New York, all as more fully set forth in the application in this proceeding.

Specifically, Applicant proposes the following projects:

(a) The abandonment of its 680 horsepower Wellsville Compressor Station in Allegany County. Applicant states that because of the storage capabilities and deliverabilities of its Greenwood, Gilbert and Dundee Storage Fields and since the completion of its Line A–5, the Wellsville Station is no longer required for the operation of its system, and

(b) The construction and operation of two segments of 12-inch pipeline, totalling 8.5 miles, replacing two segments of Applicant's parallel 6-inch lines A–1, A–2, A–3 and A–4 which lines transverse, in total, approximately 8.2 miles and which aggregate about 33 miles of pipe, in the Towns of Greenwood and Jasper in Steuben County. Applicant states that the replacement is part of its long-range plans for eventual replacement of all of its A lines, some of which were laid many years ago. Except for those portions of the old lines which must be removed because of new road construction, the A lines to be replaced will be abandoned in place.

The total estimated cost of the proposed new facilities is $385,000, which cost will be financed through the issuance and sale of promissory notes and/or common stock to Applicant's parent company, The Columbia Gas System, Inc. The application indicates a net salvage from the retirements of $2,000.

After due notice, no petition to intervene, notice of intervention or protest to the granting of application has been filed.

At a hearing held on April 6, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorizations sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Home Gas Company, a New York corporation having its principal place of business in Pittsburgh, Pennsylvania, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of January 5, 1943, in Docket No. G–345 (3 FPC 895).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are to be used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed construction and operation of the subject facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(6) The facilities to be abandoned, as hereinbefore described, are subject to the jurisdiction of the Commission and the abandonment of such facilities is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(7) Such abandonment by Applicant, as hereinbefore described, is permitted by the public convenience and necessity, and an order authorizing and approving same should be issued as hereinafter ordered.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Home Gas Company, to construct and operate the proposed facilities as hereinbefore described, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, by December 1, 1967.

(D) Permission for and approval of the abandonment by Applicant of facilities hereinbefore described, all as more fully described in the application in this proceeding, are granted.

(E) Applicant shall advise the Commission of the date of said abandonment within 10 days of the date thereof.

---

Before Commissioners: Lee C. White, Chairman; Carl E. Bagge and John A. Carver, Jr.

## LAWRENCEBURG GAS TRANSMISSION CORPORATION, DOCKET NO. CP67-205

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 11, 1967)

On January 23, 1967, Lawrenceburg Gas Transmission Corporation (Applicant) filed in Docket No. CP67-205 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing an increase from 11,000 Mcf to 11,500 Mcf in contract demand service to Applicant's affiliated customer, Lawrenceburg Gas Company (Lawrenceburg), all as more fully set forth in the application in this proceeding.

Lawrenceburg will utilize the proposed increased deliveries to meet normal growth of its service area and to initiate service to the Town of Rising Sun, Indiana. Applicant proposes to sell, on an interruptible basis, and under its FPC Gas Rate Schedule EX-1, any portion of the proposed increased volumes not taken by Lawrenceburg to Applicant's parent, The Cincinnati Gas & Electric Company.*

---

*By Commission order issued August 17, 1965 in Docket No. CP65-186, 34 FPC 527, Applicant was authorized to make interruptible sales for resale to Cincinnati.

The proposed increased sales to Lawrenceburg will be made pursuant to Applicant's FPC Gas Rate Schedule CDS-1.

No new facilities will be necessary to render the proposed increased service.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on April 6, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Lawrenceburg Gas Transmission Corporation, an Indiana corporation having its principal place of business in Lawrenceburg, Indiana, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of August 17, 1965, in Docket No. CP65-186 (34 FPC 527).

(2) The proposed sale of natural gas hereinbefore described, as more fully described in the application in this proceeding, is to be in interstate commerce, subject to the jurisdiction of the Commission, and such proposed sale by Applicant is subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed sale of natural gas by Applicant is required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (e) and (f) of Section 157.20 of such Regulations.

(6) Applicant should file with the Commission a revised service agreement with Lawrenceburg in accordance with Part 154 of the Commission's Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Lawrenceburg Gas Transmission Corporation, to sell and deliver natural gas as hereinbefore described, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(3), (e) and (f) of Section 157.20 of such Regulations.

(C) The sale of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act within six months from the date on which this order issues.

(D) Applicant shall file with the Commission a revised service agreement with Lawrenceburg in accordance with Part 154 of the Commission's Regulations.

**Before Commissioners: Lee C. White, Chairman; Carl E. Bagge and John A. Carver, Jr.**

## MISSISSIPPI RIVER TRANSMISSION CORPORATION, DOCKET NO. CP67-229

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 11, 1967)

On February 13, 1967, Mississippi River Transmission Corporation (Applicant) filed in Docket No. CP67-229 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities in Iron County, Missouri, to enable it to transport and sell natural gas on an interruptible basis to Pilot Knob Pellet Company (PKP) and American Smelting and Refining Company (ASR), all as more fully set forth in the application.

Applicant proposes to construct and operate approximately 20 miles of 6⅝-inch pipeline and related facilities extending from Applicant's existing Main Line Nos. 1 and 2 to PKP's plant, Pilot Knob, Iron County, Missouri, and approximately 10 miles of 4½-inch pipeline and related facilities extending from the proposed 6⅝-inch pipeline to ASR's plant, Glover, Iron County, Missouri.

The PKP plant will produce iron pellets and will use natural gas primarily for process fuel in its pelletizing furnace. The ASR plant will smelt lead ores mined in the adjoining Reynolds County and also ores brought from other areas. Natural gas will be used primarily in its smelting furnaces.

PKP and ASR have executed industrial gas sales contracts with Applicant dated January 14, 1967, and December 13, 1966, respectively. These contracts call for the daily delivery of gas on an interruptible basis of up to 2,100 Mcf and 1,250 Mcf with maximum annual deliveries of 500,000 Mcf and 230,000 Mcf, respectively. Said volumes of natural gas will be sold by Applicant to PKP and ASR at the rate of 48 cents per Mcf, adjusted for Btu content.

The total estimated cost of Applicant's proposed facilities is $792,000, which will be financed from cash on hand.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

At a hearing held on April 6, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Mississippi River Transmission Corporation, a Delaware corporation having its principal place of business in St. Louis, Missouri, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of November 29, 1960, in Docket No. CP60-95 (24 FPC 1020).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to

**the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.**

**(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.**

**(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.**

**(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in Section 155.1 and paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of the Regulations.**

***The Commission orders:***

**(A) A certificate of public convenience and necessity is issued to Applicant, Mississippi River Transmission Corporation, authorizing the construction and operation of facilities as hereinbefore described and as more fully described in the application in this proceeding, upon the terms and conditions of this order.**

**(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in Section 155.1 and paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of the Regulations.**

**(C) The facilities authorized shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act within one year from the date on which this order issues.**

**(D) The certificate issued hereby is granted on the express condition that the interruptible gas service authorized herein shall be curtailed or interrupted to the extent required to meet existing or future contracted maximum delivery obligations of Applicant for firm service to its customers.**

---

**Before Commissioners: Lee C. White, Chairman; Carl E. Bagge and John A. Carver, Jr.**

## NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP67-241

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

**(Issued April 11, 1967)**

**On February 27, 1967, Northern Natural Gas Company (Applicant), filed in Docket No. CP67-241 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to transport and sell natural gas to Interstate Power Company (Interstate) for resale and delivery on a direct firm industrial basis to a plant of Libby-Owens-Ford Glass Plant at Mason City, Iowa, all as more fully set forth in the application.**

Interstate has requested Applicant to allocate 400 Mcf of Interstate's present contract demand for a service to commence on May 1, 1967, to a new industrial consumer, Libby-Owens-Ford, now building a new processing plant at Mason City, Cerro Gordo County, Iowa. The requested service to Interstate will be rendered under Applicant's FPC Rate Schedule CD-3. Interstate presently has a total contract demand allocation of 33,430 Mcf, of which 18,963 Mcf has been earmarked for service in the communities of Mason City and Clear Lake, Iowa.

No new facilities will be required for the proposed new service.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on April 6, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Northern Natural Gas Company, a Delaware corporation having its principal place of business in Omaha, Nebraska, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G-280 (3 FPC 967).

(2) The proposed transportation and sale of natural gas in interstate commerce, as hereinbefore described and as more fully described in the application and exhibits, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed transportation and sale of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e) and (f) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to Applicant authorizing the transportation and sale of natural gas in interstate commerce, as hereinbefore described and as more fully described in the application, and exhibits filed in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e) and (f) of Section 157.20 of such Regulations.

(C) The transportation and sale of natural gas authorized by paragraph (A) above shall be commenced as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 3 months from the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; Carl E. Bagge and John A. Carver, Jr.

## GAS MARKETING, INC., DOCKET NO. CP63-60

### ORDER AMENDING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 12, 1967)

On January 10, 1967, Gas Marketing, Inc. (Petitioner) filed in Docket No. CP63-60 a petition to amend the order issued in said docket on August 28, 1963, [unreported] which order authorized the construction and operation of certain natural gas facilities by Petitioner for the purchase of casinghead gas from two producers in the Fruit Field, Kiowa County, Kansas, and the resale thereof to Panhandle Eastern Pipe Line Company (Panhandle). By the instant filing, Petitioner requests that the subject order be amended so as to authorize the construction and operation of additional facilities for the purchase of casinghead gas from J. Mark Richardson and Rock Island Oil & Refining Co., Inc., operators of leaseholds in the Fruit Field, and the resale of that additional gas to Panhandle at 15 cents per Mcf pursuant to the existing agreement between the parties on file with the Commission as Petitioner's FPC Gas Rate Schedule No. 1, all as more fully set forth in the petition to amend.

In order to attach the additional reserves, Petitioner proposes to construct a total of approximately 1.4 miles of 3- and 5-inch pipeline and related metering facilities.

The additional gas will be sold by the aforementioned producers to Petitioner in accordance with a percentage-type contract as defined in Section 154.91(e) of the Regulations under the Natural Gas Act.

The total estimated cost of Petitioner's proposed facilities is $7,328.00, which will be financed from cash on hand.

On February 15, 1967, Petitioner was issued a temporary certificate of public convenience and necessity authorizing the construction and operation of the facilities and the service proposed to be rendered therefrom, as hereinbefore described and as more fully described in the petition to amend.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued on August 28, 1963, in Docket No. CP63-60 be amended as hereinafter ordered and conditioned.

*The Commission orders:*

(A) The Commission's order issued on August 28, 1963, in Docket No. CP63-60 is amended by authorizing Petitioners to construct and operate additional natural gas facilities for the purchase of casinghead gas from J. Mark Richardson and Rock Island Oil & Refining Co., Inc., operators in the Fruit Field, Kiowa County, Kansas, and to resell the additional gas to Panhandle Eastern Pipe Line Company, as hereinbefore described and as more fully set forth in the petition to amend.

(B) The authorization granted by paragraph (A) above is conditioned upon Petitioner's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (c)(4), (e), (f) and (g) of Section 157.20 of the Regulations.

(C) In all other respects the certificate of public convenience and necessity issued in the instant docket on August 28, 1963, shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## IOWA-ILLINOIS GAS AND ELECTRIC COMPANY AND IOWA SOUTHERN UTILITIES COMPANY, DOCKET NO. E-7333

### ORDER AUTHORIZING SALE AND ACQUISITION OF FACILITIES

(Issued April 13, 1967)

Iowa-Illinois Gas and Electric Company (Iowa-Illinois) filed an application on January 19, 1967, and Iowa Southern Utilities Company (Iowa Southern) filed a certificate of concurrence on January 23, 1967, for an order, pursuant to Section 203 of the Federal Power Act, authorizing the sale by Iowa-Illinois and the acquisition by Iowa Southern of a portion of a 161-kv, wood pole, transmission line.

Iowa-Illinois is incorporated under the laws of the State of Illinois and is authorized to carry on business in the States of Illinois and Iowa with its principal business office in Davenport, Iowa and is engaged in the electric utility business in Rock Island, Henry, and Whiteside Counties in the State of Illinois and in Scott, Johnson, Linn, Webster, and Wapello Counties in the State of Iowa.

Iowa Southern is incorporated under the laws of Delaware with its principal business office at Centerville, Iowa and is engaged in the electric utility business along and across the southerly counties in Iowa.

Iowa-Illinois proposes to sell to Iowa Southern a portion of its 161-kv transmission line which extends from Milan, Illinois to Fort Madison, Iowa. The portion of the line to be sold extends from a point in Des Moines County, Iowa, southerly to a point in Lee County, Iowa, at which the line connects with the facilities of Union Electric Company and its Viele Substation, being approximately 28.19 miles in length. The consideration for the sale of this line is to be in the amount of $721,497.

Iowa-Illinois and Iowa Southern along with Northern States Power Company, Interstate Power Company, Iowa Electric Light and Power Company, Iowa Public Service Company and Union Electric entered into a Facilities Agreement on March 30, 1964, to construct a 520 mile, 345-kv transmission line from Northern States' facilities near Minneapolis to Union Electric's facilities near St. Louis and a 345-kv substation at Hills, Iowa. Under the terms of the Agreement, Northern States will build about 110 miles of the line, Interstate Power will build about 55 miles, Iowa Electric Light will build about 25 miles, Iowa Public Service will build about 17 miles, Iowa-Illinois will build about 60 miles and Union Electric about 253 miles.

Iowa Southern is located some distance from the proposed 345-kv transmission line and substation and has, therefore, entered into the proposed agreement with Iowa-Illinois to purchase a portion of its 161-kv transmission line in lieu of its own proportionate contribution toward the 345-kv transmission line and substation as herein described.

The consideration as heretofore stated was determined by a calculation of the obligation which would have been the burden of Iowa Southern to contribute to the construction of the 345-kv transmission line and Hills Substation based on recent estimates as applied to their proportionate contribution to the construction.

Upon the conclusion of this transaction Iowa-Illinois will have transferred to Iowa Southern a portion of its 161-kv line which continues to be of substantial and appropriate use to Iowa-Illinois and in addition will have, with the consideration negotiated between the parties, applied said sum to the construction of the portion of the Hills Substation facilities and the 345-kv transmission line which would otherwise have been the obligation of Iowa Southern to contribute. The effect of this transaction is to invest Iowa Southern with title to a portion of the 161-kv transmission line, located in its service area and outside Iowa Illinois's service area, to which Iowa Southern will interconnect its new Burlington generating station with facilities to be constructed near the southerly end of the 28.19-mile segment to be transferred, and proposes further to construct a 161-kv transmission line extending westerly toward its presently existing transmission line near Fairfield, Iowa.

The portion of the line to be transferred has a depreciated original cost of $674,340 and the consideration therefor will be $721,497. On the books of Iowa-Illinois, a gross gain of $47,157 ($721,497–$674,340) will be recorded by a credit of $12,496 to Account 236, Taxes Accrued, for taxes in connection with the gain, and by a credit of $34,661 to Account 421, Miscellaneous Nonoperating Income, for the net amount of the gain. An acquisition adjustment of $47,157 will be created on the books of Iowa Southern and this will be eliminated by a debit to Account 435, Miscellaneous Debits to Surplus.

Written notice of the application has been given to the Iowa State Commerce Commission and to the Illinois Commerce Commission and to the Governor of each of those states. Notice has also been given by publication in the Federal Register on February 3, 1967 (32 F.R. 2401), stating that any person desiring to be heard or to make any protest with reference to the application should file a petition or protest on or before February 17, 1967, with the Federal Power Commission, Washington D.C. 20426. No protest or petition or request to be heard in opposition to the granting of the application has been received.

*The Commission finds:*

(1) Iowa-Illinois, a corporation, owns and operates facilities for the transmission and sale at wholesale of electric energy which is generated in the State of Illinois and consumed in the State of Iowa, all of which facilities are in addition to, and do not include, facilities used for the generation of electric energy or facilities used in local distribution or solely for the transmission of electric energy consumed wholly by the transmitter. Iowa-Illinois, therefore, is a public utility within the meaning of that term as used in Section 203 of the Federal Power Act.

(2) Iowa Southern, a corporation is a public utility within the meaning of Section 203 of the Federal Power Act, subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued May 31, 1961, *Iowa Southern Utilities Company, et al.*, Docket No. E-6974 (25 FPC 1063).

(3) By the proposed transaction, Iowa Southern will merge or consolidate its facilities subject to the jurisdiction of the Commission with part of those of Iowa-Illinois, another person within the meaning and subject to the requirements of Section 203 of the Federal Power Act and Iowa-Illinois will dispose of facilities subject to the Commission's jurisdiction within the meaning of Section 203 of the Federal Power Act.

(4) The proposed transaction as described above, upon the terms and conditions set forth in the application, and subject to the provisions of this order will be consistent with the public interest as expressed in Section 203 of the Federal Power Act.

(5) The period of public notice given in this matter is reasonable.

*The Commission orders:*

(A) The proposed transaction referred to above and as described in the application is authorized and approved upon the terms and conditions and for the purposes set forth in the application subject to the provisions of this order.

(B) Iowa-Illinois and Iowa Southern shall record the proposed transaction herein authorized and the facilities and properties referred to above as provided in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees.

(C) This authorization shall expire unless the transaction herein authorized and approved is consummated within 90 days from the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determinations of cost, or any matter whatsoever now pending or which may come before this Commission or any other regulatory body and nothing herein shall be construed as an acquiescence by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

## MICHIGAN WISCONSIN PIPE LINE COMPANY, DOCKET NO. RP64-38

### ORDER APPROVING STIPULATION AND AGREEMENT REQUIRING RATE REDUCTIONS AND REFUNDS, ACCEPTING REVISED TARIFF SHEETS FOR FILING AND WAIVING NOTICE REQUIREMENTS AS TO EFFECTIVE DATE

(Issued April 13, 1967)

On February 14, 1967, Michigan Wisconsin Pipe Line Company (Michigan Wisconsin) submitted a Stipulation and Agreement proposing, *inter alia*, refunds and rate reductions to be made in compliance with the Commission's order issued June 23, 1964 [1] in this proceeding. The proposed refunds aggregate more than $8,000,000 as summarized below. Concurrently, Michigan Wisconsin tendered revised tariff sheets [2] reflecting rate decreases which will reduce the annual jurisdictional revenues by $2,072,000 based on estimated 1967 sales. Michigan Wisconsin requests waiver of the notice requirements to permit the revised tariff sheets to be effective as of March 1, 1967. The rate reductions and refunds result primarily from the flow through of benefits of liberalized depreciation.

The agreement approved by the aforementioned Commission order issued June 23, 1964, provided, among other things, that Michigan Wisconsin would make further rate reductions as of October 1, 1965, should the court affirm Commission's Opinion No. 417 [3] and it was no longer subject to judicial review. That agreement also provided that Michigan Wisconsin would be entitled to reflect in its filing offsetting changes in its cost-of-service, on an annualized basis, using the 12-month period ending October 1, 1965, as the test period. Michigan Wisconsin submitted the instant proposal following conferences with our Staff. The terms of the instant proposal may be summarized in principal part as follows:

---

[1] 31 FPC 1579.

[2] Ninth Revised Sheet No. 6, Seventh Revised Sheet No. 7, First Revised Sheets Nos. 9B and 9C, Seventh Revised Sheet No. 10, and First Revised Sheets Nos. 14A and 14D.

[3] 31 FPC 208 (1964), affirmed 359 F. 2d 318 (CA5-1966), cert. den., 385 U.S. 847, reh. den., 385 U.S. 964.

(1) For the period October 1, 1965 through August 31, 1966, Michigan Wisconsin will refund to its customers a total of $548,000 per month (approximately $6,028,000) plus interest at 7 percent per annum to be allocated to each customer on the basis of actual volumes purchased.

(2) For the period September 1, 1966 through February 28, 1967, Michigan Wisconsin will refund an amount estimated at approximately $2,015,000 plus interest. This is an amount equivalent to 8.0 cents per Mcf of billing demand under Rate Schedules ACQ–1 and MDQ–1; 0.3 cents per Mcf of gas delivered under Rate Schedules ACQ–1, MDQ–1, SDOS–1 and AOS–1; and 0.6 cents per Mcf for each Mcf delivered under Rate Schedule SGS–1.

(3) Rate levels proposed to be effective as of March 1, 1967 are as follows: Rate Schedule ACQ–1, Demand $2.96, Commodity 27.45¢; Section 7.1 adjustment 9.7¢; Rate Schedule MDQ–1, Demand $2.80, Commodity 27.45¢, Section 6.1 adjustment 9.2¢; Rate Schedule SGS–1, 44.25¢; and Rate Schedules SDOS–1 and AOS–1, 27.45¢.

The rates proposed to be made effective March 1, 1967, reflect an increase in Federal income tax in the form of a 6 percent surcharge thereby increasing the effective corporate tax rate from 48% to 50.88%. If an increase in the Federal income tax rate has not been enacted or become effective on or before January 1, 1968, Michigan Wisconsin will further reduce jurisdictional rates effective January 1, 1968, as set out in the Stipulation, and will refund the amounts accumulated during the period from March 1, 1967, plus interest at 7 percent. Michigan Wisconsin will also further reduce its rates and make refunds in event its purchase gas cost decreases below that set out in the Stipulation.

The Stipulation provides that Michigan Wisconsin shall also discontinue the use of deferred tax accounting and adopt "flow-through" accounting with respect to the reduction in income tax resulting from the use of liberalized depreciation. Michigan Wisconsin requests waiver of the requirements of Paragraph A of Account 282. It proposes to comply with the other requirements of that Account on a vintage year basis with respect to facilities constructed prior to January 1, 1966, until the amounts on the books in Account 282 are exhausted. By letter dated March 30, 1967, Michigan Wisconsin stated that it recognized that approval of the instant proposal would be without prejudice to the outcome of the pending proceedings in Docket No. R–264 and to the position that the Staff, Michigan Wisconsin or any other party may take in any future proceeding with respect to the disposition of the balance in Account 282.

Michigan Wisconsin reserves the right to take advantage of any changes which may occur with respect to the tax aspects of liberalized depreciation whether through legislation, court decision, change in Commission policy, or otherwise.

After due notice served upon Michigan Wisconsin's customers and interested State Commissions and published in the Federal Register (32 F.R. 3480), no objections or protests were received. Our review of the proposed Stipulation and Agreement, of the documents and data submitted in support thereof, including the cost of service utilized for such purposes, indicates that Michigan Wisconsin has complied with the requirements of our order issued herein on June 23, 1964. The proposed Stipulation and Agreement is proper and in the public interest.

*The Commission finds:*

(1) The proposal filed herein on February 14, 1967, by Michigan Wisconsin is appropriate and in the public interest in carrying out the provisions of the Natural Gas Act, and should be approved and made effective subject to the terms and conditions herein provided and ordered.

(2) Good cause exists for the Commission to waive its applicable Regulations under the Natural Gas Act in order that the tariff sheets filed on February 14, 1967, may become effective as of March 1, 1967, as proposed.

*The Commission orders:*

(A) The proposal filed herein by Michigan Wisconsin on February 14, 1967, is hereby approved and made effective subject to the following terms and conditions.

(B) The revised tariff sheets filed herein on February 14, 1967, as hereinbefore designated, are hereby accepted for filing and the notice requirements set out in Section 154.22 of the Commission's Regulations are hereby waived to permit said revised tariff sheets to be effective March 1, 1967.

(C) Within 30 days from the date of issuance of this order, Michigan Wisconsin shall make the refunds to its customers as required by Article 1 (A) and (B) of the proposal.

(D) For the period October 1, 1965 through August 31, 1966, Michigan Wisconsin shall refund to its customers a total of $548,000 per month, to be allocated to each customer on the basis of actual Mcf deliveries, and for the period September 1, 1966 through February 28, 1967, Michigan Wisconsin shall refund an amount equivalent to 8 cents per Mcf of billing demand under Rate Schedules ACQ-1 and MDQ-1; 0.3 cents per Mcf delivered under Section 3 of Rate Schedules ACQ-1, MDQ-1, SDOS-1 and AOS-1; and 0.6 cents per Mcf delivered under Section 3 of Rate Schedule SGS-1.

(E) Michigan Wisconsin shall pay interest on the refunds required by paragraph (D) in accordance with the Commission's order issued on June 23, 1964, in this proceeding (31 FPC 1579, 1581).

(F) Within 20 days of making the refunds required by the proposal and this order, Michigan Wisconsin shall report to the Commission in writing and under oath, the amounts of the refunds made to each customer together with a computation showing the manner in which such refunds were determined and shall file with the Commission releases from its customers showing receipt of the appropriate amounts. Concurrently therewith, Michigan Wisconsin shall serve a copy of the report upon its customers and interested State Commissions.

(G) Within 20 days from any date upon which Michigan Wisconsin makes further refunds as required by the Stipulation and Agreement herein approved, Michigan Wisconsin shall file with the Commission reports thereof and releases signed by its customers to whom payments were made. Copies of such reports shall be served upon interested State Commissions and all customers.

(H) Michigan Wisconsin's request as to waiver of the requirements of Paragraph (A) of Account 282 is hereby granted as requested.

(I) The accounting treatment of Account 282 approved by this order is without prejudice to any findings and orders which may be issued in Docket No. R-264 with respect to the disposition of funds in Account No. 282 to the position that the Staff, Michigan Wisconsin, or any other party may take in any future proceeding with respect to the disposition of the balance in Account 282.

(J) This order, except as herein specifically set forth, shall not be construed to change or otherwise affect the existing obligations of Michigan Wisconsin to make rate reductions and refunds as provided by orders heretofore issued by the Commission in proceedings involving Michigan Wisconsin.

(K) This order is without prejudice to any claims or contentions which have been made or which may hereafter be made by the Commission, the Commission Staff, Michigan Wisconsin, or any other party affected by this order, in any proceeding now pending, or which may hereafter be instituted by or against Michigan Wisconsin, or any other person or party affected by this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

## CITY OF MOSS POINT, MISSISSIPPI, AND UNITED GAS PIPE LINE COMPANY, DOCKET NO. CP67-57

### FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued April 13, 1967)

On September 8, 1966, the City of Moss Point, Mississippi (Applicant) filed in Docket No. CP67-57, an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing United Gas Pipe Line Company (Respondent) to establish physical connection of its transportation facilities with the facilities proposed to be constructed by the Applicant and to sell and deliver to Applicant from Respondent's pipeline facilities located near the eastern edge of the City of Moss Point, Mississippi, volumes of natural gas up to 3,478 Mcf daily for resale and distribution in the City of Moss Point, all as more fully set forth in the application.

Applicant proposes to construct and operate 4.5 miles of 6-inch lateral transmission pipeline extending from a connection with Respondent's facilities at the eastern edge of Moss Point to its existing gas distribution system, in order to secure a supply of natural gas directly from the Respondent for continued resale and distribution in Moss Point, in lieu of the supply presently supplied by the City of Pascagoula, Mississippi, on a rate basis consisting of purchased gas cost plus a transportation charge of 7 cents per Mcf.

The Applicant has owned and operated its municipality owned natural gas distribution system since 1941; and has been supplied with natural gas by the City of Pascagoula under an agreement of February 4, 1941, amended February 2, 1943, which expired on August 19, 1966. The City of Pascagoula has to date supplied a maximum daily quantity of 3,357 Mcf during the winter of 1965-66. United Gas Pipe Line Company now has a high pressure transmission line within the city limits of Moss Point, from which a supply of natural gas can be obtained without the payment of the present transportation charge of 7 cents to the City of Pascagoula. An estimated saving of $27,048 can be effected by the Applicant in the third year of operation of the proposed plan to buy natural gas from United Gas Pipe Line Company.

The total estimated cost of new construction is $122,000 which cost will be defrayed from internally generated funds and by the sale of revenue bonds.

After an agreement reached by the Applicant and the City of Pascagoula, dated February 7, 1967, the City of Pascagoula by letter filed March 20, 1967, withdrew its intervention filed October 11, 1966. The agreement provides for (1) the continuance of service by Pascagoula until Applicant has renovated its distribution system, (2) the continuance of service by Pascagoula to certain consumers residing within the city limits of Moss Point for a period of two years, and thereafter the sale of the related facilities by Pascagoula to Moss Point, and (3) the granting of easement rights by Moss Point to Pascagoula for the latter's transmission lines presently running through Moss Point.

Respondent filed an answer in this proceeding on October 3, 1966 stating it had no objection to the granting of the requested order for service.

The hearing presently scheduled for April 17, 1967 pursuant to the notice of the Commission issued February 8, 1967, is cancelled, and the matters involved are herein disposed of in accordance with the Commission's rules and regulations relating to such proceedings.

Due notice of the filing of the application and opportunity for hearing thereon has been given by publication in the Federal Register on September 21, 1966 (31 F.R. 12419). No protest, petition to intervene or request for hearing other than the petition to intervene of Pascagoula, Mississippi, withdrawn on March 20, 1967, has been filed in this proceeding.

*The Commission finds:*

(1) Applicant, United Gas Pipe Line Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 10, 1942, in Docket No. G-232 (3 FPC 863).

(2) Applicant, is legally authorized to engage in the local distribution of natural gas to the public within the meaning of Section 7(a) of the Natural Gas Act.

(3) It is necessary and desirable in the public interest to direct Respondent to establish physical connection of its transmission facilities with the facilities proposed to be constructed and operated by Applicant, and to sell and deliver to applicant under a service agreement to be executed by Applicant with Respondent in accordance with the Commission's Regulations for distribution and resale as hereinbefore described and as more fully described in the application in this proceeding.

(4) Applicant should be prepared to receive natural gas from Respondent for distribution in the City of Moss Point, Mississippi, within two years from the date of the issuance of this order.

(5) Respondent should be prepared to deliver gas to Applicant upon sixty days notice from Applicant.

(6) The requirement that Respondent serve Applicant, as requested, will not impair its ability to render adequate service to existing customers.

(7) The billing demand of Pascagoula should be adjusted as hereafter ordered.

*The Commission orders:*

(A) United Gas Pipe Line Company is directed to establish physical connection of its facilities at two delivery points with the facilities proposed to be constructed and operated by Applicant as hereinbefore described, and to sell and deliver to Applicant its natural gas requirements under a service agreement to be executed by Applicant with Respondent in accordance with the Commission's Regulations, for transportation, distribution and resale as hereinbefore described. Such service shall be rendered pursuant to Respondent's presently filed appropriate rate schedule.

(B) Respondent shall report to the Commission the date of commencement of service to Applicant within 10 days after such service begins.

(C) Applicant shall be prepared to receive service as directed herein within two years from the date of issuance of this order.

(D) Respondent shall be prepared to deliver natural gas to Applicant upon sixty days notice from Applicant.

(E) For the twelve month period commencing with the month in which initial delivery to Moss Point takes place, Respondent shall reduce Pascagoula's monthly billing demand by the amount which Moss Point contributed to said billing demand. Such reduction shall be ascertained by subtracting Pascagoula's sale to Moss Point from United's sale to Pascagoula.

---

Before Commissioners: Lee C. White, Chairman; Carl E. Bagge and John A. Carver, Jr.

## TEXACO INC., DOCKET NO. RI67-342

### ORDER DENYING REQUESTS

(Issued April 13, 1967)

Lone Star Gas Company (Lone Star) filed on March 23, 1967, a protest to the proposed unilateral increase in rate from 5.36¢ to 16.50¢ per Mcf tendered by Texaco Inc. (Texaco) on March 6, 1967, for the sale of natural gas to Lone Star from Stephens County, Oklahoma. Texaco's proposed rate, which was designated as Supplement No. 2 to Texaco's FPC Gas Rate Schedule No. 103, was suspended for five months to September 6, 1967, by order issued April 4, 1967 in the above-entitled proceeding.

Lone Star in its protest points out that the proposed rate exceeds not only the applicable area increased rate ceiling but the initial rate ceiling of 15¢ per Mcf as well. Lone Star also states that the gas sold is low pressure gas, requiring compression by it and that the well on the subject lease is a low quantity producer. Lone Star therefore contends the proposed increase is clearly unreasonable and should be rejected. In the alternative, Lone Star requests that Texaco's proposed rate be suspended for five months and that the Commission enter upon an immediate hearing concerning the lawfulness of such rate.

Lone Star also suggests that the Commission institute a rule-making proceeding to establish appropriate rules to govern unilateral increases by producers after the expiration or cancellation of their contracts. Lone Star asserts that without some reasonable limitation on such increases purchasers will be unable to protect themselves against unwarranted and unjustifiable increases.

Since the contract has expired, Texaco is not barred from filing a unilateral increase.[1] Accordingly, there is no justification for rejecting Texaco's increase as requested by Lone Star.

The Texaco increase amounts to approximately $17,000 on an annual basis, and as far as we can ascertain will have no triggering impact on other producer sales in the area. In these circumstances an immediate hearing is not warranted.

---

[1] See *Sunray Mid-Continent Oil Co. v. F.P.C.*, 364 U.S. 137. See also *Continental Oil Company (Operator), et al.*, order issued March 18, 1963, 29 FPC 525, and the Commission cases there cited.

It is also unnecessary at this time to institute a rule-making proceeding. Aside from any question as to the legality of such action, it would appear that the problems which may arise from a unilateral filing can better be disposed of on a case by case basis because of the many variables involved in these matters, such as the level of the rate, the amount of increase in purchased gas cost, the triggering impact, and the prospects for an early area rate decision.

*The Commission orders:*

For the reasons set forth above, Lone Star's requests for rejection of Texaco's proposed increased rate, and, in the alternative, for an immediate hearing are denied.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

## CITY OF ANDERSONVILLE, GEORGIA AND SOUTH GEORGIA NATURAL GAS COMPANY, DOCKET NO. CP67-156 (PHASE I)

### FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued April 14, 1967)

On December 5, 1966, the City of Andersonville, Georgia (Applicant) filed in Docket No. CP67-156 an application, as supplemented on January 19, 1967 and February 9, 1967, and amended on March 13, 1967, pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing South Georgia Natural Gas Company (Respondent) to establish physical connection of its transportation facilities with the facilities proposed to be constructed by Applicant and to sell and deliver to Applicant volumes of natural gas for resale and distribution in the City of Andersonville and environs, all as more fully set forth in the application, as amended.

By the instant application, as amended, Applicant proposes to construct and operate, in two phases, a metering facility (Phase I) to be utilized in the sale of natural gas by Applicant to the Mullite Company of America (Mullite Company) and a distribution system (Phase II) to be utilized in the local distribution of natural gas in the City of Andersonville and environs.

The estimated natural gas requirements of the Mullite Company under Phase I of Applicant's proposal are 55,000 Mcf of annual interruptible service, 1,560 Mcf of firm annual service and 6 Mcf of firm peak day service. Under Phase II of the proposal, Applicant would require an estimated 7,226 Mcf and 115 Mcf, respectively, of firm annual and peak day service.

In order that physical connection be established between Applicant's proposed facilities and Respondent's transportation facilities, Applicant requests that Respondent be directed to construct approximately 0.4 miles of 4.5-inch O.D. lateral pipeline extending from Respondent's mainline facilities to Applicant's proposed town gate metering station.

Applicant states that it has filed an application with the Department of Housing and Urban Development (HUD) for a Public Facility to finance its proposed facilities and that, although favorable action is anticipated, HUD has informed Applicant that it is temporarily without funds with which to grant the loan.

The Mullite Company, a new industry, is presently building a plant in the City of Andersonville and will provide new employment for the area. In order that the Mullite Company may commence operations that will enhance the economic status of the area, Applicant's proposal was divided into two phases, denoting the facilities and service required by the Mullite Company as Phase I. Phase II will be delayed pending financing arrangements.

Natural gas service to Applicant will be made under Respondent's FPC Rate Schedules G-1, at 52.91 cents per Mcf, and I-1, at 32.5 cents per Mcf.

The total estimated cost of Applicant's Phase I and Phase II facilities is $63,500.

Phase I of Applicant's project, which will cost less than the $13,500 available to Applicant for construction, will be financed by Applicant and the Mullite Company. Phase II will be financed from the proceeds of a $50,000, 30-year, 4 percent bond issuance to be underwritten by HUD.

In its answers filed on December 22, 1966, and March 30, 1967, Respondent stated that it has no objection to the issuance by the Commission of an order as requested by Applicant.

After due notice, no protest, petition for leave to intervene or notice of intervention has been filed herein.

*The Commission finds:*

(1) Respondent, South Georgia Natural Gas Company, a Georgia corporation having its principal place of business in Thomasville, Georgia, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of August 3, 1954, in Docket No. G-1915 (13 FPC 666).

(2) Applicant, City of Andersonville, Georgia, is a municipal corporation incorporated under the laws of the State of Georgia and is legally empowered to construct and operate natural gas facilities and to sell and distribute natural gas in said community.

(3) It is necessary and desirable in the public interest that Respondent be directed to establish physical connection of its natural gas transportation system with the proposed facilities of Applicant and to sell and deliver natural gas to Applicant, as set forth in the application, as amended, and as hereinafter ordered and conditioned.

(4) This order should be conditioned upon Applicant being prepared to receive natural gas from Respondent, as proposed, within one year from the date on which this order issues.

(5) The requirement that Respondent serve Applicant, as proposed, will not place any undue burden upon Respondent nor impair its ability to render adequate service to its existing customers.

*The Commission orders:*

(A) Respondent is directed to establish physical connection of its natural gas transmission system with the facilities to be constructed by Applicant and to sell and deliver natural gas to Applicant, all as hereinbefore described and as more fully described in the application in this proceeding.

(B) Applicant shall be prepared to receive natural gas from Respondent within one year from the date of this order.

(C) Respondent shall notify the Commission of the commencement of service within ten days thereof.

(D) Respondent shall execute and file with the Commission a service agreement with Applicant in accordance with the Commission Regulations.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## CHUGACH ELECTRIC ASSOCIATION, PROJECT NO. 2170–ALASKA

### ORDER APPROVING EXHIBIT K AND MODIFYING LICENSE

(Issued April 14, 1967)

Chugach Electric Association, Inc. of Anchorage, Alaska, licensee for the Cooper Lake Project No. 2170, situated on Cooper Lake, Cooper Creek and Kenai Lake, Alaska, on April 25, 1966 filed for Commission approval a new Exhibit K map showing a proposed relocation of the existing 115 kv transmission line which extends from Quartz Creek substation to Anchorage substation. The line occupies lands of the United States within the Chugach National Forest.

The licensee seeks authorization to change the route of the existing transmission line around the end of Turnagain Arm from Ingram Creek to the town of Girdwood. The proposed route will relocate the transmission line inland from Turnagain Arm, the railroad and the highway.

Licensee represents that as a result of the Good Friday Earthquake of 1964, certain topographical changes occurred which caused the 115 kv transmission line to be subject to tidal action and ice flows in Turnagain Arm of Cook Inlet.

According to the application, the proposed relocation is necessary for the following reasons: (a) The line is inaccessible at least half of the time due to high tides; (b) The line is constantly being damaged by tidal undercutting wave action and ice flows; and (c) the constant and continual expensive repairs to the existing line are an economic hardship.

The Department of Agriculture, in reporting on the application, recommended approval of the proposed transmission line relocation provided that Articles 32, 33 and 34 of the license amendment issued June 14, 1962, are made applicable to the line to be relocated. These articles relate to the construction, location and operation of a portion of the Cooper Lake—Anchorage 115 kv transmission line which was authorized by the June 14, 1962 order, 27 FPC 1247.

The Department also asked that the licensee be required to remove all portions of the replaced transmission line within a reasonable time under the supervision of the Department or Agency of the United States having jurisdiction of the lands involved and that the licensee obtain letters from the Alaska Railroad Commission, the State of Alaska Department of Highways and the Army Corps of Engineers stating their non-objection to the construction across their respective existing rights-of-way within the Chugach National Forest.

The transmission line, relocated as authorized herein, will be subject to Articles 32, 33 and 34 since they are part of the license for the project. The additional requirements recommended by the Department of Agriculture are being embodied in Articles 35 and 36 which we are adding to the license.

*The Commission finds:*

(1) The license, further amended as hereinafter provided, will not interfere or be inconsistent with the purpose for which the Chugach National Forest was created or acquired, and will not alter any of the basic facts upon which the license was issued.

(2) Exhibit K (FPC No. 2170–42) conforms to the Commission's rules and regulations and should be approved as part of the license for the project.

(3) Articles 35 and 36 containing conditions recommended by the Department of Agriculture with respect to the realignment of this line are reasonable and should be made a part of the license for this project.

*The Commission orders:*

(A) Exhibit K (FPC 2170–42) is hereby approved as part of the license for Project No. 2170.

(B) The license for Project No. 2170 is amended to include the following additional articles:

> *Article 35.* The licensee shall remove or otherwise dispose of all portions of the existing transmission line replaced by the new transmission line relocation shown in Exhibit K (FPC No. 2170–42). All disposal work shall be accomplished within twelve months after completion of the relocation. Disposal methods shall be subject to the approval of the Department or Agency of the United States having supervision over the lands involved.
>
> *Article 36.* Licensee shall execute appropriate agreements with the Alaska Railroad Commission, the State of Alaska Department of Highways and the Army Corps of Engineers before commencing construction of the transmission line shown in Exhibit K (FPC No. 2170–42) across their existing rights-of-way in the Chugach National Forest and shall file such agreements with the Commission and the Forest Service.

(C) The Licensee is authorized to relocate its 115 kv transmission line shown on Exhibit K (FPC 2170–42) subject to the terms and conditions of the license for Project No. 2170, as amended.

(D) These amendments in the manner set out above shall not operate to alter or amend the license in any other respect, and shall not in any way constitute a waiver of any part, provision or condition of the license.

(E) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this order. In acknowledgment of the acceptance of this order, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## WISCONSIN MICHIGAN POWER COMPANY, PROJECT NO. 2523

### ORDER ISSUING LICENSE (MINOR)

(Issued April 14, 1967)

Application was filed on May 17, 1965 and supplemented on September 16, 1965, by Wisconsin Michigan Power Company (Applicant) of Appleton, Wisconsin, for a license under Section 4(e) of the Federal Power Act (Act) for constructed Project No. 2523, known as the Oconto Falls Plant, located on the Oconto River in the City of Oconto Falls, Oconto County, Wisconsin. No lands of the United States are affected by the project.

The dam was constructed in 1902, and hydroelectric generation at the powerhouse began in 1915. Reconstruction of the dam structure was completed in the latter part of 1922 and further reconstruction was completed in 1931. There has been no project construction since the 1935 amendment to the Act.

The Secretary of the Army and the Chief of Engineers have reported that the plans of the project structures affecting navigation are satisfactory insofar as the interest of navigation is concerned.

The Department of the Interior, in reporting on the application, stated that the project as currently operated, does not affect adversely fish and wildlife resources. The Department recommended that the project lands now owned in fee by Applicant, as shown on Exhibit K (FPC No. 2523–1), filed as part of the application for license, be held under project control by Applicant for recreational development should the need for such use be required in the future. By Article 13, we are providing for the filing by Applicant of an Exhibit R, which is a proposed plan for full public utilization of project water and lands for recreational purposes.

The Department of Health, Education, and Welfare, has reported that according to the Wisconsin Committee on Water Pollution, no water quality degradation due to pollution or vector control problem exists in the area of the Oconto River occupied by the project.

The Oconto River rises in northeastern Wisconsin and flows southeasterly a distance of 110 miles into Green Bay, an arm of Lake Michigan. In Docket No. DI–165–Wisconsin (5 FPC 489, 490), the Commission on April 30, 1946 found the Oconto River is a navigable water of the United States from a point above the location of the proposed Stiles Dam project at mile 14.2, to its mouth. The Oconto Falls Plant is located some 6 miles upstream from Stiles. The Commission also found that for many years substantial quantities of logs were floated down the Oconto River to mills along that river and in some cases the sawed lumber from such mills was rafted down the river to Green Bay and from there into Lake Michigan for use in other areas. Some of the logs referred to above were floated from points about 90 miles upstream from the Oconto Falls Plant, downstream to lumber and paper mills located at Oconto Falls, the site of the Oconto Falls Plant.

For the reasons set forth in our Opinion No. 357 (27 FPC 830), the license herein granted shall have an effective date of April 1, 1962 and a termination date of December 31, 1993.

In our order on rehearing issued February 17, 1965 in *Wisconsin Power & Light Company*, Project No. 2347, *et al.* (33 FPC 275), we stated that we will, if the Applicant so wishes, issue licenses for minor projects without waiving Sections 14 and 15 of the Federal Power Act and the other provisions of the Act necessary to the effectuation of those sections, provided the minor project applications are timely supplemented pursuant to Section 4.50 of our Regulations under the Act (18 CFR § 4.50), which relates to applications for major projects. In the event the Applicant herein wishes a license in which those provisions of the Act are not waived it should so advise us within 30 days from the date of issuance of this order and file its supplemental application within 30 additional days thereafter.

*The Commission finds:*

(1) The Oconto River is a navigable water of the United States from its mouth in Green Bay to points near its source, 110 miles upstream from its mouth.

(2) Oconto Falls Project No. 2523 is located on navigable waters of the United States.

(3) Applicant is a corporation organized under the laws of the State of Wisconsin and has submitted satisfactory evidence of compliance with the requirements of all applicable State laws insofar as necessary to effectuate the purposes of a license for the project.

(4) Public notice of the filing of the application has been given. No protests or petitions to intervene have been received. No conflicting application is before the Commission.

(5) The project does not affect a Government dam, nor will the issuance of a license therefor, as hereinafter provided, affect the development of any water resources for public purposes which should be undertaken by the United States.

(6) Subject to the terms and conditions hereinafter imposed, the project will be best adapted to a comprehensive plan for improving or developing a waterway or waterways for the use or benefit of interstate or foreign commerce, for the improvement and utilization of water-power development, and for other beneficial public uses, including recreational purposes.

(7) The installed horsepower capacity of the project hereinafter authorized for the purpose of computing the capacity component of the administrative annual charge is 1,920 horsepower, and the amount of annual charges, based on such capacity, to be paid under the license for the project, for the costs of administration of Part I of the Act is reasonable as hereinafter fixed and specified.

(8) It will be in the public interest to waive pursuant to Section 10(i) of the Act, the terms and conditions contained in the following sections of Part I of the Act:

> Sections 4(b), except the second sentence thereof; 4(e), insofar as it relates to approval of plants by the Chief of Engineers and the Secretary of the Army and to public notice; 6, insofar as it relates to public notice and to the acceptance and expression in the license of terms and conditions of the Act which are hereinafter waived; 10(c), insofar as it relates to depreciation reserves; 10(d); 10(f); 11; 12; 14, except insofar as the power of condemnation is reserved; 15; 19; 20; 22; and 23(a), insofar as it relates to the determination of fair value.

*The Commission orders:*

(A) This license is hereby issued to Wisconsin Michigan Power Company (Licensee) of Appleton, Wisconsin, under Sections 4(e) and 10(i) of the Act, for a period effective as of April 1, 1962 and terminating December 31, 1993, for the continued operation and maintenance of Project No. 2523, located on the Oconto River, a navigable water of the United States, in Oconto County, Wisconsin, subject to the terms and conditions of the Federal Power Act insofar as not expressly waived herein, which Act is incorporated by reference as a part of this license, and subject to such rules and regulations as the Commission has issued or prescribed under the provisions of the Act.

(B) Oconto Falls Project No. 2523 consists of:

(i) all lands constituting the project area and enclosed by the project boundary or limits which are otherwise defined;

(ii) the existing Oconto Falls Project consisting of (1) a concrete gravity dam about 1,914 feet long with a 28-foot operating head, (2) two earth sections about 175 feet and 1,350 feet long, (3) an 84-foot concrete spillway containing four tainter gates 11 feet high, (4) a 240-acre reservoir from which water is drawn to operate four hydroelectric units—two rated at

480 kw each, and the other two rated at 120 kw and 300 kw, all housed in a 33.5-foot by 70-foot stone masonry powerhouse; and

(iii) all other structures, fixtures, equipment, or facilities which are located in the project area and are useful in the maintenance and operation of the project; and all rights and interests the possession of which is necessary or appropriate in the maintenance and operation of the project.

(C) This license is also subject to the terms and conditions set forth in Form L–9 (July 1, 1964) entitled, "Terms and Conditions of License for Constructed Minor Project Affecting Navigable Waters of the United States" (32 FPC 577) which terms and conditions designated as Articles 1 through 11 are attached hereto and made a part hereof; and subject to the following special conditions set forth herein as additional articles:

*Article 12.* The Licensee shall pay to the United States the following annual charge, effective April 1, 1962:

For the purposes of reimbursing the United States for the costs of administration of Part I of the Act, $96.00 per annum.

*Article 13.* Licensee shall submit for Commission approval within one year from the date of issuance of this license an Exhibit R which conforms with requirements of Section 4.41R of the Commission's Regulations under the Federal Power Act.

*Article 14.* The licensee shall cooperate with the Regional Engineer, Federal Power Commission, or such other officer or agent as the Commission may designate, in an investigation during the summer of 1967 to correct the problem of algae proliferation in the deadwater area below the Oconto Falls Dam and shall make such correction as the Commission shall deem necessary after notice and opportunity for hearing.

(D) The terms and conditions of the Act, which it has been found to be in the public interest to waive, are hereby excluded from this license.

(E) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this license. In acknowledgment of the acceptance of this license, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

## CITIES SERVICE GAS COMPANY, DOCKET NO. CP66–188

### ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 17, 1967)

On March 8, 1967, Cities Service Gas Company (Petitioner) filed in Docket No. CP66–188 an application to amend the order of March 7, 1966, 35 FPC 343, in said docket, issuing a certificate of public convenience and necessity authorizing the installation and operation of transmission and compressor facilities at Petitioner's Hugoton Compressor Station in Grant County, Kansas, all as more fully set forth in the application to amend. Cities requests a one-year extension until March 7, 1968 within which to construct and place in operation the facilities authorized.

Petitioner states that it subsequently became necessary to file an emergency application to increase the horsepower at Cities' Saginaw Compressor Station (Docket No. CP67-7). The emergency application was granted on September 16, 1966, 36 FPC 639, and the compressor unit which had been purchased to be installed at the Hugoton Station under the authority of the certificate in this proceeding was installed at Saginaw to meet the emergency situation which existed there.

The need for additional compressor horsepower at the Hugoton Station continues to exist. Cities hopes to be able to install the 2,000 horsepower authorized in this proceeding prior to March 7, 1968.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued March 7, 1966, in Docket No. CP66-188 be amended as hereinafter ordered.

*The Commission orders:*

(A) The Commission's order issued March 7, 1966, in Docket No. CP66-188 is amended so as to extend the time for completion of the authorized facilities to March 7, 1968.

(B) In all other respects said order shall remain in full force and effect.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

## COLORADO INTERSTATE GAS COMPANY, DOCKET NO. CP67-195

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 17, 1967)

On January 6, 1967, Colorado Interstate Gas Company (Applicant), filed in Docket No. CP67-195 an application together with a supplement thereto on February 14, 1967, and an amendment on March 7, 1967, pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas transmission facilities for the transportation and sale for resale in interstate commerce of natural gas, all as more fully set forth in the application, supplement and admendment thereto.

Applicant requests authorization to construct and operate 21.3 miles of 20-inch loop line between Keyes Station, Oklahoma and Campo Junction, Colorado and to construct and operate a new meter station and 0.8 mile of 6⅝-inch lateral line in Weld County, Colorado for increased deliveries to Cheyenne Light, Fuel and Power Company (Cheyenne).

The facilities proposed herein will, with previously authorized additional deliveries from storage, increase Applicant's system peak day sales capacity to 954,850 Mcf. Present contracted firm requirements for the 1967-68 heating season amount to 939,996 Mcf, leaving uncommitted system capacity of approximately 14,854 Mcf.

Cheyenne has contracted with Applicant for additional firm deliveries during the year 1967 and has executed a new service agreement with Applicant for an increase of 5,000 Mcf (to a total of 46,500 Mcf) in Cheyenne's demand volume under Rate Schedule P-1, effective April 1, 1967. The service agreement includes a new Colorado-Wyoming State line delivery point to provide Cheyenne with more flexibility to accept the increase in deliveries. Cheyenne has agreed to make a contribution in aid of construction to Applicant equal to the total cost of the 0.8 mile of 6⅝-inch lateral pipeline.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on April 12, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplement, amendment and exhibits, submitted in support of the authorizations and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Colorado Interstate Gas Company, a Delaware corporation having its principal place of business in Colorado Springs, Colorado, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued June 5, 1945, in Docket No. G-294 (4 FPC 936).

(2) The proposed construction and operation of facilities and sale of natural gas, as hereinbefore described and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities and sale of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(6) It is appropriate in the administration of the Natural Gas Act and in the public interest to accept for filing Applicant's service agreement dated September 1, 1966.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to Applicant, authorizing the construction and operation of facilities, and the sale of natural gas described herein and as more fully described in the application, supplement and amendment filed in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation and the transportation of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, by January 1, 1968.

(D) Colorado Interstate Gas Company's Service Agreement dated September 1, 1966, is accepted for filing effective on the date of the commencement of the increased service to Cheyenne.

(E) Cheyenne shall make a contribution in aid of construction equal to the total cost of the 0.8 mile of 6-inch lateral line.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

## MONTANA-DAKOTA UTILITIES CO., DOCKET NO. CP67-240

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 17, 1967)

On February 27, 1967, Montana-Dakota Utilities Co. (Applicant) filed in Docket No. CP67-240 a "budget-type" application pursuant to Section 7(c) of the Natural Gas Act, as implemented by Section 157.7(c) of the Regulations under the Act for a certificate of public convenience and necessity authorizing the construction, during the calendar year 1967, and operation of certain natural gas facilities, all as more fully set forth in the application.

By the instant application, Applicant seeks authorization to construct and operate various natural gas facilities which will enable it to attach to its certificated main pipeline system natural gas which will be purchased from authorized independent producers in the general area of its system.

The total estimated cost of Applicant's proposed construction will not exceed $200,000, with no single project to exceed a cost of $50,000. Applicant proposes to finance its proposed construction from internally generated funds.

After due notice, no protest, petition to intervene, or notice of intervention has been filed herein.

At a hearing held on April 12, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Montana-Dakota Utilities Co., a Delaware corporation having its principal place of business in Minneapolis, Minnesota, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of March 22, 1946, in Docket No. G-220 (5 FPC 64).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(5) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(6) The authorization hereinafter granted should be limited to construction during the calendar year 1967 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $200,000, with no single project to exceed a cost of $50,000.

*The Commission finds:*

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, Montana-Dakota Utilities Co., to construct during the calendar year 1967 the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities only to take natural gas supplies from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(C) The certificate issued by paragraph (A) and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(D) The authorization granted in paragraph (A) above is limited to construction during the calendar year 1967 and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $200,000, with no single project to exceed a cost of $50,000.

---

## OPINION NO. 515-A

## VIRGINIA ELECTRIC & POWER COMPANY, DOCKET NO. E-6684

### MEMORANDUM OPINION AND ORDER DENYING APPLICATION FOR REHEARING

(Issued April 17, 1967)

*Syllabus*

1. Prior determination that Roanoke Rapids project has not realized any dependable capacity gain as result of operations of upstream federal projects rests squarely upon substantial evidence of record and is consistent with definition "dependable capacity" term in FPC Form 12, Schedule 16. P. 769.

**2. Import of *proviso* in FPC Form 12, Schedule 16, is that consideration is to be given probability of frequency and duration of heaviest flows which will adversely affect hydro plant capacity; it is not necessarily limited to the one heaviest flow of record. P. 769.**

**3. There is no validity in assertion of gross error by reference in prior Opinion to Commission practice in evaluating potential hydroelectric projects on other rivers, such as the Ohio; reference is not of basic decisional significance and serves only to illuminate fact that determination here shares consistency with current practice. PP. 770, 771.**

**4. Commission *denies* application for rehearing of prior Opinion and order.**

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

CARVER, *Commissioner:*

By Opinion No. 515 and order issued February 17, 1967, 37 FPC 340, we found that the Virginia Electric & Power Company (Vepco) was liable under Section 10(f) of the Federal Power Act for headwater benefits conferred upon its Roanoke Rapids Project by the upstream federal John H. Kerr and Philpot Projects during the period August 1, 1955 through December 31, 1962, in the amount of $983,300 plus $43,986 for costs of making our determination. We ordered Vepco to pay to the Commission such amounts less any sum which it may have heretofore paid on account. This determination was made over the opposition of the Secretary of Interior (Interior) who had intervened in these proceedings to assert, among other points, that Vepco was liable for a total assessment of $4,155,000 plus costs, or in the alternative, no less than $2,799,600 plus costs.

On March 20, 1967, Interior filed an application for rehearing of the above Opinion and order, stating that the Commission had erred: (1) in the approach to and consideration of the matter of capacity gains; (2) in not finding that Vepco's Roanoke Rapids Project had realized a gain of 35 megawatts or at the very least 17 megawatts in dependable capacity because of regulation by the upstream federal projects; (3) in referring to Commission practice in evaluating potential hydroelectric projects on other rivers, such as the Ohio, when such practice was not considered in the hearings; (4) in sustaining the Examiner's findings on pre-draw operations; (5) in sustaining the Examiner's treatment of the amounts collected for the administration of Part I of the Federal Power Act.

We find that the grounds set forth for rehearing in Interior's application are not persuasive. Most of the issues argued by Interior for rehearing, apart from that in (3) above, are simply restatements of arguments previously advanced by Interior, and were adequately covered in the Examiner's decision and in the Commission's opinion. We deem it appropriate, however, to add the following comment to the position expressed in Opinion No. 515 and order.

Our determination that Vepco's project at Roanoke Rapids has not realized any dependable capacity gain as the result of the operations of the upstream federal projects rests squarely upon substantial evidence of record and is consistent with the definition of the term "dependable capacity" in FPC Form 12, Schedule 16. In that definition the following *proviso* is plainly enunciated:

> * * * In cases where the stream-flow records indicate that the most adverse flows are not likely to occur except at long intervals of time and are likely to be of very short duration, the figures used in determining the capacity available from hydro plants may be modified, treating such abnormal limitations as an emergency condition to be covered by the reserve capacity. * * *

The record in this proceeding satisfactorily demonstrates that floods which would impair the capability of the Roanoke Rapids Project by even one megawatt must attain a flow of at least 70,000 cubic feet per second on an unregulated river, and that a flood of this magnitude or greater occurs so infrequently as to warrant treatment as an emergency condition under the above *proviso*. Thus, during the 38-year period from 1912 through 1949 when the Roanoke River was not regulated, there were only 34 floods with a flow of 70,000 cubic feet per second or more, extending over a combined period of 70 days out of a total time period of 13,878 days. On the basis of this showing of record, the full capability of the Roanoke Rapids Project would not have been impaired by flooding on an unregulated river about 99.5 percent of the time. Any possible loss in plant capability in the event of a flood of 70,000 cubic feet per second or more on an unregulated river may be regarded as an emergency condition to be covered by Vepco's reserve capacity under the Form 12 definition.

Interior's assertion that the *proviso* in FPC Form 12, Schedule 16, is limited in its application only to the one single period of the most adverse flows of record, namely the flood of 254,000 day second feet[1] of August 18, 1940, overlooks the essential meaning of the *proviso*. The import of the *proviso* is that consideration is to be given to the probability of the frequency and duration of the heaviest flows which will adversely affect the capacity of a hydro plant. This consideration is not necessarily limited to the one heaviest flow of record. Other "most adverse flows" are to be considered for the purpose of determining whether their probability of recurrence and duration have meaningful significance with respect to the dependable capacity of the hydro plant.

---

[1] A day second foot is the volume resulting from a uniform flow of one cubic foot per second flowing for a period of one day (86,400 cubic feet).

Interior restates arguments originally presented in this proceeding that the plant capability of Roanoke Rapids would be impaired by a flow of just over 20,000 cubic feet per second rather than 66,000 cubic feet per second, and that there were 73 periods of high flows over 50,000 day second feet during the 38-year period from 1912 through 1949 which would have impaired the Roanoke Rapids Project by four megawatts to 35 megawatts had it then existed on an unregulated river. Without conceding the validity of Interior's assertion, it may be noted that these 73 periods of high flows, at Interior's alleged impairment rates, would have affected the Roanoke Rapids Project only about 1.4 percent of the time during the 38-year period from 1912 through 1949. Thus, even according to Interior's estimates, the full capability of the Roanoke Rapids Project would not have been impaired by floods in excess of 50,000 day second feet on an unregulated river about 98.6 percent of the time. Moreover, Interior's conclusions are based on extensive extrapolation from very limited data, obtained in one case from observing the Roanoke Rapids operations for two days, and in the other case, only one day. The calculations of staff's witness and of Vepco's witness, on the other hand, are based on the use of model tests in accordance with recognized practice. We find that the staff and Vepco estimates based on these model tests appear to be more reliable than Interior's estimates.

We further observe that Interior's calculations failed to credit Roanoke Rapids' installation with an adequate efficiency rating during periods of heavy flow because Interior apparently did not give sufficient weight to the fact that the cavitation problem at Roanoke Rapids is lessened during these periods. Also, although Interior has questioned staff's calculations based on a formula using gross head rather than net head, the testimony of staff's witness shows that this formula reflects an overall factor which assumed a loss in gross head, and that such loss was taken into consideration in staff's calculations. The evidence of record adequately supports our conclusion that Roanoke Rapids has not realized any dependable capacity gain as the result of the operations of the upstream federal projects, and that any impairment by reason of high water flows on an unregulated river would occur so infrequently as to be considered properly as an emergency condition consistent with the definition in FPC Form 12, Schedule 16.

The Commission finds no validity in Interior's assertion that gross error was committed in Opinion No. 515 and order by the reference therein to Commission practice in evaluating potential hydroelectric projects on other rivers, such as the Ohio, where projects were credited with full capacity value upon a showing that capability will be available 95 percent of the time. As we have stated above, our conclusion that the Roanoke Rapids Project has not realized any dependable capacity gain as the result of the operations of the upstream federal projects rests upon the evidence of record in this proceeding as applied to the definition of the term "dependable capacity" in FPC Form 12, Schedule 16. This conclusion stands alone on the facts adduced in this proceeding, and is independent of any other proceeding. Commission reference to the handling of the Ohio River projects is not of basic decisional significance in this matter, and serves only to illuminate the fact that the determination in this case shares a consistency with current Commission practice.

The Commission again expresses the finding made in Opinion No. 515 and order that there is an indication in the record that Roanoke Rapids realizes plant capability gains as a result of the operation of the upstream federal projects, that it is not possible for us to ascertain the extent and value of those gains on this record, and accordingly that there should be reserved for determination at a later date what further charges should be assessed against Vepco to reflect such plant capability gains for the period between August 1, 1955 and December 31, 1962.

*The Commission finds:*

The assignments of error and grounds for rehearing set forth in Interior's application for rehearing filed in this proceeding present no facts or legal principles which would warrant any change in or modification of the Commission's Opinion No. 515 and accompanying order.

*The Commission orders:*

The application for rehearing filed by the Secretary of Interior on March 20, 1967, is denied.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## COLORADO INTERSTATE GAS COMPANY, DOCKET NO. CP67-209

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 19, 1967)

On January 25, 1967, Colorado Interstate Gas Company (Applicant) filed in Docket No. CP67-209 a "budget-type" application pursuant to Section 7(c) of the Natural Gas Act, as implemented by Section 157.7(b) of the Regulations under the Act, for a certificate of public convenience and necessity authorizing the construction during the 12-month period following the issuance of the Commission's order herein, and the operation of gas purchase facilities to enable

Applicant to attach to its certificated main pipeline system natural gas which will be purchased from authorized independent producers in the general area of its system, all as more fully set forth in the application.

Applicant proposes to construct and operate routine gas supply facilities, including pipeline, metering and compression facilities.

The total estimated cost of Applicant's proposed facilities will not exceed $600,000, with no single project exceeding a cost of $150,000. Applicant proposes to finance said costs from funds on hand.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

At a hearing held on April 12, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Colorado Interstate Gas Company, a Delaware corporation having its principal place of business in Colorado Springs, Colorado, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of June 5, 1945, in Docket No. G-294 (4 FPC 936).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(5) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(6) The authorization hereinafter granted should be limited to construction during the 12-month period following the issuance of this certificate and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $600,000, with no single project to exceed a cost of $150,000.

*The Commission orders:*

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, Colorado Interstate Gas Company, to construct during the 12-month period following the issuance of this order, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities only to take natural gas supplies from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(C) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(D) The authorization granted in paragraph (A) above is limited to construction during the 12-month period following the issuance of this order and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $600,000, with no single project to exceed a cost of $150,000.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## MOUNTAIN FUEL SUPPLY COMPANY, DOCKET NO. CP67-191

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND PERMITTING AND APPROVING ABANDONMENT

(Issued April 19, 1967)

On December 30, 1966, Mountain Fuel Supply Company (Applicant) filed in Docket No. CP67-191 an application pursuant to Section 7(b) and Section 7(c) of the Natural Gas Act for permission and approval to abandon certain natural gas facilities and for a certificate of public convenience and necessity authorizing the construction and operation of other facilities, all as more fully set forth in the application.

Applicant proposes to construct approximately 3.5 miles of 10¾-inch diameter pipeline and 25.7 miles of 8⅝-inch diameter pipeline extending a total of 29.2 miles from the end of Applicant's existing 10¾-inch pipeline terminating in the West Side Canal Field to a central delivery point in the North Craig Field, together with the necessary fittings, valves, meters and other accessories. The new pipeline will parallel the existing 4½-inch pipeline to the Four-Mile Creek Field (certificated in Docket No. CP65-348) for a distance of about 2.0 miles. This portion of the 4½-inch lateral will not be needed after the 10¾-inch pipeline is in operation.

Applicant proposes to abandon said two miles of 4½-inch lateral which will be removed and salvaged. The remaining length of the 4½-inch lateral will be tied into the 10¾-inch pipeline. The new facilities will attach a new gas supply in the North Craig Field, Moffat County, Colorado, estimated at 53,040,000 Mcf with a deliverability of 12,000 Mcf per day.

Applicant estimates that the total cost of the proposed facilities will be about $408,000, including the cost of tying in the 4½-inch lateral. The cost will be financed out of funds on hand and from short term bank borrowing.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on March 16, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization sought, and upon consideration of the record.

*The Commission finds:*

(1) Applicant, Mountain Fuel Supply Company, a Utah corporation having its principal place of business in Salt Lake City, Utah, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of October 15, 1940, in Docket No. G-154 (2 FPC 288).

(2) The facilities proposed to be abandoned by Applicant, as hereinbefore described and as more fully described in the application filed in this proceeding are used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and such abandonment is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The proposed abandonment of the aforesaid facilities is permitted by the public convenience and necessity and permission and approval therefor should be granted as hereinafter ordered.

(4) The proposed construction and operation of facilities, as hereinbefore described and as more fully described in the application, filed in this proceeding are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(5) The aforesaid proposed construction and operation of facilities, is required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(6) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(7) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) Permission for and approval of the abandonment by Applicant of the facilities hereinbefore described, as more fully described in the application in this proceeding is granted.

(B) A certificate of public convenience and necessity is issued to Applicant in this proceeding, authorizing the construction and operation of facilities, as hereinbefore described, all as more fully described in the application, upon the terms and conditions of this order.

(C) The certificate issued by paragraph (B) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(D) Applicant shall advise the Commission of the date of abandonment of the facilities as authorized in paragraph (A) above within ten days of such abandonment.

(E) The facilities authorized in paragraph (B) above shall be constructed and placed in actual operation, as provided in paragraph (b) of Section 157.20 of the aforesaid Regulations within twelve months of the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

# PROHIBITION OF DISCRIMINATION AT RECREATIONAL FACILITIES AT LICENSED HYDROELECTRIC PROJECTS, DOCKET NO. R-304

## ORDER NO. 341

### AMENDING REGULATIONS UNDER THE FEDERAL POWER ACT

(Issued April 19, 1967)*

On June 8, 1966 the Commission gave notice (31 F.R. 8376, June 15, 1966) that it proposed to issue a rule prohibiting discrimination on account of race, creed, color, or national origin in connection with recreation facilities at licensed projects. The notice proposed, in addition to this prohibition, a requirement that employees of the licensee and any persons who lease or manage its recreation facilities be instructed to comply with it and that the licensee post signs informing the public that the facilities would be operated on a nondiscriminatory basis.

Five comments were received on the proposed rule.[1] All agreed with the basic objective of eliminating discrimination at licensed projects, but one expressed doubt as to the propriety of utilizing the Federal Power Act (and particularly its sanctions, such as forfeiture of the license) to promote an antidiscrimination policy. Three of the comments suggested modifications in the posting requirement and while the suggested changes were in part mutually inconsistent we have taken account of these suggestions in the rule as adopted by this order.

The respondent who objected to "the use of federal power in this manner to enforce an unrelated law * * * however admirable we may regard the law and the policy its embodies" misconceives the basis on which the Commission proposed to issue the rule. We would not be enforcing an unrelated law (such as the Civil Rights Act of 1964), but carrying out the logic and policy of section 10(a) of the Federal Power Act, which gives the Commission responsibility for insuring the fullest practicable use of the nation's waterway resources for recreational as well as electric energy and navigation purposes. It cannot seriously be argued that a limitation of availability based on race, creed, color, or national origin is consistent with such use of project lands and waters for recreation.

The same respondent argued that it would be bad policy "to draft regulations that are open to the imposition of draconic penalties for minor or accidental infractions." The Commission has always conducted its enforcement activities in the belief that sanctions should be appropriate to the infraction, and expects to observe the same policy in this area.

With respect to the posting requirement, three of the comments suggested changes. Two suggested that no reference need be made to the issues of race, creed, color or national origin; one suggested that no signs at all were necessary, but that if required they should not exclude (in the respondent's language) "non-discriminatory rules and regulations * * * [covering payment of rent or assessments by sub-leases, keeping properties neat and free from weeds and debris, the misuse of liquors, creating unnecessary disturbances, disobeying the laws of the area, the county, or the state, etc."

---

*Published in the Federal Register on April 27, 1967 (32 F.R. 6487).

[1] Central Nebraska Public Power & Irrigation District, The Commonwealth of Pennsylvania, Philadelphia Electric Co., Rives and Rodgers, Attorneys-at-Law, Portland, Ore., and The Commonwealth of Virginia.

We agree that the direct reference to "race, creed, color, or national origin" should be replaced by a general reference to discrimination, which will cover these as well as any other possible ground of discriminatory exclusion. Posting, however, is necessary in order that members of the community who have in the past thought (perhaps wrongly) that they were not welcome to use the facilities will be apprised of their right to do so. We are altering the regulation amending §8.2(a) so that it will require posting of notice that the recreation facilities are open "to all members of the public without discrimination". The point raised by one respondent regarding compliance with non-discriminatory rules of the licensee and state or local laws is sufficiently covered by the existing language of §8.2(a) which directs the posting of "permissible times and activities, and other regulations regarding such use". To state specifically that state and local laws are applicable is, therefore, quite unnecessary, and might even raise problems of interpretation where old ordinances requiring segregation are still on the books.

Since the proposed change in the title of Part 8 has been accomplished by Order No. 330 in Docket No. R-276 issued December 12, 1966, 36 FPC 1030, 31 F.R. 16201, no further action thereon is necessary.

*The Commission finds:*

(1) The amendments to the regulations, herein prescribed, are necessary and appropriate for the administration of the Federal Power Act.

(2) The revision made in the amendment originally proposed results from suggestions made by respondents to the Notice of Proposed Rulemaking herein and since it neither amounts to a substantial change in the original proposal nor imposes a further burden on persons subject to the regulation, no further notice prior to its adoption is necessary.

*The Commission*, acting pursuant to the provisions of the Federal Power Act, as amended, and particularly sections 10(a) and 309 thereof (41 Stat. 1068, 49 Stat. 858; 16 U.S.C. 803, 825th), *orders:*

(A) Part 8 of Subchapter B, Chapter I of Title 18 of the Code of Federal Regulations is amended as follows:

1. In §8.2, paragraph (a) is revised by adding a new sentence. As amended, §8.2(a) reads as follows:

§8.2 Posting of project lands as to recreational use and availability of information.

(a) Following the issuance or amendment of a license, the licensee shall post and shall maintain at all points of public access which are required by the license (or at such access points as are specifically designated for this purpose by the licensee) and at such other points as are subsequently prescribed by the Commission on its own motion or upon the recommendation of a public recreation agency operating in the area in which the project is located, a conspicuous sign giving the name of the project and the owner of the project, a statement that it is licensed by the Commission and the project number, directions to the areas of the project which are available for public recreation use, permissible times and activities, and other regulations regarding such use, and advising that further information may be obtained at local offices of the licensee in the vicinity of the project. In addition, the licensee shall post at such locations conspicuous notice that the recreation facilities are open to all members of the public without discrimination.

2. A new §8.3 is added, as follows:

§8.3 Discrimination prohibited.

Every licensee maintaining recreation facilities for the use of the public at a licensed project, or employing or permitting any other person to maintain such facilities, shall permit, or require such other person to permit, equal and unobstructed use of such facilities to all members of the public without regard to race, color, religious creed or national origin.

(Secs. 10(a), 309; 41 Stat. 1068, 49 Stat. 858; 16 U.S.C. 803, 825h)

(B) The caption of this proceeding is amended to read as set out above. These amendments shall be effective May 22, 1967.

(C) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## PHILLIPS PETROLEUM COMPANY, DOCKET NO. CI67-1226 AND MARATHON OIL COMPANY, DOCKET NO. CI67-1227

### ORDER AUTHORIZING EXPORTATION OF LIQUEFIED NATURAL GAS AND DISMISSING APPLICATION FOR PERMIT

(Issued April 19, 1967)

On March 8, 1967, Phillips Petroleum Company and Marathon Oil Company (Applicants) filed in Docket No. CI67-1226 an application pursuant to Section 3 of the Natural Gas Act for authorization to export liquefied natural gas from the United States to Japan, all as more fully set forth in the application.

Applicants propose to export liquefied natural gas from Alaska for sale and delivery in Yokohama, Japan to The Tokyo Electric Power Company, Inc., and The Tokyo Gas Company Limited. Applicants agree to sell and buyers agree to purchase the following annual Btu's of liquefied natural gas during a fifteen-year period ending May 31, 1984:

March 1, 1969, to May 31, 1970: 35,295,000,000,000 Btu's.

June 1, 1970, to May 31, 1971, and each of the subsequent thirteen years: 50,570,000,000,000 Btu's.

The agreement contains an option for a five-year renewal.

The application states that the gas will be sold at a rate of 52.0 cents per million Btu's delivered.

Applicants will construct facilities in the Cook Inlet Basin area, Alaska, for the liquefaction of natural gas, the storage of liquefied natural gas, and the loading of such onto ships for export and delivery to Japan to the aforementioned buyers.

Concurrently with the subject application, Applicants filed in Docket No. CI67-1227 an application pursuant to Executive Order No. 10485 for a permit authorizing the construction, operation and maintenance of facilities at the border of the United States in the State of Alaska for the exportation of natural gas. Said Order designates and empowers the Commission to issue such a permit upon finding that the issuance would be consistent with the public interest and after obtaining the favorable recommendations of the Secretary of State and the Secretary of Defense. During the course of processing this application a question was raised by the Department of State as to whether the facilities in question are of the type contemplated by the Executive Order, though both the Secretary of State and the Secretary of Defense agreed that authorization of the proposed export was consistent with the public interest of the United States. Consequently, the Commission presented the issue to the Office of the Legal Counsel of the Department of Justice which, upon consideration of the documents pertaining to the application, has concurred in the conclusion of the Department of State that the Executive Order does not apply, because there will not be facilities at the border involving any physical connection between this country and a foreign country. In view of these conclusions by the relevant agencies of the Executive Branch of the Government (with which, we are informed, the Department of Defense does not take issue), and in the absence of any basis for our independently reaching a contrary position, we shall dismiss, the permit application in Docket No. CI67-1227. We shall, however, in future cases of this nature continue to secure the views of the Departments of State and Defense before taking action under Section 3 of the Natural Gas Act.

After due notice, no petitions to intervene, notices of intervention or protests to the granting of the application in Docket No. CI67-1226 have been received.

*The Commission finds:*

(1) The exportation of liquefied natural gas by Applicants, Phillips Petroleum Company and Marathon Oil Company, from the United States to Japan, as hereinabove described and as set forth in the application in Docket No. CI67-1226, will not be inconsistent with the public interest within the meaning of Section 3 of the Natural Gas Act, provided that said exportation be on the terms and conditions hereinafter set forth:

(a) Applicants shall file statements or reports with the Commission from time to time under oath and in such details as the Commission may require with respect to the whole or any part of the instant export operation.

(b) The authorization granted herein is not transferable or assignable and shall remain in full force and effect only so long as Applicants continue the acts or operations herein authorized in accordance with the terms and conditions herein set forth.

(c) The authorization granted herein shall automatically terminate on May 31, 1984. If the five-year renewal option of the agreement between Applicants and buyers is exercised, Applicants must comply with Section 153.8 of the Regulations under the Natural Gas Act.

(d) Applicants shall not, during the terms of the authorization granted by this order, materially change or alter their export operations without first obtaining the permission and approval of the Commission.

(e) In the event that Applicants should abandon or permanently cease for any reason whatsoever all or any part of the instant export operation prior to the termination date described in (c) hereof, Applicants shall forthwith notify the Commission of said fact and the reason therefor.

(f) The maximum annual Btu's of liquefied natural gas to be exported for sale to The Tokyo Electric Power Company, Inc., and The Tokyo Gas Company Limited should not exceed the following:

March 1, 1969, to May 31, 1970: 35,295,000,000,000 Btu's,

June 1, 1970, to May 31, 1971, and each of the subsequent thirteen years: 50,570,000,000,000 Btu's.

(g) Applicants should comply with the requirements of Section 153.8 of the Commission's Regulations under the Natural Gas Act before initiating the proposed exports to Japan.

(2) Applicants do not propose to construct, operate or maintain any facilities at the border of the United States within the contemplation of and for which a permit is required to be issued pursuant to Executive Order No. 10485.

*The Commission orders:*

(A) Authorization is granted to Applicants to export liquefied natural gas from the United States to Japan, as hereinabove described and as set forth in the application in Docket No. CI67-1226, upon the conditions herein set forth and subject to the provisions of the Natural Gas Act and the Commission's Regulations issued thereunder.

(B) The maximum annual Btu's of liquefied natural gas to be exported for sale to The Tokyo Electric Power Company, Inc., and The Tokyo Gas Company Limited shall not exceed the following:

March 1, 1969, to May 31, 1970: 35,295,000,000,000 Btu's,

June 1, 1970, to May 31, 1971, and each of the subsequent thirteen years: 50,570,000,000,000 Btu's.

(C) Applicants shall comply with the requirements of Section 153.8 of the Commission's Regulations under the Natural Gas Act before initiating the proposed exports to Japan and for any other contractual changes including the exercise of the option for renewal.

(D) The application for a permit filed in Docket No. CI67-1227 is dismissed.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

## CHRISTIE, MITCHELL & MITCHELL COMPANY, ET AL., DOCKET NOS. G-20001, RI61-123, RI63-23, RI63-398 AND RI63-440; GEORGE MITCHELL & ASSOCIATES, INC., AGENT FOR B. V. CHRISTIE, ET AL., DOCKET NO. RI64-251

### ORDER GRANTING MOTION FOR RELEASE OF ADDITIONAL ESCROWED FUNDS

(Issued April 20, 1967)

By order issued July 19, 1966, 36 FPC 130, in the above-entitled proceedings, the Commission authorized the release of amounts attributable to the interest of Mitchell & Mitchell Gas & Oil Corporation (Mitchell) previously deposited in escrow agreements with The Chase Manhattan Bank of New York City. In lieu of retaining such amounts in escrow, Mitchell was permitted to collect the increased rates involved here, subject to refund, under an agreement and undertaking and a surety bond in the amount of $48,213.39, the total amount reported by Mitchell to have been collected in the escrow agreements in excess of the last firm rate approved by the Commission or in excess of the applicable increased rate ceiling.[1]

Mitchell by letter filed on March 20, 1967, states that the previously reported amounts attributable to its interest in the escrow agreements in Docket Nos.

---

[1] The July 19, 1966 order authorized the release of $91,549.47, the total reported amount applicable to Mitchell's interest then deposited under escrow agreements.

G-20001, RI61-123, and RI63-23 were understated by $22,586.28. Mitchell also advises that $19,226.93 of such amount relates to rates collected above the last firm rate or the applicable increased rate ceiling. Mitchell seeks release of the additional amount from the escrow agreements and inquires as to whether it should increase the amount of its surety bond.

Mitchell's request is consistent with the general import of our July 19, 1966 order. We shall therefore allow the release of these additional amounts, but shall also require an increase in the amount of its surety bond as hereinafter ordered.

*The Commission orders:*

(A) Upon notification by the Secretary of the Commission that Mitchell has complied with the provisions of paragraph (B) hereof, The Chase Manhattan Bank of New York as trustee under the escrow agreements in the above-entitled proceedings shall release forthwith to Mitchell the additional $22,586.28 attributable to Mitchell's interest in these proceedings which have been deposited with it. Except as specifically provided herein, these escrow agreements shall remain in full force and effect.

(B) Within 30 days of the date of issuance of this order, Mitchell shall increase its present surety bond in the above-entitled proceedings in the amount of $19,226.93, and shall file a copy of such increased bond with the Commission.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## SOUTHERN NATURAL GAS COMPANY, DOCKET NO. CP67-168

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 20, 1967)

On December 14, 1966, Southern Natural Gas Company (Applicant) filed in Docket No. CP67-168, as supplemented on February 9 and March 2, 1967, an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities for the transportation of natural gas in interstate commerce, all as more fully set forth in the application, as supplemented, in this proceeding.

Specifically, Applicant requests authorization for the following proposals:

(1) The increase in the design daily delivery capacity of Applicant's mainline system by approximately 137,000 Mcf from 1,732,000 Mcf to 1,869,000 Mcf to meet the peak day requirements of Applicant's present customers through the winter of 1969-1970;

(2) The increase in the design daily delivery capacity of the portion of Applicant's system between Macon, Georgia and Aiken, South Carolina by approximately 150,000 Mcf to meet the increasing requirements of present customers served from this portion of the system;

(3) Reinforcement of the existing Savannah, Gadsden, Vicksburg, and Cordova branch lines to meet the increasing requirements of present customers and for safety and security of operation, and

(4) To provide for the transportation through Applicant's South Louisiana supply system of increased volumes of gas from presently connected sources.

Applicant proposes to construct and operate the following facilities in order to accomplish the above four projects, respectively:

(1) 139.5 miles of 26-inch loop pipelines in the States of Mississippi, Alabama, and Georgia, 10 miles of 16-inch and 35.4 miles of 14-inch pipelines in the State of Georgia, and multiple line crossings of the Chickasawhay, Cahaba, and Tallapoosa Rivers;

(2) 35.4 miles of 20-inch and 44.1 miles of 16-inch loop pipelines in the States of Georgia and South Carolina, a multiple line crossing of the Savannah River, and 3,400 horsepower of additional compression at Applicant's Hall Gate Compressor Station;

(3) 27.3 miles of 14-inch loop pipelines for the Savannah, Georgia branch lines; 2.3 miles of 12¾-inch and 1.7 mile of 6⅝-inch loop pipelines for the Gadsden, Alabama branch lines; 2.9 miles of 8⅝-inch loop pipelines for the Vicksburg, Mississippi branch lines, and 5.4 miles of 6⅝-inch loop pipelines and a crossing of the Warrior River for the Cordova, Alabama branch line, and,

(4) 50.2 miles of 26-inch loop pipelines and 31.8 miles of 24-inch loop pipelines in the States of Louisiana and Mississippi, together with 1,350 horsepower, 825 horsepower and 2,750 horsepower of additional compression at the existing compressor stations White Castle, Olga and Lacombe, respectively.

The total estimated cost of the proposed facilities is $42,130,810, which cost will be financed initially by bank loans which will be repaid from the proceeds of the sale of First Mortgage Bonds and from funds on hand.

On March 2, 1967, Applicant filed a statement in this proceeding commenting on the Commission staff's inquiry as to whether future certificates issued to Applicant should impose volumetric limitations on the quantities of gas which Applicant may sell to its customers. Applicant's remarks regarding "open-end" certificates and the responses thereto show that it is desirable to provide by a separate, subsequent order for a formal hearing concerning this issue.

Several petitions to intervene have been filed in this proceeding; however, none of said petitions objects to the disposition of this proceeding by the statutory hearing procedure.

After due notice, no other petition to intervene, notice of intervention or protest to the granting of the application, as supplemented, has been filed.

At a hearing held on April 20, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplements and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Southern Natural Gas Company, a Delaware corporation having its principal place of business in Birmingham, Alabama, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of October 6, 1942, in Docket No. G–296 (3 FPC 822).

(2) The facilities hereinbefore described, as more fully described in the application, as supplemented, in this proceeding, are to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

**(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.**

**(4) The proposed construction and operation of the subject facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.**

**(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(2), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.**

***The Commission orders:***

**(A) A certificate of public convenience and necessity is issued authorizing Applicant, Southern Natural Gas Company, to construct and operate the proposed facilities for the transportation of natural gas as hereinbefore described, all as more fully described in the application, as supplemented, in this proceeding, upon the terms and conditions of this order.**

**(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(2), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.**

**(C) The facilities authorized shall be constructed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within one year from the date on which this order issues.**

**(D) The certificate granted by paragraph (A) above is without prejudice to the final outcome of the formal hearing, to be scheduled by a subsequent order, regarding the issue of whether this and subsequent certificates granted to Applicant should be conditioned to impose limitations on the quantities of gas which Applicant may sell to its customers.**

## NEW ENGLAND POWER COMPANY, PROJECT NO. 1904

### ORDER AUTHORIZING EASEMENT ACROSS PROJECT LANDS

**(Issued April 21, 1967)**

**By our order issued November 30, 1966, 36 FPC 913, we authorized the sale of a ten-acre tract of land within the project boundary of New England Power Company's Project No. 1904 to the Town of Brattleboro, Vermont. The subject parcel was to be transferred thereafter to the A.P.W. Products Company, Inc., for use by the latter for expansion of its paper mill operations. The tract is situated close to the western shore of the Connecticut River in the Town of Brattleboro, along a stretch of the river which serves as the pond or reservoir of Project No. 1904. Our approval of the conveyance was made subject to the retention in any such conveyance of flowage rights necessary in the construction, operation and maintenance of Project No. 1904 and a covenant ensuring**

that the use of such land will not endanger health, create a nuisance, or otherwise be incompatible with overall project recreational use in accordance with paragraph (C) of the Commission's Order No. 313, issued December 27, 1965, 34 FPC 1546 (18 CFR 2.7(C)). By subsequent order issued January 6, 1967, 37 FPC 67, we modified our aforementioned November 30, 1966 order to include therein a finding that "The aforementioned parcel of Project No. 1904 land herein involved does not have recreational value."

We are now informed by N.E.P.C. in a filing received April 14, 1967, that: (1) Consolidated Cellulose Products, Inc., a New York corporation, has agreed to acquire from A.P.W. Products Company, Inc., among other property, the parcel of Project No. 1904 land which was the subject of our November 30, 1966 order; (2) in connection with such acquisition it will become necessary to obtain from N.E.P.C. an easement of right-of-way across Project No. 1904 lands lying between the subject parcel and the project pond in the Connecticut River, by means of the construction thereon of facilities to draw from and to return to the latter pond, water for use in connection with the paper mill plant to be constructed by Consolidated Cellulose Products, Inc.; and (3) we are requested to authorize the granting of the easement.

According to a draft of the instrument covering the conveyance of the parcel of Project No. 1904 land and the aforementioned easement across other of the project lands, not more than eight cfs of water or a total of 5,100,000 gallons of water per day will be taken from the river for paper mill purposes and the quality of the water to be returned to the river (water taken minus water evaporated or absorbed during its use in the mill) will at all times conform to the standards and rules and regulations of all Federal, State and local governmental authorities having jurisdiction thereof.

*The Commission finds:*

It is necessary and appropriate for the purposes of the Federal Power Act to authorize the granting of the easement of right-of-way over lands within the boundary of Project No. 1904 for the purposes recited above upon the terms and conditions as hereinafter provided.

*The Commission orders:*

(A) New England Power Company is hereby authorized to grant the aforementioned easement to the Town of Brattleboro, Vermont, subject to the retention in any instrument granting such easement of flowage rights necessary in the construction, operation and maintenance of Project No. 1904, and to a further condition that New England Power Company incorporate in any such easement a covenant ensuring that the grantee, his successors and assignees will at all times conform to the standards and rules and regulations of all Federal, State and local governmental authorities having jurisdiction over water quality, and a convenant ensuring that the use of such land will not endanger health, create a nuisance, or otherwise be incompatible with overall project recreational use in accordance with paragraph (C) of the Commission's Order No. 313, issued December 27, 1965 (18 CFR 2.7(C)).

(B) The licensee shall file copies of any instrument granting the easement, with the Commission within 30 days of its execution. Within 60 days from the date of completion of construction of the facilities required to withdraw water from and return it to the river, the licensee shall file a drawing to the same scale as Exhibit K, showing the location of such easement or easements.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

## MULTIPLE COPIES OF APPLICATIONS REQUIRED TO BE FILED BY PUBLIC UTILITIES, DOCKET NO. R-320

## ORDER NO. 342

### AMENDING §§ 32.4, 32.37 AND 32.50 OF REGULATIONS UNDER THE FEDERAL POWER ACT SO AS TO REDUCE THE NUMBER OF COPIES REQUIRED TO BE FILED THEREBY

(Issued April 21, 1967)*

A recent survey within the Commission of the use to which copies of applications and other filings are put has disclosed that in several instances more copies are required to be filed than are actually needed. Accordingly, we are reducing the number of copies which will hereafter be required with respect to the following classes of applications:

Application under section 202(b) to establish physical connections.

Application for emergency connections of facilities.

Application to export electric energy.

Application for Presidential permit to maintain facilities at the international boundary.

*The Commission finds:*

(1) Since the amendments herein ordered reduces the number of copies of applications and other documents required to be filed with the Commission for its own use, it is unnecessary to comply with the notice and effective date provisions of section 4 of the Administrative Procedure Act.

(2) These amendments to the Commission regulations under the Federal Power Act are necessary and appropriate to the administration of that Act.

*The Commission*, acting pursuant to sections 308 and 309 of the Federal Power Act, as amended (49 Stat. 858; 16 U.S.C. 825g, 825h), *orders:*

(A) Effective upon the issuance of this order, Part 32, Subchapter B, Chapter I of Title 18 of the Code of Federal Regulations is amended as follows:

1. Section 32.4 is revised to read as follows:

§ 32.4 Form and style; number of copies.

An original and six conformed copies of an application under §§ 32.1 to 32.4 must be filed and must conform, in all other respects, to the requirements of §§ 1.15 through 1.17 of this chapter.

2. In § 32.22, the heading is revised to read as follows:

§ 32.22 Application for permanent connection for emergency use; contents; form and style; number of copies.

3. Since § 32.24, by virtue of the provisions of § 32.22 as revised in item 2, above, is repetitious, it is revoked.

4. Section 32.37 is revised to read as follows:

§ 32.37 Form and style; number of copies.

An original and six conformed copies of an application under §§ 32.30 through 32.37 must be filed and must conform, in all other respects, to the requirements of §§ 1.15 through 1.17 of this chapter.

---

*Published in the Federal Register on April 29, 1967 (32 F.R. 6622).

5. In § 32.50, paragraph (a) is revised to read as follows:

§ 32.50 Who shall apply.

(a) Any person, firm, or corporation contemplating the construction of, or who is operating or maintaining facilities at the borders of the United States, for the transmission of electric energy between the United States and a foreign country, shall file with the Commission an original and 8 conformed copies of an application for a Presidential permit, in compliance with Executive Order No. 10485, dated September 3, 1953 (3 CFR, 1949–1953 Comp., p. 970).

(Secs. 308, 309, 49 Stat. 858; 16 U.S.C. 825g, 825h.)

(B) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## PUGET SOUND POWER & LIGHT COMPANY, PROJECT NO. 2150

### ORDER APPROVING REVISED SUPPLEMENTARY EXHIBIT L DRAWINGS FOR PROJECT AND MODIFYING LICENSE

(Issued April 21, 1967)

On February 20, 1967, Puget Sound Power & Light Company, licensee for Project No. 2150, filed for Commission approval revised supplementary Exhibit L drawings covering the proposed construction of the Lower Baker Development of the project. The latter, known as the Baker River Project, is located on the Baker River, tributary to the Skagit River, in Whatcom and Skagit Counties, Washington, and affects navigable waters and lands of the United States within the Mt. Baker National Forest.

A recent mud slide caused severe damage to the powerhouse. The licensee caused the demolition of the powerhouse to the level of the generator floor, and the generator and other salvageable equipment was dismantled and stored. The slide also destroyed the surge chamber located on the slope above the powerhouse. The licensee proposes to clean out the surge shaft, power tunnel, powerhouse substructure, and outlet tunnel, which were filled with debris.

The revised supplementary Exhibit L drawings show a new powerhouse superstructure planned to be built with a heavy sloping roof especially designed, to shed, and with the aid of hydraulic sluices, to slough off any future slides. The roof and walls of the powerhouse would be anchored to bedrock by stressed anchor bolts, and the roof, side walls and interior support walls are designed to withstand any earth pressures which may be caused by a slide that would bury completely the powerhouse either from above, or from below due to a more fluid mud flow filling the river channel. A new surge chamber would be built on bedrock and connected to an existing surge-shaft located some 100 feet upstream of the demolished surge chamber.

According to cost-of-construction estimates, the total reconstruction costs will be about $3.5 million, including contingency and escalation allowances, engineering and management expenses, and interest during construction. Reconstruction of the powerhouse would place 64,000 kilowatts of capacity back into operation. An alternative plan, involving an underground powerhouse and using the existing power tunnel would be more than $2 million greater than the plan now proposed by the licensee. The licensee's proposed plan is an economical and reasonable method of restoring power generation in the shortest time and yet protect the generating equipment against possible future slides.

The Chief of Engineers has reported that the proposed work will have no effect on navigation of the Skagit River and offered no objection insofar as the interests of navigation are concerned. However, the Corps suggested that the proposed dredging of slide material be coordinated with regard to possible effects on downstream fish and wildlife, as provided for by Article 41 herein.

*The Commission finds:*

The following described revised supplementary Exhibit L drawings conform to the Commission's rules and regulations and should be approved as part of the license for Project No. 2150, and the license supplementary Exhibit L drawings which are described herein as being superseded should be eliminated from the license for the project:

*Exhibit L supplementary*

| Sheet No. | Title | FPC No. | Superseding FPC No. |
|---|---|---|---|
| 1 | General Plan and Profile, Lower Baker River Development | 2150-59 | 2150-22. |
| 4 | Powerhouse Cross Sections, Lower Baker River Development | 2150-60 | 2150-40 and 41. |

*The Commission orders:*

(A) The revised supplementary Exhibit L drawings described in the above finding are hereby approved as part of the license for Project No. 2150, and the license Exhibit L drawings described in the finding as being superseded are hereby eliminated from the license for the project.

(B) The following article is hereby added to the license for the project.

*Article 41.* Licensee in dredging slide material during reconstruction of the Lower Baker powerhouse and subsequent operation of the Lower Baker Development shall in cooperation with appropriate State and Federal agencies take all necessary actions to minimize pollution injurious to fish and wildlife or their habitat and any other types of pollution.

(C) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this order. In acknowledgment of the acceptance of this order, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## SABINE RIVER AUTHORITY OF TEXAS AND SABINE RIVER AUTHORITY OF LOUISIANA, PROJECT NO. 2305

### ORDER APPROVING RECREATIONAL USE PLAN AND MODIFYING LICENSE

(Issued April 21, 1967)

On September 28, 1964, Sabine River Authority of Texas and Sabine River Authority of Louisiana, joint licensees for Project No. 2305, filed, pursuant to license Article 35, a Recreational Use Plan for the project, known as the

Toledo Bend Project, to be located on Sabine River in Newton, Sabine and Shelby Counties, Texas, and Sabine and De Soto Parishes, Louisiana. The September 28, 1964 filing was supplemented by Supplement No. 1 filed August 6, 1965, and by site development drawings for the recreational use areas filed May 19, 1966 and August 4, 1966.

Toledo Bend Reservoir will be the fifth largest man-made reservoir, in terms of surface area, in the Nation and will create an important recreational resource of at least regional significance. Generally speaking, the plan sets out and describes the public use areas and facilities to be provided by the licensees, the types of facilities proposed for concessionaire operation, and recreational developments to be provided by the U.S. Forest Service on lands of the United States within the Sabine National Forest on the Texas side of the Toledo Bend Reservoir.

The Department of the Interior, in commenting on the proposed Plan, recommended special license conditions providing for modification of the plan to include a reservoir zoning plan for the reservation of areas for hunting, fishing and other wildlife purposes and to allow hunting on project lands other than those areas reserved for general recreation, project operation, and public safety. The Department pointed out that, consistent with Commission practice, consideration should be given by the licensees to provide for recreation development adequate to meet anticipated needs beyond the 10-year period of project operation presently covered by the Plan, since the license was issued for a period of 50 years, effective as of October 1, 1963, which might require the acquisition of additional land for recreational development. It is noted that the Department of the Interior indicated that matching Federal funds might be made available from the Land and Water Conservation Fund to assist in the acquisition and development of recreation areas at this project.

The U.S. Forest Service, Department of Agriculture, in commenting on the proposed Plan insofar as it would affect National forest interests, advised that the Service had reached agreement with the licensees concerning the protection of such interests, involving fire protection, recreational resources, reservoir clearing, sale of timber and land lines (surveying).

The State of Louisiana Bureau of Outdoor Recreation, in commenting on the proposed Plan, has advised that insofar as it affects lands within that State, the Plan is in accord with the Louisiana State Comprehensive Outdoor Recreation Plan approved by the Governor of Louisiana, Louisiana State Parks and Recreation Commission, and the Bureau of Outdoor Recreation of the U.S. Department of the Interior. The Texas Parks and Wildlife Department, in commenting on the Plan, has advised that while it appears to the Department that the planning for recreational opportunities on the Toledo Bend Reservoir is adequate, there will be losses to wildlife resources due to the impoundment of the project reservoir.

By letter dated March 15, 1966, the licensees expressed their views respecting the aforementioned comments on the proposed Plan, advising essentially that prior to placing the project in operation, the reservoir will be zoned in cooperation with the State and Federal agencies involved, for hunting and fishing and other purposes affecting wildlife, and that hunting in the area will be permitted as it is under present use, and that the licensees intend to acquire adequate park lands and facilities for recreation during the life of the project as such needs develop.

While we are approving the proposed Recreational Use Plan as submitted by the licensees as part of the license for the project, we are herein providing for the submittal of additional filings to supplement the Plan in the following respects: a revised recreational use plan with respect to planned recreational development and use at the project to provide for public recreational needs for that period of the license following the first 10 years of project operation; reports at stated periods on the licensees' progress in acquiring project lands needed for public recreational purposes as contemplated in the present Recreational Use Plan; functional site plans showing project site developments for recreation by both the licensees and the U.S. Forest Service; and a reservoir zoning plan for recreational uses of project lands and waters, such as hunting, fishing and other wildlife recreational pursuits, and a requirement that certain recreational facilities be constructed and made available for public use by the time the water surface of the project reservoir reaches a specified elevation.

*The Commission finds:*

The following designated and described filings of the Recreational Use Plan for Project No. 2305 conform to the Commission's regulations and should be approved as part of the license for the project:

Plan entitled "Toledo Bend Dam and Reservoir, Sabine River of Texas and Louisiana, Report on Master Plan for Reservoir Recreation Resource Development", dated September 1964, and filed September 28, 1964;

"Supplement No. 1" dated June 1965, and filed August 6, 1965; and

Reproducible site development drawings for the Texas and Louisiana recreational use areas (FPC Nos. 2305–37 through –59), filed May 19, 1966, and August 4, 1966, respectively.

*The Commission orders:*

(A) The Recreational Use Plan filings designated and described in the above finding are hereby approved as part of the license for Project No. 2305.

(B) The license for Project No. 2305 is hereby modified to include therein the following additional articles:

*Article 48.* The Licensees shall with respect to future planning of recreational development and use at the project, file within five years following the date of issuance of this order, for Commission approval, a revised recreational use plan in conformance with the then applicable requirements of the Commission's Regulations under the Federal Power Act, providing for public recreational needs for that period of the license following the first ten years of project operation. Simultaneously therewith Licensees shall advise the Commission of their plans for financing the construction, operation, maintenance and replacement of all recreation facilities needed for optimum development and use of recreational resources of the project during the entire period of the license. The revised recreation use plan as required herein shall include licensee's proposals for land acquisition of all additional land needed for recreational purposes.

*Article 49.* The Licensees shall file with the Commission within 12 months of the date of issuance of this order, and at 12-month intervals thereafter, reports on their progress for acquisition of project lands required for project recreation purposes covered by Licensee's Recreational Use Plan as approved herein; such reports to be filed until all land acquisitions are completed.

*Article 50.* The Licensees shall file for Commission approval the following plans, prepared in accordance with Section 4.42 of the Regulations under the Federal Power Act, pertaining to recreational development of project lands and waters:

(a) within six months following the date of issuance of this order a drawing illustrating the plan of development for the tailrace area to accommodate fishermen and other recreation users, and

(b) prior to construction, drawings illustrating any substantial changes in design of the functional type site plans for the licensees' recreational development sites which would materially alter the type, quality, or quantity of recreation service or opportunity provided.

*Article 51.* The Licensees shall file for information of the Commission, following preparation by the Forest Service, functional plans for the development of recreational use sites on Federally-owned lands within the Sabine National Forest serving project-created recreational opportunities.

*Article 52.* The Licensees shall construct and have available for public use, by the time the water surface reaches full pool in the process of initial Toledo Bend Reservoir filling, recreation facilities at the tailrace area, and at all other recreational use sites and facilities scheduled for development for use during the first year of project operation as specified in the Recreational Use Plan.

*Article 53.* The Licensees shall, not later than June 1, 1969, file for Commission approval as part of the Recreational Use Plan, a reservoir zoning plan which shall be prepared in cooperation with appropriate Federal agencies and with the Texas Park and Wildlife Department, the Louisiana State Parks and Recreation Commission, and the Louisiana Wildlife and Fisheries Commission. This plan shall include the reservation of project lands and waters for hunting, fishing, and other wildlife purposes after first considering areas reserved for general recreation, efficient operation of the project, and public safety.

*Article 54.* The Licensees shall, within one year following the date of issuance of this order, advise the Commission of their plans for financing the development, operation, maintenance and replacement of recreation facilities at the project for the first ten years of project operation.

(C) The Commission reserves the right to require such additional information as it may deem necessary.

(D) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this order. In acknowledgment of the acceptance of this order, it shall be signed for the licensees and returned to the Commission within 60 days from the date of issuance of this order.

---

## EL PASO NATURAL GAS COMPANY, DOCKET NO. CP61-265 AND TRANSWESTERN PIPELINE COMPANY, DOCKET NO. CP61-299

### ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY AND ACCEPTING TARIFF SHEETS FOR FILING

(Issued April 24, 1967)

On February 28, 1967, El Paso Natural Gas Company (El Paso) filed in Docket No. CP61-265 a petition, as supplemented on March 31, 1967, to amend the order of the Commission issued in said docket on January 11, 1965, 33 FPC 36, and amended on February 21, 1966, 35 FPC 234, which order, as amended, authorized El Paso to construct and operate certain natural gas facilities and to deliver natural gas to Transwestern Pipeline Company (Transwestern) on an exchange basis, pursuant to an exchange agreement between the parties dated February 1, 1961, and amended on February 21, 1966,[1] all as more fully set forth in the petition to amend.

Specifically, El Paso requests that the order issued in Docket No. CP61-265, as amended, be amended further so as to authorize the delivery to Transwestern, under the terms of the aforementioned exchange agreement between the parties, of natural gas produced from the Buzzard No. 1-75 well, Ochiltree County, Texas, and the construction of natural gas facilities necessary to implement said delivery.

On March 8, 1967, Transwestern filed its companion petition in the instant proceeding requesting that the aforementioned order issued in Docket No. CP61-299, as amended, be amended further so as to authorize the construction and operation of a tap and valve to interconnect its existing gathering system with El Paso's proposed facilities; the receipt from El Paso, on an exchange basis, of gas produced from the Buzzard No. 1-75 well; and the operation of the facilities proposed to be constructed by El Paso for connection of said well; all as more fully set forth in the petition to amend.

El Paso proposes to construct approximately 0.8 miles of 4½-inch O.D. pipeline and necessary appurtenances extending from the Buzzard No. 1-75 well to a point of connection with Transwestern's existing gathering facilities together with a high pressure well tie and dehydration, measuring and regulating facilities, all in Ochiltree County, Texas.

Volumes of natural gas produced from the Buzzard No. 1-75 well will be purchased from the Sunset International Petroleum Corporation (Sunset). Sunset received authorization to sell natural gas to El Paso by order of the Commission issued in Docket No. CI61-356. On January 31, 1967, Sunset filed a petition to amend said order requesting authorization to add the Buzzard lease. Authorization to add said lease will be granted by the Commission by order issued in Docket No. CI61-356 concurrently with that issued in the instant proceeding.

The subject exchange of natural gas will be made pursuant to El Paso's FPC Rate Schedule X-12 and Transwestern's FPC Rate Schedule X-1. Under the terms of the exchange agreement between the parties, natural gas available to either company is delivered to the other if its facilities are closer to the source. Any imbalances in delivery volumes are accounted for by balancing at either of two points of interconnection in Beaver County, Oklahoma.

On March 20, 1967, El Paso filed an amended Exhibit A to its Rate Schedule X-12 to include the subject Buzzard No. 1-75 well and on March 23, 1967, Transwestern made a similar filing amending its Rate Schedule X-1.

The total estimated cost of El Paso's proposed construction is $18,400, which cost will be financed from cash on hand. The total estimated cost of Transwestern's proposed construction is $1,280, which cost will also be financed from cash on hand.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act, and the public convenience and necessity require that the Commission's order issued in Docket Nos. CP61-265 and CP61-299 on January 11, 1965, and amended on February 21, 1966, be amended further as hereinafter ordered and conditioned.

---

[1] By order issued on January 11, 1965, in Docket No. CP61-299, as amended by order issued on February 21, 1966, companion authorization was issued to Transwestern authorizing it to construct and operate certain natural gas facilities and to deliver natural gas to El Paso on an exchange basis, under said exchange agreement.

*The Commission orders:*

(A) The Commission's order issued in Docket Nos. CP61-265 and CP61-290 on January 11, 1965, and amended on February 21, 1966, is amended further so as (1) to authorize El Paso to deliver to Transwestern natural gas produced from the Buzzard No. 1-75 well, Ochiltree County, Texas, and to construct natural gas facilities necessary to implement said delivery; (2) to authorize Transwestern to construct and operate a tap and valve to interconnect its existing gathering system with El Paso's proposed facilities; (3) to receive from El Paso, on an exchange basis, natural gas produced from the Buzzard No. 1-75 well; and (4) to operate the facilities proposed to be constructed by El Paso for connection of said well; all as hereinbefore set forth and as more fully set forth in the respective petitions to amend.

(B) The authorization granted by paragraph (A) above is conditioned upon Petitioners' compliance with all applicable Commission Regulations and particularly the general terms and conditions set forth in paragraphs (c)(1). (c)(3), (c)(4), (f) and (g) of Section 157.20 of said Regulations.

(C) The facilities hereby authorized shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, by August 1, 1967.

(D) In all other respects said order, as amended, shall remain in full force and effect.

(E) The amendments filed by El Paso and Transwestern to their respective Rate Schedules X-12 and X-1 are accepted effective as of the dates of initial delivery of gas from Sunset's Buzzard No. 1-75 well and El Paso and Transwestern shall inform the Commission of the date on which said delivery begins.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## MICHIGAN WISCONSIN PIPE LINE COMPANY, DOCKET NO. CP67-210

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 24, 1967)

On January 25, 1967, Michigan Wisconsin Pipe Line Company (Applicant), filed in Docket No. CP67-210 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities, all as more fully set forth in the application.

Applicant seeks authorization for the construction and operation of:

(a) 92.7 miles of 30-inch mainline loop between North Tepetate, Louisiana and Defiance, Ohio and 2,000 horsepower of compression at the existing Shelbyville, Indiana station.

(b) 55.1 miles of 24-inch loop line and a new 9,000 horsepower compressor station between Defiance, Ohio and Bridgman, Michigan to increase capacity between its mainline and its storage complex in west central Michigan.

(c) 38.5 miles of 30-inch loop line between Bridgman and the Michigan storage area.

(d) 34.7 miles of 20-inch to 26-inch loop line and 1,100 horsepower of compression on its South Louisiana gathering system.

(e) 4.7 miles of 30-inch line to loop the South Louisiana mainline crossing of Ford Lake near Detroit, Michigan.

(f) 4.2 miles of 10-inch loop on its Two Rivers, Wisconsin lateral.

(g) 30.3 miles of 30-inch mainline loop in Illinois and Wisconsin and 2,000 and 2,750 horsepower of compression, respectively in its Janesville and Germantown compressor stations in Wisconsin.[1]

Applicant proposes to increase peak day delivery capacity by 168,000 Mcf per day to a total of 2,600,660 Mcf per day and to increase sales for resale by 107,988 Mcf per day. The remaining 80,812 Mcf per day of unallocated capacity (60,012 Mcf in this application and 20,800 Mcf remaining from previous authorizations) will be used to supply pending and future requests for service under Section 7(a) and increasing demands of existing customers.

The proposed facilities will enable Applicant to transport and sell an additional 107,988 Mcf per day to 32 of its existing resale customers, each of which has executed a service agreement requesting the increased deliveries to be effective September 1, 1967. Present and proposed maximum daily quantities are shown by customer on attached Appendix A.

The total estimated cost of the proposed facilities is $35,923,000 which amount will be financed with funds on hand and interim short term bank loans.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed. Petitions for leave to intervene filed by North Central Public Service Co. on March 1, 1967, Wisconsin Fuel and Light Company on February 13, 1967, and Wisconsin Public Service Corporation on February 9, 1967, state the respective petitioners have no objection to the disposition of the proceedings under the shortened procedure provided by the Commission's rules and regulations.

At a hearing held on April 20, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Michigan Wisconsin Pipe Line Company, a Delaware corporation having its principal place of business in Detroit, Michigan, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of November 30, 1946, in Docket No. G-669 (5 FPC 953).

(2) The proposed construction and operation of facilities and sale and delivery of natural gas, as hereinbefore described and as more fully described in the application in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities and sale and delivery of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

---

[1] M-W states that if it receives timely approval of its application pending at Docket No. CP66-109, it will not construct facilities proposed in item (g).

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to Applicant authorizing the construction and operation of facilities and the sale and delivery of natural gas as hereinbefore described and as more fully described in the application in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 12 months of the date on which this order issues.

(D) Applicant shall file with the Commission revised service agreements covering the new authorized volumes set forth in Appendix A hereto.

(E) This certificate authorization is conditioned upon Applicant obtaining permission from the Commission before beginning actual construction of facilities related to the company's application in Docket No. CP66-109, *i.e.,* 30.3 miles of 30-inch loop line in Illinois and Wisconsin and 4,750 horsepower of compression in Wisconsin.

## APPENDIX A

## PANHANDLE EASTERN PIPE LINE COMPANY, DOCKET NO. CP66-50

### ORDER TO PRODUCE

(Issued April 24, 1967)

Pursuant to Opinion Nos. 510 and 510-A, issued December 23, 1966, 36 FPC 1107, and February 14, 1967, 37 FPC 314, respectively, the Commission remanded this matter to the Presiding Examiner for further hearings. Certain data was requested by Staff and the City of Fulton (Fulton) from Panhandle Eastern Pipe Line Company (Panhandle) which was refused. The Examiner ruled that Panhandle did not have to supply the data, and from this ruling Fulton has appealed. The requests will be considered one by one.

*Estimates of annual and peak-day requirements for the next three years of the Harbison-Walker Company (Harbison-Walker).*

The relevance of this data is that the Commission must determine (among other things) whether the capacity of the existing and proposed facilities will be sufficient to take care of the requirements of the customers on the line, of which Harbison-Walker is one. It may also be relevant in determining how costs should be apportioned if the facilities are improved or new facilities are installed.

Fulton further urges that Section 157.14(a)(11) of the Commission's Regulations requires that the data be submitted.

As against this Panhandle argues that it has not withheld any data in its possession, that currently available data as to Harbison-Walker's estimates has been provided, and that Panhandle has no three-year future estimates from Harbison-Walker. Panhandle argues that the current usage by Harbison-Walker is the best evidence of that customer's requirements. Panhandle further argues that Fulton did not request three-year future estimates for Harbison-Walker.

Whether or not *Fulton* requested three-year future estimates, the Staff did (see Tr. 1257). Fulton's appeal is from the Examiner's ruling on this request by Staff. The contract between Panhandle and Harbison-Walker provides for Harbison-Walker's furnishing of estimates of their expected use. Counsel for Panhandle stated (Tr. 1258): "I might explain that as a practical matter Harbison-Walker has never done this. As far as I am aware they are not equipped to make this type of study. I think the reason for the provision in the contract is normally Panhandle estimates industrial usage for each customer and they do this primarily on the basis of historical use which you have now from the first two items we have distributed. The provision in the contract provides for the company to make or the industry to make this estimate in case they have new facilities or something of that sort that Panhandle is not familiar with. In that instance, we are entitled to call on the company to make that estimate, but historically they never have made that estimate and historically Panhandle has never requested such an estimate from them."

As the requested data is clearly relevant, we think that Panhandle should produce it to the extent Panhandle already has it or has the right to obtain it.

*Data as to the original cost and accumulated depreciation of the Fulton and Crawfordsville laterals and costs of operation and maintenance of each.*

Fulton states:

> The City seeks to obtain the original cost and accumulated depreciation records with respect to the existing Fulton lateral for use in conjunction with its feasibility analyses of the various proposals for new lateral facilities. If the existing lateral has been completely paid for by the existing customers, this could bear on the available revenues for any new facilities to serve the customers on the lateral. This certainly is within the scope of the issues for which the Commission requested further evidence in the remanded proceeding.
>
> Furthermore, the requested evidence on operation and maintenance costs on the Fulton lateral is relevant to a determination whether Panhandle is discriminating against the City in its lateral line policy. In its present expansion application, Docket No. CP67-170, Panhandle proposes to abandon a six-inch 15.3-mile line on its Crawfordsville lateral (built around the same time as the Fulton lateral) because of high operation and maintenance costs. The City seeks the operation and maintenance costs in both instances to determine if Panhandle is in fact discriminating among its present customers as to lateral line policy. (Appeal, p. 4)

Panhandle argues that these items are not relevant. It states that it has already provided estimates of the operation and maintenance costs for the Fulton lateral, and that it knows of no records which reflect historical data for the Fulton lateral alone.

Panhandle also states that Fulton is in error in asserting that Panhandle is replacing the Crawfordsville lateral because of high operation and maintenance costs.

We think the records and other data requested with respect to the Fulton lateral may be relevant for the reasons stated by Fulton. The data requested as to the Crawfordsville lateral may also be relevant to the question of discrimination among customers in lateral line policy. A final determination as to the relevance of given material cannot be made until the material itself is disclosed. Panhandle should be required to produce any of the requested material as is available.

*Evidence as to the third-year requirements of customers on other laterals for which Panhandle proposes looping facilities.*

Panhandle's only objection is that the material is already in Fulton's hands since it is contained in the application in Docket No. CP66-170. The material is clearly relevant since it relates to possible discrimination in Panhandle's lateral line policies between customers on different laterals. The Examiner's ruling (Tr. 1308) was on the ground that "I think this is going to take us too far afield in this hearing." Opinion No. 510 indicated that discrimination in lateral line policy was a matter to be explored in this proceeding. Panhandle will be ordered to supply any data it has on this subject which is not already in Fulton's possession.

*All correspondence, memoranda, and the like between Panhandle and H. K. Porter Company, Inc. (Porter) relating to service to Porter's Fulton plant and to the contract between Panhandle and Porter.*

This request is opposed by both Panhandle and Porter. It does not appear the data requested would be relevant to the issues here, and the request is denied.

*The original records with respect to the description and location of pipe valves and fittings in the Fulton lateral.*

The relevance of the general information does not appear to be questioned. Panhandle has furnished certain data to Fulton, but what Fulton asks here are the original records. Panhandle seems to say that, in respect to much of this, there are no original records. To the extent such records do exist, Fulton should be allowed to inspect them.

*The Commission orders:*

(A) Panhandle Eastern Pipe Line Company shall produce all records, memoranda, or other data, including work papers and sources, which it has in its possession or subject to its control or which it can obtain by reason of contract or other means not equally available to Staff and the City of Fulton, from others in relation to the following:

(a) Estimates of annual and peak day gas requirements for the next three years of the Harbison-Walker Company from the Fulton lateral.

(b) The original cost, accumulated depreciation, costs of operation and costs of maintenance of the Fulton lateral and the Crawfordsville lateral.

(c) The third-year gas requirements of customers on other laterals for which Panhandle Eastern Pipe Line Company proposes looping facilities.

(d) Description and location of pipes, valves and fittings in the Fulton lateral.

(B) The request of the City of Fulton for the production of correspondence, memoranda and the like between Panhandle Eastern Pipe Line Company and H. K. Porter Company, Inc. is denied.

(C) The dates for the production of data, submission of evidence, hearing, and all other necessary proceedings shall be fixed by the Presiding Examiner.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr

## UNITED GAS PIPE LINE COMPANY, DOCKET NO. CP67-239

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 24, 1967)

On February 24, 1967, United Gas Pipe Line Company (Applicant) filed in Docket No. CP67-239 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities and the sale of quantities of natural gas for resale, all as more fully set forth in the application.

Applicant seeks authorization to construct and operate approximately 40 feet of 2⅜-inch line, positive meter and regulator station and appurtenant facilities near milepost 27.3 on Applicant's 20-inch Carthage Compressor Station to Longview Compressor Station line, located in Gregg County, Texas. The purpose of the proposed construction is to supply natural gas to the City of Easton, Gregg County, Texas, for resale and distribution. Applicant estimates the third-year sales to the City of Easton at approximately 450 Mcf daily and 27,650 Mcf annually.

Applicant estimates the cost of the proposed construction at approximately $5,825, to be defrayed out of current working funds.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on April 20, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, United Gas Pipe Line Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 10, 1942, in Docket No. G–232 (3 FPC 863).

(2) The proposed construction and operation of facilities and the sale and delivery of natural gas by Applicant to the City of Easton, Texas, as hereinbefore described, and as more fully described in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities and the sale and delivery of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to the Applicant in this proceeding, authorizing the construction and operation of facilities and the sale and delivery of up to 450 Mcf per day of natural gas to the City of Easton, Texas, as described herein and as more fully described in the application and exhibits in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) Applicant and the City of Easton, Texas, shall execute a service agreement in accordance with the Commission's Regulations reflecting the delivery point and volumes and the same shall be filed with the Commission by Applicant.

(D) The facilities authorized shall be constructed and placed in actual operation within one year of the date of this order as required by Section 157.20(b) of the Regulations.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## WEST TEXAS GATHERING COMPANY, DOCKET NO. CP67-120 AND NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP67-225

### FINDINGS AND ORDER AFTER STATUTORY HEARING

### ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 24, 1967)

On November 1, 1966, as supplemented on March 1, 1967, West Texas Gathering Company (Gathering Company) filed in Docket No. CP67-120 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to transport natural gas for the account of Northern Natural Gas Company (Northern) from points of delivery to it by producers, and to deliver such volumes to Northern, all as more fully set forth in the application and supplement thereto.

Gathering Company transports natural gas received by it from certain producers in Winkler County, Texas, for the account of Northern as follows:

| Well operator | Well name | Producer selling to Northern | Percent of production contracted to Northern |
|---|---|---|---|
| J. C. Barnes | Brown-Altman #1 | Tidewater Oil Co | 50.000 |
| Cities Service Oil Co | Cowden S-1 | Phillips Petroleum Co | 12.500 |
| Continental Oil Co | Brown-Altman Unit "38" #1 | Phillips Petroleum Co | 14.897 |
| Phillips Petroleum Co | Ernest #5 | Phillips Petroleum Co | 100.000 |
| Union Oil Co. of California | Cowden #1 | Phillips Petroleum Co | 25.000 |
| Shell Oil Co | McCabe #1, #2 and #3 | Phillips Petroleum Co | 50.000 |

The natural gas so received is transported through Gathering Company's facilities in Winkler County, Texas, and delivered to a measuring station located on Northern's 16-inch main line in the North Half of the Southeast Quarter of Section 15, Block B-5, P.S.L., Winkler County, Texas. The rate charged by Gathering Company for this service is 0.5 cents per Mcf. The transportation of said gas is pursuant to an agreement between Gathering Company and Northern dated January 28, 1959, as amended by letters dated March 9, 1959, April 14, 1959, January 24, 1961 and May 22, 1961, and has been filed with the Commission as Gas Gathering's Rate Schedule T-1.

On February 9, 1967, Northern filed in Docket No. CP67-225 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the exchange of natural gas with Gathering Company and continued operation of facilities, all as more fully set forth in the said application.

Northern requests authority for the continued operation of a side valve used to receive volumes of natural gas transported by and exchanged with Gathering Company in Winkler County, Texas.

The installed cost of the side valve is $1,757.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on April 20, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application supplementing data in Docket Nos. CP67-120 and CP67—225 and exhibits submitted in support of the authorization sought, and upon consideration of the record,

*The Commission finds:*

(1) Northern Natural Gas Company, a Delaware corporation having its principal place of business in Omaha, Nebraska, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G–280 (3 FPC 967).

(2) West Texas Gathering Company, a Texas corporation having its principal place of business in Odessa, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of June 27, 1958, in Docket No. G–14302.

(3) The operation of facilities by Northern and the operation of facilities for the transportation of natural gas in interstate commerce by West Texas Gathering Company as hereinbefore described and as more fully described in the applications, supplement, and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(4) The aforesaid operation of facilities and transportation of natural gas are required by the public convenience and necessity and certificates therefor should be issued as hereinafter ordered and conditioned.

(5) Northern and Gathering Company are able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(6) Public convenience and necessity require that the certificates issued hereinafter and the rights granted thereunder be conditioned upon Northern's and Gathering Company's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of such Regulations.

(7) It is appropriate in the administration of the Natural Gas Act and in the public interest to accept for filing Gathering Company's Rate Schedule T–1, effective on the date of issuance of this order.

*The Commission orders:*

(A) Certificates of public convenience and necessity are issued to Northern and Gathering Company authorizing the continued operation of facilities, by Northern in Docket No. CP67–225 and the continued operation of facilities for the transportation of natural gas in interstate commerce, by Gathering Company in Docket No. CP67–120 as hereinbefore described, all as more fully described in the application and exhibits filed in this proceeding upon the terms and conditions of this order.

(B) The certificates issued by paragraph (A) above and the rights granted thereunder are conditioned upon Northern's and Gathering Company's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) Northern shall file within 30 days of the issuance of this order an appropriate rate schedule covering its deliveries to Gathering Company, in conformance with Commission Regulations.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## CITIES SERVICE GAS COMPANY AND NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP64–89

### ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 25, 1967)

On March 1, 1967, Cities Service Gas Company (Cities Service) and Natural Gas Pipeline Company of America (Natural) filed in Docket No. CP64–89, a joint application to further amend the order of the Commission issued on January 2, 1964, 31 FPC 3, as amended on August 14, 1964, 32 FPC 618, and April 13, 1965, 33 FPC 724, authorizing Cities Service and Natural, among other things, to construct and operate certain facilities described therein, and to exchange up to 40,000 Mcf of natural gas daily for a period terminating May 1, 1967, under the terms of a Gas Exchange Agreement dated September 30, 1963, and amended April 13 and September 24, 1964.

The application to amend filed March 1, 1967 seeks modification of the Commission's said order so as to extend the period during which Cities Service and Natural may exchange natural gas pursuant to the Gas Exchange Agreement dated September 30, 1963, as amended, to May 1, 1970.

The principal purpose for this extension of the gas exchange agreement is to accommodate Cities Service, enabling it to utilize excess capacity in its South of Blackwell System. Due to the steady decline of the availability of gas along Cities Service's South of Blackwell System, Cities Service has sufficient capacity to handle the volumes of gas received from Natural into this portion of its system and by this exchange arrangement will be able to utilize the unused capacity in this system to meet the growing demands of its present customers.

Due notice of the filing of the application to amend and opportunity for hearing thereon has been given by publication in the Federal Register on March 17, 1967 (32 F.R. 4187). No protest or petition to intervene has been filed in this proceeding concerning this amendment.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act, and the public convenience and necessity require that the order of the Commission issued on January 2, 1964, as amended on August 14, 1964, and April 13, 1965, be further amended so as to extend the period during which Cities Service and Natural may exchange natural gas to May 1, 1970.

*The Commission orders:*

(A) The order of the Commission issued on January 2, 1964, as amended on August 14, 1964, and April 13, 1965, is further amended so as to authorize the extension of the period during which Cities Service and Natural may exchange natural gas under their exchange agreement dated September 30, 1963, as amended, to May 1, 1970.

(B) In all other respects said order shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## CORNELL OIL COMPANY, DOCKET NO. CS67-49

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING SMALL PRODUCER CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 25, 1967)

On February 27, 1967, Cornell Oil Company filed in Docket No. CS67-49 an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.40 of the Regulations thereunder for a small producer certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce from the Permian Basin area of Texas and New Mexico, all as more fully set forth in the application.

Applicant is not presently authorized to sell natural gas in interstate commerce from the Permian Basin area subject to the jurisdiction of the Commission; therefore, the certificate issued herein shall be effective on the date of initial delivery.

In accordance with the principles set forth in the order issued February 6, 1967, in *Rodman & Late, et al.*, Docket No. CS66-48, *et al.*, 37 FPC 281, Applicant herein, pending judicial review of Opinion No. 468, 34 FPC 159, will be permitted to file for above ceiling rates. However, before collecting an above ceiling rate, Applicant will be required to file a notice of change in rate and the basic contract, together with any amendments thereto, relating to such sale. Any such notice of change in rate will be subject to suspension pursuant to Section 4(e) of the Natural Gas Act.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been received.

At a hearing held on April 20, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant will be engaged in the sale of natural gas in interstate commerce for resale for ultimate public consumption, subject to the jurisdiction of the Commission, and will, therefore, be a "natural-gas company" within the meaning of the Natural Gas Act upon commencement of service under the authorization hereinafter granted.

(2) The sales of natural gas hereinbefore described, as more fully described in the application herein, will be made in interstate commerce subject to the jurisdiction of the Commission, and such sales by Applicant, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) Applicant will be an independent producer of natural gas who is not affiliated with natural gas pipeline companies and has not made any jurisdictional sales during the preceding calendar year.

(5) The sales of natural gas by Applicant, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary

therefor, are required by the public convenience and necessity, and a small producer certificate of public convenience and necessity therefor should be issued as hereinafter ordered and conditioned.

*The Commission orders:*

(A) A small producer certificate of public convenience and necessity is issued upon the terms and conditions of this order authorizing the sale for resale and delivery of natural gas in interstate commerce by Applicant from the Permian Basin area of Texas and New Mexico, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, all as hereinbefore described and as more fully described in the application in this proceeding.

(B) The certificate granted in paragraph (A) above is not transferable and shall be effective only so long as Applicant continues the acts or operations hereby authorized in accordance with the provisions of the Natural Gas Act and the applicable rules, regulations and orders of the Commission, and particularly,

(a) The subject certificate shall be applicable only to all future "small producer sales," as defined in Section 157.40(a)(3) of the Regulations under the Natural Gas Act, from the Permian Basin area;

(b) Sales shall not be at rates in excess of those set forth in Section 157.40(b)(1) of the Regulations under the Natural Gas Act; however, Applicant may file notices of changes in rate for any contractually authorized rates in excess of the ceiling rates, which increased rates shall be subject to suspension pursuant to Section 4(e) of the Natural Gas Act and subsequently may be rejected as of the date of filing, as provided by the Order Granting Relief issued February 6, 1967, in Docket No. CS66–48, *et al.*;

(c) Applicant shall file annual statements pursuant to Section 154.104 of the Regulations under the Natural Gas Act.

(C) The certificate granted in paragraph (A) above shall remain in effect for small producer sales until the Commission on its own motion or on application terminates said certificate because Applicant no longer qualifies as a small producer or fails to comply with the requirements of the Natural Gas Act, the regulations thereunder, or the terms of the certificate. Upon such termination, Applicant will be required to file separate certificate applications and individual rate schedules for future sales. To the extent compliance with the terms and conditions of this order is observed, the small producer certificate will still be effective as to those already included thereunder.

(D) The grant of the certificate issued in paragraph (A) above shall not be construed as a waiver of the requirements of Section 7 of the Natural Gas Act or Part 157 of the Commission's Regulations thereunder, and is without prejudice to any findings or orders which have been or may hereafter be made by the Commission in any proceeding now pending or hereafter instituted by or against Applicant. Further, our action in this proceeding shall not foreclose nor prejudice any future proceedings or objections relating to the operation of any price or related provisions in the gas purchase contracts herein involved. Nor shall the grant of the certificate aforesaid for service to the particular customers involved imply approval of all of the terms of the contracts, particularly as to the cessation of service upon termination of said contracts, as provided by Section 7(b) of the Natural Gas Act. Nor shall the grant of the certificate aforesaid be construed to preclude the imposition of any sanctions pursuant to the provisions of the Natural Gas Act for the unauthorized commencement of any sales subject to said certificate.

(E) The certificate issued herein shall be effective on the date of initial delivery.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## GEORGE D. GOULD, TRUSTEE, DOCKET NO. CS67-30

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING SMALL PRODUCER CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY, TERMINATING CERTIFICATE, AND CANCELLING FPC GAS RATE SCHEDULE

(Issued April 25, 1967)

On December 19, 1966, George D. Gould, Trustee (Applicant) filed in Docket No. CS67-30 an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.40 of the Regulations thereunder for a small producer certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce from the Permian Basin area of Texas and New Mexico, all as more fully set forth in the application.

Applicant has not heretofore been authorized to sell natural gas in interstate commerce subject to the jurisdiction of the Commission but proposes to continue that sale of natural gas heretofore authorized in Docket No. CI63-1378 to be made pursuant to Melba Jean Davis Greenlee FPC Gas Rate Schedule No. 1. Therefore, the small producer certificate issued herein will be effective as of March 1, 1966, the date of transfer of the producing properties from Greenlee to Applicant; the certificate issued in Docket No. CI63-1378 will be terminated; and Greenlee's FPC Gas Rate Schedule No. 1 will be cancelled.

In accordance with the principles set forth in the order issued February 6, 1967, in *Rodman & Late, et al.*, Docket No. CS66-48, *et al.*, 37 FPC 281, Applicant herein, pending judicial review of Opinion No. 468, 34 FPC 159, will be permitted to file for above ceiling rates. However, before collecting an above ceiling rate Applicant will be required to file a notice of change in rate and the basic contract,[1] together with any amendments thereto, relating to such sale. Any such notice of change in rate will be subject to suspension pursuant to Section 4(e) of the Natural Gas Act.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been received.

At a hearing held on April 20, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, submitted in support of the authorization sought herein, and upon consideration of the record,

***The Commission finds:***

(1) Applicant will be engaged in the sale of natural gas in interstate commerce for resale for ultimate public consumption, subject to the jurisdiction of the Commission, and will, therefore, be a "natural-gas company" within the meaning of the Natural Gas Act upon commencement of service under the authorization hereinafter granted.

(2) The sales of natural gas hereinbefore described, as more fully described in the application herein, will be made in interstate commerce subject to the jurisdiction of the Commission, and such sales by Applicant, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

---

[1] If Applicant proposes to charge and collect an above ceiling rate pursuant to the contract comprising the Greenlee rate schedule, he should file for reinstatement of that rate schedule together with a notice of change in rate.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) Applicant will be an independent producer of natural gas who is not affiliated with natural gas pipeline companies and has not made jurisdictional sales during the preceding calendar year exceeding 10,000,000 Mcf of natural gas.

(5) The sales of natural gas by Applicant, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are required by the public convenience and necessity, and a small producer certificate of public convenience and necessity therefor should be issued as hereinafter ordered and conditioned.

*The Commission orders:*

(A) A small producer certificate of public convenience and necessity is issued upon the terms and conditions of this order authorizing the sale for resale and delivery of natural gas in interstate commerce by Applicant from the Permian Basin area of Texas and New Mexico, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, all as hereinbefore described and as more fully described in the application in this proceeding.

(B) The certificate granted in paragraph (A) above is not transferable and shall be effective only so long as Applicant continues the acts or operations hereby authorized in accordance with the provisions of the Natural Gas Act and the applicable rules, regulations and orders of the Commission, and particularly,

(a) The subject certificate shall be applicable only to all future "small producer sales," as defined in Section 157.40(a)(3) of the Regulations under the Natural Gas Act, from the Permian Basin area;

(b) Sales shall not be at rates in excess of those set forth in Section 157.40(b)(1) of the Regulations under the Natural Gas Act; however, Applicant may file notices of changes in rate for any contractually authorized rates in excess of the ceiling rates, which increased rates shall be subject to suspension pursuant to Section 4(e) of the Natural Gas Act and subsequently may be rejected as of the date of filing, as provided by the Order Granting Relief issued February 6, 1967, in Docket No. CS66-48, *et al.*;

(c) Applicant shall file annual statements pursuant to Section 154.104 of the Regulations under the Natural Gas Act.

(C) The certificate granted in paragraph (A) above shall remain in effect for small producer sales until the Commission on its own motion or on application terminates said certificate because Applicant no longer qualifies as a small producer or fails to comply with the requirements of the Natural Gas Act, the regulations thereunder, or the terms of the certificate. Upon such termination Applicant will be required to file separate certificate applications and individual rate schedules for future sales. To the extent compliance with the terms and conditions of this order is observed, the small producer certificate will still be effective as to those sales already included thereunder.

(D) The grant of the certificate issued in paragraph (A) above shall not be construed as a waiver of the requirements of Section 7 of the Natural Gas Act or Part 157 of the Commission's Regulations thereunder, and is without prejudice to any findings or orders which have been or may hereafter be made by the Commission in any proceeding now pending or hereafter instituted by or against Applicant. Further, our action in this proceeding shall not foreclose nor prejudice any future proceedings or objections relating to the operation of any price or related provisions in the gas purchase contracts herein involved.

Nor shall the grant of the certificate aforesaid for service to the particular customers involved imply approval of all of the terms of the contracts, particularly as to the cessation of service upon termination of said contracts, as provided by Section 7(b) of the Natural Gas Act. Nor shall the grant of the certificate aforesaid be construed to preclude the imposition of any sanctions pursuant to the provisions of the Natural Gas Act for the unauthorized commencement of any sales subject to said certificate.

(E) The continuation of the sale of natural gas by Applicant heretofore authorized to be made in Docket No. CI63–1378 pursuant to Melba Jean Davis Greenlee FPC Gas Rate Schedule No. 1 is approved as of March 1, 1966; the small producer certificate issued herein shall be effective as of that date; and the certificate issued in Docket No. CI63–1378 is terminated and the related rate schedule cancelled.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge.

## SOUTHERN NEW MEXICO OIL CORPORATION AND TREBOL DRILLING COMPANY, DOCKET NO. RI65–35

### ORDER ACCEPTING OFFER OF SETTLEMENT, REQUIRING REFUNDS, TERMINATING PROCEEDING IN PART, NAMING SUBSTITUTE RESPONDENT, AND ACCEPTING SURETY BOND

(Issued April 25, 1967)

On March 6, 1967, Southern New Mexico Oil Corporation (Southern New Mexico) submitted an offer of settlement, pursuant to Section 1.18(e) of the Commission's Rules of Practice and Procedure, involving a sale of natural gas to El Paso Natural Gas Company (El Paso) under Southern New Mexico's FPC Gas Rate Schedule No. 1 in the Lusk Deep Unit area in Lea and Eddy Counties, New Mexico. On August 2, 1964, Southern New Mexico began charging and collecting from El Paso an increased rate of 15.5¢ per Mcf of natural gas at 14.65 psia, subject to refund, which had been suspended for the statutory period by order of the Commission in Docket No. RI65–35.

Southern New Mexico was included in the show cause order issued by the Commission on August 5, 1965, 34 FPC 424, in Docket No. AR61–1, *et al.*, which directed the producers named to show cause why its Opinion Nos. 468 and 468–A issued in such proceeding, 34 FPC 159, 1068, should not apply to them. Under the Commission's Opinion and order, Southern New Mexico would have qualified as a small producer and the applicable area base rate would be 14.459337¢ per Mcf of natural gas at 14.65 psia.

On August 1, 1966, Southern New Mexico sold and conveyed to Trebol Drilling Company (Trebol) all of the leasehold rights and properties dedicated to its sale of natural gas under its FPC Gas Rate Schedule No. 1. Thereafter, Trebol filed its application for a certificate of public convenience and necessity to make the subject sale to El Paso, and a motion to be substituted as respondent in the above-docketed proceeding. On January 17, 1967, the Commission issued an order substituting Trebol as the producer-seller of natural gas to El Paso in lieu of Southern New Mexico. However, since said order did not make Trebol respondent in the instant proceeding, we shall do so herein, and shall also accept its surety bond for the increased rate, charged and collected subject to refund herein subsequent to August 1, 1966. Southern New Mexico's proposed settlement does not cover Trebol.

Southern New Mexico proposes a settlement rate of 14.459337¢, the applicable area base ceiling under Opinion No. 468 and agrees to make refunds of all amounts collected in excess thereof in Docket No. RI65-35. Southern New Mexico estimates that it will refund El Paso approximately $57,024.56 in principal, plus $4513.36 in interest, which it computes to March 31, 1967. However, we shall require Southern New Mexico to compute the applicable interest on the refund monies to the date of the issuance of this order.

Southern New Mexico makes no other sales of natural gas subject to the jurisdiction of this Commission, and we find approval of its offer of settlement to be in the public interest.

*The Commission orders:*

(A) The offer of settlement filed by Southern New Mexico on March 6, 1967, as conditioned herein, is approved.

(B) Southern New Mexico shall compute the difference between 15.5¢ per Mcf and 14.459337¢ per Mcf of natural gas at 14.65 psia for the period August 2, 1964 through July 31, 1966, with applicable interest to the date of issuance of this order, and shall refund said monies collected subject to refund in Docket No. RI65-35 to El Paso within thirty days of the date of issuance of this order, and ten days thereafter shall file with the Commission a report showing the amount of refunds (showing separately the principal and applicable interest) and the basis used for such determination, and a release from El Paso acknowledging the receipt of the refunds and agreeing to the correctness of such amounts.

(C) The proceeding in Docket No. RI65-35, insofar as it pertains to Southern New Mexico, will be terminated upon its compliance with the terms and conditions of this order without further action of the Commission.

(D) Trebol is hereby substituted for Southern New Mexico as respondent in the proceeding in Docket No. RI65-35, as of August 1, 1966, and its surety bond applicable to monies charged and collected, subject to refund, from El Paso for sales of natural gas under its FPC Gas Rate Schedule No. 1 since August 1, 1966, is accepted.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## AREA RATE PROCEEDING, ET AL. (OTHER SOUTHWEST AREA), DOCKET NO. AR67-1, ET AL.

### ORDER ON MOTIONS FOR RECONSIDERATION AND CLARIFICATION

(Issued April 26, 1967)

By motions filed by Continental Oil Company (Continental) on March 27, 1967, Pan American Petroleum Corporation and Sunray DX Oil Company (Pan American, *et al.*) on March 29, 1967, Texaco Inc. and Mobil Oil Corporation (Texaco, *et al.*) on March 30, 1967, Atlantic Richfield Company, Dorchester Gas Producing Company and Magna Oil Corporation (Atlantic, *et al.*) on March 30, 1967, and Humble Oil & Refining Company (Humble) on March 31, 1967, respondents in the above-entitled proceeding, reconsideration and clarification are requested of the Commission's Order Instituting Area Rate Proceeding issued on February 28, 1967, 37 FPC 400.[1] In the main the motions are concerned with the provision in the order which directs the Presiding Examiner to incorporate by reference all the evidence adduced in the joint record in the Hugoton-Anadarko—Texas Gulf Coast proceedings. The order provided that "specific portions of the joint record may be excluded upon a clear showing of irrelevance or immateriality." It further provided that evidence may be presented on any new issues not raised in the joint record and supplemental data or opinions which are not cumulative or repetitive would also be permitted. While non-repetitive testimony or cross-examination would be allowed on new issues or on matters incorporated by reference, the proceeding essentially would be limited to new evidence respecting area conditions, area costs and rate design.

---

[1] The motions filed by Pan American, *et al.*, Texaco, *et al.*, Atlantic, *et al.*, and Humble are styled as being applications for rehearing under Section 19(a) of the Natural Gas Act. However, applications for rehearing are not properly directed to an interlocutory order such as is here under consideration and accordingly the motions are being treated as motions for reconsideration.

Continental urges that the "only criteria for restriction of evidence should be relevancy and materiality and duplication" and that the Commission should "make clear that all relevant and nonduplicative evidence will be admissible." As indicated, the order provides that the exclusions from the record will be based upon a clear showing of irrelevance or immateriality. Furthermore, evidence supplementing that already received and evidence which is directed to new issues or relates to area conditions, area costs and rate design would be admissible so long as it met the criteria of relevance, competence, and materiality.

Pan American, *et al.*, contends in its motion that the order could be interpreted as an incorporation by reference of findings of fact as distinguished from incorporation by reference of evidence. Texaco, *et al.*, Atlantic, *et al.*, and Humble likewise claim that the order could be interpreted as meaning that findings or decisions would be incorporated by reference. The order clearly refers only to the evidence adduced and does not refer to findings of fact or decisions by the presiding examiners in other proceedings. Consequently, the record as developed in the instant proceeding will consist of applicable portions of the joint record in the Hugoton-Anadarko—Texas Gulf Coast (not excluded by the Examiner), portions of the records in other proceedings incorporated by reference therein, supplemental and updated evidence permitted by the Examiner, and evidence on new issues and on area conditions, area costs, and rate design relating to the Other Southwest Area. Thus, whether or not parties to the instant proceeding were parties in the other proceedings, they will have the opportunity to urge the Examiner to make findings of fact and law based upon the record in this proceeding as developed either by incorporation by reference as supplemented or updated and such new relevant evidence as may be introduced. The Examiner will be free in his decision to make such findings and reach such conclusions as he deems appropriate based upon the entire record in this proceeding. He will not be bound by rulings, findings, or decisions made by the examiners in other proceedings, nor are such findings incorporated in this record. If, in the opinion of any of the parties, evidence was admitted in the aforesaid joint record which should have been excluded for reasons of irrelevance or immateriality and objections on these grounds were made and overruled by the presiding examiners in the other proceedings, the parties are free to urge before the Examiner in the instant proceeding that such material be excluded from the incorporation by reference. In making his rulings herein, the Examiner would not be bound by the prior rulings of other examiners.[2]

---

[2] Accordingly, we delete from the February 28 order those portions thereof which may be inconsistent with our position herein. In the second full paragraph of page 401 of that order on line 9 "a retrial or" is deleted, and starting on line 19 ", absent new evidence, the same issues shall not be tried in this proceeding but that" is also deleted.

Pan American, *et al.*, urges that the Commission order should provide that the Presiding Examiner may divide the hearing into "revenue requirements and rate design phases." The conduct of the hearings and any phasing thereof is strictly within the province of the Presiding Examiner. If, in his determination, the hearing will be handled most expeditiously by the phasing of the hearings, he is in the best position to so order.

*The Commission orders:*

The motions filed by Continental, Pan American, *et al.*, Texaco, *et al.*, Atlantic, *et al.*, and Humble for reconsideration and clarification of the order issued herein on February 28, 1967, are denied except in the respects above set forth.

Commissioner Ross *not participating.*

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## CONSOLIDATED OIL & GAS, INC., DOCKET NO. RI65-290

### ORDER ACCEPTING OFFER OF SETTLEMENT, REQUIRING FILING OF NOTICE OF CHANGE, REQUIRING REFUNDS AND TERMINATING PROCEEDING

(Issued April 26, 1967)

On March 9, 1967, Consolidated Oil & Gas, Inc. (Consolidated) filed an offer of settlement, pursuant to Section 1.18(e) of the Commission's Rules of Practice and Procedure, involving an increased rate for sales of natural gas to Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (TGP), from the Chesterville Field, Colorado County, Texas (Texas Railroad Commission District No. 3). Consolidated filed a rate increase from 13.7458¢ to 19.33333¢ per Mcf of natural gas at 14.65 psia, inclusive of tax reimbursement, which was suspended by order of the Commission for the statutory period, and thereafter made effective subject to refund by Consolidated on March 26, 1965.

Under the terms of the offer, Consolidated proposes to reduce its rate under its FPC Gas Rate Schedule No. 22, and to amend the same to provide for a life-of-contract rate of 15¢ per Mcf of natural gas.[1] Additionally, it will eliminate all price escalation provisions from said rate schedule, and the price redetermination and favored-nation clauses contained therein. Monies collected subject to refund under the instant sale, through April 1, 1967, will approximate $14,600 exclusive of interest.

We believe that Consolidated's settlement proposal, as modified herein, is in the public interest and shall approve the same. However, we desire to make it clear that acceptance of Consolidated's offer of settlement as modified herein is without prejudice to any findings or order of the Commission in any future proceeding involving Consolidated's rates and rate schedules. Additionally, for all of the reasons set forth in *Humble Oil & Refining Company*, Docket No. G-9287, *et al.*, 32 FPC 49, we shall require Consolidated to deposit the refund monies in a special escrow account or to commingle the retained funds with its general assets pending future action of the Commission.

---

[1] The rate under Consolidated's FPC Gas Rate Schedule is subject to a 0.21931¢ per Mcf of natural gas deduction for delivery of nondehydrated gas. Such deduction will also be applicable to the proposed settlement rate, and the computation of refunds.

*The Commission finds:*

The proposed settlement of the above-designated proceedings, on the basis described herein, as more fully set forth in the offer of settlement, as modified herein, filed with the Commission by Consolidated on March 9, 1967, is consistent with the Statement of General Policy No. 61-1, as amended, 18 CFR 2.56, and approval thereof as made effective and hereinafter ordered is in the public interest and is appropriate to carry out the provisions of the Natural Gas Act.

*The Commission orders:*

(A) The offer of settlement, as modified herein, filed with the Commission by Consolidated on March 9, 1967, is approved in accordance with the provisions of this order.

(B) Consolidated shall file, within 30 days from the date of issuance of this order, a notice of change in rate under its FPC Gas Rate Schedule No. 22 to reflect the settlement rate and an executed contractual amendment in accordance with the terms of its settlement proposal, as modified herein, and as approved herein. The notice of change and the contractual amendment shall be submitted in accordance with Part 154 of the Commission's Regulations under the Natural Gas Act.

(C) Consolidated shall compute the difference between the rate collected subject to refund in Docket No. RI65-290 and the settlement rate of 15¢ per Mcf, less the 0.21931¢ dehydration deduction with applicable interest to the date of this order, and shall within 45 days from the date of issuance of this order submit a report to the Commission, with a copy to TGP, setting out the amount of refunds (showing separately the principal and applicable interest) the basis used for such determination, the period covered, and ten days thereafter shall submit to the Commission a copy of a letter from TGP agreeing to the correctness of such amounts.

(D) Consolidated shall retain the amounts shown in the report required under paragraph (C) above, subject to further action of the Commission directing the disposition of those amounts.

(E) Consolidated may deposit the retained refunds in a special escrow account, and shall tender for filing within 60 days of the date of issuance of this order an executed Escrow Agreement, conditioned as set out below, accompanied by a certificate showing service of a copy thereof upon TGP.

Unless notified to the contrary by the Secretary within 30 days from the date of filing thereof, the Escrow Agreement shall be deemed to be satisfactory and to have been accepted for filing. The Escrow Agreement shall be entered into between Consolidated and any bank or trust company used as a depository of funds of the United States Government and the Agreement shall be conditioned as follows:

(1) Consolidated, the bank or trust company, and the successors and assigns of each, shall be held and formally bound unto the Federal Power Commission for the use and benefit of those entitled thereto, with respect to all amounts and the interest thereon deposited in the special escrow account, subject to such Agreement, and such bank or trust company shall be bound to pay over to such person or persons as may be identified and designated by final order of the Commission and in such manner as may be therein specified, all or any portion of such deposits and the interest thereon.

(2) The bank or trust company may invest and reinvest such deposits in any short term indebtedness of the United States or any agency thereof, or in any form of obligation guaranteed by the United States which is, respectively,

payable within 120 days as the said bank or trust company in the exercise of its sound discretion may select.

(3) Such bank or trust company shall be liable only for such interest as the invested funds described in Paragraph (2) above will earn and no other interest may be collected from it.

(4) Such bank or trust company shall be entitled to such compensation as is fair, reasonable and customary for its services as such, which compensation shall be paid out of the escrow account to such bank or trust company. Said bank or trust company shall likewise be entitled to reimbursement for its reasonable expenses necessarily incurred in the administration of this escrow account, which reimbursement shall be paid out of the escrow account.

(5) Such bank or trust company shall report to the Secretary quarterly, certifying the amount deposited in the bank or trust company for the quarterly period.

(F) If Consolidated elects to commingle the retained refunds with its general assets and use them for business purposes, it shall notify the Secretary of the Commission of its intention so to do within sixty days of the issuance of this order, and shall pay interest on such monies at the rate of 5½% per annum from the date of issuance of this order to the date on which they are paid over to the person or persons ultimately determined to be entitled thereto by final ordre or orders of the Commission.

(G) Upon notification by the Secretary of the Commission that Consolidated has complied with the terms and conditions of this order, the proceeding in Docket No. RI65-290 shall terminate and the proposed 15¢ settlement rate, less the 0.21931¢ dehydration deduction shall become effective as of the date of issuance of this order, all without further order of the Commission.

(H) The acceptance by the Commission of Consolidated's offer of settlement, as modified herein, is without prejudice to any findings or determinations that may be made in any proceeding now pending, or hereafter instituted by or against Consolidated and is without prejudice to claims or contentions which may be made by Consolidated, the Commission Staff, or any affected party hereto, in any proceedings.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## LOUISIANA GAS SERVICE COMPANY AND TRUNKLINE GAS COMPANY, DOCKET NO. CP67-232

### FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued April 26, 1967)

On February 17, 1967, Louisiana Gas Service Company (Applicant) filed in Docket No. CP67-232 an application, as supplemented on March 6 and March 20, 1967, pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Trunkline Gas Company (Respondent) to establish physical connection of its transportation facilities with the facilities proposed to be constructed by Applicant and to sell and deliver to Applicant up to 100 Mcf of natural gas per day for resale and distribution in the Village of Kilbourne, West Carroll Parish, Louisiana, all as more fully set forth in the application as supplemented.

Applicant proposes to construct and operate a distribution system and lateral pipeline totaling approximately 3.56 miles of 2-inch and 3-inch pipeline. Respondent will install necessary metering equipment.

By letter dated March 8, 1967, the authorities of the Village of Kilbourne state that they will grant Applicant a franchise to render the proposed service.

Applicant's estimated third-year annual and peak day natural gas requirements are 11,712 Mcf and 100 Mcf, respectively. Respondent will sell and deliver said gas requirements to Applicant pursuant to Respondent's presently effective Rate Schedule SG–1 at 35.6 cents per Mcf.

The total estimated cost of Applicant's proposed facilities is $40,637, which cost will be financed from company funds and, if necessary, from funds available under a five-year credit agreement with the Whitney National Bank of New Orleans.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

*The Commission finds:*

(1) Respondent, Trunkline Gas Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of April 29, 1949, in Docket No. G–882 (8 FPC 250).

(2) Applicant, Louisiana Gas Service Company, will receive authorization from the Village of Kilbourne to render the proposed service, and no state authorization is needed to implement said proposal.

(3) It is necessary and desirable in the public interest that Respondent be directed to establish physical connection of its natural gas transportation system with the proposed facilities of Applicant and to sell and deliver up to 100 Mcf of natural gas per day to Applicant, as set forth in the application and as hereinafter ordered and conditioned.

(4) This order should be conditioned upon Applicant being prepared to receive natural gas from Respondent, as proposed, within one year from the date on which this order issues.

(5) The requirement that Respondent serve Applicant, as proposed, will not place any undue burden upon Respondent nor impair its ability to render adequate service to its existing customers.

*The Commission orders:*

(A) Respondent is directed to establish physical connection of its natural gas transmission system with the facilities to be constructed by Applicant and to sell and deliver up to 100 Mcf of natural gas per day to Applicant for resale and distribution in the Village of Kilbourne, West Carroll Parish, Louisiana, all as hereinbefore described and as more fully described in the application and supplements thereto.

(B) Applicant shall be prepared to receive natural gas from Respondent within one year from the date of this order.

(C) Respondent shall notify the Commission of the commencement of service within ten days thereof.

(D) Respondent shall execute and file with the Commission a service agreement with Applicant in accordance with the Commission Regulations.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## ACCOUNTING AND REPORTING BY HYDROELECTRIC LICENSEES FOR EXPENDITURES RELATING TO FISH, RECREATION AND WILDLIFE, DOCKET NO. R-305

## ORDER NO. 343

### AMENDING THE UNIFORM SYSTEM OF ACCOUNTS AND ANNUAL REPORT F.P.C. FORM NO. 1

(Issued April 26, 1967)*

On July 14, 1966, the Commission gave notice (31 F.R. 9877, July 21, 1966) that it proposed to amend the Uniform System of Accounts for Class A and Class B public utilities and licensees and to add four new schedules for F.P.C. Form No. 1, prescribed for use by these public utilities and licensees by § 141.1 of its regulations. The object of these amendments is to enable the Commission and other interested agencies to evaluate the cost and effectiveness of fish, wildlife and recreation programs undertaken by the reporting licensees. Expenditures for these purposes are not now accounted for or reported separately.

Twenty-four responses commenting on the proposed amendments were received.[1] Five state agencies and the National Audubon Society supported the proposal, while 17 of the 18 remaining respondents (all licensees) opposed one or another aspect of the amendments. Five of the 17, however, indicated approval of the overall scheme. One licensee is already maintaining its accounts in the form contemplated by the amendments.

The Commission has considered the comments submitted and has adopted modifications responsive to certain of the objections expressed therein. While these modifications will reduce the complexity of the accounting and reporting as proposed, the modified amendments will still provide information adequate for the Commission's purposes.

Objections expressed in the responses centered largely on the accounting separation of expenditures and revenues for fish, wildlife and recreation activities, and on the proposal that depreciation reserves and accruals be reported in Form No. 1. The respondent licensees maintain that this accounting scheme would create unnecessary burdens and present difficult cost-allocation problems. The proposed reporting of depreciation reserves and accruals, also, was thought to present cost-allocation difficulties and to violate the functional classification of depreciation. While we believe that some breakdown of cost information is necessary if it is to be useful, the combining of fish and wildlife activities for accounting and reporting purposes appears to be feasible. Expenditures for wildlife activities will in most cases be small. This modification should reduce accounting and reporting paperwork by about a third without seriously affecting the utility of the information.

---

*Published in the Federal Register on May 2, 1967 (32 F.R. 6678).

[1] Alabama Power Co., Allegheny Power Service Corp., Appalachian Power Co., Carolina Power & Light Co., Cleveland Electric Illuminating Co., Consumers Power Co., Georgia Power Co., Idaho Power Co., Iowa State Conservation Commission, Massachusetts Division of Fisheries and Game, National Audubon Society, Northern States Power Co., Oregon Fish Commission, Pacific Gas and Electric Co., Pacific Power & Light Co., Pennsylvania Fish Commission, Pennsylvania Power & Light Co., Philadelphia Electric Co., Public Service Electric & Gas Co., Southern California Edison Co., Union Electric Co., Virginia Electric & Power Co., Washington State Dept. of Fisheries, Wisconsin Michigan Power Co.

Accounting and reporting for depreciation would not violate the functional classification of depreciation, since the accounting proposed here would be maintained under the hydroelectric function. Nevertheless, the Commission agrees that eliminating the accounting and reporting requirement for depreciation would materially reduce the respondents' workload without impairing the usefulness of their reports. Depreciated cost of the facilities is not needed to evaluate the activities when gross cost figures are available.

Some respondents suggested that revenues from fish, wildlife and recreation activities are small enough that it would be proper to show them as offsets against expense in the appropriate operating or maintenance account. The Commission believes that the cost of operating these facilities can be accurately shown only if revenues and expenses are separately stated. Since in most cases recreation activities will provide most of the revenues, it would not detract significantly from the usefulness of the information to combine revenues from all three programs into a single subaccount. Accordingly, we have made this change in the amendments proposed.

Another modification suggested is the deletion of Item 12, referring to supplies and expenses for fish, game and forest conservation, from Account 537, Hydraulic Expenses. This item would be redundant under the new accounts prescribed and is being deleted as suggested.

Some respondents commented that the figures obtained under the accounting and reporting requirements here adopted will not permit the general public to know how effective the fish, wildlife and recreation programs are, because the costs of development will vary with the natural surroundings of each project. It is not intended, however, that these fiscal data be the only measure of effectiveness; rather they will be used to complement other information already available to the Commission.

Certain other comments and suggestions dealt with matters actually disposed of in the manner suggested either by the amendments here adopted or by existing provisions of the Uniform System of Accounts.

*The Commission finds:*

(1) The amendments to the Uniform System of Accounts and the Annual Report Form, prescribed herein, will provide the Commission with information important to the execution of its duties under the Federal Power Act with reference to the promotion of recreational use of licensed projects and the preservation of fish and wildlife in project lands and waters and, therefore, are necessary and appropriate for the administration of the Act.

(2) Since the modifications made to the amendments as originally proposed reduce and simplify the reporting obligation laid upon licensees, no further notice prior to adoption is necessary under section 4 of the Administrative Procedure Act.

*The Commission*, acting pursuant to the Federal Power Act, as amended, and particularly sections 301, 304, and 309 thereof (49 Stat. 854, 855, 858; 16 U.S.C. 825, 825c, 825h) *orders:*

(A) Effective upon the issuance of this order, the Uniform System of Accounts Prescribed for Class A and Class B Public Utilities and Licensees by Part 101, Subchapter C of Chapter I, Title 18 of the Code of Federal Regulations is amended by revising Electric Plant Instruction 8C, adding a new

Electric Plant Instruction 15, and revising Accounts Nos. 330, 331, 332, 335, 336, 398, 456, 537, 542, 543 and 545 to read as follows:

ELECTRIC PLANT INSTRUCTIONS

* * * * * * *

8. Structures and Improvements.

* * * * * * *

C. Minor buildings and structures, such as valve towers, patrolmen's towers, telephone stations, fish and wildlife, and recreation facilities, etc., which are used directly in connection with or form a part of a reservoir, dam, waterway, etc., shall be considered a part of the facility in connection with which constructed or operated and the cost thereof accounted for accordingly.

* * * * * * *

15. *Hydraulic Production Plant.*

For the purpose of this system of accounts hydraulic production plant means all land and land rights, structures and improvements used in connection with hydraulic power generation, reservoirs, dams and waterways, water wheels, turbines, generators, accessory electric equipment, miscellaneous power plant equipment, roads, railroads and bridges, and structures and improvements used in connection with fish and wildlife, and recreation.

* * * * * * *

ELECTRIC PLANT ACCOUNTS

* * * * * * *

330 Land and land rights.

This account shall include the cost of land and land rights used in connection with hydraulic power generation. (See electric plant instruction 7.) It shall also include the cost of land and land rights used in connection with (1) the conservation of fish and wildlife, and (2) recreation. Separate subaccounts shall be maintained for each of the above.

331 Structures and improvements.

This account shall include the cost in place of structures and improvements used in connection with hydraulic power generation. (See electric plant instruction 8.) It shall also include the cost in place of structures and improvements used in connection with (1) the conservation of fish and wildlife, and (2) recreation. Separate subaccounts shall be maintained for each of the above.

332 Reservoirs, dams and waterways.

This account shall include the cost in place of facilities used for impounding, collecting, storage, diversion, regulation, and delivery of water used primarily for generating electricity. It shall also include the cost in place of facilities used in connection with (1) the conservation of fish and wildlife, and (2) recreation. Separate subaccounts shall be maintained for each of the above. (See electric plant instruction 8C.)

* * * * * * *

335 Miscellaneous power plant equipment.

This account shall include the cost installed of miscellaneous equipment in and about the hydroelectric generating plant which is devoted to general station use and is not properly includible in other hydraulic production accounts. It shall also include the cost of equipment used in connection with (1) the conservation of fish and wildlife, and (2) recreation. Separate subaccounts shall be maintained for each of the above.

336 Roads, railroads and bridges.

* * * * * * *

Note A: Roads intended primarily for connecting employees' houses with the power plant, and roads used primarily in connection with fish and wildlife, and recreation activities, shall not be included herein but in account 331, Structures and Improvements.

* * * * * * *

398 Miscellaneous equipment.

* * * * * * *

Items

* * * * * * *

3. Employees' recreation equipment.

OPERATING REVENUE ACCOUNTS

* * * * * * *

456 Other electric revenues.

This account shall include revenues derived from electric operations not includible in any of the foregoing accounts. It shall also include in a separate subaccount revenues received from operation of fish and wildlife, and recreation facilities whether operated by the company or by contract concessionaires, such as revenues from leases, or rentals of land for cottages, homes or campsites.

OPERATION AND MAINTENANCE EXPENSE ACCOUNTS

* * * * * * *

537 Hydraulic expenses.

This account shall include the cost of labor, materials used and expenses incurred in operating hydraulic works including reservoirs, dams and waterways, and in activities directly relating to the hydroelectric development outside the generating station. It shall also include the cost of labor, materials used and other expenses incurred in connection with the operation of (1) fish and wildlife, and (2) recreation facilities. Separate subaccounts shall be maintained for each of the above.

Items

* * * * * * *

12. Transportation expense.

[Codification note: item 12 deleted and item 13 renumbered 12.]

* * * * * * *

542 Maintenance of structures.

This account shall include the cost of labor, materials used and expenses incurred in maintenance of hydraulic structures, the book cost of which is includible in account 331, Structures and Improvements. (See operating expense instruction 2.) However, the cost of labor, materials used and expenses incurred in the maintenance of fish and wildlife, and recreation facilities, the book cost of which is includible in account 331, Structures and Improvements, shall be charged to account 545, Maintenance of Miscellaneous Hydraulic Plant.

543 Maintenance of reservoirs, dams and waterways.

This account shall include the cost of labor, materials used and expenses incurred in maintenance of plant includible in account 332 Reservoirs, Dams and Waterways. (See operating expense instruction 2.) However, the cost of labor, materials used and expenses incurred in the maintenance of fish and wildlife, and recreation facilities, the book cost of which is includible in account 332, Reservoirs, Dams and Waterways, shall be charged to account 545, Maintenance of Miscellaneous Hydraulic Plant.

* * * * * * *

545 Maintenance of Miscellaneous hydraulic plant.

This account shall include the cost of labor, materials used and expenses incurred in maintenance of plant, the book cost of which is includible in account 335, Miscellaneous Power Plant Equipment, and account 336, Roads, Railroads and Bridges. (See operating expense instruction 2.) It shall also include the cost of labor, materials used and other expenses incurred in the maintenance of (1) fish and wildlife, and (2) recreation facilities. Separate subaccounts shall be maintained for each of the above.

(B) Effective for the reporting year 1967, Annual Report F.P.C. Form No. 1, prescribed for Class A and Class B electric utilities and licensees by §141.1, Subchapter D, of the said Chapter I of Title 18 is amended by adding new schedules entitled "Fish and Wildlife and Recreation Plants" (page 403A) and "Operation and Maintenance Expenses of Fish and Wildlife and Recreation Operations" (page 416A), and by revising the schedule entitled "Miscellaneous Service Revenues and Other Electric Revenues" (page 416), all as set out in *Attachment A* hereto.*

(C) Effective upon the issuance of this order, in paragraph (d) of the said § 141.1, the list of schedules is revised by—

1. Inserting, to follow the line "Electric Plant in Service", a new line reading:

"Fish and Wildlife and Recreation Plants."

2. Inserting, to follow the line "Miscellaneous Service * * * Revenues", a new line reading:

"Operation and Maintenance Expenses of Fish and Wildlife and Recreation Operations."

(D) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

---

## SOUTHERN NATURAL GAS COMPANY, DOCKET NO. CP67-244

### FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT

(Issued April 26, 1967)

On March 1, 1967, Southern Natural Gas Company (Applicant), filed in Docket No. CP67-244 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval of the Commission to abandon certain natural gas facilities, all as more fully set forth in the application.

---

*Omitted in printing.

Applicant requests permission and approval to abandon a field sale and to remove a field sales meter and regulator on Applicant's Tinsley Field branch line in the vicinity of an oil well known as the Ben Hanley Well, Yazoo County, Mississippi.

Applicant had a gas sales contract with Billy Bridewell (Bridewell) who used natural gas in the operation of an oil well which has ceased to produce. The parties terminated their sales contract by letter agreement, effective December 1, 1966.

Applicant states that no service now being rendered will be affected by the abandonment of the above-mentioned facilities.

*The Commission finds:*

(1) Applicant, Southern Natural Gas Company, a Delaware corporation having its principal place of business in Birmingham, Alabama, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued October 6, 1942, in Docket No. G-296 (3 FPC 822).

(2) The facilities proposed to be abandoned, as hereinbefore described and as more fully described in the application herein, are used in the transportation and sale of natural gas in interstate commerce subject to the jurisdiction of the Commission, and such abandonment is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The proposed abandonment of the aforesaid facilities is permitted by the public convenience and necessity and approval thereof should be granted as hereinafter ordered.

*The Commission orders:*

(A) Permission for and approval of the abandonment of the facilities hereinbefore described, as more fully described in the application in this proceeding, is granted to Applicant, Southern Natural Gas Company.

(B) Applicant shall advise the Commission of the date of abandonment of the facilities as authorized in paragraph (A) above within ten days of such abandonment.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## MOUNTAIN FUEL SUPPLY COMPANY, DOCKET NO. CP67-172 AND U.S. NATURAL GAS CORPORATION, DOCKET NO. CI62-594

### FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT OF FACILITIES AND ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 27, 1967)

On December 16, 1966, U.S. Natural Gas Corporation (U.S. Natural) filed in Docket No. CI62-594 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon by sale to Mountain Fuel Supply Company (Mountain Fuel) certain natural gas facilities located in the Joyce Creek Field, Sweetwater County, Wyoming, all as more fully set forth in the application.

On December 16, 1966, Mountain Fuel filed in Docket No. CP67-172 its companion application, as supplemented on March 2, 1967, pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the acquisition from U.S. Natural and operation of the subject facilities.

Specifically, U.S. Natural seeks to abandon by sale to Mountain Fuel approximately 2.7 miles of 4-inch pipeline extending southwesterly from U.S. Natural's well in the Joyce Creek Field, Sweetwater County, Wyoming, to a connection with Mountain Fuel's 20-inch lateral supply pipeline also located in Sweetwater County.

By a bill of sale dated September 30, 1966, U.S. Natural sold and conveyed its interest in the subject facilities to Mountain Fuel in consideration of the sum of $20,037.72, which sum is equivalent to the original cost of the facilities.

Mountain Fuel proposes to continue the operation of the subject facilities and to continue its purchase of natural gas from U.S. Natural at 12 cents per Mcf in accordance with the gas purchase contract on file with the Commission as U.S. Natural's FPC Gas Rate Schedule No. 1. U.S. Natural will continue the sale of gas under its certificate heretofore issued in Docket No. CI62-594.

After due notice, no protest, petition to intervene, or notice of intervention has been filed herein.

At a hearing held on April 20, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Mountain Fuel Supply Company, a Utah corporation having its principal place of business in Salt Lake City, Utah, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order issued in Docket No. G-313 on March 9, 1943 (3 FPC 938).

(2) Applicant, U.S. Natural Gas Corporation, a Delaware corporation having its principal place of business in Beverly Hills, California, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order issued in Docket No. G-3083, *et al.*, on January 15, 1963.

(3) The facilities to be abandoned, as hereinbefore described and as more fully described in the applications in this proceeding, are used in the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and abandonment of such facilities is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(4) The abandonment of facilities by U.S. Natural Gas Corporation, as hereinbefore described, is permitted by the public convenience and necessity and an order approving same should be issued as hereinafter ordered.

(5) The proposed acquisition and operation of facilities by Mountain Fuel Supply Company are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(6) Said acquisition and operation of facilities are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(7) Mountain Fuel Supply Company is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(8) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Mountain

Fuel Supply Company's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (d)(2), (d)(3), (e), (f) and (g) of Section 157.20 of the Regulations.

*The Commission orders:*

(A) Permission for and approval of the abandonment by U.S. Natural Gas Corporation of the facilities hereinbefore described, all as more fully described in the applications filed in this proceeding, are granted.

(B) A certificate of public convenience and necessity is issued to Applicant, Mountain Fuel Supply Company, authorizing the acquisition and operation of facilities as hereinbefore described, as more fully described in the applications in this proceeding, upon the terms and conditions of this order.

(C) The certificate issued by paragraph (B) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (d)(2), (d)(3), (e), (f) and (g) of Section 157.20 of the Regulations.

## TEXAS GAS UTILITIES COMPANY, DOCKET NO. CP67-72

### FINDINGS AND ORDER AUTHORIZING THE EXPORTATION OF NATURAL GAS

(Issued April 27, 1967)

On September 19, 1966, Texas Gas Utilities Company (Applicant) filed in Docket No. CP67-72, as supplemented on December 2, 1966, an application pursuant to Section 3 of the Natural Gas Act for authorization to continue, as successor to Border Pipe Line Company (Border), the exportation of natural gas to the Republic of Mexico by sale to American Smelting and Refining Company (Smelting) for use by the latter's Mexican subsidiary, Compania Minera Asarco, S.A., all as more fully set forth in the application, as supplemented, in this proceeding.

The Commission's order issued October 10, 1942, in Docket No. G-228, as amended,[1] among other things, authorized Border to export up to 14,000 Mcf of gas per day by sale to Smelting in accordance with and pursuant to the terms of their agreement of July 5, 1949, as amended. Such authorization is to terminate on March 26, 1970. Pursuant to an assignment dated June 29, 1966, Border assigned and conveyed to Applicant its (Border's) interest in the sale to Smelting. Accordingly, Applicant now requests authorization to continue, as Border's successor, the exportation of natural gas.

On September 19, 1966, Applicant also filed, in Docket No. CP67-73, an application pursuant to Executive Order No. 10485 for a Permit to continue, as successor to Border, the operation, maintenance and connection of natural gas transmission facilities at or near the international boundary between the United States and Mexico for the purpose of exporting natural gas as proposed, and as hereinabove described. Said related Permit will be released concurrently with the issuance of this order.

---

[1] The order of October 10, 1942 (3 FPC 827) as amended by orders issued November 4, 1942 (3 FPC 859), July 11, 1950 (9 FPC 910), May 10, 1956 (15 FPC 1387), March 25, 1960 (23 FPC 529) and March 26, 1965 (33 FPC 640).

Notice of the filing of the instant application was issued on September 28, 1966. This notice fixed October 24, 1966, as the last day for filing protests or petitions to intervene. Opportunity for hearing has been given by the issuance of said notice and the publication thereof in the Federal Register on October 5, 1966 (31 F.R. 12974). No petition to intervene, notice of intervention or protest has been filed in this proceeding.

*The Commission finds:*

The continued exportation of natural gas to Mexico by Applicant, Texas Gas Utilities Company, as successor to Border Pipe Line Company, by sale to American Smelting and Refining Company will not be inconsistent with the public interest within the meaning of Section 3 of the Natural Gas Act provided that said exportation be continued on the terms and conditions hereinafter set forth and ordered.

*The Commission orders:*

(A) Applicant, Texas Gas Utilities Company, is authorized to continue, as successor to Border Pipe Line Company, the exportation of natural gas to Mexico by sale to American Smelting and Refining Company, in accordance with the terms of the contract dated July 5, 1949, as amended, hereinbefore described, upon the terms and conditions of this order and subject to the provisions of the Natural Gas Act and the Commission's Regulations issued thereunder.

(B) The quantities of natural gas Applicant is authorized in paragraph (A) above to continue to export by sale to American Smelting are limited to 14,000 Mcf (14.65 psia) per day, and, further, such authorization is limited to a term ending March 26, 1970.

(C) The authorization granted in paragraph (A) above to Applicant, as successor to Border, is subject in all respects to the terms and conditions of the Commission's order issued October 10, 1942, as amended, in Docket No. G–228.

(D) Applicant shall file by March 31 of each year a report on its previous year's operations showing:

(1) Total volumes (at 14.73 psia) exported by months.

(2) The maximum daily volume (at 14.73 psia) exported in each month and the date thereof.

(3) The total annual revenue received for the gas exported.

(E) The related Permit in Docket No. CP67–73 is released concurrently with the issuance of this order.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## UNITED FUEL GAS COMPANY, DOCKET NO. CP64–73

### ORDER AMENDING AN ORDER ISSUING A CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued April 27, 1967)

On February 9, 1967, United Fuel Gas Company (Petitioner) filed in Docket No. CP64–73 a petition to amend the order issued by the Commission in said docket on June 19, 1964, 31 FPC 1559. By the instant filing, Petitioner requests that the subject order be amended so as to authorize an increase in its firm sale and delivery of natural gas to Gas Transport, Inc. from the presently authorized 6,500 Mcf to 7,500 Mcf per day, all as more fully set forth in the application.

The order issued in the subject docket on June 19, 1964, authorized Petitioner to construct and operate a delivery facility on its 8-inch pipeline near its Rockport Compressor Station in Wood County, West Virginia, connecting its system with a 14-inch pipeline owned and operated by Gas Transport, Inc., and used to supply natural gas to its parent company Anchor Hocking Glass Company in Lancaster, Ohio. This tie-over line was constructed for the purpose of delivering up to 6,500 Mcf of natural per day into Gas Transport's system under Petitioner's CDS-1 Rate Schedule.

By letter dated January 12, 1967, Gas Transport requested Petitioner to increase the contract demand for natural gas to 7,500 Mcf per day citing increased need and declining local supply.

No change in rates is proposed and no additional facilities or financing will be required to implement Petitioner's proposal.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued in the instant docket on June 19, 1964, be amended as hereinafter ordered and conditioned.

*The Commission orders:*

(A) The Commission's order issued on June 19, 1964, in Docket No. CP64-73 is amended so as to authorize an increase in Petitioner's firm sale and delivery of natural gas under its Rate Schedule CDS-1 to Gas Transport Inc., from 6,500 Mcf to 7,500 Mcf per day, as hereinbefore set forth and as more fully set forth in the petition to amend filed in this proceeding.

(B) The authorization granted by paragraph (A) above is conditioned upon Petitioner's filing with the Commission an appropriate revised service agreement with Gas Transport Inc., in accordance with the Commission's Regulations under the Natural Gas Act.

(C) The authorization granted by paragraph (A) above is further conditioned upon Petitioner's notifying the Commission of the commencement of the increased service authorized herein within 10 days thereof.

(D) In all other respects the certificate issued in the subject docket shall remain in full force and effect.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## JACK W. GRIGSBY (OPERATOR), ET AL., DOCKET NOS. RI61-96, RI62-536; SOCONY MOBIL OIL COMPANY, INC. (NOW MOBIL OIL CORPORATION), DOCKET NOS. G-12193, ET AL., G-12401; UNITED GAS PIPE LINE COMPANY, DOCKET NOS. RP61-18, RP63-1, RP65-1

### ORDER RELEASING REFUNDS

(Issued April 28, 1967)

Jack W. Grigsby (Operator), *et al.* (Grigsby) is presently retaining certain monies refundable to United Gas Pipe Line Company (United) pursuant to the

Commission's order in Docket Nos. RI61-96 and RI62-536, issued August 6, 1964, 32 FPC 529. The retained amounts are attributable to gas sold under Grigsby's Rate Schedule Nos. 6 and 7 from February 26, 1961, to August 6, 1964, and under Rate Schedule No. 8 from December 2, 1962 to August 6, 1964.

The flow-through obligations of United and its jurisdictional customers are established as to those portions of the retained amount attributable to Grigsby's Rate Schedule Nos. 6 and 7, but not as to Grigsby's Rate Schedule No. 8. In accordance with our usual practice, therefore, we are authorizing Grigsby to release to United the amounts attributable to Rate Schedule Nos. 6 and 7, and directing Grigsby to continue its retention of the amount attributable to Rate Schedule No. 8.

Pursuant to our order of June 26, 1964, 31 FPC 1593, issued in Docket Nos. G-12193, *et al.*, and G-12401, Socony Mobil Oil Company, Inc. (Socony), has also been retaining amounts refundable to United. These monies are attributable to purchases of gas made by United under five of Socony's rate schedules. Although United has agreed to flow through amounts attributable to purchases made under four [1] of the five rate schedules, it claims a right to retain monies attributable to purchase made under the fifth.[2]

Accordingly, we are directing Socony to release to United those portions of the refunds escrowed pursuant to our June 26, 1964 order which are attributable to the four Socony rate schedules covered by United's obligations, and to continue its retention of monies attributable to the fifth.

We are directing United to flow-through the amounts released to it pursuant to this order in accordance with the plan of disposition set forth in our order issued January 4, 1967, in Docket Nos. RP61-18, RP63-1, and RP65-1, *et al.*

*The Commission orders:*

(A) Grigsby and its duly appointed escrow agent are authorized to release and pay over to United within 45 days from the date of this order the amounts (together with net escrow earnings) retained by Grigsby pursuant to our order of August 6, 1964, issued in Docket Nos. RI61-96, and RI62-536, and attributable to purchases made by United under Grigsby's Rate Schedule Nos. 6 and 7.

(B) Grigsby shall, pending further Commission order, continue its retention of monies attributable to United's purchases under Grigsby's Rate Schedule No. 8.

(C) Socony and its duly appointed escrow agent are authorized to release and pay over to United within 45 days from the date of this order the amounts (together with net escrow earnings) retained pursuant to the Commission's order of June 26, 1964, issued in Docket Nos. G-12193, *et al.*, and G-12401, and attributable to United's purchases under Socony's Rate Schedule Nos. 24, 69, 120, and 258.

(D) Socony shall, pending further Commission order, continue its retention of monies attributable to United's purchases under Socony's Rate Schedule No. 229.

(E) Grigsby and Socony, within 60 days from the date of this order, shall each submit to the Commission a report showing (1) the amounts paid to United in accordance with paragraphs (A) and (C) above, (2) the portion of such payments attributable to escrow account earnings, and (3) the amounts retained in accordance with paragraphs (B) and (D) above.

---

[1] Rate Schedule Nos. 24, 69, 120, and 258.

[2] Rate Schedule No. 229.

(F) The amounts ordered to be retained pursuant to paragraphs (B) and (D) above shall be retained by Grigsby and Socony in accordance with the respective methods previously adopted by the two companies.

(G) United shall flow through the refunds received pursuant to paragraphs (A) and (C) above in accordance with the method prescribed in the Commission's order of January 4, 1967, issued in Docket Nos. RP61-18, RP63-1, RP65-1, *et al.*

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## INTERSTATE POWER COMPANY, DOCKET NO. E-7345

### ORDER AUTHORIZING ISSUANCE OF FIRST MORTGAGE BONDS AND OF COMMON STOCK

(Issued April 28, 1967)

Interstate Power Company filed an application on March 16, 1967 for an order, pursuant to Section 204 of the Federal Power Act, authorizing the issuance of the following securities: (1) $17,000,000 principal amount of First Mortgage Bonds, and (2) 267,897 shares of Common Stock, par value $3.50 per share.

Applicant is incorporated under the laws of the state of Delaware with its principal business office at Dubuque, Iowa and is engaged in the electric utility business in three counties in Illinois, 21 counties in Iowa, 21 counties in Minnesota and one county in South Dakota.

The proposed $17,000,000 principal amount of First Mortgage Bonds are to be dated May 1, 1967, and are to mature on May 1, 1997. The interest rate will be determined by the most favorable bid received and accepted.

The new Bonds are to be issued under the Applicant's Indenture dated as of January 1, 1948, to The Chase National Bank of New York and Carl E. Buckley, Trustees, as amended and supplemented by ten supplemental indentures and to be further amended and supplemented by a proposed Eleventh Supplemental Indenture to be dated as of May 1, 1967. The new Bonds will be redeemable at the option of the Applicant, as a whole or in part at any time, at regular and special redemption prices.

The Applicant proposes on or about May 5, 1967, to publish an invitation for sealed, written bids for the purchase of the $17,000,000 new Bonds. The Statement of Terms and Conditions Relating to Bids will contain the following principal provisions:

> Each bid must be for the purchase of all the Bonds and may be made by a single bidder or by a group of bidders. Bids must be presented to the Applicant before 11:00 a. m., New York Time, on May 16, 1967, at the office of The Chase Manhattan Bank (National Association), Room 2414, One Chase Manhattan Plaza, New York, N. Y., and be accompanied by deposits of $510,000.
>
> Each bid shall specify: (1) the coupon rate which shall be a multiple of ⅛ of 1%; (2) the price (exclusive of accrued interest) to be paid to the Applicant, which price shall not be less than 99% nor more than 102¾% of principal amount thereof; and (3) and shall further provide that accrued interest from May 1, 1967 to the date of payment and delivery will be paid to the Applicant by the purchaser or purchasers.

> Unless the Applicant shall reject all bids or exclude a bid or bids for reasons set forth in the Statement of Terms and Conditions Relating to Bids, it will accept the bid which provides for the lowest annual cost of money.

The Applicant proposes to offer to the holders of its outstanding Common Stock of record at 3:30 p.m., New York Time, on May 17, 1967, the right to subscribe for a total of 267,897 additional shares of its presently authorized Common Stock, on the Primary Subscription Right basis of one additional share for each fourteen shares of Common Stock held. The rights to subscribe will be evidenced by a single form of transferrable Subscription Warrant expressed in terms of Rights, the number of Rights evidence by each Warrant being equivalent to the number of shares of the Applicant's Common Stock held of record on the record date by the stockholder. In addition to the Primary Subscription Right, the Warrant holders whose holdings of rights are not evenly divisible by fourteen or are less than fourteen will have an Incidental Subscription Right. Also, each Warrant holder, in addition to shares covered by the Warrants, will have the conditional right to subscribe, as a Secondary Subscription Right (Over-subscription), for any shares covered by outstanding Warrants which are not issued pursuant to exercise of the Primary Subscription Rights. The rights to subscribe will expire at 3:30 p.m., New York Time, on June 2, 1967.

On or about May 5, 1967, the Applicant proposes to invite sealed, written bids for the purchase of such of the 267,897 shares of its Common Stock as shall not be subscribed for under the offering to the stockholders. The subscription price per share will be fixed by the Applicant's Board on May 15, 1967, and such price will be furnished to prospective bidders on the same day. According to the application the subscription price will be fixed in relation to and at an appropriate discount from, the then market price of Applicant's presently issued and outstanding Common Stock.

Each bid must be for the purchase of the entire Unsubscribed Stock and may be made by a single bidder or by a group of bidders. Each price shall specify: (a) the price per share to be paid to the Applicant for the Unsubscribed Stock, which price shall be the same as fixed by the Applicant's Board, and (b) the aggregate amount to be paid by the Applicant to the bidder or bidders as compensation for their commitments and obligations in connection with the purchase of the Unsubscribed Stock. Each bid must be delivered to the Applicant at the office of The Chase Manhattan Bank (National Association), Room 2414, One Chase Manhattan Plaza, New York, N. Y., before 11:30 A. M., New York Time, on May 17, 1967. Each bid must be accompanied by a deposit of $50,000.

If any bid is accepted, it will be the "best bid." This "best bid" shall be the bid which specifies the lowest aggregate amount of compensation to be paid by the Applicant to the bidder or bidders. Immediately after opening of bids, the Applicant will file with the Commission an amendment which gives the results of the competitive bidding.

The proceeds from the sale of the new Bonds and the additional shares of Common Stock will be used first, to discharge $16,000,000 in outstanding promissory notes and secondly, towards payment of the $13,478,000 construction program of the Applicant for 1967. The principal item in this program is the completion of Applicant's Milton L. Kapp generating plant (Unit No. 2) at Clinton, Iowa, which will require an estimated expenditure of $1.7 million in 1967.

Written notice of the application has been given to the Commerce Commission of Illinois, the Minnesota Railroad and Warehouse Commission, the South Dakota Public Utilities Commission, and the State Commerce Commission of Iowa and the Governor of each of those States. Notice has also been given by publication in the Federal Register on March 30, 1967 (32 F.R. 5387), stating that any person desiring to be heard or to make any protest with reference to the application should file a petition or protest on or before April 10, 1967, with the Federal Power Commission, Washington, D.C., 20426. No protest, petition or request to be heard in opposition to the granting of the application has been received.

*The Commission finds:*

(1) Applicant, a corporation, is a public utility within the meaning of Section 204 of the Federal Power Act, subject to the jurisdiction of the Commission, as heretofore described and set forth in the Commission's order issued May 12, 1959, *In the Matter of Interstate Power Company,* Docket No. E-6877 (21 FPC 678).

(2) The proposed issuance and sale of Bonds, and Common Stock, as described above, will constitute an issuance of securities within the purview of Section 204 of the Federal Power Act.

(3) Applicant is not organized and operating in a State under the laws of which the security issues here involved are regulated by a State Commission within the meaning of Section 204(f) of the Act, and the proposed issuance of securities are, therefore, not exempt by virtue of that Section from the requirements of Section 204 of the Act.

(4) The proposed issuance and sale of Bonds, and Common Stock, as hereinafter authorized, will be for a lawful object, within the corporate purposes of Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance by Applicant of service as a public utility and which will not impair its ability to perform that service, and is reasonably appropriate for such purposes.

(5) The period of public notice given in this matter is reasonable.

*The Commission orders:*

(A) The proposed issuance and sale of Bonds, and Common Stock, upon the terms and conditions and for the purposes specified in the application, as described above, are authorized, subject to the provisions of this order.

(B) The proposed issuance and sale of Bonds and the proposed issuance and sale of Common Stock in the manner set forth in the application shall not be consummated until:

(i) Applicant shall have amended its application pursuant to the requirements of Section 34.2(g) of the Commission's Regulations under the Federal Power Act relating to compliance with competitive bidding requirements, and Section 34.2(h)(1) of those Regulations relating to affiliation, and shall have either filed such amendments or shall have mailed them and advised the Commission by telephone and telegraph, as contemplated in Section 34.9 of the Regulations.

(ii) The Commission, by further order, shall have approved the price to be received by Applicant for the proposed issuance of Bonds and the interest rate thereof, the price per share to be received by Applicant for the Common Stock and the amount of any compensation for underwriters to be paid by Applicant in connection with the Common Stock.

(C) This authorization shall expire unless the transactions hereby authorized are consummated within 90 days from the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determinations of cost, or any other matter whatsoever now pending or which may come before this Commission.

(E) Nothing in this order shall be construed to imply any guarantee or obligation on the part of the United States with respect to any securities to which this order relates.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## IOWA SOUTHERN UTILITIES COMPANY, DOCKET NO. E-7277

### SUPPLEMENTAL ORDER AMENDING ORDER AUTHORIZING THE ISSUANCE OF PROMISSORY NOTES

(Issued April 28, 1967)

By order issued April 4, 1966, 35 FPC 455, in the above-entitled matter, the Commission, pursuant to Section 204 of the Federal Power Act, authorized Iowa Southern Utilities Company (Applicant) to issue up to $20,000,000 short term notes outstanding at any one time. The notes were to be issued to Continental Illinois National Bank and Trust Company of Chicago (Bank) under a Revolving Credit Agreement dated March 18, 1966. They were to be issued from time to time, with maturities of up to six months after dates, but not later than October 31, 1967. The interest rate was not to exceed the prime rate at the time of borrowing on the first $15,000,000, and not over ¼% above such rate on the balance. Applicant now has notes outstanding in the total amount of $3,900,000.

On March 6, 1967, Applicant filed an Amendment to its Application. In this Amendment, Applicant has requested that the Commission's order issued April 4, 1966, be amended so as to authorize the issuance of short term notes in accordance with an Amendment and Supplement to Revolving Credit Agreement dated September 9, 1966. Under this Amendment and Supplement to Revolving Credit Agreement, the Bank has agreed to lend to the Applicant, on or before September 30, 1968, such amounts as the Applicant may from time to time request, but not exceeding $15,000,000 outstanding at any one time. Each note will have a maturity of ninety days from its date of issuance. Borrowings subsequent to June 30, 1968 shall not exceed $3,000,000. If $3,000,000 in notes are outstanding on September 30, 1968, the Bank has agreed to establish a payment schedule of one payment of $2,000,000 on December 31, 1969 and one payment of $1,000,000 on December 31, 1970.

The Amendment and Supplement to Revolving Credit Agreement also provides that Applicant is required to issue and sell not less than $8,000,000 long term debt on or before June 30, 1967, and apply the net proceeds to the payment of all notes then outstanding; and on or before June 30, 1968, the Applicant is required to discharge not less than $10,000,000 in notes by the application of proceeds of additional long-term debt or other available funds.

The notes are to bear interest at the prime rate in effect at the time of each borrowing, except all notes outstanding on the earlier to occur of the date of the retirement of not less than $10,000,000 of notes on or before June 30, 1968, or on June 30, 1968, shall bear interest until maturity at a rate of ¼ of 1% above the Bank's prime rate then in effect.

Applicant states that the proceeds from the promissory notes will be used to finance Applicant's construction program which has a total estimated cost of $35,943,000 for three years, 1966, 1967 and 1968. The largest item in this program is $25,185,000 for the 212 mw Burlington Generating Station.

Written notice of the amendment to the application has been given to the Iowa State Commerce Commission and the Governor of that State. Notice has also been given by publication in the Federal Register on March 17, 1967 (32 F.R. 4187), stating that any person desiring to be heard or to make any protest with reference to the application, should file petitions or protests on or before March 30, 1967, with the Federal Power Commission, Washington, D.C. 20426. No protest, petition or request to be heard in opposition to the granting of the application has been received.

*The Commission finds:*

Good cause has been shown and it is necessary and appropriate for the purposes of the Federal Power Act, that Paragraphs (A) and (C) of the Commission's order issued April 4, 1966, be modified as hereinafter provided.

*The Commission orders:*

(A) Paragraphs (A) and (C) of the Commission's order issued April 4, 1966, in the above-entitled docket are amended to read as follows:

> (A) The proposed issuance of Promissory Notes in the aggregate principal amount of $15,000,000, outstanding at any one time, upon the terms and conditions and confined to the purposes specified in the Application as filed March 10, 1966 and as amended March 6, 1967, is hereby authorized, subject to the provisions of this order.
>
> (C) This authorization is expressly conditioned upon the final maturity of all notes over and above the amount of $3,000,000 being not later than June 30, 1968 and the final maturity of the balance of said notes not to exceed $3,000,000 being not later than December 31, 1970.

(B) All other terms and conditions, as set forth in Paragraphs (B), (D) and (E) of the Commission's order issued April 4, 1966 shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## AREA RATE PROCEEDING, ET AL. (OTHER SOUTHWEST AREA). DOCKET NO. AR67-1, ET AL.

### ORDER DENYING MOTION TO DELETE RESPONDENT

(Issued May 1, 1967)

By motion filed on April 13, 1967, El Paso Natural Gas Company (El Paso), seeks to be deleted as a party-respondent in these proceedings. El Paso urges in support of the motion that during 1966 it had two relatively small purchases in the Other Southwest Area and consequently its operations in the area were of a *de minimis* nature. In seeking to be relieved of participating in the proceedings, El Paso refers to the Commission's order issued on August 22, 1966, 36 FPC 519, deleting Texas Gas Pipe Line Corporation (Texas Gas)* as a respondent in the Pipeline Production Area Rate Proceeding, Docket No. RP66-24 on the ground that the company's activities were of a *de minimis* nature in relation to the matters covered by that proceeding. El Paso's reference to that order has no application here since the Pipeline Production proceeding is concerned primarily with natural gas production by pipeline companies and it appeared, among other things, that Texas Gas had no natural gas production. The order instituting these proceedings stated that the pipeline purchasers were joined as parties-respondent since the proceedings related to contracts theretofore entered by the pipeline purchasers. While El Paso may presently have relatively small purchases in the Other Southwest Area, it is appropriate that it remain as a party-respondent herein. Of course, the degree of participation, either individually or through a common interest group, by any respondent in the proceedings is determined by each party.

*The Commission orders:*

The motion filed by El Paso to be deleted as a party-respondent to this proceeding is denied.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## FLORIDA GAS TRANSMISSION COMPANY, DOCKET NO. CP65-393

### ORDER GRANTING REHEARING ON COMMISSION'S OWN MOTION

(Issued May 1, 1967)

On March 31, 1967, the Public Service Commission of the State of New York filed a Notice of Intervention in the above-entitled proceeding, a Motion for Permission to File Belated Notice of Intervention, and an Application for

---

* Incorrectly referred to by movant as Texas Gas Transmission Corporation.

Rehearing of the Commission's Opinion No. 516 and order issued March 1, 1967, 37 FPC 424. On April 11, 1967, the staff filed a response, contending that the filing of its Notice did not effect automatically the New York Commission's intervention, but that the Commission should authorize such intervention. On April 19, 1967, the Florida Gas Transmission Company and Florida Power & Light Company filed answers in which they contended that the Notice of Intervention and Application for Rehearing should both be rejected. The Florida Public Service Commission filed an answer on April 20, 1967, taking a similar position.

As a condition to our issuance of the requested certificate we directed the Florida Gas Transmission Company, in paragraph (B)(4) of our March 1, 1967 order, to establish within 30 days "that the MMBtu purchase contract of March 12, 1965, is still effective." By letter of March 31, 1967, Florida Gas advised us that the gas purchase contract was still effective and accepted certification of the facilities at issue. However, along with that acceptance Florida Gas forwarded to the Commission a copy of a letter dated March 28, 1967, in which Pan American advised Florida Gas, the Florida Power & Light Company, and Austral Oil Incorporated that the parties had agreed "that the MMBTU Purchase Contract shall be reinstated and fully in effect upon the aforesaid order of March 1, 1967 becoming legally final and no longer subject to administrative or judicial review as of Midnight, March 31, 1967." The letter also provided that "if any condition exists after Midnight, March 31, 1967, which will have the effect of prolonging the certificate proceedings in Docket No. CP65-393, the contract shall not be considered reinstated." In view of that transmittal, it is unclear as to whether the condition in our order has been complied with and whether there still is available to the project the supply of gas upon which our certification was based.

In order to resolve this question before taking further action we shall grant rehearing on our own motion. By this action Florida Gas will have the opportunity to inform us as to compliance with the condition in our order, particularly with respect to the exact status of the gas supply.

In view of this uncertainty as to the gas supply there is no necessity to act upon the New York Commission's Notice of Intervention or its Application for Rehearing until this question has been resolved, and we shall therefore defer action on the filings made by the New York Commission. By such deferral it is clearly intended that none of the rights, if any, of the New York Commission shall be adversely affected hereby.

*The Commission orders:*

(A) Rehearing is granted in the above-entitled matter.

(B) Within twenty days of this order, Florida Gas shall file a statement showing compliance with the condition in paragraph (B)(4) of the Commission's order of March 1, 1967 with respect to the continued effectiveness of the MMBtu Purchase Contract of March 12, 1965, including the present status of the proposed gas supply.

(C) Action on the New York Commission's Notice of Intervention and Application for Rehearing is deferred until further order of the Commission.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## EAST TENNESSEE NATURAL GAS COMPANY, DOCKET NOS. CP67-181 AND CP67-221; KENTUCKY-TENNESSEE NATURAL GAS COMPANY, CP67-270; THE MAYOR AND ALDERMEN OF THE TOWN OF ALGOOD, TENNESSEE AND EAST TENNESSEE NATURAL GAS COMPANY, CP67-206

### ORDER CONSOLIDATING APPLICATIONS FOR HEARING AND DENYING REQUEST FOR TEMPORARY CERTIFICATE

(Issued May 2, 1967)

By application filed February 6, 1967, under Section 7(c) of the Natural Gas Act, East Tennessee Natural Gas Company (East Tennessee) seeks a certificate of public convenience and necessity authorizing the construction and operation of facilities adequate to increase East Tennessee's system capacity by approximately 28,000 Mcf/d in order to meet estimated requirements for the 1967-68 heating season and thereafter.

At the time East Tennessee's application was filed, we had pending before us the application filed January 23, 1967, by The Mayor and Aldermen of the Town of Algood, Tennessee (Algood), under Section 7(a) of the Natural Gas Act requesting an order directing East Tennessee to interconnect its facilities with and sell natural gas to Algood in lieu of Algood's present gas supply from the City of Cookeville. In response to Algood's application, Respondent, East Tennessee, stated that its present capacity is insufficient to meet Algood's request on a long-term basis, but that upon authorization of East Tennessee's requests in Docket No. CP67-221 such capacity would be available.

On March 21, 1967, Kentucky-Tennessee Natural Gas Company (Kentucky-Tennessee) filed an application pursuant to Section 7(c) of the Natural Gas Act to sell volumes of natural gas to Cumberland Valley Pipe Line Company, such volumes to be purchased by Kentucky-Tennessee from East Tennessee. East Tennessee's application in Docket No. CP67-221 includes a request to sell natural gas volumes to Kentucky-Tennessee.

Since the applications of Algood in Docket No. CP67-206 and Kentucky-Tennessee in Docket No. CP67-270 are dependent upon our disposition of East Tennessee's application in Docket No. CP67-221, these applications will be consolidated for hearing and disposition. The Presiding Examiner shall fix the dates for holding a prehearing conference, the commencement of hearing and for the service of testimony.

By application filed December 23, 1966, East Tennessee requested temporary authorization until November 1, 1967, to provide additional firm service of approximately 9,000 Mcf/d of natural gas to four resale and three direct sale customers. The issuance of such temporary authorization under Section 7(c) of the Natural Gas Act would be appropriate only to assure maintenance of adequate service during an emergency period. East Tennessee's application in Docket No. CP67-181, however, shows no evidence of emergency at present or until November 1, 1967, and we will accordingly deny East Tennessee's application for a temporary certificate. Nevertheless, East Tennessee will be afforded full opportunity in Docket No. CP67-221 to establish its need to increase firm service to the customers involved in Docket No. CP67-181.

*The Commission finds:*

(1) Disposition of the above-entitled dockets are dependent upon the Commission's disposition of East Tennessee's application in Docket No. CP67-221, and the dockets accordingly should be consolidated for hearing and disposition.

(2) East Tennessee has not shown in Docket No. CP67-181 an emergency within the meaning of Section 7(c) of the Natural Gas Act, and its request for a temporary certificate of public convenience and necessity accordingly should be denied.

*The Commission orders:*

(A) The above-entitled dockets are consolidated for hearing and disposition.

(B) The request of East Tennessee in Docket No. CP67-181 for a temporary certificate of public convenience and necessity is denied.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## EL PASO NATURAL GAS COMPANY, DOCKET NO. CP62-154

### ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 2, 1967)

On October 12, 1966, El Paso Natural Gas Company (Petitioner) filed in Docket No. CP62-154 a petition, as supplemented on March 8, 1967, to amend the order of the Commission issued in said docket on October 17, 1962, 28 FPC 614, and amended on May 2, 1966, 35 FPC 664. By the instant filing Petitioner requests authorization to continue natural gas service on an interruptible, best efforts basis, to Southern California Gas Company and Southern Counties Gas Company of California (jointly referred to as Southern) by means of existing facilities under the terms of its presently effective G-X-2 Rate Schedule for a period extending from January 1, 1967, through October 31, 1968, all as more fully set forth in the petition to amend, as supplemented.

The order issued in the subject docket, as amended, authorized Petitioner to sell under its Rate Schedule G-X-2, FPC Gas Tariff, Original Volume No. 1, and deliver to Southern an annual volume of up to 63,000,000 Mcf of natural gas at 14.9 psia (63,725,000 Mcf at 14.73 psia) for a period ending December 31, 1966. Petitioner's Rate Schedule G-X-2 specifies a rate of 21.85 cents per Mcf at 14.73 psia.

Upon application filed on December 22, 1966, Petitioner was issued a temporary certificate on January 20, 1967, authorizing the delivery to Southern of up to an average daily quantity of 100,000 Mcf of G-X-2 gas until commencement of deliveries by Transwestern Pipeline Company (Transwestern) pursuant to authorization issued by the order accompanying Opinion No. 500, 36 FPC 176, or until the G-X-2 deliveries so authorized aggregate 12 billion cubic feet, whichever first occurs.

In its supplement of March 8, 1967, Petitioner expresses its willingness to accept an amended certificate conditioned to provide that the average daily sales of G-X-2 gas shall not exceed 100,000 Mcf. This volume approximates the average daily quantity that Southern's market can utilize. By letter dated February 24, 1967, Southern also indicates that it would be agreeable to such a condition.

Petitioner states that no new facilities are required to implement the instant proposal.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued in the instant docket on October 17, 1962, as amended, be amended further as hereinafter ordered and conditioned.

*The Commission orders:*

(A) The Commission's order issued on October 17, 1962, in Docket No. CP62–154, as amended, is amended further so as to authorize the continued sale under Petitioner's Rate Schedule G–X–2 and delivery of natural gas jointly to Southern California Gas Company and Southern Counties Gas Company of California for a period extending from January 1, 1967, through October 31, 1968, as hereinbefore set forth and as more fully set forth in the petition to amend and supplement thereto filed in this proceeding.

(B) The authorization granted by paragraph (A) above is conditioned as follows:

(1) The average daily sales of natural gas by Petitioner to Southern under Petitioner's G–X–2 Rate Schedule shall not exceed 100,000 Mcf at 14.73 psia;

(2) Petitioner shall file monthly reports setting forth the volumes of natural gas sold and delivered to Southern;

(3) Deliveries of natural gas by Petitioner to Southern shall be made only on those days when Pacific Lighting Service and Supply Company has taken 640,000 Mcf of gas from Transwestern Pipeline Company, when such quantities are available and

(4) Petitioner shall file with the Commission an appropriate revised service agreement with Southern in accordance with the Commission's Regulations under the Natural Gas Act.

(C) In all other respects the certificate issued in the subject docket, as amended on May 2, 1966, shall remain in full force and effect.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## FLORIDA POWER & LIGHT COMPANY, DOCKET NO. E–7210

### ORDER DENYING APPLICATION FOR REHEARING

(Issued May 2, 1967)

On March 20 1967, 37 FPC 544, the Commission issued Opinion No. 517 and accompanying order in the above-entitled proceeding. Application for rehearing of this Opinion and order has been timely filed under Section 313(a) of the Federal Power Act by the Florida Power & Light Company.

In Opinion No. 517 and order the Commission found that the Florida Power & Light Company (FPL) is a public utility within the meaning of that term as used in Section 201 of the Federal Power Act and subject to the jurisdiction of the Commission because FPL owns and operates facilities, among others, for the transmission of electric energy transmitted from points of generation in the States of Georgia and Florida to points of consumption outside the State in which it is generated. The Commission further found that these facilities are in addition to, and do not include, facilities used by FPL for the generation of electric energy, facilities used in local distribution or only for the transmission of electric energy in intrastate commerce, or facilities for the transmission of electric energy consumed wholly by the transmitter. The Commission ordered FPL to file original cost statements in the manner provided in Section 120.3 of the Commission's Regulations under the Federal Power Act and Electric Plant Instruction No. 1 of the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees Subject to the Provisions of the Federal Power Act. FPL was also ordered to comply with all requirements of the Commission's Regulations under such Act.

FPL requests that the Commission grant rehearing and thereafter issue a new order dismissing this proceeding on the merits, asserting that the Commission's findings as above described are without basis in law or in fact. In support of its application for rehearing, FPL lists numerous specific findings which it contends represent error on the part of the Commission.

Upon consideration of FPL's application the Commission finds that the arguments advanced by FPL are essentially the same as those set forth in its brief to the Examiner and in its exceptions to the Examiner's initial decision. These arguments were covered in the Examiner's decision and were rejected in the Commission's Opinion No. 517. No new facts or arguments are presented which would be cause for granting rehearing or disturbing the original Opinion and order.

*The Commission finds:*

The assignments of error and grounds for rehearing set forth in the above-described application for rehearing present no facts or principles of law which were not considered by the Commission when it issued its Opinion No. 517 and accompanying order on March 20, 1967, and which having now been considered warrant any change in or modification of said Opinion and order.

*The Commission orders:*

The application for rehearing filed by the applicant, Florida Power & Light Company, on April 11, 1967, is hereby denied.

Commissioners Carver and O'Connor *dissenting* for the reasons set forth in their dissent to Opinion No. 517 issued March 20, 1967.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## KANSAS-NEBRASKA NATURAL GAS COMPANY, INC., DOCKET NO. CP67-235

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 2, 1967)

On February 21, 1967, Kansas-Nebraska Natural Gas Company, Inc. (Applicant) filed in Docket No. CP67-235 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities and the transportation of natural gas, all as more fully set forth in the application.

Applicant seeks authorization for the installation, construction and operation of the following facilities:

(1) 14.3 miles of 12-inch pipeline between the Huntsman Storage Field and the Sidney-Big Springs, Nebraska 12-inch line,

(2) 18.4 miles of 12-inch pipeline to parallel the existing 10-inch pipeline between Paxton and Hershey, Nebraska,

(3) 10.5 miles of 8-inch pipeline to parallel the existing 8-inch pipeline between Grand Island and Albion, Nebraska,

(4) 9.5 miles of 8-inch pipeline to parallel the existing 6-inch pipeline between Albion and Neligh, Nebraska,

(5) 1100 horsepower compressor addition to the Big Springs, Nebraska Compressor Station,

(6) 1100 horsepower compressor addition to the Albion, Nebraska Compressor Station, and

(7) 2700 horsepower compressor addition at the Holcomb, Kansas Compressor Station.

The proposed facilities will permit increased peak day withdrawals from Applicant's Huntsman Storage pool to offset declining wellhead pressures in the Hugoton field, and increase Applicant's transmission system capacity by approximately 7000 Mcf of natural gas per day which is needed to meet Applicant's forecasted 1967–1968 peak day market requirements.

The total estimated cost of Applicant's proposed construction is $1,860,000 of which Applicant states that the costs will be paid out of current working capital and, if necessary, interim bank loans.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on April 27, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Kansas-Nebraska Natural Gas Company, Inc., a Kansas corporation having its principal place of business in Phillipsburg, Kansas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G–259 (3 FPC 966).

(2) The proposed construction and operation of facilities, and the transportation of natural gas in interstate commerce by Applicant as hereinbefore described and as more fully described in the application and supplement are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities, and the transportation of natural gas in interstate commerce are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act. and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in para-

graphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to Applicant, authorizing the construction and operation of facilities and the transportation of natural gas, all as more fully described in the application and exhibits thereto,

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation, and the transportation of gas authorized in paragraph (A) above shall commence, as provided in paragraph (b) of Section 157.20 of the aforesaid Regulations within 12 months of the date on which this order issues.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## LONE STAR GAS COMPANY, DOCKET NO. CP67-237

### FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT

(Issued May 2, 1967)

On February 23, 1967, Lone Star Gas Company (Applicant) filed in Docket No. CP67-237 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval of the Commission to abandon the operation of certain natural gas facilities for the transportation of natural gas in interstate commerce, all as more fully set forth in the application.

Applicant seeks permission and approval to abandon, remove and salvage the following pipelines and appurtenant facilities:

(1) 6,496 feet of 4-inch and 675 feet of 2-inch Line A-18-a,
(2) 1,635 feet of 4-inch Line A-18-3,
(3) 1,105 feet of 2-inch Line A-18-3-1,
(4) 5,151 feet of 3-inch Line A-18-4,
(5) 2,369 feet of 2-inch Line A-18-4-1,
(6) 2,639 feet of 2-inch Line A-18-7,
(7) 3,253 feet of 2-inch Line A-18-13
(8) 1,454 feet of 2-inch Line 71-23-1-1,
(9) 8,960 feet of 4-inch Line 71-23-1-3,
(10) 14,838 feet of 6-inch Line ED,
(11) 3,877 feet of 3-inch Line GN-35-T,
(12) 5,540 feet of 6-inch Line E5AA-A,
(13) 154 feet of 4-inch and 76 feet of 3-inch Line FX-476-T,
(14) 634 feet of 4-inch Line FX-506-T,
(15) 1,195 feet of 2-inch Line FX-529-T,

(16) 10,607 feet of 6-inch and 51 feet of 4-inch Line H-W,
(17) 3,341 feet of 6-inch Line GDH-A,
(18) 14,335 feet of 6-inch and 3,974 feet of 4-inch Line GDS-B,
(19) 3,740 feet of 6-inch Line FX 410-T, and
(20) 5,001 feet of 4-inch Line FX 427-T.

The above-listed lateral pipelines and related facilities are no longer needed or required to transport gas due to termination of sales of gas or the disconnection of depleted sources of gas supply and that the proposed abandonment would not result in any abandonment or diminution of natural gas service to any city, town or community.

Applicant has grouped the facilities proposed for abandonment into 20 projects. Nine of these projects, which are about 6.39 miles in length, comprise sales laterals located in Wichita County, Texas. Sales were principally to well-drilling or lease-operating customers. The well drilling has been completed and the related sales have been terminated.

The remaining eleven projects, consisting of laterals about 12.76 miles in length, are located in Grayson County, Texas and Cotton, Marshall and Stephens Counties, Oklahoma. The sources to which the gathering facilities were connected have either become depleted or their deliverability so declined that they have been disconnected from Applicant's system.

In project 10 (Line ED) and Project 17 (Line GDH-A) only the terminal portion of the lines will be abandoned. The remaining segment of the two lines will remain in place for the continued transportation of gas purchased by Applicant from other supply sources in the area.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on April 27, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorizations sought and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Lone Star Gas Company a Texas corporation having its principal place of business in Dallas, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of April 11, 1944, in Docket No. G-442 (4 FPC 565).

(2) The facilities proposed to be abandoned, as hereinbefore described and as more fully described in the application herein, are used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and such abandonment is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The proposed abandonment of the aforesaid facilities is permitted by the public convenience and necessity and approval thereof should be granted as hereinafter ordered.

*The Commission orders:*

(A) Permission for and approval of the abandonment of the facilities hereinbefore described, as more fully described in the application in this proceeding, are granted to Applicant.

(B) Applicant shall advise the Commission of the date of abandonment of the facilities as authorized in paragraph (A) above within 10 days of such abandonment.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## REPORTS BY NATURAL GAS COMPANIES OF CURTAILMENTS OF SERVICE TO INDUSTRIAL CUSTOMERS, DOCKET NO. R-321

## ORDER NO. 344

### REVISING THE SUPPLEMENTARY SCHEDULE 520A TO ANNUAL REPORT FPC FORM NO. 2

(Issued May 2, 1967)*

The schedule "Curtailments of Main Line Industrial Customers" required to be filed by natural gas pipeline companies as a supplement to their Annual Report FPC Form No. 2 requires the reporting of curtailments, the average daily delivery during the system 3-day peak period, and the maximum 24-hour delivery during the year to such customers.[1]

Our review and analysis of the information supplied in the initial submission of these reports discloses that the following revisions of the existing schedule are desirable.

1. Schedule 520A now requires the reporting, in columns (e) and (f), of the maximum 24-hour delivery made to each main line industrial customer during the year. In view of the claims by many companies that the review of their daily sales records required to obtain these peak deliveries is both time-consuming and a cost burden, and in light of the fact that the primary utility of the information would have been in connection with a method of cost allocation no longer under consideration, we have decided to eliminate the reporting of this information.

2. The information supplied in this schedule covers a report year which ends on each April 30 but because the data for the last month (April) is often not available until the date (May 15) the report is now required to be submitted, we are revising instruction 7. to change the filing date to June 15.

3. We have found, also, that the requirement, in instruction 1., to report in group totals the curtailment of small customers (less than 50,000 Mcf annually) can be deleted. Many companies have large numbers of such customers and their small size does not warrant daily metering so they were unable to supply the data. We find that the absence of this information has no appreciable effect on the usefulness of the report.

These three changes should reduce substantially the reporting burden, a result clearly in the public interest.

4. The schedule, pages 519–520 of FPC Form No. 2, was revised beginning with the report year 1966, to provide for the reporting of "Field and Main Line Industrial Sales of Natural Gas."[2] Since the schedule 520A supplements the schedule on pages 519–520 and, at the suggestion of some of the reporting companies, we are revising it to conform to the revision of the basic schedule by the addition of the words "Field and" to both the title and instruction paragraph 1. of the schedule.

The change is not only conformatory but clarifying, as well. Instruction 1. in the supplemental schedule 520A directs, in part, that

---

* Published in the Federal Register on May 10, 1967 (32 F.R. 7051).

[1] The schedule was prescribed for inclusion in Form No. 2 by Order No. 300 in Docket No. R–243, issued June 24, 1965, 33 FPC 1286, 30 F.R. 8831, amended by Order No. 300–A, issued March 30, 1966, 35 FPC 451, 31 F.R. 5428.

[2] Order No. 310–B, issued December 22, 1966, in Docket No. R–283, 36 FPC 1144, 31 F.R. 16562.

> 1. The pipeline company shall report below particulars concerning curtailments of deliveries of natural gas to each customer identified in the preceding schedule * * *

*i.e.*, the schedule on pages 519-520 of Form No. 2 which, in Instruction 1., states, in pertinent part:

> 1. Report below particulars concerning sales of natural gas to industrial customers *served other than from local distribution systems* operated by the respondent. (Emphasis added)

Thus the revision here adopted makes it clear that curtailments of service to all industrial customers except those served from distribution lines are to be reported.

*The Commission finds:*

(1) It is necessary and appropriate for the administration of the Natural Gas Act that the supplementary schedule "Curtailments of Main Line Industrial Customers," page 520A of FPC Form No. 2, be revised as ordered herein.

(2) Since the amendments to the schedule ordered herein involve either a reduction in the reporting requirements or are of a clarifying nature and the information contained therein is not generally available to the public,[3] the notice and effective date requirements of section 4 of the Administrative Procedure Act are not applicable.

*The Commission*, acting pursuant to the provisions of the Natural Gas Act, as amended, particularly sections 10 and 16 thereof (52 Stat. 826, 830; 15 U.S.C. 717i, 717o), *orders:*

(A) Effective upon the issuance of this order, FPC Form No. 2, prescribed by § 260.1, Chapter I, Title 18 of the Code of Federal Regulations, is amended by revising the supplementary schedule 520A thereto as follows:

1. The title is revised to read "Curtailments of Field and Main Line Industrial Customers."

2. In instruction paragraph 1., the matter in parenthesis is revised to read "(Field and Main Line Industrial Sales of Natural Gas)," and the third sentence, "Curtailments * * * by states.", is deleted.

3. Instruction paragraph 2. is revised to read:

> 2. All volumes should be stated in Mcf at 14.73 psia, 60° F.

4. Instruction paragraph 3. is revised by changing "(d), (e) and (g)." to "(d) and (e),".

5. Instruction paragraph 5. is revised by changing "column (g)" to "column (e)."

6. Instruction paragraph 6. is revised by changing "column (h)" to "column (f)" and deleting the last sentence thereof.

7. Instruction paragraph 7. is revised by changing "May 15" to "June 15."

8. The heading to and columns (e) and (f) are deleted and columns (g) and (h) are redesignated "(e)" and "(f)," respectively.

The schedule, as so revised, is appended hereto.

(Secs. 10, 16, 52 Stat. 826, 830; 15 U.S.C. 717l, 717o)

(B) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

## TEXAS GAS TRANSMISSION CORPORATION, DOCKET NO. CP67-252

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 2, 1967)

On March 6, 1967, Texas Gas Transmission Corporation (Applicant) filed in Docket No. CP67-252 a "budget-type" application pursuant to Section 7(c) of the Natural Gas Act, as implemented by Section 157.7(b) of the Regulations under the Act, for a certificate of public convenience and necessity authorizing the construction during the 12 month period commencing May 30, 1967, and the operation of certain gas purchase facilities, all as more fully set forth in the application.

Applicant seeks authorization for the construction and operation of field facilities to enable it to attach to its certificated main pipeline system natural gas which will be purchased from authorized independent producers in the general area of its system.

The total estimated cost of Applicant's proposed facilities will not exceed $2,000,000, with no single project exceeding a cost of $500,000. Applicant proposes to finance said costs from funds on hand.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

At a hearing held on April 27, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Texas Gas Transmission Corporation, a Delaware corporation having its principal place of business in Owensboro, Kentucky, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of March 30, 1949, in Docket No. G-859 (8 FPC 228).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(5) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas

Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(6) The authorization hereinafter granted should be limited to construction during the 12 month period commencing May 30, 1967, and the total expenditures thereunder should be limited to a maximum of $2,000,000, with no single project to exceed a cost of $500,000.

*The Commission orders:*

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, Texas Gas Transmission Corporation, to construct during the 12 month period commencing May 30, 1967, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities only to take natural gas supplies from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(C) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(D) The authorization granted in paragraph (A) above is limited to construction during the 12 month period following the issuance of this order and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $2,000,000, with no single project to exceed a cost of $500,000.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## WEST OHIO GAS COMPANY AND MICHIGAN WISCONSIN PIPE LINE COMPANY, DOCKET NO. CP67-245

### FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued May 2, 1967)

On March 1, 1967, West Ohio Gas Company (Applicant) filed in Docket No. CP67-245 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Michigan Wisconsin Pipe Line Company (Respondent) to establish physical connection of its transportation facilities with the facilities proposed to be constructed by Applicant and to sell and deliver to Applicant volumes of natural gas for resale and distribution in the incorporated communities of Willshire, Rockford, Ohio City, Haviland and Scott, and the unincorporated Village of Tipton, all in the State of Ohio, all as more fully set forth in the application.

The Village of Haviland is located approximately 3.75 miles due east of Respondent's main transmission line and the Village of Scott is located approximately 1½ miles south of Haviland. The unincorporated Village of Tipton is located adjacent to Respondent's main transmission line on the northwest side.

The Village of Willshire is located approximately 3.25 miles southeast of Respondent's main transmission line and the Village of Ohio City is approximately 9 miles generally east of Willshire. The Village of Rockford is approximately 5 miles south of Ohio City.

Applicant proposes that Respondent construct, pursuant to its "10-cent" formula, approximately 4.9 miles of 4-inch transmission lateral pipeline from its main transmission line, approximately 3.25 miles northwest of Willshire, to the connection with the proposed lateral pipeline of Applicant that will serve Willshire, Rockford and Ohio City, and, approximately 3.0 miles of 4-inch transmission lateral pipeline from its main transmission line, approximately 3.75 miles due west of Haviland, to the connection with the proposed lateral pipeline of Applicant that will serve Haviland and Scott. Applicant proposes to construct approximately 12.5 miles of pipeline to connect the first mentioned lateral with the proposed distribution systems of Willshire, Rockford and Ohio City, and to construct approximately 2.6 miles of pipeline to connect the next mentioned lateral with the proposed distribution systems of Haviland and Scott. Applicant also proposes to construct separate distribution systems in each of the aforementioned communities.

Applicant's estimated third year annual and peak day requirements are 246,324 Mcf and 1,722 Mcf of natural gas, respectively.

The estimated cost of Applicant's proposed project, in the first year of operation, is $488,337, said cost to be financed with internally generated funds and long-term debt.

On April 7, 1967, Respondent filed an answer to the application herein, stating that it has no objection to the issuance by the Commission of an order as requested by Applicant.

Due notice of the filing of the application was published in the Federal Register on March 16, 1967 (32 F.R. 4147). No protest, petition to intervene or notice of intervention has been filed.

*The Commission finds:*

(1) Respondent, Michigan Wisconsin Pipe Line Company, a Delaware corporation with its principal place of business in Detroit, Michigan, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of November 30, 1946, in Docket No. G-669 (5 FPC 953).

(2) Applicant, West Ohio Gas Company, a corporation organized and existing under the laws of the State of Ohio, is authorized to construct and operate facilities and distribute and sell natural gas as proposed.

(3) It is necessary and desirable in the public interest that Respondent be directed to establish physical connection of its natural gas transmission facilities with the proposed facilities of Applicant and to sell and deliver natural gas to Applicant, as set forth in the application and as hereinafter ordered and conditioned.

(4) This order should be conditioned upon Applicant being prepared to receive natural gas from Respondent, as proposed, within one year from the date on which this order issues.

(5) The requirement that Respondent serve Applicant, as proposed, will not place any undue burden upon Respondent nor impair its ability to render adequate service to its existing customers.

*The Commission orders:*

(A) Respondent is directed to establish physical connection of its natural gas transmission system with the facilities to be constructed by Applicant and to sell and deliver up to 1,722 Mcf of natural gas per day to Applicant, all as hereinbefore described and as more fully described in the application.

(B) Applicant shall be prepared to receive natural gas from Respondent within one year from the date of this order.

(C) Respondent shall notify the Commission of the commencement of service within 10 days thereof.

(D) Respondent shall execute and file with the Commission a service agreement with Applicant in accordance with the Commission's Regulations.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## COLUMBIA GULF TRANSMISSION COMPANY, DOCKET NO. CP67-243

### FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT OF FACILITIES

(Issued May 3, 1967)

On February 27, 1967, Columbia Gulf Transmission Company (Applicant) filed in Docket No. CP67-243 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon certain natural gas purchase facilities, all as more fully set forth in the application.

Specificaly, Applicant seeks authorization for the abandonment of its field lines and appurtenances thereto constructed to take gas for the account of United Fuel Gas Company (United Fuel) from properties in the following fields in Louisiana:

| Field | Parish | Producer | Lines to be abandoned |
|---|---|---|---|
| Deep Lake | Cameron | Texas Pacific Oil Co. (successor to The Calvert Distilling Co., d/b/a Frankfort Oil Co.), *et al.* | 6,330 feet of 6-inch line. |
| Ellis | Acadia | Forest Oil Corp., *et al* | 6,328 feet of 4-inch line. |
| Do | do | Humble Oil & Refining Co | 6,521 feet of 3-inch line and Measuring Station. |
| Go Around Bayou | Cameron | Kerr-McGee Corp., *et al* | 7,300 feet of 6-inch line. |

Said facilities were constructed and service therefrom was initiated pursuant to authorization granted by orders issued in Docket Nos. G-12375, G-9900. G-2058 and G-17550.

Applicant cites the following as reasons for its proposed abandonment of the subject facilities:

(1) The Texas Pacific Oil Company (Texas Pacific) well which is connected to the gas purchase facilities proposed to be abandoned, is no longer capable of production.[1]

(2) Forest Oil Corporation, *et al.* (Forest Oil), pursuant to an agreement with United Fuel, has changed its delivery point to the outlet of the Egan Processing Plant of San Jacinto Corporation and therefore the present gathering facilities are no longer required.

---

[1] Texas Pacific is delivering gas to Applicant from other producing properties in the Deep Lake Field under the same rate schedule now on file with the Commission.

(3) Gas Production of Humble Oil & Refining Company (Humble) and Bateman Drilling Company, *et al.* (Bateman) from the Ellis Field has ceased and all leases have expired.[2]

(4) Kerr-McGee Corporation, *et al.* (Kerr-McGee) and Humble have abandoned all their wells in the Go Around Bayou Field for lack of production and the leases on which these wells are located have expired.[3]

Applicant transports gas for United Fuel under Applicant's cost of service Rate Schedule T-1. The effect of the proposed abandonment of facilities will be reflected in the rate charged.

With the exception of certain valves located above ground, the subject facilities will be abandoned in place due to the prohibitive cost of salvaging.

The costs associated with the proposed abandonment are as follows:

| | |
|---|---|
| Original cost | $136, 897 |
| Cost of retirement | 2, 800 |
| Total cost | 139, 697 |
| Less salvage value | 1, 900 |
| Net charge to depreciation reserve | 137, 797 |

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

At a hearing held on April 27, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Columbia Gulf Transmission Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of November 5, 1958, in Docket No. G-15529 (20 FPC 681).

(2) The facilities to be abandoned, as hereinbefore described, and as more fully described in the application in this proceeding, are used in the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and abandonment of such facilities is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The abandonment by Applicant, as hereinbefore described, is permitted by the public convenience and necessity and an order approving same should be issued as hereinafter ordered.

*The Commission orders:*

(A) Permission for and approval of the abandonment by Applicant of the facilities hereinbefore described, all as more fully described in the application in this proceeding, are granted upon the terms and conditions of this order.

(B) Applicant shall advise the Commission of the date of said abandonment within ten days thereof.

---

[2] Humble filed an abandonment application in Docket No. CI66-596 and the Commission granted permission to abandon by order dated March 7, 1966. Bateman and United Fuel signed a cancellation agreement dated August 25, 1966, and Bateman has been requested to file an abandonment application for its wells in the Ellis Field, Acadia Parish, Louisiana.

[3] Humble's Rate Schedule No. 145 has been cancelled. Kerr-McGee has been requested to file an abandonment application for its wells in the Go Around Bayou Field, Cameron Parish, Louisiana.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## TRUNKLINE GAS COMPANY, DOCKET NO. CP67-101 AND THE CAMINO CORPORATION (FORMERLY CAMINO OIL CORPORATION), DOCKET NO. CI67-613

### FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT

(Issued May 3, 1967)

On October 17, 1966, Trunkline Gas Company (Applicant) filed an application and supplement thereto filed December 27, 1966, in Docket No. CP67-101 pursuant to Section 7(b) of the Natural Gas Act for permission and approval of the Commission to abandon the sale of natural gas by it from production of which it is part owner, to Transcontinental Gas Pipe Line Corporation (Transco), all as more fully set forth in the application and supplement thereto.

Applicant states that due to the rapid decrease in the reservoir pressure in the Luby Field Area in Nueces County, Texas, which will require the installation of compression facilities, the presence in excess of three-tenths grain of hydrogen sulphide per 100 cubic feet (quality specification in Transco contract), and the termination of the contract term (September 12, 1966), it is not economically feasible for Applicant to install compression and desulphurization facilities to continue the sale to Transco.

Applicant's sale to Transco is presently being made under its FPC Gas Rate Schedule F-4 (authorized in Docket No. CP62-281). Upon receipt of the requested authorization Applicant will file a notice of cancellation of the related Rate Schedule.

On October 20, 1966, The Camino Corporation (Camino) filed an application in Docket No. CI67-613, pursuant to Section 7 of the Natural Gas Act to abandon the sale and delivery of natural gas to Transco from the Luby Field in Nueces County, Texas, District No. 4, in which acreage Trunkline (Applicant herein) has a 50% interest. Camino's sale was authorized in Docket No. CI62-992. Transco does not oppose the abandonment requested, and has executed an agreement cancelling its contract with Camino. The related Notice of Cancellation of Camino's Rate Schedule No. 1, filed October 20, 1966, should be accepted for filing, effective from the date of issuance of this order. The certificate issued to Camino Oil Corporation in Docket No. CI62-992 should be terminated, effective from the date of issuance of this order.

After due notice, no petition to intervene, notice of intervention, or protest to the granting of the application has been filed.

At a hearing held on April 27, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplement thereto and exhibits, submitted in support of the authorization sought, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Trunkline Gas Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 29, 1949, in Docket No. G-882 (8 FPC 250).

(2) Applicant, The Camino Corporation (formerly Camino Oil Corporation), is engaged in the sale of natural gas in interstate commerce for resale for ultimate public consumption, subject to the jurisdiction of the Commission,

and is therefore, a "natural-gas company" within the meaning of the Natural Gas Act.

(3) The sale of natural gas proposed to be abandoned by Trunkline Gas Company in Docket No. CP67-101, and by the Camino Corporation in Docket No. CI67-613, as hereinbefore described and as more fully described in the respective applications in these proceedings, are subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(4) The proposed abandonments of sale by Trunkline and Camino are permitted by the public convenience and necessity and approval thereof should be granted as hereinafter ordered.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the certificate of public convenience and necessity issued in Docket No. CI62-992, be terminated, Camino's Rate Schedule No. 1 be cancelled, and the Notice of Cancellation filed by Camino on October 20, 1966, be accepted for filing and designated as Supplement No. 1 thereto, to be effective from the date of issuance of this order.

*The Commission orders:*

(A) Permission for and approval of the abandonment of the sale and delivery of natural gas by Applicant to Transco, and by The Camino Corporation (formerly Camino Oil Corporation) to Transco, hereinbefore described, and as more fully described in the applications filed in these proceedings is granted.

(B) Trunkline shall advise the Commission of the date of abandonment of service as authorized in paragraph (A) above within 10 days of such abandonment.

(C) Camino's Rate Schedule No. 1 is cancelled and the Notice of Cancellation of Camino's Rate Schedule No. 1, designated Supplement No. 1 thereto is accepted for filing effective from the date of issuance of this order.

(D) The certificate of public convenience and necessity issued to Camino Oil Corporation in Docket No. CI62-992 is terminated.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## FLORIDA GAS TRANSMISSION COMPANY, DOCKET NO. CP67-182

### ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 5, 1967)

On April 13, 1967, Florida Gas Transmission Company (Petitioner) filed in Docket No. CP67-182 a petition to amend the order issued in said docket on March 6, 1967, 37 FPC 499, so as to extend from April 1, 1967, to April 1, 1968, the time within which the proposed facilities are to be completed and ready for operation, all as more fully set forth in the petition to amend.

By order issued March 6, 1967, the Commission granted Petitioner a certificate of public convenience and necessity authorizing the construction and operation of certain delivery facilities with the requirement in paragraph (C) of said order that the facilities authorized by the certificate were to be constructed and in operation by April 1, 1967.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued March 6, 1967, in Docket No. CP67-182 be amended as hereinafter ordered.

*The Commission orders:*

(A) The Commission's order issued March 6, 1967, in Docket No. CP67-182 is amended so as to extend the time for completion and operation of the authorized facilities to April 1, 1968.

(B) In all other respects said order shall remain in full force and effect.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## PHILADELPHIA ELECTRIC COMPANY, PROJECT NO. 2355

### ORDER APPROVING REVISED EXHIBIT K DRAWING FOR PROJECT

(Issued May 5, 1967)

On December 8, 1966, Philadelphia Electric Company, licensee for Muddy Run Pumped Storage Project No. 2355, filed for Commission approval a revised Exhibit K drawing showing project transmission lines crossing the Conowingo Reservoir and their minimum clearance above the reservoir. Project No. 2355 is located in the Conowingo Reservoir reach of the Susquehanna River and on its tributary Muddy Run, in Lancaster and York Counties, Pennsylvania.

The revised Exhibit K drawing was filed in compliance with Article 33 of the license which also provided that licensee shall not commence construction of the lines until Commission approval of the revised drawing.

The Chief of Engineers, Department of the Army, has reported that the plans of the transmission lines (220 kv) crossing the Conowingo Reservoir are satisfactory insofar as the interests of navigation are concerned.

Public notice of the filing of the revised Exhibit K drawing has been given. No protests or petitions to intervene have been received.

The vertical clearance and location of the transmission lines crossing over the Conowingo Reservoir are satisfactory insofar as the public interest is concerned.

*The Commission finds:*

(1) Revised Exhibit K: Sheet 5 of 5 (FPC No. 2355-35) entitled "Property Plan," conforms to the Commission's rules and regulations and should be approved as part of the license for the project.

(2) License Exhibit K: Sheet 5 of 5 (FPC No. 2355-19) entitled "Property Plan," which has been superseded, should be eliminated from the license for the project.

*The Commission orders:*

The revised Exhibit K drawing described in finding (1) above is hereby approved as part of the license for Project No. 2355, and the superseded license Exhibit K drawing described in finding (2) above is hereby eliminated from the license for the project.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## SOUTHERN NATURAL GAS COMPANY, DOCKET NO. CP67-168

### ORDER FIXING DATE FOR PREHEARING CONFERENCE, PERMITTING INTERVENTION, AND EXTENDING TIME FOR FILING PETITIONS TO INTERVENE

(Issued May 5, 1967)

On April 20, 1967, the Commission issued an order in this proceeding, 37 FPC 780, granting the certificate of public convenience and necessity requested by Southern Natural Gas Company (Southern) in its application in Docket No. CP67-168, but reserving for formal hearing the question of whether certificates issued to Southern, including the one granted in this proceeding, should impose volumetric limitations upon the quantities of gas which Southern is authorized to sell to its customers.

On March 2, 1967, Southern filed a statement in Docket No. CP67-168, setting forth not only its views but those of some of its customers concerning volumetric certificate limitations. Southern's statement refers to Commission orders[1] which are cited in support of its belief that the Commission has specifically taken notice of the fact that it operates under "open-end" certificates. Southern indicates that it would not object to the imposition of limitations on the volumes of gas which it and other pipeline companies can sell to customers in market areas where Southern is competing for sales with other pipeline companies because such limitations would place Southern and the pipeline companies with which it is competing on equal footing. Southern's customers in the competitive category are Atlanta Gas Light Company (which is served by both Southern and Transcontinental Gas Pipe Line Corporation in the Atlanta, Georgia, area) and Chattanooga Gas Company (which is served by both Southern and East Tennessee Natural Gas Company in the Chattanooga, Tennessee, area). Southern also would not object to certificate limitations on the volumes of gas it can sell to Carolina Pipeline Company, Florida Gas Transmission Company, and Texas Eastern Transmission Corporation because these three companies also buy gas from other suppliers.

However, Southern does not believe it is in the public interest to impose certificate limitations on the volumes of gas which it can sell to customers in the market areas where it is the sole supplier. Southern supports this view by pointing out that it supplies natural gas to 103 municipal gas systems and gas districts in Alabama, Mississippi, and Georgia, and sells gas to four investor-owned distribution companies and one pipeline company which serve 325 additional Mississippi, Alabama, and Georgia communities. Southern claims that these customers have historically underestimated their requirements. For example, 54 of them so underestimated their requirements for the 1966-67 heating season that it was necessary for Southern to increase their contract demands and maximum delivery obligations by a total amount of 38,439 Mcf more per day than the volumes these customers had estimated their requirements to be when Southern filed its expansion application in Docket No. CP64-314.[2] Southern contends that if it had had to obtain an amendment to its certificate in Docket No. CP64-314 in order to serve these additional firm requirements, the substantial delay associated with obtaining the certificate amendment would have been a hardship on its customers and the consumers they serve.

---

[1] *Southern Natural Gas Co.*, 12 FPC 516, 532; *South Georgia Natural Gas Co.*, 22 FPC 211, 215; City of Monticello, Georgia, 29 FPC 912; *Southern Natural Gas Co.*, 31 FPC 789, 802-03.

[2] Granted June 8, 1966, In *Transcontinental Gas Pipe Line Corp.*, Opinion No. 493 35 FPC 917.

Southern's present procedure for granting additional firm gas to a customer, when it has the capacity to deliver additional volumes, is to file a revised Exhibit A to its service agreement with the customer requesting the increase. Southern points out that this procedure enables the customer to receive promptly the increased service and it is unnecessary for the customer to submit detailed market data or for Southern to spend time and effort to prepare a petition, with exhibits, requesting modification of a certificate previously issued.

Southern's municipal customers support its position and argue that the present procedure utilized by Southern permits small distributors to act quickly in competing with large gas distributors who, because of their substantial contract quantities and number of customers, are able to rely on load diversification in supplying the requirements of new industrial customers. The municipal customers contend that certificate volumetric limitations would merely cause them to have to increase unduly their contract quantities or face the risk of incurring substantial unauthorized overrun penalties which would in turn add to their costs and probably compel them to raise their customers' rates.

On March 15, 1967, Chattanooga Gas Company (Chattanooga) filed an answer to Southern's statement of position, urging that Southern be allowed to continue operating under "open-end" certificates and requesting that no volumetric limitations be placed on Southern's certificates without there first being held a hearing "* * * to develop on the record the extent to which, if any, the public convenience and necessity require imposition of service limitations." Chattanooga especially objects to Southern's suggestion that volumetric limitations be imposed in areas where Southern competes for sales with other pipeline companies. Chattanooga claims it is not only faced with competition posed by attractive TVA electric rates, but must also vie with its neighboring communities for available industrial customers. It contends that it must therefore have every opportunity in the form of price and supply flexibility to meet this competitive challenge, and must not be faced with supply limitations that are not also imposed upon other customers of Southern.[3]

Petitions seeking leave to intervene in any formal hearing held in connection with Southern's application in Docket No. CP67-168 were timely filed by the following companies:

| Names of petitioners | Dates filed |
|---|---|
| Alabama Gas Corp. | Dec. 30, 1966 |
| Atlanta Gas Light Co. | Jan. 16, 1967 |
| Carolina Pipeline Co. | Jan. 13, 1967 |
| Mississippi Valley Gas Co. | Jan. 16, 1967 |
| South Carolina Natural Gas Co. | Do. |

The statements by Southern and Chattanooga hereinbefore discussed show that customers other than those listed above may wish to file petitions to intervene in the hearing to be held regarding the volumetric certificate limitation issue. Therefore, this order will extend the time for other interested persons to file petitions to intervene in this proceeding if they wish to do so.

---

[3] On March 9, 1967, and March 23, 1967, Carolina Pipeline Company filed statements expressing similar views.

*The Commission finds:*

(1) It is appropriate for a hearing to be held in this proceeding in order that interested parties and the Commission's staff may develop a record from which it may be determined whether volumetric limitations should be imposed in certificates issued to Southern Natural Gas Company, beginning with the one issued April 20, 1967, in Docket No. CP67-168.

(2) It is desirable to allow the companies which have filed petitions to intervene to become interveners in this proceeding in order that they may establish the facts and law from which the nature and validity of their alleged rights and interests pertaining to the issue of volumetric certificate limitations may be determined and show what further action may be appropriate under the circumstances in the administration of the Natural Gas Act.

*The Commission orders:*

(A) Pursuant to the provisions of Section 1.18 of the Commission's Rules of Practice and Procedure, a prehearing conference before a duly designated presiding examiner shall commence at 10:00 a.m. (EDST) on June 21, 1967, in a hearing room of the Federal Power Commission, Washington, D.C. 20426, for the purpose of considering all matters pertaining to the issue of certificate limitations, determining the manner in which evidence shall be presented, fixing the date on which the hearing shall commence, and entertaining adoption of suggestions which may expedite the proceeding.

(B) The above-named petitioners are hereby permitted to become interveners in this proceeding subject to the rules and regulations of the Commission: *Provided, however*, That the admission of such interveners shall not be construed as recognition by the Commission that they or any of them might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(C) Additional petitions to intervene or protests may be filed with the Federal Power Commission, 441 G Street, NW., Washington, D.C. 20426, in accordance with the Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (157.10) on or before May 22, 1967.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## TOWN OF BELHAVEN, NORTH CAROLINA, ET AL. v. VIRGINIA ELECTRIC & POWER COMPANY, ET AL., DOCKET NO. E-7308

### ORDER DENYING MOTION TO DISMISS, ACCEPTING ANSWER FOR FILING, JOINING ADDITIONAL PERSONS AS RESPONDENT PARTIES, AND PROVIDING FOR HEARING

(Issued May 8, 1967)

This order directs a hearing on issues raised in a complaint filed August 30, 1966, by the Town of Belhaven, North Carolina, and ten other North Carolina municipalities,[1] as amended on February 20, 1967. The complaint, directed against Virginia Electric & Power Company (VEPCO) as the named respondent, alleges, *inter alia*, that VEPCO's present rates to complainants are unlawful within the meaning of Sections 205 and 206 of the Federal Power Act and seeks relief pursuant to Sections 201, 202, 205, 206, 207, 208 and 209 of the Act. On October 3, 1966, VEPCO filed an Answer and Motion to Dismiss. Complainants filed an Objection to the Motion to Dismiss on October 10, 1966. The Motion to Dismiss argues that there is no "reasonable ground for investigating such complaint." We do not agree. In order that we may make determination as to the merits of the complaint, we are ordering a hearing on the issues raised by Complainants as to the lawfulness of the rate schedules complained of.[2]

---

[1] The Town of Edenton, N.C., and Board of Public Works, of Edenton; The City of Elizabeth City, N.C.; The Town of Enfield, N.C.; The City of Greenville, N.C., and Greenville Utilities Commission; The Town of Hertford, N.C.; The Town of Robersonville, N.C.; The Town of Scotland Neck, N.C.; The Town of Tarboro, N.C.; The City of Washington, N.C.; and, The Town of Windsor, N.C.

On February 20, 1967, the Complaint was amended by a Motion for Assignment to Trial Examiner for Early Hearing and an Order Directing Answers to Interrogatories (Amendment). Complainants specifically requested that this filing be treated as an amendment to the Complaint. The Complaint and the Amendment raise issues which appear to involve not only the named respondent but also the other members of the Carolina-Virginias Power Pool (CARVA Pool), Carolina Power & Light Company (Carolina), Duke Power Company (Duke), and South Carolina Electric & Gas Company (South Carolina),[3] each a public utility and licensee within the meaning of the Federal Power Act. Therefore, in order to assure that all persons who may be affected by an order on this matter have an opportunity to be heard, we are ordering that Carolina, Duke and South Carolina be joined as parties respondent in this proceeding, with opportunity for full participation in all hearings to be held in this case. To further facilitate the development of a complete record in this case, we are providing by this order that this investigation and hearing include the terms of the CARVA Pool Agreement[4] as they may pertain to the issues raised by the pleadings filed in this case.

The February 20, 1967 Amendment requests an order directing answers to interrogatories, which were appended to the Amendment. Complainants further request that if any of the interrogatories cannot be answered by VEPCO, that VEPCO be directed to notify other members of the CARVA Pool and that those other members be directed to answer within ten days following notification. On March 16, 1967, VEPCO filed objections to Complainant's motion for interrogatories; on March 24, 1967, VEPCO filed a motion for extension of time to answer complainants' motion, asking that its March 16, 1967 objections be accepted for filing; and on March 29, 1967, Complainants filed objections to the motion for extension of time. There is good cause to grant VEPCO's Motion for Extension of Time and accept its Objections for filing. VEPCO contends in its Objections that the totality of the demands made in the interrogatories are harrassing, oppressive and unjustified by the Complaint as to their relevance and materiality. VEPCO also points out that some of the information requested is available in the files of this Commission or of State Commissions.

---

[2] VEPCO's Rate Schedule F.P.C. No. RS (Electric Tariff).

[3] Complainants February 20, 1967 Amendment states (pp. 1, 3): "* * * the relief requested herein may include the necessity of admission of complainants as members of said pool * * *;" and "Belhaven, et al., move that * * * copies of the complaint * * * be served upon * * * Carolina Power * * * Duke Power * * * South Carolina Electric & Gas * * *."

[4] Carolina Power & Light Company Rate Schedule F.P.C. No. 92, Duke Power Company Rate Schedule F.P.C. No. 148, South Carolina Electric & Gas Company Rate Schedule F.P.C. No. 26, and Virginia Electric & Power Company Rate Schedule F.P.C. No. 72.

We believe that requests for interrogatories can be dealt with most expeditiously in the context of a prehearing conference before a hearing examiner. Therefore, we are not here passing on the motion for interrogatories but directing the examiner to be appointed to hear the case to do so. We are ordering a prehearing conference for the purpose of narrowing the issues to be heard, hearing requests for discovery by all parties, setting dates for service of testimony and cross-examination and for such other matters as may be appropirate.

*The Commission further finds:*

(1) It is necessary and appropriate for the purposes of the Federal Power Act that VEPCO's motion to dismiss be denied.

(2) Good cause has been shown to grant VEPCO's motion for extension of time.

(3) It is necessary and appropriate for purposes of the Federal Power Act that a prehearing conference be held before a hearing examiner of this Commission for the purposes set forth in the recital above.

(4) It is appropriate for the purposes of the Federal Power Act that Carolina Power & Light Co., Duke Power Co., and South Carolina Electric & Gas Co., be joined as parties respondent to this proceeding, that they be served with copies of all pleadings filed in this docket and that they be afforded opportunity to answer the Complaint and Amendment and to participate in all hearings to be held on this matter.

*The Commission orders:*

(A) A hearing shall be held concerning the lawfulness of the rate schedules referred to in the recital above as they relate to issues raised in the pleadings heretofore filed in this case or as may be filed hereafter pursuant to Paragraph (G) below; said hearing to commence with a prehearing conference to be held before a hearing examiner of the Commission at 10:00 a.m. (EDT) June 8, 1967, in a hearing room of the Commission, 441 G Street, N.W., Washington, D.C.

(B) VEPCO's Motion To Dismiss is denied.

(C) VEPCO's Objections to Complainants' motion for an early hearing and for an order directing answers to interrogatories is accepted for filing.

(D) Complainants' motion for an order directing answers to interrogatories is forwarded to the hearing examiner for action by him at the prehearing conference ordered herein.

(E) Carolina Power & Light Co., Duke Power Co., and South Carolina Electric & Gas Co. are joined as parties respondent in this proceeding.

(F) The Secretary of the Commission is directed to serve copies of all pleadings heretofore filed in this case on Carolina, Duke and South Carolina.

(G) Answers to the Complaint, as amended, may be filed by parties to this proceeding on or before June 5, 1967.

(H) Notices of Intervention and Petitions to Intervene in this proceeding may be filed with the Federal Power Commission, Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.37) on or before June 1, 1967.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## MISSISSIPPI POWER & LIGHT COMPANY, DOCKET NOS. E-7338, E-7339 AND E-7340

### ORDER AUTHORIZING ACQUISITION OF FACILITIES

(Issued May 8, 1967)

Mississippi Power & Light Company (Applicant) filed three applications on February 13, 1967, for orders, pursuant to Section 203 of the Federal Power Act, authorizing the leases and purchases of certain electric transmission facilities from Delta Electric Power Association (Delta) (Docket Nos. E-7338 and E-7339) and Twin County Electric Power Association (Twin County) (Docket No. E-7340).

Applicant is incorporated under the laws of Mississippi with its principal business office at Jackson, Mississippi and is engaged in the electric utility business in parts of 45 of the 82 counties in Mississippi.

Delta owns and operates a cooperative distribution system serving rural areas in 13 counties of western Mississippi. Delta has no generating facilities and purchases most of its energy requirements from Applicant.

Twin County owns and operates a cooperative distribution system serving rural areas in six counties of western Mississippi. Twin County has no generating facilities and purchases its entire energy requirements from Applicant.

In its application filed in Docket No. E-7338, Applicant requests approval to perform its agreement of August 1, 1966, with Delta to construct for the account of Delta, to lease, operate, maintain and to purchase at the end of 10 years (or earlier) 3.5 miles of 115 kv transmission line to be located in Leflore County, Mississippi. The cost of the facilities to be leased and purchased is estimated to be $95,000. The Applicant will pay an annual lease rental equal to 2½% of the original cost of the line and will make 10 annual payments each equal to 7½% of said cost toward the purchase of the line. On the completion of these 10 payments the Association will convey title of the line to the Applicant.

In its application filed in Docket No. E-7339, Applicant requests approval to perform its agreement of January 25, 1967, with Delta to construct for the account of Delta to lease, operate, maintain and to purchase at the end of 10 years (or earlier) 6.5 miles of 115 kv transmission line located in Sunflower County, Mississippi. Applicant will pay an annual lease rental equal to 2½% of the original cost of said line and will make 10 annual payments equal to 7½% of said cost toward the purchase of the line. Upon the completion of said payments, Delta will convey title of said line to Applicant. The cost of the facilities to be leased and purchased is estimated at $205,000.

In its application filed in Docket No. E-7340, Applicant requests approval to perform its agreement of May 31, 1966, with Twin County to lease, operate, maintain and to purchase at the end of 10 years (or earlier) 0.94 miles of 115 kv transmission line located in Washington County, Mississippi. The Applicant will pay an annual lease rental of $1,350.95 and will make 10 annual payments of $4,052.86 toward the purchase of the line. Upon the completion of said payments Twin County will convey title of said line to Applicant.

The original cost of the facilities to be leased and purchased is $54,038.16.

On the Applicant's books, the annual rent payments of 2½%, will be debited to Operation Expense, Account 567, Transmission Rents; and the annual purchase payments of 7½% will be debited to Account 186, Miscellaneous Deferred Debits, and at the end of 10 years the acquisitions will be recorded on the Applicant's books by debits of original costs to Account 101, Electric Plant in Service, by credits to Account 186, Miscellaneous Deferred Debits, to close this account, and by credits to Account 108, Accumulated Provision for Depreciation of Electric Plant in Service, for the difference between the amounts debited to Account 101 and the amounts credited to Account 186.

From an operational viewpoint, Applicant's ownership of the three sections of line is preferable and in the public interest. The circuit breakers at Cleveland and Greenwood will operate to clear any fault on the Cleveland-Greenwood line and on the tap line to Delta's Minter City Substation (Docket No. E-7338). Similarly, the tap lines to Delta's Shaw Substation (Docket No. E-7339) and to Twin County's Greenville Substation (Docket No. E-7340) are protected by circuit breakers at the terminals of the main transmission lines to which they are connected. Applicant now has air patrol of its own transmission lines. Patrolling of the taps to the cooperatives' new substations can be done at a negligible increase in Applicant's cost of this service. Applicant also has greater resources in equipment and personnel for transmission line maintenance than Delta and Twin County.

Written notice of these applications has been given to the Governor of the State of Mississippi and to the Public Service Commission of that State. Notice was also published in the Federal Register on March 2, 1967 (32 F.R. 3480), stating that any person desiring to be heard or to make any protest with reference to the application should on or before March 13, 1967, file with the Federal Power Commission petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). No protest or petition or request to be heard in opposition to the granting of the application has been received.

*The Commission finds:*

(1) Applicant, a corporation, owns and operates facilities for the transmission and sale at wholesale of electric energy which is generated in the States of Arkansas, Louisiana and Tennessee and consumed in the State of Mississippi, all of which facilities are in addition to, and do not include, facilities used for the generation of electric energy or facilities used in local distribution or solely for the transmission of electric energy consumed wholly by the transmitter. Applicant, therefore, is a public utility within the meaning of that term as used in Section 203 of the Federal Power Act.

(2) By the proposed transactions, Applicant will merge or consolidate its facilities subject to the jurisdiction of the Commission with those of Delta and Twin County, other persons within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(3) The proposed leases and acquisitions by Applicant, as described above, upon the terms and conditions set forth in the applications in Docket Nos. E-7338, E-7339 and E-7340, and subject to the provisions of this order will be consistent with the public interest as expressed in Section 203 of the Federal Power Act.

(4) The period of public notice given in this matter is reasonable.

*The Commission orders:*

(A) The proposed leases and acquisitions by Applicant of the aforementioned electric facilities, all as described above, are authorized and approved upon the terms and conditions and for the purposes set forth in the applications subject to the provisions of this order.

(B) Applicant shall record the proposed transactions herein authorized and the facilities and properties referred to above as provided in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees and as set forth above in this order.

(C) This authorization shall expire for each of the transactions herein authorized and approved in Docket Nos. E-7338, E-7339 and E-7340 which is not consummated within 90 days from the date of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determination of cost, or any matter whatsoever now pending or which may come before this Commission or any other regulatory body and nothing herein shall be construed as an acquiescence by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## CONSOLIDATED GAS SUPPLY CORPORATION, DOCKET NO. CP67-212

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 9, 1967)

On January 26, 1967, Consolidated Gas Supply Corporation (Applicant) filed in Docket No. CP67-212 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of three separate projects, comprising a total of 32.0 miles of 20 and 30-inch pipeline loops in Livingston, Madison, and Herkimer Counties, New York, all as more fully described in the application.

The proposed construction and operation consists of the following facilities:

(1) Approximately 10.7 miles of 20-inch pipeline No. 554, looping existing lines Nos. 14 and 24, extending in a northerly direction from Craigs Connection to the Caladonia Connection, all in Livingston County, New York.

(2) Approximately 10 miles of 30-inch pipeline No. 550, looping existing line No. 30, extending in a northeasterly direction from the DeRuyter Connection toward the Morrisville Connection, all in Madison County, New York.

(3) Approximately 11.3 miles of 20-inch pipeline No. 550 looping existing line No. 30, extending in an easterly direction from the Herkimer Connection to the Cramer Gate, all in Herkimer County, New York.

The proposed facilities are designed to enable Applicant to meet the requirements of its Northern Division during the 1967-1968 winter season.

The estimated cost of the proposed pipeline is $3,781,113, which will be financed through the use of funds on hand and funds to be obtained from Applicant's parent corporation, Consolidated Natural Gas Company.

Due notice of the filing was issued on February 1, 1967. No petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on May 4, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Consolidated Gas Supply Corporation, a West Virginia corporation having its principal place of business in Clarksburg, West Virginia, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of February 2, 1965, in Docket No. CP63-272 (33 FPC 150).

(2) The facilities hereinbefore described and as more fully described in the application in this proceeding are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities and the transportation of natural gas by Applicant are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of said Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to the Consolidated Gas Supply Corporation authorizing the construction and operation of the facilities and the transportation of natural gas in interstate commerce as hereinbefore described and as more fully set forth in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation and the transportation of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, by November 1, 1967.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## DUKE POWER COMPANY, PROJECT NO. 2465

### ORDER ISSUING LICENSE (MAJOR)

(Issued May 9, 1967)

Application was filed on April 21, 1964, and amended on July 21, 1965, by Duke Power Company (Applicant) of Charlotte, North Carolina, for a license under Section 4(e) of the Federal Power Act (Act) for constructed Project No. 2465, known as the Hollidays Bridge Project, on the Saluda River in Greenville and Anderson Counties, South Carolina, approximately four miles east of Belton, South Carolina. The project does not affect lands of the United States.

The Hollidays Bridge Project was constructed and placed in operation in 1906. There has been no project construction since the 1935 amendment to the Act.

The Secretary of the Army and the Chief of Engineers have approved the plans of the project structures affecting navigation pursuant to the provisions of Section 4(e) of the Act.

The Department of the Interior, in reporting on the application, recommended for inclusion in any license for the project terms and conditions in the interests of fish and wildlife and recreation, as are set forth in attached Form L-10, and suggested that if a license is granted, the Commission assure that the license terms do not prevent redevelopment of the river at some later date, since, the Department states, there is a possibility for redevelopment of the stretch of the Saluda River herein involved. However, our investigation indicates there are no present or future plans for Federal development of the Saluda River either below, at, or above the site of the Hollidays Bridge Project that would affect this project. Article 10 of attached Form L-10 provides for such additional capacity and other changes in the project as may be directed by the Commission upon a showing of economic feasibility and consistency with the public interest.

The Department of Health, Education, and Welfare has advised that there are no known adverse effects on water supply, water pollution control, or vector control attributable to the project, and none is anticipated.

Applicant filed an Exhibit R statement reciting the lack of recreational potential at the project. The exhibit does not conform to Commission requirements and we are therefore not approving it. The South Carolina Wildlife Resources Department has advised that there is no need for public recreation facilities on the Hollidays Bridge Project pond; that any increase in public recreation facilities could be made on nearby Greenwood County's Lake Greenwood, South Carolina Electric & Gas Company's Lake Murray and on the U.S. Corps of Engineers' Hartwell Lake; and that should the need arise in the future for a public access area on the Hollidays Bridge pond, the present cooperative agreement between Applicant and the Department is adequate to provide for such an area. Nevertheless we are providing in Articles 18, 19 and 28 herein requirements to meet any future needs for recreation which may arise.

Power produced by the Hollidays Bridge Project will be marketed to customers of Applicant in North and South Carolina and will be marketed by other members of the CARVA Pool[1] serving in the two Carolinas and Virginia.

The license herein granted shall have an effective date of May 1, 1965, the first day of the month in which the Supreme Court of the United States affirmed the Commission's findings and order asserting licensing authority over Taum Sauk Project No. 2277 by virtue of the effect of the hydroelectric project on the interests of interstate commerce by its utilization of headwaters of a navigable stream to generate electric energy for an interstate power system (381 U.S. 90), and a termination date of December 31, 1993.

*The Commission finds:*

(1) Hollidays Bridge Project affects the interests of interstate commerce.

(2) Applicant is a corporation organized under the laws of the State of North Carolina, and has submitted satisfactory evidence of compliance with the requirements of all applicable State laws insofar as necessary to effectuate the purposes of a license for the project.

(3) Public notice of the filing of the application has been given. No protests or petitions to intervene have been received. No conflicting application is before the Commission.

(4) The project does not affect a Government dam, nor will the issuance of a license therefor, as hereinafter provided, affect the development of any water resources for public purposes which should be undertaken by the United States.

(5) Subject to the terms and conditions hereinafter imposed, the project will be best adapted to a comprehensive plan for improving or developing a waterway or waterways for the use or benefit of interstate or foreign commerce, for the improvement and utilization of water-power development, and for other beneficial public uses, including recreational purposes.

(6) The installed horsepower capacity of the project hereinafter authorized for the purpose of computing the capacity component of the administrative annual charge is 4,700 horsepower, and the amount of annual charges, based on such capacity, to be paid under the license for the project, for the costs of administration of Part I of the Act is reasonable.

(7) The exhibits designated and described in paragraph (B) below conform to the Commission's rules and regulations and should be approved as part of this license.

*The Commission orders:*

(A) This license is hereby issued to Duke Power Company (Licensee) of Charlotte, North Carolina, under Section 4(e) of the Federal Power Act (Act) for a period effective as of May 1, 1965 and terminating December 31, 1993, for the continued operation and maintenance of the Hollidays Bridge Project No. 2465, located on the Saluda River in Greenville and Anderson Counties, South Carolina, and affecting the interests of interstate commerce, subject to the terms and conditions of the Act, which is incorporated herein by reference as a part of this license, and subject to such rules and regulations as the Commission has issued or prescribed under the provisions of the Act.

(B) Hollidays Bridge Project consists of:

(i) all lands constituting the project area and enclosed by the project boundary or the licensee's interests in such lands, the limits of which are otherwise defined, the use and occupancy of which are necessary for the purposes of the project; such project area and project boundary being shown and described by certain exhibits which form part of the application for license and which are designated and described as follows:

---

[1] The members of the CARVA Pool are: Duke Power Company, Carolina Power & Light Company, South Carolina Electric & Gas Company and Virginia Electric & Power Company.

Exhibit J: (FPC No. 2465-2) entitled "General Map and Profile"

Exhibit K: (FPC No. 2465-5) entitled "Project Area"

(ii) project works consisting of:

*Hollidays Bridge Project*—The project consists of: (1) a 644-foot long concrete gravity dam with a maximum height of about 50 feet made up of: a 386-foot long ogee spillway section with flashboards at elevation 634.0 feet; a 77-foot long non-overflow section between the canal and spillway; a 51-foot long intake section with four slide gates; and non-overflow abutment sections 47 and 73 feet long tying into the banks; (2) a 466 acre reservoir at elevation 634.0 feet; (3) a 950-foot long power canal with an overflow; (4) a powerhouse containing four operating generators, one of 500 kw capacity and three of 1000 kw capacity; the turbine of a fifth 100 kw unit is inoperable and the generator is used as a motor; (5) six 2.3–22.5 kw, 500 kva transformers; and (6) 3.5 miles of 22 kv transmission line to Belton-Williamston line; and (7) appurtenant electrical and mechanical facilities: the location, nature and character of which are more specifically shown and described by the exhibits hereinbefore cited and by certain other exhibits which also form part of the application for license and which are designated and described as follows:

| Exhibit L | FPC No. | Showing |
|---|---|---|
| Sheet 1 | 2465–6 | Plan of dam, canal and powerhouse. |
| Sheet 2 | 2465–7 | Elevation of dam, intake and powerhouse. |
| Sheet 3 | 2465–8 | Sections of dam and powerhouse. |

*Exhibit M:* Consisting of three typewritten pages entitled, "General Descriptions of Mechanical, Electrical and Transmission Equipment," filed April 21, 1964, and amended July 21, 1965.

(iii) all other structures, fixtures, equipment or facilities used or useful in the maintenance and operation of the project and located on the project area, including such portable property as may be used or useful in connection with the project or any part thereof, whether located on or off the project area, if and to the extent that the inclusion of such property as part of the project is approved or acquiesced in by the Commission; also, all riparian or other rights, the use or possession of which is necessary or appropriate in the maintenance or operation of the project.

(C) This license is also subject to the terms and conditions set forth in Form L–10, entitled "Terms and Conditions of License for Constructed Major Project Affecting the Interests of Interstate or Foreign Commerce," *infra*, p. 860, which terms and conditions, designated as Articles 1 through 26, are attached hereto and made a part hereof, and subject to the following special conditions set forth herein as additional articles:

*Article 27.* The Licensee shall pay to the United States the following annual charge, effective as of May 1, 1965:

> For the purpose of reimbursing the United States for the costs of administration of Part I of the Act, a reasonable annual charge as determined by the Commission in accordance with the provisions of its regulations, in effect from time to time. The authorized installed capacity for such purpose is 4,700 horsepower.

*Article 28.* Licensee shall cooperate with State and local agencies in the development and maintenance of public access areas and such other additional facilities necessary for full recreational utilization by the public of project lands and waters, consistent with the terms of the license and operation of the project.

*Article 29.* The Commission reserves the right to determine at a later date what additional transmission facilities, if any, should be included in this license as a part of the project.

(D) The exhibits designated and described in paragraph (B) above are hereby approved as part of this license.

(E) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this license. In acknowledgment of the acceptance of this license it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

### FORM L-10

### (SEPTEMBER 1, 1966)

## TERMS AND CONDITIONS OF LICENSE FOR CONSTRUCTED MAJOR PROJECT AFFECTING THE INTERESTS OF INTERSTATE OR FOREIGN COMMERCE

*Article 1.* The entire project, as described in the order of the Commission, shall be subject to all the provisions, terms, and conditions of the license.

*Article 2.* No substantial change shall be made in the maps, plans, specifications, and statements described and designated as exhibits and approved by the Commission in its order as part of the license, until such change shall have been approved by the Commission: *Provided*, however, that if the Licensee or the Commission deems it necessary or desirable that said approved exhibits, or any of them, be changed, there shall be submitted to the Commission for approval amended, supplemental, or additional exhibit or exhibits covering the proposed change which, upon approval by the Commission, shall become a part of the license and shall supersede, in whole or in part, such exhibit or exhibits theretofore made a part of the license as may be specified by the Commission.

*Article 3.* The project area and project works shall be in conformity with the approved exhibits referred to in Article 2 hereof. If the Licensee shall contemplate any substantial alteration in or addition to the project area or project works shown and described by the approved exhibits referred to in Article 2 herein, the Licensee shall submit to the Commission for approval amended, supplemental, or additional exhibits under the provisions of said article covering such alteration or addition, together with a statement in writing setting forth the reasons which necessitate or justify such alteration or addition. Except when emergency shall require for the protection of navigation, life, health, or property, no substantial alteration or addition not in conformity with the approved plans shall be made to any dam or other project works under the license without the prior approval of the Commission; and any emergency alteration or addition so made shall thereafter be subject to such modification and change as the Commission may direct. Minor changes in the project works or divergence from such approved exhibits may be made if such changes will not result in decrease in efficiency, in material increase in cost, or in impairment of the general scheme of development; but any of such minor changes made without the prior approval of the Commission, which in its judgment have produced or will produce any of such results, shall be subject to such alteration as the Commission may direct.

*Article 4.* The project, including its operation and maintenance and any work incident to additions or alterations authorized by the Commission, shall be subject to the inspection and supervision of the Regional Engineer, Federal Power Commission, in the region wherein the project is located, or of such other officer or agent as the Commission may designate, who shall be the authorized representative of the Commission for such purposes. The Licensee shall cooperate fully with said representative and shall furnish him such information as he may require concerning the operation and maintenance of the project, and of any such alteration thereof, and shall notify him of the date upon which work with respect to any alteration will begin, and as far in advance thereof as said representative may reasonably specify, and shall notify him promptly in writing of any suspension of work for a period of more than one week, and of its resumption and completion. Licensee shall submit to said representative a detailed program of inspection by the Licensee that will provide for an adequate and qualified inspection force for construction of any such alterations to the project. Construction of said alterations or any feature thereof shall not be initiated until the program of inspection for the alterations or any feature thereof has been approved by said representative. The Licensee shall allow said representative and other officers or employees of the United States, showing proper credentials, free and unrestricted access to, through, and across the project lands and project works in the performance of their official duties. The Licensee shall comply with such rules and regulations of general or special applicability as the Commission may from time to time prescribe for the protection of life, health or property.

*Article 5.* In the absence of specific Commission exemption, the Licensee within five years from date of issuance of the license shall acquire title in fee or the right to use in perpetuity all lands, other than lands of the United States, necessary or appropriate for the maintenance and operation of the project. The Licensee, its successors and assigns shall, during the period of the license, retain the possession of all project property covered by the license as issued or as later amended, including the project area, the project works, and all franchises, easements, water rights, and rights of occupancy and use; and none of such properties shall be voluntarily sold, leased, transferred, abandoned, or otherwise disposed of without the prior written approval of the Commission, except that the Licensee may lease or otherwise dispose of interests in project lands or property without specific written approval of the Commission pursuant to the then current regulations of the Commission. The provisions of this article are not intended to prevent the abandonment or the retirement from service of structures, equipment, or other project works in connection with replacements thereof when they become obsolete, inadequate, or inefficient for further service due to wear and tear; and mortgage or trust deed or judicial sales made thereunder, or tax sales, shall not be deemed voluntary transfers within the meaning of this article.

*Article 6.* In the event the project is taken over by the United States upon the termination of the license, as provided in Section 14 of the Act, or is transferred to a new licensee under the provisions of Section 15 of the Act, the Licensee, its successors and assigns will be responsible for and will make good any defect of title to or of right of occupancy and use in any of such project property which is necessary or appropriate or valuable and serviceable in the maintenance and operation of the project, and will pay and discharge, or will assume responsibility for payment and discharge, of all liens or incumbrances upon the project or project property created by the Licensee or created or incurred after the issuance of the license: *Provided,* That the provisions of this article are not intended to require the Licensee, for the purpose of transferring the project to the United States or to a new Licensee, to acquire any different title to or right of occupancy and use in any of such project property than was necessary to acquire for its own purposes as Licensee.

*Article 7.* The actual legitimate original cost, estimated where not known and the accrued depreciation of the project as of the effective date of the license shall be determined by the Commission in accordance with the Act and the rules and regulations of the Commission, and such cost less such accrued depreciation, so determined, shall be the net investment in the project as of such effective date.

*Article 8.* After the first 20 years of operation of the project under the license, six percent per annum shall be the specified rate of return on the net investment in the project for determining surplus earnings of the project for the establishment and maintenance of amortization reserves, pursuant to Section 10(d) of the Act; one-half of the project surplus earnings, if any, accumulated after the first 20 years of operation under the license, in excess of six percent per annum on the net investment, shall be set aside in a project amortization reserve account as of the end of each fiscal year: *Provided*, that, if and to the extent that there is a deficiency of project earnings below six percent per annum for any fiscal year or years after the first 20 years of operation under the license, the amount of such deficiency shall be deducted from the amount of any surplus earnings accumulated thereafter until absorbed, and one-half of the remaining surplus earnings, if any thus cumulatively computed, shall be set aside in the project amortization reserve account; and the amounts thus established in the project amortization reserve account shall be maintained therein until further order of the Commission.

*Article 9.* For the purpose of determining the stage and flow of the stream or streams from which water is diverted for the operation of the project works, the amount of water held in and withdrawn from storage, and the effective head on the turbines, the Licensee shall install and thereafter maintain such gages and stream-gaging stations as the Commission may deem necessary and best adapted to the requirements; and shall provide for the required readings of such gages and for the adequate rating of such stations. The Licensee shall also install and maintain standard meters adequate for the determination of the amount of electric energy generated by said project works. The number, character, and location of gages, meters, or other measuring devices, and the method of operation thereof, shall at all times be satisfactory to the Commission and may be altered from time to time if necessary to secure adequate determinations, but such alteration shall not be made except with the approval of the Commission or upon the specific direction of the Commission. The installation of gages, the ratings of said stream or streams, and the determination of the flow thereof, shall be under the supervision of, or in cooperation with, the District Engineer of the United States Geological Survey having charge of stream-gaging operations in the region of said project, and the Licensee shall advance to the United States Geological Survey the amount of funds estimated to be necessary for such supervision or cooperation for such periods as may be mutually agreed upon. The Licensee shall keep accurate and sufficient record of the foregoing determinations to the satisfaction of the Commission, and shall make return of such records annually at such time and in such form as the Commission may prescribe.

*Article 10.* The Licensee shall install additional capacity or make other changes in the project as directed by the Commission, to the extent that it is economically sound and in the public interest to do so, after notice and opportunity for hearing.

*Article 11.* The Licensee shall, after notice and opportunity for hearing, coordinate the operation of the project, electrically and hydraulically, with such other projects or power systems and in such manner as the Commission may direct in the interest of power and other beneficial public uses of water resources, and on such conditions concerning the equitable sharing of benefits by the Licensee as the Commission may order.

*Article 12.* Whenever the Licensee is directly benefited by the construction work of another licensee, a permittee, or of the United States of a storage reservoir or other headwater improvement, the Licensee shall reimburse the owner of the headwater improvement for such part of the annual charges for interest, maintenance, and depreciation thereon as the Commission shall determine to be equitable, and shall pay to the United States the cost of making such determination as fixed by the Commission. For benefits provided by a storage reservoir or other headwater improvement of the United States the Licensee shall pay to the Commission the amounts for which it is billed from time to time for such headwater benefits and for the costs of making the determinations pursuant to the then current Commission Regulations under the Federal Power Act within 60 days from the date of rendition of a bill therefore and, upon failure to do so, shall thereafter be subject to the payment of the penalties specified in the then current Regulations. The Licensee shall have the right to pay such amounts under protest within the 60-day period and to reconsideration of the determination of the amounts billed or a hearing as provided by the then current Regulations under the Act.

*Article 13.* The United States specifically retains and safeguards the right to use water in such amount, to be determined by the Secretary of the Army, as may be necessary for the purposes of navigation on the navigable waterway affected; and the operations of the Licensee, so far as they affect the use, storage and discharge from storage of waters affected by the license, shall at all times be controlled by such reasonable rules and regulations as the Secretary of the Army may prescribe in the interest of navigation, and as the Commission may prescribe for the protection of life, health, and property, and in the interest of the fullest practicable conservation and utilization of such waters for power purposes and for other beneficial public uses, including recreational purposes; and the Licensee shall release water from the project reservoir at such rate in cubic feet per second, or such volume in acre-feet per specified period of time, as the Secretary of the Army may prescribe in the interest of navigation, or as the Commission may prescribe for the other purposes hereinbefore mentioned.

*Article 14.* On the application of any person, association, corporation, Federal agency, State or municipality, the Licensee shall, after notice and opportunity for hearing, permit such reasonable use of its reservoirs or other project properties, including works, lands and water rights, or parts thereof, as may be ordered by the Commission in the interest of comprehensive development of the waterway or waterways involved and the conservation and utilization of water resources of the region, for water supply for the purpose of steam-electric, irrigation, industrial, municipal or similar uses. The Licensee shall receive reasonable compensation, at least full reimbursement for any damages or expenses which the joint use causes him to incur, for use of its reservoirs or other project properties or parts thereof for such purposes, any such compensation to be fixed by the Commission either by approval of an agreement between the Licensee and the party or parties benefiting or after notice and opportunity for hearing. Applications shall contain information in sufficient detail to afford a full understanding of the proposed use, including satisfactory evidence that the applicant possesses necessary water rights pursuant to applicable State law, or a showing of cause why such evidence cannot be concurrently submitted, and a statement as to the relationship of the proposed use to any State or municipal plans or orders which may have been adopted with respect to the use of such waters.

*Article 15.* In the construction or maintenance of the project works, the Licensee shall place and maintain suitable structures and devices to reduce to a reasonable degree the liability of contact between its transmission lines and telegraph, telephone and other signal wires or power transmission lines constructed prior to its transmission lines and not owned by the Licensee, and shall also place and maintain suitable structures and devices to reduce to a reasonable degree the liability of any structures or wires falling or obstructing traffic or endangering life. None of the provisions of this article are intended to relieve the Licensee from any responsibility or requirement which may be imposed by other lawful authority for avoiding or eliminating inductive interference.

*Article 16.* The Licensee shall, for the conservation and development of fish and wildlife resources, construct, maintain, and operate, or arrange for the construction, maintenance and operation of such facilities and comply with such reasonable modifications of the project structures and operation as may be ordered by the Commission upon its own motion or upon the recommendation of the Secretary of the Interior or the fish and wildlife agency or agencies of any State in which the project or a part thereof is located, after notice and opportunity for hearing and upon findings based on substantial evidence that such facilities and modifications are necessary and desirable, reasonably consistent with the primary purpose of the project, and consistent with the provisions of the Act.

*Article 17.* Whenever the United States shall desire, in connection with the project, to construct fish and wildlife facilities or to improve the existing fish and wildlife facilities at its own expense, the Licensee shall permit the United States or its designated agency to use, free of cost, such of Licensee's lands and interest in lands, reservoirs, waterways and project works as may be reasonably required to complete such facilities or such improvements thereof. In addition, after notice and opportunity for hearing, the Licensee shall modify the project operation as may be prescribed by the Commission, reasonably consistent with the primary purpose of the project, in order to permit the maintenance and operation of the fish and wildlife facilities constructed or improved by the United States under the provisions of this article. This article shall not be interpreted to place any obligation on the United States to construct or improve fish and wildlife facilities or to relieve the Licensee of any obligation under this license.

*Article 18.* The Licensee shall construct, maintain and operate or shall arrange for the construction, maintenance and operation of such recreational facilities including modifications thereto, such as access roads, wharves, launching ramps, beaches, picnic and camping areas, sanitary facilities and utilities, and shall comply with such reasonable modifications of the project structures and operations as may be prescribed hereafter by the Commission during the term of this license upon its own motion or upon the recommendation of the Secretary of the Interior or other interested Federal and State agencies, after notice and opportunity for hearing and upon findings based upon substantial evidence that such facilities and modifications are necessary and desirable, and reasonably consistent with the primary purpose of the project.

*Article 19.* So far as is consistent with proper operation of the project, the Licensee shall allow the public free access, to a reasonable extent, to project waters and adjacent project lands owned by the Licensee for the purpose of full public utilization of such lands and waters for navigation and recreational purposes, including fishing and hunting, and shall allow to a reasonable extent for such purposes the construction of access roads, wharves, landings, and other facilities on its lands the occupancy of which may in appropriate circumstances be subject to payment of rent to the Licensee in a reasonable amount: *Provided, that* the Licensee may reserve from public access, such portions of the project waters, adjacent lands, and project facilities as may be necessary for the protection of life, health, and property and *Provided, further*, that the Licensee's consent to the construction of access roads, wharves, landings, and other facilities shall not, without its express agreement, place upon the Licensee any obligation to construct or maintain such facilities. These facilities are in addition to the facilities that the Licensee may construct and maintain as required by the license.

*Article 20.* The Licensee shall be responsible for and shall take reasonable measures to prevent soil erosion on lands adjacent to the stream and to prevent stream siltation or pollution resulting from construction, operation or maintenance of the project. The Commission upon request, or upon its own motion, may order the Licensee to construct and maintain such preventive works to accomplish these purposes and to revegetate exposed soil surface as the Commission may find to be necessary after notice and opportunity for hearing.

*Article 21.* There is reserved to the appropriate department or agency of the United States, or of the State or county involved, the right to take over, maintain, and supervise the use of any project road as a public road.

*Article 22.* The Licensee shall clear and keep clear to an adequate width lands along open conduits and shall dispose of all temporary structures, unused timber, brush, refuse, or inflammable material resulting from the clearing of lands or from the maintenance or alteration of the project works. In addition, all trees along the margins of reservoirs which may die during operations of the project shall be removed. The clearing of the lands and the disposal of the material shall be done with due diligence and to the satisfaction of the authorized representative of the Commission.

*Article 23.* If the Licensee shall cause or suffer essential project property to be removed or destroyed or to become unfit for use, without adequate replacement, or shall abandon or discontinue good faith operation of the project for a period of three years, or refuse or neglect to comply with the terms of the license and the lawful orders of the Commission mailed to the record address of the Licensee or its agent, the Commission will deem it to be the intent of the Licensee to surrender the license, and not less than 90 days after public notice may in its discretion terminate the license.

*Article 24.* Upon abandonment of the project the Licensee shall remove all structures, equipment and power lines from the stream and restore said stream to a condition satisfactory to the Commission's authorized representative and shall fulfill such other obligations under the license as the Commission may prescribe.

*Article 25.* The right of the Licensee and of its transferees and successors to use or occupy waters, over which the United States has jurisdiction under the license, for the purpose of maintaining the project works or otherwise, shall absolutely cease at the end of the license period, unless Licensee has obtained a new license pursuant to the then existing laws and regulations or an annual license under the terms and conditions of this license.

*Article 26.* The terms and conditions expressly set forth in the license shall not be construed as impairing any terms and conditions of the Federal Power Act which are not expressly set forth herein.

## MYSTIC VALLEY GAS COMPANY, DOCKET NO. CP67-267

### DECLARATION OF EXEMPTION

(Issued May 9, 1967)

Mystic Valley Gas Company (Applicant) filed an application on March 17, 1967, for exemption from the provisions of the Natural Gas Act, pursuant to Section 1(c) thereof.

Applicant, a Massachusetts corporation with its principal place of business in Malden, Middlesex County, Massachusetts, is engaged in the transportation and sale of natural gas in the State of Massachusetts. Pursuant to certificate authorization Tennessee Gas Pipeline Company (Tennessee), a division of Tenneco Inc., sells and delivers natural gas to Applicant for transportation and sale for resale in the State of Massachusetts. Applicant also has an agreement for emergency service with Algonquin Gas Transmission Company which was approved by the Commission's order dated November 15, 1957, in Docket No. G-13081. (18 FPC 639)

Applicant is engaged in the retail distribution of natural gas within its service area in Massachusetts which includes all or part of the Cities of Everett, Malden, Medford, Melrose, Revere and Woburn and the Towns of Arlington, Belmont, Burlington, Lexington, Reading, Stoneham, Winchester and Winthrop. Applicant sells natural gas to the Town of Wakefield for resale by the municipal gas department of the Town. The gas is delivered to the Town of Wakefield at two main delivery points located within the limits of the Town. Applicant also delivers gas, for which it bills the Town, to the meters of eight residential customers isolated from the Town's distribution system but adjacent to Applicant's system. Applicant makes no other sales for resale.

All gas transported, sold and delivered is received and consumed within The Commonwealth of Massachusetts.

The Massachusetts Department of Public Utilities of the State of Massachusetts has certified to the Federal Power Commission that it has regulatory jurisdiction over the rates and services and facilities of the Applicant and is exercising such jurisdiction.

Wherefore, the Commission declares, by reason of the foregoing:

> Mystic Valley Gas Company is exempt from the provisions of the natural Gas Act, and the orders, rules and regulations of the Commission issued thereunder.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## NATURAL GAS COMPANIES—ANNUAL REPORTS OF SYSTEM FLOW DIAGRAMS, DOCKET NO. R-322

## ORDER NO. 345

### DISCONTINUING THE REPORTING OF CERTAIN INFORMATION

(Issued May 9, 1967)*

Section 260.8 of the Commission's regulations** requires certain Class A natural gas pipeline companies to file annually a flow diagram reflecting the operating conditions on their main transmission systems during the previous year. One of the items of information now required to be submitted by paragraph (b) of the section is—

> (12) The average and maximum (co-incidental and noncoincidental) daily volumes delivered at each takeoff point during the reporting year. * * *

A part of Item (12), the maximum non-coincidental daily volume delivered at each takeoff point, was required originally to enable the Commission to study the feasibility of a proposed method of allocation of pipeline company costs. That particular study is now completed and since we recognize that to obtain data on the maximum noncoincidental daily deliveries imposes a substantial burden on the reporting companies, we are deleting that requirement from the regulations.

The subparagraph also provides that small deliveries, *i.e.*, those less than 100 Mcf per day, may be grouped for reporting purposes in an appropriate manner. Since this applies in any event to deliveries which have little or no effect on the operation of the pipeline, we have determined that our purposes will be adequately served if the breaking point for grouping deliveries be raised to 200 Mcf.

*The Commission finds:*

(1) Since the amendment relieves the affected parties of an existing reporting requirement and we now have no indication that any person or agency has any use for the information, it is unnecessary to comply with the notice and effective date provisions of section 4 of the Administrative Procedure Act.

(2) The amendment herein adopted is necessary and appropriate in the administration of the Natural Gas Act.

*The Commission*, acting pursuant to the authority of the Natural Gas Act, as amended, particularly sections 4, 5, 7 and 16 thereof (52 Stat. 822, 823, 825; 56 Stat. 83; 15 U.S.C. 717c, 717d, 717f, 717o), *orders:*

(A) Part 260, Subchapter G, Chapter I of Title 18 of the Code of Federal Regulations is amended by revising subparagraph (12) of § 260.8(b). As revised, the subparagraph reads as follows:

> § 260.8 System flow diagrams.
>
> * * * * * * *
>
> (b) * * *
>
> (12) Volumes delivered: (a) the average daily volumes delivered at each take-off point, (b) the volumes delivered at each take-off point on

---

* Published in the Federal Register on May 17, 1967 (32 F.R. 7331).

** Promulgated by Order No. 303-A issued May 10, 1966 in Docket No. R-257, 35 FPC 712, 31 F.R. 7226.

the day of maximum coincidental delivery, and (c) the maximum daily volumes (non-coincidental) delivered to each customer under rates subject to FPC jurisdiction. Where deliveries to a single customer are made at two or more points and conjunctive billing is used to determine charges, the volumes delivered shall be reported on the conjunctive basis. Small deliveries (less than 200 Mcf per day) which have little or no effect upon the operation of the pipeline may be grouped in an appropriate manner, i.e., between compressor stations or the last mainline compressor station and the end of the pipeline. If an estimate is used for a delivery, so indicate.

[Secs. 4, 5, 16, 52 Stat. 823, 824, 825, 830: 15 U.S.C. 717c, 717d, 717f, 717o.]

(B) This amendment shall be effective upon the issuance of this order.

(C) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## PANHANDLE EASTERN PIPE LINE COMPANY, DOCKET NO. CP67-266

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 9, 1967)

On March 16, 1967, Panhandle Eastern Pipe Line Company (Applicant) filed in Docket No. CP67-266 a "budget-type" application pursuant to Section 7(c) of the Natural Gas Act, as implemented by Section 157.7(b) of the Regulations under the Act, for a certificate of public convenience and necessity authorizing the construction during the twelve month period following the issuance of the Commission's order herein, and the operation of gas purchase facilities to enable Applicant to attach to its certificated main pipeline system natural gas which will be purchased from authorized independent producers in the general area of its system, all as more fully set forth in the application.

Applicant proposes to construct and operate routine gas supply facilities, including pipeline, metering and compression facilities.

The total estimated cost of Applicant's proposed facilities will not exceed $2,000,000, with no single project exceeding a cost of $500,000. Applicant proposes to finance said costs from funds on hand.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

At a hearing held on May 4, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Panhandle Eastern Pipe Line Company, a Delaware corporation having its principal place of business in Kansas City, Missouri, is a

"natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of October 17, 1945, in Docket No. G-254 (4 FPC 1081).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(5) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(6) The authorization hereinafter granted should be limited to construction during the twelve month period following the issuance of this certificate and the total expenditures for facilities to be constructed thereunder should be limited to $2,000,000, with no single project to exceed a cost of $500,000.

*The Commission orders:*

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, Panhandle Eastern Pipe Line Company, to construct during the twelve month period following the issuance of this order, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities only to take natural gas supplies from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(C) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(D) The authorization granted in paragraph (A) above is limited to construction during the twelve month period following the issuance of this order, and the total expenditures for facilities to be constructed thereunder are limited to $2,000,000 with no single project to exceed a cost of $500,000.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## SHENANDOAH GAS COMPANY, DOCKET NO. CP65-287

### ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued May 9, 1967)

On April 14, 1967, Shenandoah Gas Company (Petitioner) filed in Docket No. CP65-287 a petition to amend the order issued in said docket on June 29, 1965, 33 FPC 1300, as amended May 12, 1966, 35 FPC 732, by extending the time from May 12, 1967, to May 12, 1968, for completion of certain facilities authorized in the aforesaid amending order, authorizing the delivery of natural gas on an interruptible basis to a new industrial customer, Bauhan-Davis Lime Co. Inc. (Bauhan-Davis), located in the environs of Strasburg, Virginia. Petitioner has not commenced construction of the facilities to serve Bauhan-Davis because Bauhan-Davis has delayed beginning construction of its plant due to financial conditions. Bauhan-Davis is now re-examining the financing possibilities and is hopeful of proceeding with the construction of its plant so that it will be completed within the next twelve months.

*The Commission orders:*

The time within which the facilities authorized by the order of May 12, 1966, in Docket No. CP65-287 shall be completed and delivery of natural gas shall commence is extended to May 12, 1968, and in all other respects said order shall remain in full force and effect.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## SOUTHERN NATURAL GAS COMPANY, DOCKET NO. CP64-314

### ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 9, 1967)

On April 13, 1967, Southern Natural Gas Company (Petitioner) filed in Docket No. CP64-314 a petition to amend the order of the Commission issued in said docket on June 8, 1966, 35 FPC 917, and amended on March 6, 1967, 37 FPC 506, authorizing the Petitioner, among other things, to construct facilities to deliver firm third year peak day volumes of 2,613 Mcf to Intercoastal Gas Corporation for distribution in the Towns of Chatsworth, Ranger, Fairmont, Ellijay and East Ellijay, Georgia, all as more fully set forth in the said petition to amend.

Petitioner now requests the Commission to further modify the certificate order issued to it in Docket No. CP64-314 (Opinion No. 493, issued June 8, 1966) and extend the time to and including November 1, 1969 within which to construct and place in operation (1) the additional 350 horsepower of compressing facilities to be installed at Tarrant compressor station and (2) facilities to serve Atlanta Gas Light Company (Atlanta), as successor in interest to Intercoastal Gas Corporation (Intercoastal), as authorized by the Commission in its Opinion No. 493, issued June 8, 1966, in *Transcontinental Gas Pipe Line Corporation, et al.*, Docket No. CP64–270, *et al.*, as amended by order issued March 6, 1967.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued June 8, 1966, in Docket No. CP64–314 be further amended as hereinafter ordered.

*The Commission orders:*

(A) The Commission's order issued June 8, 1966, in Docket No. CP64–314 is amended so as to modify Ordering Paragraph (B)(7) of Opinion No. 493 and extend the time for constructing and placing in operation (1) the additional 350 horsepower of compressing facilities to be installed at Tarrant compressor station and (2) facilities to serve Atlanta, as successor in interest to Intercoastal, be extended to and including November 1, 1969.

(B) In all other respects said order shall remain in full force and effect.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## SUSQUEHANNA POWER COMPANY AND PHILADELPHIA ELECTRIC POWER COMPANY, PROJECT NO. 405

### ORDER AMENDING LICENSE

(Issued May 9, 1967)

On June 8, 1965, Susquehanna Power Company and Philadelphia Electric Power Company, joint licensees for Project No. 405 on the Susquehanna River in Maryland and Pennsylvania filed for Commission approval a proposal to provide recreation facilities at their Conowingo project. The application was modified by letters dated March 30, 1966, and August 2, 1966, with respect to the proposed fisherman's warning system, and was supplemented with a drawing (FPC 405–73) filed on September 8, 1966.

The proposal consists of improvements and additions to existing facilities for use by fishermen and visitors to the tailrace area, the development of a public access and boat launching area at the mouth of Conowingo Creek on Conowingo Reservoir, and the installation of a fishermen's warning system below Conowingo dam.

The facilities proposed for the tailwater include new paved roadways and parking spaces for 246 cars, paved walks and promenades, a two-story picnic shelter with public restrooms in the lower story, a fish-cleaning shed, and such other facilities, grading and landscaping needed to make the tailwater area functional and attractive for public use. The estimated cost of these facilities and development of the tailwater area is $330,000.

The proposal for boating access at Conowingo Creek includes a boat launching ramp, parking for 14 cars and 14 cars with trailers, together with landscaping, lighting and benches, at an estimated cost of $70,000.

The proposal for the fishermen's warning system, as revised, includes five large, elevated, red warning lights on Rowlands Island; warning signs at the powerhouse and each bank for a distance of 100 yards below the dam and powerhouse, denoting an area in which boating is prohibited; explanatory signs located at all access roads and parking areas on both sides of the river below the dam downstream to McCausland Island; printed folders setting forth basic safety rules and regulations for fishing and boating below the dam, to be made available to the public from boxes on the explanatory signs described above; and five new large red warning lights on the downstream face of the powerhouse. The estimated cost of the revised fishermen's warning system is $120,000.

The Department of the Interior in commenting on the proposed plan recommended approval of the application and indicated that the proposed plan would supplement existing recreation facilities considerably and should be implemented at an early date. The Federal Water Pollution Control Administration of the Department recomended approval of the application provided a secondary treatment system is constructed at Conowingo dam to handle waste discharges. Licensees have retained an engineering firm for consultation on waste treatment and propose, as a result thereof, to replace the present sewage treatment system with an extended aeration type plant acceptable to the Maryland State Health Department which we believe should meet the Department's objectives.

The United States Coast Guard in reporting on the application commented favorably on the prohibited area signs (and their flood lighting at night) as conforming in size, shape and symbol to the Uniform State Waterway Marker System but recommended inclusion of the words, "DAM TAILRACE" on the signs. The Licensees in commenting on the Coast Guard's recommendations agreed to change the prohibited area signs by adding the words "DAM TAILRACE".

The Department of the Army in commenting on the application advised that the amendment of the license as proposed will not require insertion of additional terms and conditions in the interest of navigation.

The State of Maryland Planning Department supported the proposed expansion of recreational facilities and requested consideration by the Licensees of (1) improved access to the Susquehanna River below Shures Landing for fishing use, (2) additional parking needs in the tailrace area, (3) coordination of recreational planning at the dam with that for the Susquehanna State Park, and (4) protection of the scenic values at the Conowingo Creek Development. Licensees have agreed to consult with the State on the first three points above and have given assurance that the development at Conowingo Creek would be done so as to improve the present appearance of the area. The Maryland Department of Game and Inland Fisheries has concurred in Licensees' revised plan for the fishermen's warning system.

The Commonwealth of Pennsylvania, Department of Forests and Waters in commenting on the application stated that the proposed improvements will provide much needed facilities for the public on Conowingo Reservoir but that sanitary facilities should be provided at the time the Conowingo Creek access area is developed, that the location of the picnic shelter and fish-cleaning shed might interfere with the fish passage facilities proposed for construction at Conowingo Dam, and recommended coordination by Licensees with the U.S. Coast Guard and other agencies on the needs of the fishermen's warning system. Licensees have stated that the location of the proposed fish ladder at Conowingo was considered in locating the picnic shelter and fish-cleaning shed and our review of the location of these facilities has revealed no conflict.

Licensees have also stated that the need for sanitary facilities at Conowingo Creek will be reviewed from time to time in light of public use of the area. The licensees will coordinate the needs of the fishermen's warning system with the appropriate State and Federal agencies.

While we are approving the proposal to provide recreation facilities as submitted by the Licensees as part of the license for the project, we are herein modifying the license for Project No. 405 to include two additional Articles to provide sanitary facilities at the Conowingo Creek development at the time of completion of these facilities and requiring the licensees to continue to cooperate with Federal and State agencies in the installation of any needed improvements to the proposed fishermen's warning system for the tailrace area at the Conowingo dam. We believe these articles will meet the suggestions made on those two subjects by the Commonwealth of Pennsylvania, Department of Forests and Waters and the United States Coast Guard respectively and will be consistent with the public interest.

*The Commission finds:*

The plan to provide recreation facilities for Project No. 405 as described in the following designated filings conforms to the Commission's Regulations and should be approved as part of the license:

(a) Application to Amend License To Provide Recreational Facilities (Filed June 8, 1965).

(b) Letter from Licensees dated March 30, 1966.

(c) Letter from Licensees dated August 2, 1966.

(d) Drawing (FPC 405-73) filed on September 8, 1966.

*The Commission orders:*

(A) The plan to provide recreation facilities as described in the filings designated in the above finding is hereby approved as part of the license for Project No. 405.

(B) The License for Project No. 405 is hereby modified to include therein the following additional articles:

> *Article 46.* The Licensees shall provide adequate sanitary facilities at the Conowingo Creek public recreation area of a design approved by the appropriate state department of health.
>
> *Article 47.* The Licensees shall, in the interest of public safety, continue to cooperate with Federal and State agencies in the installation of any needed improvement to the proposed fishermen's warning system for the tailrace area at the Conowingo dam and the Licensees shall make such reasonable modifications of the system and operation as may be ordered by the Commission upon its own motion after notice and opportunity for hearing and upon findings based on substantial evidence that such modifications are necessary, desirable, and reasonably consistent with the primary purpose of the project, and consistent with the provisions of the Act.

(C) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this order. In acknowledgment of the acceptance of this order, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## UNITED GAS PIPE LINE COMPANY, DOCKET NO. G-15123

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 9, 1967)

On May 19, 1958, United Gas Pipe Line Company (Applicant) filed in Docket No. G-15123 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of a purchase meter station, a separator installation and approximately 9.35 miles of 16-inch pipeline and appurtenant facilities in St. Mary Parish, Louisiana, all as more fully set forth in the application.

Applicant seeks permanent authorization for the above-mentioned facilities being used in connecting the gas supply of the Belle Isle Area into its existing transmission system. The natural gas is being supplied by Sun Oil Company (Sun); the original recoverable reserves available to Applicant were estimated to be 301,346 MMcf in the original application.

The total actual cost of Applicant's facilities was $841,311, said cost being financed from funds on hand.

On August 10, 1959, Applicant was granted the certificate requested in the above-mentioned application authorizing the facilities above-described. United Gas Improvement Company (UGI) and the New York Public Service Commission, interveners in the instant proceeding, appealed the Commission's decision and the Court held that the Commission decision be set aside and the proceeding be remanded for further appropriate action by the Commission. Applicant then sought, and on October 26, 1962 was granted, temporary authorization to construct and operate the subject facilities. On November 14, 1962, 28 FPC 809, the Commission, in Docket No. G-15122, issued an order approving the offer of settlement by Sun of the rate to Applicant. The application is no longer contested and Applicant now seeks permanent authorization for said facilities.

At a hearing held May 4, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the original application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, United Gas Pipe Line Company, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued November 10, 1942, in Docket No. G-232 (3 FPC 863).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (e) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to Applicant, United Gas Pipe Line Company, authorizing the construction and operation of facilities as hereinbefore described and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e) and (g) of Section 157.20 of such Regulations.

## UNITED GAS PIPE LINE COMPANY, DOCKET NO. G-16556

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 9, 1967)

On October 14, 1958, United Gas Pipe Line Company (Applicant) filed in G-16556 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of a purchase meter station, approximately 10.0 miles of 16-inch pipeline, and appurtenant facilities in Terrebonne Parish, Louisiana, all as more fully set forth in the application.

Applicant seeks permanent authorization for the above-mentioned facilities being used in the connection of the gas supply of the Four Isle Dome Area into its existing transmission system. The natural gas is being supplied by The California Company (California) and Superior Oil Company (Superior).

The total cost of Applicant's facilities was $762,723.

On August 10, 1959, Applicant was granted the certificate requested in the above-mentioned application authorizing the facilities above-described. United Gas Improvement Company (UGI), intervener in the instant proceeding, appealed the Commission's decision and the Court held that the Commission's order be set aside and the proceeding be remanded for further appropriate action by the Commission. Applicant then sought, and on October 26, 1962, was granted, temporary authorization to construct and operate the subject facilities. On July 30, 1962, 28 FPC 247, and July 17, 1963, 30 FPC 283, the Commission issued orders granting permanent certificates to California in Docket No. G-16108 and Superior in Docket No. G-16388, respectively. The application is no longer contested and Applicant now seeks permanent authorization for said facilities.

At a hearing held May 4, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the original application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, United Gas Pipe Line Company, a Delaware Corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued November 10, 1942, in Docket No. G-232 (3 FPC 863).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (e) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to Applicant, United Gas Pipe Line Company, authorizing the construction and operation of facilities as hereinbefore described and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e) and (g) of Section 157.20 of such Regulations.

## MCCARRICK, GOUGER & MITCHELL, ET AL., DOCKET NO. RI60-426

### ORDER ACCEPTING OFFER OF SETTLEMENT, REQUIRING FILING OF NOTICE OF CHANGE, REQUIRING REFUNDS, SEVERING, AND TERMINATING PROCEEDING

(Issued May 10, 1967)

On March 20, 1967, McCarrick, Gouger & Mitchell, *et al.* (McCarrick) filed an offer of settlement, pursuant to Section 1.18(e) of the Commission's Rules of Practice and Procedure, involving an increased rate for sales of natural gas to Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (TGP) from the Seeligson Field, Jim Wells County, Texas (Texas Railroad Commission District No. 4, under its FPC Gas Rate Schedule No. 2. McCarrick filed a rate increase from 12.12268¢ to 17.24347¢ per Mcf of natural gas at 14.65 psia, inclusive of tax reimbursement, on May 23, 1960, which was suspended by order of the Commission on June 22, 1960, for the statutory period, and thereafter made effective, subject to refund, by McCarrick on November 23, 1960.

Under the terms of the offer, McCarrick proposes to eliminate the periodic price escalation, price redetermination and favored-nation clauses from the subject contract, to substitute new periodic escalation provisions, and to reduce the rate to 14.6¢ per Mcf of natural gas at 14.65 psia, inclusive of tax reimbursement (three-fourths of taxes levied after January 1, 1967).

Approval of the proposal will decrease McCarrick's annual revenues approximately $8,200, based on the currently effective rate, and it will refund to TGP approximately $27,300, exclusive of interest.

The proposed settlement is consistent with the provisions of the Second Amendment to the Commission's Statement of General Policy No. 61–1 (18 CFR 2.56) and its acceptance would serve the public interest.

However, we desire to make it clear that acceptance of McCarrick's offer of settlement shall not be construed as constituting approval of any future rate increase that may be filed under the subject rate schedule resulting from the new periodic escalation provisions or from any possible future tax increase, and is without prejudice to any findings or orders of the Commission in any proceeding, including area rate or other similar proceeding, involving McCarrick's rate and rate schedule.

*The Commission finds:*

The proposed settlement of the above-designated proceeding, on the basis described herein, as more fully set forth in the offer of settlement filed with the Commission by McCarrick on March 20, 1967, is in the public interest and appropriate to carry out the provisions of the Natural Gas Act and should be approved and made effective as hereinafter ordered.

*The Commission orders:*

(A) The offer of settlement filed with the Commission by McCarrick on March 20, 1967, is approved in accordance with the provisions of this order.

(B) McCarrick shall file within 30 days from the date of issuance of this order a notice of change in rate providing for the 14.6¢ per Mcf rate specified in its settlement proposal and an executed contract amendment to its FPC Gas Rate Schedule No. 2 eliminating the present periodic, price redetermination, and favored-nation clauses therefrom and submitting in lieu thereof new periodic escalations consistent with the settlement proposal. The contractual amendment and notice of change shall be submitted in accordance with Part 154 of the Commission's Regulations under the Natural Gas Act.

(C) McCarrick shall compute the difference between the rate collected subject to refund and the settlement rate of 14.6¢ per Mcf of natural gas at 14.65 psia for the period from November 23, 1960 to the date of this order, together with applicable interest, and shall within thirty days from the date of this order submit a report to the Commission, and serve a copy on TGP, setting out the amount of refunds (showing separately the principal and interest) and the bases used for such determination. Ten days thereafter it shall refund such monies to TGP, and within ten days of making the refund shall file a letter of agreement and receipt of the refund monies from TGP.

(D) Upon compliance by McCarrick, with the provisions of this order, the proceeding in Docket No. RI60–426 shall be severed from the Texas Gulf Coast Area Rate Proceeding, Docket No. AR64–2, and terminated.

(E) The acceptance of the Commission of McCarrick's offer of settlement is without prejudice to any findings now pending, or hereafter instituted by or against McCarrick including area rate or other similar proceedings.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## PANHANDLE EASTERN PIPE LINE COMPANY, DOCKET NO. CP66-244

### ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 10, 1967)

On March 15, 1967, Panhandle Eastern Pipe Line Company (Petitioner) filed in Docket No. CP66-244 a petition to amend the order of the Commission issued in said docket on June 6, 1966, 35 FPC 896, and amended on August 26, 1966, 36 FPC 538, which order, as amended, authorized the construction and operation of certain natural gas facilities together with the sale and delivery of increased volumes of natural gas to certain of its general service customers. By the instant filing Petitioner requests authority to increase the summer contract demands for four of its general service customers in order to enable them to meet their present contract firm requirements during the months of April through October, all as more fully set forth in the petition to amend.

Petitioner states that the following volumes of natural gas (in Mcf) are required by the aforementioned customers in view of their revised estimates of requirements for the summer season:

| Company | Total of present monthly demand Apr.-Oct. | Total of proposed monthly demand Apr.-Oct. | Total of proposed monthly increase |
|---|---|---|---|
| Associated Natural Gas Co. | 14,500 | 16,300 | 1,800 |
| Missouri Power and Light Co. | 138,000 | 145,000 | 7,000 |
| Missouri Utilities Co. | 66,400 | 82,000 | 15,600 |
| Central Illinois Electric and Gas Co. | 88,000 | 91,400 | 3,400 |

On March 31, 1967, the Commission issued to Petitioner a temporary certificate authorizing the additional service proposed during the period April 1, 1967, through October 31, 1967.

After due notice, no protest, petition to intervene or notice of intervention has been filed.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act, and the public convenience and necessity require that the Commission's order issued on June 6, 1966, as amended, be amended further as hereinafter ordered and conditioned.

*The Commission orders:*

(A) The Commission's order issued on June 6, 1966, in Docket No. CP66-244, as amended, is amended further so as to authorize the increased sale and delivery of natural gas by Petitioner to the general service customers listed above in order to enable them to meet their present firm requirements during the period April 1, 1967, through October 31, 1967, as hereinbefore set forth and as more fully set forth in the petition to amend filed in this proceeding.

(B) Petitioner shall make appropriate rate filings reflecting the increased service authorized herein and shall notify the Commission of the dates of commencement of such service within ten days thereof.

(C) In all other respects the subject order shall remain in full force and effect.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## CITIES OF PRINCETON AND MERCER, MISSOURI, AND LINEVILLE, IOWA, AND MICHIGAN WISCONSIN PIPE LINE COMPANY, DOCKET NO. CP66-240

### ORDER AMENDING ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued May 10, 1967)

On April 19, 1967, the Cities of Princeton and Mercer, Missouri, and Lineville, Iowa (Petitioners) filed in Docket No. CP66-240 a petition to amend the order issued in said docket on May 24, 1966, 35 FPC 782, requesting that paragraph (B) of said order be amended so as to extend the time until May 24, 1968, for Petitioners to be prepared to receive natural gas from Michigan Wisconsin Pipe Line Company (Michigan Wisconsin), all as more fully set forth in the petition to amend.

The order of the Commission issued May 24, 1966, directs Michigan Wisconsin to make physical connection with and deliver natural gas to Princeton and Mercer, Missouri, and Lineville, Iowa, for local distribution. Paragraph (B) of said order requires Petitioners to be prepared to receive natural gas from Michigan Wisconsin by May 23, 1967.

Petitioners state that construction and final testing of the transmission lateral line and distribution systems cannot be completed in time to meet the required May 23, 1967 deadline.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity requires that the Commission's order issued May 24, 1966, in Docket No. CP66-240, as amended, be further amended as hereinafter ordered.

*The Commission orders:*

(A) The Commission's order issued May 24, 1966, in Docket No. CP66-240, is further amended so as to modify the provisions of Ordering Paragraph (B) and extend the time in which the Cities of Princeton and Mercer, Missouri, and Lineville, Iowa, shall be prepared to receive natural gas from Michigan Wisconsin from May 23, 1967, to May 24, 1968.

(B) In all other respects said order, as amended shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## SALTILLO-GUNTOWN NATURAL GAS DISTRICT, MISSISSIPPI AND TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC., DOCKET NO. CP67-165

### FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued May 10, 1967)

On December 13, 1966, Saltillo-Guntown Natural Gas District, Mississippi (Applicant), filed in Docket No. CP67-165 an application, as supplemented on March 13, 1967, pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Tennessee Gas Pipeline Company (Respondent) to establish physical connection of its facilities with the facilities to be constructed by Applicant and to sell and deliver volumes of natural gas to Applicant, all as more fully set forth in the application and supplement thereto.

Specifically, Applicant requests that the Commission order Respondent to make physical connection of its transmission facilities with the facilities to be constructed by Applicant and to sell and deliver volumes of natural gas to Applicant for resale and distribution in the Towns of Guntown and Saltillo, in Lee County and adjacent parts of Lee, Tippah and Union Counties and along Applicant's proposed transmission line, all in Mississippi.

The estimated third year annual and peak day requirements of Applicant's proposed system in Mcf at 14.73 psia are 137,808 and 1,615 respectively.

The total cost of Applicant's proposed construction is estimated at $995,000 and will be financed through the sale of 30-year revenue bonds.

On January 16, 1967, Respondent filed an answer to the application in this proceeding stating it does not oppose the granting of the application for an order directing it to render the service requested.

Due notice of the filing of the subject application and opportunity for hearing thereon have been given by publication in the Federal Register on December 28, 1966 (31 F.R. 16590). No protest, petition to intervene, notice of intervention or request for hearing has been filed in this proceeding, other than a petition to intervene filed by Mississippi Valley Gas Company on January 16, 1967, and withdrawn on April 11, 1967.

*The Commission finds:*

(1) Tennessee Gas Pipeline Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretobefore found by the Commission in its order issued July 15, 1947, in Docket No. G-910 (6 FPC 777).

(2) Applicant is legally authorized to engage in the local distribution of natural gas to the public within the meaning of Section 7(a) of the Natural Gas Act.

(3) It is necessary and desirable in the public interest to direct Respondent to establish physical connection of its transmission facilities with the facilities proposed to be constructed and operated by Applicant, and to sell and deliver to Applicant under a service agreement to be executed by Applicant with Respondent in accordance with the Commission's Regulations, up to 1,615 Mcf per day of natural gas for distribution and resale, as hereinbefore

described and as more fully described in the application in this proceeding.

(4) Applicant should be prepared to receive natural gas from Respondent for distribution in the towns of Saltillo and Guntown in Lee County and the adjacent parts of Lee, Tippah and Union Counties and along Applicant's proposed transmission line, all in Mississippi, within one year from the date of the issuance of this order.

(5) The requirement that Respondent serve Applicant, as requested, will not place an undue burden upon it nor impair its ability to render adequate service to its existing customers.

*The Commission orders:*

(A) Tennessee Gas Pipeline Company is directed to establish physical connection of its facilities with the facilities proposed to be constructed and operated by Applicant, and to sell and deliver up to 1,615 Mcf of natural gas daily to Applicant under a service agreement to be executed by Applicant with Respondent and filed in accordance with the Commission's Regulations, for distribution and resale, as hereinbefore described and as more fully described in the application in this proceeding. Such service shall be rendered pursuant to Respondent's presently filed appropriate rate schedule.

(B) Respondent shall report to the Commission in writing the date of commencement of service to Applicant within 10 days thereof.

(C) Applicant shall be prepared to receive service as directed herein within one year from the date of issuance of this order.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## TEXAS GAS TRANSMISSION CORPORATION, DOCKET NO. CP67-198

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND PERMITTING AND APPROVING ABANDONMENT

(Issued May 10, 1967)

On January 10, 1967, Texas Gas Transmission Corporation (Applicant), filed in Docket No. CP67-198 an application, as supplemented on March 2, 1967, pursuant to Section 7(b) and Section 7(c) of the Natural Gas Act for permission and approval to abandon certain natural gas facilities and for a certificate of public convenience and necessity authorizing the construction and operation of other facilities, all as more fully set forth in the application.

Applicant seeks permission and approval to abandon:

(1) The Wilmot, Arkansas, Compressor Station consisting of 7 compressor units aggregating 5400 horsepower and appurtenances thereto;

(2) The Benoit, Mississippi, Compressor Station consisting of 6 compressor units aggregating 6600 horsepower and appurtenances thereto; and

(3) The Lula, Mississippi, Compressor Station consisting of 8 compressor units aggregating 5640 horsepower and appurtenances thereto.

Applicant states that the facilities proposed to be abandoned are obsolete,[1] not as efficient as modern compressors and present maintenance problems.

Applicant also proposes to install and operate 4520 additional horsepower at its Greenville, Mississippi, Compressor Station through the installation of one new 2,000-horsepower compressor unit and the turbo-charging eight existing compressor units.

---

[1] The average age of these units is 30 years.

The total estimated cost of the proposed construction is $1,651,000, which will be financed from funds on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application, has been filed.

At a hearing held on May 4, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplement and exhibits submitted in support of the authorizations sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Texas Gas Transmission Corporation, a Delaware corporation having its principal place of business in Owensboro, Kentucky, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of March 30, 1948, in Docket No. G–855 (7 FPC 213).

(2) The facilities proposed to be abandoned by Applicant, as hereinbefore described and as more fully described in the application, filed in the proceeding are used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and such abandonment is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The proposed abandonment of the aforesaid facilities is permitted by the public convenience and necessity and permission and approval therefor should be granted as hereinafter ordered.

(4) The proposed installation, construction and operation of facilities, as hereinbefore described and as more fully described in the application, filed in this proceeding are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(5) The aforesaid proposed installation, construction and operation of facilities, are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(6) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(7) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) Permission for and approval of the abandonment by Applicant of the facilities hereinbefore described, as more fully described in the application in this proceeding, are granted.

(B) A certificate of public convenience and necessity is issued to Applicant in this proceeding authorizing the construction and operation of facilities, as hereinbefore described and as more fully described in the application, upon the terms and conditions of this order.

(C) The certificate issued by paragraph (B) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(D) Applicant shall advise the Commission of the date of abandonment of the facilities as authorized in paragraph (A) above within ten days of such abandonment.

(E) The facilities authorized in paragraph (B) above shall be installed and placed in actual operation, as provided in paragraph (b) of Section 157.20 of the aforesaid Regulations within 12 months of the date on which this order issues.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## CITY OF ALBANY, WATER, GAS AND LIGHT COMMISSION AND SOUTH GEORGIA NATURAL GAS COMPANY, DOCKET NO. CP67-264

### FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued May 11, 1967)

On March 14, 1967, The Water, Gas and Light Commission of the City of Albany (Applicant), filed in Docket No. CP67-264 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing South Georgia Natural Gas Company (Respondent) to establish physical connection of its transportation facilities with the facilities proposed to be constructed by Applicant and to sell and deliver to Applicant volumes of natural gas for resale and distribution by Applicant to a proposed manufacturing plant in the southwest corner of Lee County, in the State of Georgia, all as more fully set forth in the application.

Applicant proposes to construct a natural gas distribution system, from a point of connection with Respondent's transmission system in Lee County, at the unincorporated community of Armena, Georgia, consisting of a pressure reducing station, an odorizing station, 1,250 feet of 4.5-inch O.D. pipe and related facilities necessary for delivery of natural gas to the proposed industrial plant of Lilliston Implement Company of Albany, Georgia (Lilliston), to be located in Armena, Lee County, Georgia. This will be an initial connection for service to Lilliston in Lee County, Georgia. Applicant does not propose to serve any other customer from this line except Lilliston. Applicant proposes to serve Lilliston at its new plant location in lieu of the service presently rendered in Albany, Georgia. Applicant's distribution system at Albany, Georgia, is also connected to Respondent's system.

Applicant estimates the maximum daily and maximum annual requirements of Lilliston in Mcf at 14.73 psia as follows:

| Year | Maximum daily requirements (Mcf) | Maximum annual requirements (Mcf) |
|---|---|---|
| 1st | 115 | 12,000 |
| 2d | 120 | 13,000 |
| 3d | 125 | 14,000 |

Applicant estimates the cost of the proposed facilities at approximately $14,750, said cost to be defrayed from cash on hand.

Respondent filed an answer in this proceeding on March 22, 1967, stating it has no objection to the granting of the requested order for service.

Due notice of the filing of the application and opportunity for hearing thereon has been given by publication in the Federal Register on March 30, 1967 (32 F.R. 5387). No protest, petition to intervene, or request for hearing has been filed in this proceeding.

*The Commission finds:*

(1) South Georgia Natural Gas Company, a Georgia corporation having its principal place of business in Birmingham, Alabama, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order dated February 18, 1953 in Docket No. G–1915 (3 FPC 516).

(2) Applicant is legally authorized to engage in the local distribution of natural gas to the public within the meaning of Section 7(a) of the Natural Gas Act.

(3) It is necessary and desirable in the public interest to direct Respondent to establish physical connection of its transmission facilities with the facilities proposed to be constructed and operated by Applicant and to sell and deliver to Applicant under revised service agreement to be executed by Applicant with Respondent, in accordance with the Commission's Regulations, up to 125 Mcf per day for distribution and resale, as hereinbefore described and as more fully described in the application in this proceeding.

(4) Applicant should be prepared to receive natural gas from Respondent for distribution by Applicant to the manufacturing plant of Lilliston Implement Company in Lee County, Georgia, within one year from the date of the issuance of this order.

(5) The requirement that Respondent serve Applicant, as requested, will not impair its ability to render adequate service to existing customers.

*The Commission orders:*

(A) South Georgia Natural Gas Company is directed to establish physical connection of its facilities with the facilities proposed to be constructed and operated by Applicant and to sell and deliver to Applicant up to 125 Mcf of natural gas daily under a revised service agreement to be executed by Applicant with Respondent in accordance with the Commission's Regulations for transportation, distribution and resale, as hereinbefore described and as more fully described in the application. Such service shall be rendered pursuant to Respondent's presently filed appropriate rate schedule.

(B) Respondent shall report to the Commission the date of commencement of service to Applicant within 10 days after such service begins.

(C) Applicant shall be prepared to receive service as directed herein within one year from the date of issuance of this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## GREAT RIVER GAS COMPANY AND PANHANDLE EASTERN PIPE LINE COMPANY, DOCKET NO. CP67–257

### FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued May 11, 1967)

On March 9, 1967, Great River Gas Company (Applicant) filed in Docket No. CP67–257 an application pursuant to Section 7(a) of the Natural Gas

Act for an order of the Commission directing Panhandle Eastern Pipe Line Company (Respondent) to establish physical connection of its transportation facilities with the facilities proposed to be constructed by Applicant and to sell and deliver to Applicant up to 8,400 Mcf of natural gas per day for resale and distribution to the public in and around the municipalities of Memphis, Arbela and Granger in Scotland County; the municipalities of Luray, Kahoka, Wayland and Alexandria and the unincorporated communities of Ashton and Medill in Clark County, the municipalities of Edina and Knox City in Knox County; the municipalities of LaBelle, Lewistown, Monticello, Canton and LaGrange in Lewis County; and the unincorporated communities of West Quincy and Taylor in Marion County, all in the State of Missouri, all as more fully set forth in the application.

Applicant proposes to construct and operate pipelines extending from Respondent's point of delivery northward and to the east and west to the aforementioned eighteen communities and distribution facilities in each of the communities. These facilities aggregate approximately 29 miles of 10-inch, 71 miles of 6-inch, 32 miles of 4-inch, 43 miles of 2-inch and 64 miles of 1-inch coated and wrapped steel gas main, together with related appurtenances, services, meters and regulators.

Applicant also proposes to construct and operate an odorizing and regulating station at the point of interconnection with Respondent's facilities.

Applicant's estimated third year annual and peak day natural gas requirements are 1,143,200 Mcf and 8,400 Mcf, respectively. Respondent will sell and deliver said gas requirements to Applicant pursuant to Respondent's Rate Schedule G–2.

Applicant states that Respondent has advised that it will construct the necessary metering and regulating facilities at the proposed point of delivery and will render the requested natural gas service. The estimated cost of Respondent's metering and regulating facilities is $30,000.

Applicant has been granted certificate authority by the Missouri Public Service Commission in Docket No. 15,976 effective March 1, 1967, and franchises from each of the 14 municipalities.

The county courts of the five counties comprising the subject service area have authorized Applicant to construct natural gas distribution systems within their respective boundaries, thus authorizing Applicant to serve the four unincorporated communities.

The total estimated cost of Applicant's proposed facilities is $3,572,670. Applicant proposes to finance its cost of construction with funds furnished by its parent company, Northern Illinois Gas Company (Northern Illinois).

By order of May 25, 1966, in Docket No. 52295, the Illinois Commerce Commission authorized Northern Illinois to make equity investments in, and loans to Applicant up to an aggregate amount of $4,000,000.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

*The Commission finds:*

(1) Respondent, Panhandle Eastern Pipe Line Company, a Delaware corporation having its principal place of business in Kansas City, Missouri, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of September 23, 1942, in Docket Nos. G–200 and G–207 (3 FPC 273).

(2) Applicant, Great River Gas Company, has received authorization to render the proposed service and no additional authorization is needed to implement its proposal.

(3) It is necessary and desirable in the public interest that Respondent be directed to establish physical connection of its natural gas transportation system with the proposed facilities of Applicant and to sell and deliver up to 8,400 Mcf of natural gas per day to Applicant, as set forth in the application and as hereinafter ordered and conditioned.

(4) This order should be conditioned upon Applicant being prepared to receive natural gas from Respondent, as proposed, within one year from the date on which this order issues.

(5) The requirement that Respondent serve Applicant, as proposed, will not place any undue burden upon Respondent, nor impair its ability to render adequate service to its existing customers.

*The Commission orders:*

(A) Respondent is directed to establish physical connection of its natural gas transmission system with the facilities to be constructed by Applicant and to sell and deliver up to 8,400 Mcf of natural gas per day to Applicant for resale and distribution in the municipalities of Memphis, Arbela and Granger in Scotland County, the municipalities of Luray, Kahoka, Wayland and Alexandria and the unincorporated communities of Ashton and Medill in Clark County; the municipalities of Edina and Knox City in Knox County; the municipalities of LaBella, Lewistown, Monticello, Canton and LaGrange in Lewis County; and the unincorporated communities of West Quincy and Taylor in Marion County, all in the State of Missouri, as hereinbefore described and as more fully described in the application.

(B) Applicant shall be prepared to receive natural gas from Respondent within one year from the date of this order.

(C) Respondent shall notify the Commission of the commencement of service within ten days thereof.

(D) Respondent shall execute and file with the Commission a service agreement with Applicant in accordance with the Commission Regulations.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## MANTACHIE NATURAL GAS DISTRICT AND TEXAS EASTERN TRANSMISSION CORPORATION, DOCKET NO. CP67-169

### FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued May 11, 1967)

On December 14, 1966, Mantachie Natural Gas District (Applicant) filed in Docket No. CP67-169 an application, as supplemented on April 3, 1967, pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Texas Eastern Transmission Corporation (Respondent) to establish physical connection of its facilities with facilities proposed to be constructed by Applicant and to sell and deliver to Applicant volumes of natural gas for resale and distribution, all as more fully set forth in the application and supplement.

Applicant requests that the Respondent be ordered to make physical connection of its transmission facilities with the system to be constructed by Applicant and to sell and deliver volumes of natural gas for resale through Applicant's system in Mantachie, Mooresville, Dorsey, Kirkville, and Evergreen, Mississippi, and parts of Itawamba and Lee Counties, Mississippi. Applicant proposes to construct and operate distribution systems in the five communities, and adjacent rural areas, and 9.1 miles of 4-inch and 13.05 miles of 3-inch lateral transmission pipeline.

Applicant proposes to finance the project through the sale of five percent, 30-year revenue bonds in the principal amount of $1,072,000.

On December 16, 1966, Respondent was duly advised of the application filed in this proceeding, and due notice of the filing and opportunity for hearing thereon has been given by publication in the Federal Register on January 13, 1967. No protest, petition to intervene or request for hearing has been filed in this proceeding other than a petition to intervene filed by Mississippi Valley Gas Company on January 16, 1967, and withdrawn on April 11, 1967.

On January 13, 1967, Respondent filed an answer to the application and indicated therein that it has no objection to the entry of an order requiring it to establish the requested connection of its facilities and provide the requested service.

*The Commission finds:*

(1) Texas Eastern Transmission Corporation, a Delaware corporation havings its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretobefore found by the Commission in its order of October 11, 1947, in Docket No. G–880 (6 FPC 171).

(2) Applicant is legally authorized to engage in the local distribution of natural gas to the public within the meaning of Section 7(a) of the Natural Gas Act.

(3) It is necessary and desirable in the public interest to direct Texas Eastern to establish physical connection of its transmission facilities with the facilities proposed to be constructed and operated by Applicant, and to sell and deliver to Applicant up to 1,762 Mcf of natural gas daily under a service agreement to be executed by Applicant with Texas Eastern in accordance with the Commission's Regulations.

(4) The requirement that Texas Eastern serve Applicant, as hereinafter ordered, will not place an undue burden upon Texas Eastern, require Texas Eastern to enlarge its transportation facilities, or impair Texas Eastern's ability to render adequate service to its existing customers.

(5) Applicant should be prepared to receive natural gas at the proposed delivery point from Texas Eastern within one year from the date of the issuance of this order.

*The Commission orders:*

(A) Texas Eastern Transmission Corporation is directed to establish physical connection of its facilities with the facilities proposed to be constructed and operated by Applicant and to sell and deliver to Applicant up to 1,762 Mcf of natural gas daily, for distribution, as hereinbefore described and as more fully described in the application and supplement thereto, under a service agreement to be executed by Applicant with Texas Eastern in accordance with the Commission's Regulations. Such service shall be rendered pursuant to Texas Eastern's presently filed appropriate rate schedule.

(B) Texas Eastern shall report to the Commission in writing the date of commencement of service to Applicant at the proposed delivery point within 10 days thereof.

(C) Applicant shall be prepared to receive service as directed herein within one year from the date of issuance of this order.

## THE MONTANA POWER COMPANY, PROJECT NO. 1473

### ORDER APPROVING REVISED EXHIBIT L DRAWINGS FOR PROJECT AND MODIFYING LICENSE

(Issued May 11, 1967)

On April 25, 1966, The Montana Power Company, licensee for Project No. 1473, filed for Commission approval revised Exhibit L drawings for constructed Project No. 1473, known as Georgetown Lake Project, located on Flint Creek, a tributary of Clark Fork River, in Deer Lodge and Granite Counties, Montana, and affecting lands of the United States within the Deerlodge National Forest.

The drawings show a plan for the construction by the United States Forest Service of a two lane highway across the project dam and modifications to the dam structure made necessary thereby, Construction would consist of the placement of additional fill on the downstream embankment and extension of the concrete outlet pipe, reconstruction of the spillway, and provision for a manhole for access to the outlet pipe control valve. The surface of the proposed highway will be about 4.5 feet above the crest of the dam. The highway will replace a single lane road now crossing the dam and improve access to recreational facilities located in the vicinity of the project lake.

Certain benefits from construction of the new highway will inure to the licensee, in that an unused spillway will be renovated and 4.5 feet of additional freeboard will be made available, thereby increasing the flood handling capability of the project.

In connection with its April 25, 1966 filing and pursuant to Commission Order No. 315, issued December 27, 1965 (34 FPC 1551), the licensee filed on March 2, 1967, an independent consultant's report on the Flint Creek Dam of the project, entitled "Flint Creek Dam Safety Investigation" (dated February 1967) in which the following recommendations (paragraphs 5.7 and 6) were made in connection with construction by the U.S. Forest Service of the proposed two lane highway as shown on the revised Exhibit L drawings:

(1) Increase the thickness of concrete in the spillway chute and appropriately reinforce;

(2) Provide a properly designed filter protected drain blanket along the entire contact area between the proposed new fill and natural ground; and

(3) Provide a measuring weir in Flint Creek downstream from the new fill to measure leakage and observe turbidity.

The recommendations set forth above are necessary and reasonable refinements to the design for the proposed construction of the highway and modification of the dam structure shown on the revised Exhibit L drawings.

The Chief, Forest Service, acting for the Secretary of Agriculture, who has supervision over the Deerlodge National Forest, has advised that the revised Exhibit L drawings are satisfactory.

**The Department of the Interior has recommended for inclusion in the license, a special condition to protect the downstream fishery during the proposed construction. Both the licensee and the Forest Service have offered no objection to inclusion of the special condition in the license, which is set forth herein as Article 26.**

**We are herein including a new license Article 5, which is revised to conform to the "inspection" article presently included in licenses for projects of the type herein involved and to apply to the construction in connection with the new highway across the project dam.**

*The Commission finds:*

The following described revised Exhibit L drawings conform to the Commission's rules and regulations and should be approved as part of the license for Project No. 1473.

| Exhibit L | FPC No. 1473 | Showing |
|---|---|---|
| 2 | 12 | Typical cross section of proposed modifications. |
| 3 | 13 | Plan and profile of dam and road. |
| 4 | 14 | Plan and elevation of dam. |
| 5 | 15 | Plan and section of spillway. |
| 6 | 16 | Plan and section of manhole and valve chamber. |
| 7 | 17 | Plan, elevation, and section of outlet works. |
| 8 | 18 | Outlet works reinforcing steel. |

*The Commission orders:*

(A) The revised Exhibit L drawings described in the above finding are hereby approved as part of the license for Project No. 1473.

(B) The changes reflected in the revised Exhibit L drawings shall be made in accordance with the recommendations set forth above as contained in the above-mentioned "Flint Creek Dam Safety Investigation" report dated February 1967.

(C) Article 5 of the license for Project No. 1473 is hereby revised to read as follows:

*Article 5.* The construction, operation, and maintenance of the project and any work incident to additions or alterations shall be subject to the inspection and supervision of the Regional Engineer, Federal Power Commission, in the region wherein the project is located, or of such other officer or agent as the Commission may designate, who shall be the authorized representative of the Commission for such purposes. The Licensee shall cooperate fully with said representative and shall furnish him a detailed program of inspection by the Licensee that will provide for an adequate and qualified inspection force for construction of the project. Construction of the project works or any feature thereof shall not be initiated until the program of inspection for the project works or any such feature thereof has been approved by said representative. The Licensee shall also furnish to said representative such further information as he may require concerning the construction, operation, and maintenance of the project, and of any alteration thereof, and shall notify him of the date upon which work will begin, as far in advance thereof as said representative may reasonably specify, and shall notify him promptly in writing of any suspension of work for a period of more than one week, and of its resumption and completion. The Licensee shall allow him and other officers or employees of the United States, showing proper credentials, free and unrestricted access to, through, and across the project lands and project works in the performance of their official duties. The Licensee shall comply with such rules and regulations of general or special applicability as the Commission may from time to time prescribe for the protection of life, health, or property.

(D) The following article is hereby added to the license for the project:

*Article 26.* The Licensee shall take whatever precautions are necessary during construction operations to prevent the entry into Flint Creek and project waters of any undue amounts of silt, sand, gravel, or other material which may be injurious to fish and wildlife or their habitat.

(E) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this order. In acknowledgment of the acceptance of this order, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## UNION TEXAS PETROLEUM, A DIVISION OF ALLIED CHEMICAL CORPORATION, DOCKET NO. G-2935; TEXAS GAS PIPE LINE CORPORATION, DOCKET NO. CP67-20; TRANSCONTINENTAL GAS PIPE LINE CORPORATION, DOCKET NO. CP67-34

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY AND ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 11, 1967)

On July 27, 1966, in Docket No. CP67-20 and on August 17, 1966, in Docket No. CP67-34, Texas Gas Pipe Line Corporation (Texas Gas) and Transcontinental Gas Pipe Line Corporation (Transco), each, respectively, filed applications pursuant to Section 7(c) of the Natural Gas Act for certificates of public convenience and necessity authorizing the construction and operation of certain natural gas facilities in St. Landry Parish, Louisiana, in order to provide a new delivery point for gas sold by Texas Gas to Transco. On July 27, 1966, Union Texas Petroleum, a Division of Allied Chemical Corporation (Union), filed a petition to amend the Commission's order issuing a certificate of public convenience and necessity in Docket No. G-2935 so as to authorize an additional delivery point for the delivery of natural gas by Union to Texas Gas. The three Applicants' proposals are more fully set forth in the applications and petition in these proceedings.

Union presently gathers and processes Texas R.R. District No. 3 gas for Texas Gas who transports, sells and delivers the residue volume to Transco at a delivery point in Cameron Parish, Louisiana. The service agreement between Transco and Texas Gas provides for a contract demand of 50,000 Mcf of gas per day. Texas Gas states that it has experienced difficulty in delivering that volume regularly because of reduced volumes available to Union. To relieve this situation Union proposes to deliver by means of an exchange arrangement with Mobil Oil Corporation (Mobil) up to 30,000 Mcf of natural gas per day to Texas Gas from the Opelousas Field, St. Landry Parish, Louisiana. Mobil will supply this gas to Union and the latter will deliver like quantities to Mobil for use in a chemical plant near Beaumont, Texas.*

Union will deliver the Opelousas Field gas to Texas Gas at the outlet side of the Opelousas Plant in lieu of delivery of equivalent volumes which would otherwise be delivered to Texas Gas in Texas R.R. District No. 3. Texas Gas proposes to construct and operate 7.6 miles of 8⅝ inch pipeline from the Opelousas Plant to Transco's line in the Washington Field in St. Landry Parish. Transco will install a purchase meter and tap on its line.

Several petitions to intervene have been filed in these proceedings; however, such petitions have either been withdrawn or Petitioners state that they do not request formal hearing and do not object to the disposition of these matters pursuant to the statutory hearing procedure.

Due notice of the filing of the petition to amend in Docket No. G-2935 and opportunity for hearing thereon has been given by publication in the Federal Register on August 17, 1966 (31 F.R. 10933). No protest or other petition to intervene has been filed in said docket.

After due notice, no other petitions to intervene, notice of intervention or protest to the granting of the applications in Docket Nos. CP67-20 and CP67-34 have been filed.

At a hearing held on May 4, 1967, the Commission on its own motion received and made a part of the record in Docket Nos. CP67-20 and CP67-34 all evidence, including the applications and exhibits, submitted in support of the authorizations sought, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Texas Gas Pipe Line Corporation, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 29, 1954, in Docket No. G-2405 (13 FPC 1653).

(2) Applicant, Transcontinental Gas Pipe Line Corporation, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 18, 1948, in Docket No. G-1143 (7 FPC 145).

(3) The facilities hereinbefore described, as more fully described in the applications in Docket Nos. CP67-20 and CP67-34, are to be used in the transportation and/or sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Transco and Texas Gas are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(4) Transco and Texas Gas are able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the

---

* Since there is a possibility that Mobil may be unable to utilize volumes equivalent to those actually delivered to Union in Louisiana, Union has agreed to purchase the volumes in Louisiana which in any given month exceed a cumulative take deficiency (on the part of Mobil) of 3,600,000 Mcf. Should this take place, Mobil should file for authorization to sell gas to Union.

Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) The construction and operation of the proposed facilities by Texas Gas and Transco are required by the public convenience and necessity and certificates therefor should be issued as hereinafter ordered and conditioned.

(6) Public convenience and necessity require that the certificates issued hereinafter and the rights granted thereunder be conditioned upon Texas Gas' and Transco's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(7) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issuing a certificate of public convenience and necessity in Docket No. G-2935 be amended as hereinafter ordered.

*The Commission orders:*

(A) Certificates of public convenience and necessity are issued authorizing Applicants, Texas Gas Pipe Line Corporation and Transcontinental Gas Pipe Line Corporation, to construct and operate the proposed facilities for the transportation and/or sale of natural gas as hereinbefore described, all as more fully described in the applications in Docket Nos. CP67-20 and CP67-34, upon the terms and conditions of this order.

(B) The certificates issued by paragraph (A) above and rights granted thereunder are conditioned upon Applicants' compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within six months from the date on which this order issues.

(D) Texas Gas shall make appropriate tariff filings to reflect the new delivery point hereinabove authorized.

(E) The Commission's order issuing a certificate of public convenience and necessity in Docket No. G-2935 is amended so as to authorize the proposed additional delivery point for the delivery of South Louisiana natural gas by Union to Texas Gas, all as hereinbefore described and as set forth in the petition to amend in Docket No. G-2935.

(F) Union shall file, as supplements to its FPC Gas Rate Schedule No. 70, copies of the letter agreement, dated July 21, 1966, providing for the establishment of the additional delivery point, and, as a separate rate schedule, Union shall file copies of the exchange agreement, dated November 1, 1965, between Union and Mobil.

(G) In the event that Union must purchase gas exceeding the cumulative take deficiency of Mobil, Mobil shall first receive certificate authorization for such sale and shall make any appropriate rate filings prior to selling said excess volumes of gas to Union.

(H) In all other respects said order in Docket No. G-2935 shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## APPLICATIONS FOR VACATION OF POWER SITE WITHDRAWALS AND FOR DETERMINATIONS UNDER SECTION 24 OF THE FEDERAL POWER ACT, DOCKET NO. R-323

## ORDER NO. 346

### AMENDING § 25.1 OF REGULATIONS UNDER THE FEDERAL POWER ACT

(Issued May 12, 1967)*

The Commission has reviewed its procedures with respect to applications for vacation of power site withdrawals and determinations under Section 24 of the Federal Power Act in an effort to expedite the processing of such applications. Consultation with the Department of the Interior and other interested agencies has resulted in an understanding between the Commission and the Secretary of the Interior with respect to procedures for processing various applications relating to lands of the United States withdrawn for the development of electric power. In order to implement these procedures we are amending Part 25 of the Regulations under the Federal Power Act to provide that applications involving such lands which have been withdrawn pursuant to Section 24 of the Act, classified by the Geological Survey or otherwise withdrawn for power purposes be directed to the Bureau of Land Management, Department of the Interior, or in the case of National Forest Lands, to the U.S. Forest Service, Department of Agriculture.

Under the amended procedure, the Bureau of Land Management would advise an applicant in the event the lands included in the application are not available for disposal under the public land laws without regard to their power withdrawal. In such cases, where any action this Commission might take under Section 24 would not result in making the lands involved subject to disposal, the Bureau of Land Management would not request that a Section 24 determination be made. In all other cases, the Bureau of Land Management (or the Forest Service if National Forest Lands are involved) would apply to the Commission for a Section 24 determination. The procedure contemplates that the results of an investigation by the Geological Survey would be transmitted to the Commission together with the application involving lands which have been withdrawn for power purposes by the Department of the Interior.

The practice of having a Federal agency apply to the Commission for a section 24 determination when a third party seeks to acquire Government lands withdrawn for power purposes has been followed for some years by the Forest Service in connection with National Forest Land exchanges. The effect of the proposed change in § 25.1 would be merely to apply this procedure uniformly to all future applications under section 24.

It appears that the amendment hereinafter adopted pertains to Commission practice and procedure and hence that the notice and effective date provisions of section 4 of the Administrative Procedure Act are not applicable.

---

* Published in the Federal Register on May 20, 1967 (32 F.R. 7495).

*The Commission finds:*

(1) The amendment hereinafter adopted is necessary and appropriate for the purposes of administration of the Federal Power Act.

(2) Good cause exists that the amendment herein adopted becomes effective forthwith.

*The Commission,* acting pursuant to the provisions of the Federal Power Act, as amended, particularly sections 24 and 309 thereof (41 Stat. 1075; 49 Stat. 846, 858; 62 Stat. 275; 16 U.S.C. 818, 825 (h)), *orders:*

(A) Part 25, Subchapter B, Chapter I, Title 18 of the Code of Federal Regulations is amended by revising the first sentence of § 25.1. As amended, the section reads as follows:

> § 25.1 Contents of application.
>
> Any application for vacation of a reservation effected by the filing of an application for preliminary permit or license, or for a determination under the provisions of section 24 of the Act permitting restoration for location, entry, or selection under the public lands laws, or such lands reserved or classified as power sites shall, unless the subject lands are National Forest Lands, be filed with the Bureau of Land Management, Department of the Interior, at the Bureau's office in Washington, D.C. or at the appropriate regional or field office of the Bureau. If the lands included in such application are National Forest Lands, the application shall be filed with the United States Forest Service, Department of Agriculture at the Forest Service's office in Washington, D.C., or at the appropriate regional office of the U.S. Forest Service.

(B) The amendment herein adopted shall become effective upon the issuance of this order.

(C) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

## PACIFIC POWER & LIGHT COMPANY, DOCKET NO. E-7129

### SUPPLEMENTAL ORDER AUTHORIZING ISSUANCE OF PROMISSORY NOTES

(Issued May 12, 1967)

By order issued February 14, 1964, 31 FPC 414, in the above-entitled matter, the Commission, pursuant to Section 204 of the Federal Power Act, authorized Pacific Power & Light Company (Applicant) to issue, pursuant to a Credit Agreement of October 1, 1963 between Applicant and eight banks, unsecured Promissory Notes in the aggregate principal amount of $45,000,000 outstanding at any one time upon terms and conditions set forth in the order, which include, among other things, those set forth in the application, filed September 30, 1963, requesting such authorization. The order, by its terms, provided that the Notes were to be dated as of the dates of the borrowings and they were to mature 11 months after date of issue or on September 30, 1965, whichever shall be earlier.

The Commission, in a supplemental order, issued on June 3, 1965, 33 FPC 1207, authorized extension of the final maturity date for the notes to June 30, 1967 pursuant to the Applicant's "Amendment No. 1 to Application", filed on March 23, 1965.

The Applicant, in an "Amendment No. 2 to Application," filed on March 27, 1967, has informed the Commission that its Credit Agreement of October 1, 1963, as amended by its Letter Agreement of March 10, 1965, has been further amended by a new Letter Agreement of March 15, 1967. Under this new Letter Agreement, the Applicant has the right to continue to issue short-term notes up to $45,000,000 outstanding at any one time, under the same terms and conditions, with the exception of the extension of the final maturity date for the notes from June 30, 1967 to December 31, 1968. Among the aforesaid terms and conditions is a requirement that the notes bear interest at the prime rate in effect at the time of the borrowings with a commitment fee of one fourth of 1% per annum on unused available credit. In this "Amendment No. 2 to Application," the Commission has been requested to extend the final maturity date for the notes to December 31, 1968. This request is the subject of this order.

The notes issued under this credit agreement have been and will be discharged with proceeds from permanent financing.

The notes which the Applicant proposes to issue with a new final maturity date are to be issued to refund about $15,000,000 in notes outstanding and to provide a portion of the funds for the Applicant's construction program which has estimated costs of $43,459,000 for 1967 and $42,473,000 for 1968. The principal items in this program include $5 million for construction of the 15 mw Green River Steam Plant, Unit No. 1, $3.5 million for construction of 230 kv transmission facilities from Enterprise Oregon to Walla Walla, Washington, $2.7 million for work on the Malin 500 kv switching station, $1.3 million for the Centralia steam plant and $38.6 million for distribution facilities.

Applicant does not request any other changes in the authorization heretofore granted in this matter.

Written notice of the filing of this application has been given to the California Public Utilities Commission, the Public Utilities Commission of Idaho, the Public Service Commission of Montana, the Utilities and Transportation Commission of Washington, the Public Service Commission of Wyoming, the Public Utility Commissioner of Oregon and to the Governor of each of those States. Notice has also been given by publication in the Federal Register on April 18, 1967 (32 F.R. 6111), stating that any person desiring to be heard or to make any protest with reference to the application should file a petition or protest on or before April 25, 1967, with the Federal Power Commission, Washington, D.C. 20426. The state commissions of Washington, California, Montana and Idaho have approved this transaction. No protest, petition or request to be heard in opposition to the granting of the application has been received.

*The Commission finds:*

(1) Good cause has been shown and it is necessary and appropriate for the purposes of the Act that Paragraph (B) of the Commission's order issued February 14, 1964, be modified as hereinafter provided.

(2) The period of public notice given in this matter is reasonable.

*The Commission orders:*

(A) Paragraph (B) of the Commission's order issued February 14, 1964, as amended by order issued June 3, 1965, in the above-entitled docket is amended to read as follows:

> (B) This authorization is expressly conditioned upon the final maturity of all Notes to be issued pursuant hereto being not later than December 31, 1968.

(B) All other terms and conditions as set forth in Paragraphs (A), (C) and (D) of the aforesaid Commission order issued February 14, 1964 shall remain in full force and effect.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

## PEND OREILLE MINES & METALS CO., PROJECT NO. 1393 AND CITY OF SEATTLE, WASHINGTON, PROJECT NO. 2144

### ORDER RELIEVING LICENSEE OF CERTAIN OBLIGATIONS AND PERMITTING WITHDRAWAL OF APPLICATION FOR LICENSE

(Issued May 12, 1967)

Pend Oreille Mines and Metals Co., (Pend Oreille) filed an application on April 16, 1962 for a renewal of its license for Project No. 1393. Pend Oreille filed on April 21, 1967, a notice of withdrawal of its application for a renewal of its license, effective as of May 15, 1967, subject to Commission approval.

The license for Project No. 1393 contains the following articles:

> ARTICLE 27: The right, power, and authority is reserved to the Commission to issue a license to construct, operate and maintain a hydroelectric project which will more completely utilize the water resources of the section of Pend Oreille River in which this project is located.
>
> ARTICLE 28: The acceptance of this license by the Licensee shall constitute its stipulation, consent and agreement made upon its own behalf and upon the behalf of its successors and assigns for the benefit of the United States, or the person or persons hereafter constructing, operating and maintaining such more complete hydroelectric project or his or their successors and assigns, that said Licensee its successors or assigns shall not be entitled to any compensation for damages sustained by reason of inundation or destruction of the project or project works, provided said Licensee, its successors or assigns shall be entitled to receive from said more complete hydroelectric development an amount of electric capacity and energy equal to that generated by this project before surrender of said license at rates to be fixed by duly constituted authority.

The City of Seattle (Seattle) was issued a license for a more complete hydroelectric project on the Pend Oreille River on July 10, 1961, Project No. 2144, 26 FPC 54. That license contains the following article:

> ARTICLE 45: The Licensee shall make available to Pend Oreille Mines & Metals Co. an amount of electric capacity and energy at Metaline Falls equal to that generated by the existing Metaline Falls Project No. 1393 * * *.

It is anticipated that Project No. 1393 will cease operations on May 15, 1967. In any event, the reservoir of Project No. 2144 is scheduled to commence filling about July 1, 1967 and one generating unit is to commence operations about August 1, 1967.

According to Pend Oreille's filing of April 21, 1967, Seattle and Pend Oreille have entered into an agreement, pursuant to which Seattle will pay a sum of $796,000, subject to certain adjustments, to Pend Oreille in exchange for certain rights and property including nonproject property. By virtue of that agreement and payment Seattle will be released from any obligation under Article 28 of Project No. 1393 or Article 45 of Project No. 2144 to make available to Pend Oreille an amount of electric capacity and energy at Metaline

Falls equal to that generated by the existing Metaline Falls Project No. 1393, and will be released from any other possible obligation to reimburse Pend Oreille for the taking, damaging, destruction or inundation of certain property of Pend Oreille.

Seattle which filed a petition to intervene in the proceeding in Project No. 1393 on June 28, 1962, has joined with Pend Oreille in its present filing and asks leave to withdraw the City's petition to intervene.

Seattle and Pend Oreille jointly represent that their agreement constitutes full satisfaction of any obligations, either express or implied, occasioned by Article 28 of Project No. 1393 and Article 45 of Project No. 2144 to provide Pend Oreille with electric capacity and energy.

The annual charges for Project No. 1393 have been paid through December 31, 1961.

*The Commission finds:*

Under the circumstances of this case it is appropriate and in the public interest to permit Pend Oreille to withdraw its application for renewal of license for Project No. 1393, to approve Seattle's withdrawal of its petition to intervene in Project No. 1393, to terminate the proceeding in that Project as of May 15, 1967, and to enter an order discharging Seattle from any obligations, either express or implied, occasioned by Article 28 of Project No. 1393 and Article 45 of Project No. 2144, to provide Pend Oreille with electric capacity or energy.

*The Commission orders:*

(A) Permission is given to Pend Oreille to withdraw its application for renewal of License in Project No. 1393 and the proceeding is terminated as of May 15, 1967.

(B) Seattle's request to withdraw its petition to intervene in Project No. 1393 is granted.

(C) Seattle is hereby discharged from any obligations, either express or implied, occasioned by Article 28 of Project No. 1393 and Article 45 of Project No. 2144, to provide Pend Oreille with electric capacity or energy.

(D) This order is subject to the payment of annual charges for Project No. 1393 from December 31, 1961 until its operations are discontinued.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

## NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP66-169 (PHASE II)

### FINDINGS AND ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 15, 1967)

On March 13, 1967, Natural Gas Pipeline Company of America (Petitioner) filed in Docket No. CP66-169 (Phase II), as supplemented on April 5, 1967, a petition to amend the Commission's order issued December 30, 1966, 36 FPC 1168, in said docket and phase, so as to authorize Petitioner to construct and operate additional natural gas facilities to increase its transmission system capacity by 41,600 Mcf * of natural gas per day over and above the expansion authorized by the Commission in the order of December 30, 1966, all as more fully set forth in the petition to amend, as supplemented, in this proceeding.

---

* Volumes stated at 14.65 psia and 1,000 Btu per cubic foot.

The order of December 30, 1966, among other things, authorized Petitioner to construct and operate certain natural gas facilities for the purpose of expanding its overall system capacity by 156,000 Mcf * per day. Petitioner states that nearly all of its remaining uncommitted capacity will be required to meet additional firm demands of its customers prior to the advent of the 1967–68 heating season, and, therefore, it proposes to construct the additional facilities providing for the increased additional capacity in order to have sufficient uncommitted capacity to meet expected customer requirements during the 1967–68 heating season.

Specifically, Petitioner proposes the following:

(a) To construct and operate ten segments of 36-inch mainline loop ranging from 4.52 miles to 8.66 miles in length and aggregating in toto 63.3 miles of line to be installed on its existing Gulf Coast Line in Texas, Arkansas, Missouri and Illinois, and

(b) To make minor modifications of header piping at Station No. 308 in Randolph County, Arkansas.

The estimated cost of the proposed additional facilities is $10,458,000, which cost will be financed by short term borrowings pending permanent financing.

Due notice of the filing of the petition to amend and opportunity for hearing thereon has been given by publication in the Federal Register on March 31, 1967 (32 F.R. 5438). No protest or petition to intervene has been filed in this proceeding.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued December 30, 1966, in Docket No. CP66–169 (Phase II) be amended as hereinafter ordered.

*The Commission orders:*

(A) The Commission's order issued December 30, 1966, in Docket No. CP66–169 (Phase II) is amended by authorizing the construction and operation of the proposed additional natural gas transmission facilities as hereinbefore described and as set forth in the petition to amend, as supplemented.

(B) In all other respects said order shall remain in full force and effect.

*Volumes stated at 14.65 psia and 1,000 Btu per cubic foot.

## RATE SCHEDULES OF PUBLIC UTILITIES, DOCKET NO. R–324

## ORDER NO. 347

### STATEMENT OF POLICY

(Issued May 15, 1967)*

Commission experience in administering the rate and service regulatory provisions of the Federal Power Act indicates several areas within which public utilities may take voluntary action in changing the format and style of filed rate schedules to achieve more uniformity and simplicity. Under the Commission's regulations governing the filing of rate schedules pursuant to the Act, latitude is afforded filing parties in their choice of the physical document to be submitted.[1] In processing the rate schedules now filed with the Commission it has been noted that systems filing a standardized format achieve clerical and administrative simplicity. Similar benefits have accrued to the Commission in discharging its administrative responsibilities. This policy statement is intended to apprise all companies of these results and to facilitate voluntary adoption of similar procedures by all systems. In doing so, the Commission recognizes that the individual filing parties must review their specific facts and circumstances and may choose to continue existing practices. Suggested revisions in format and style of rate schedules are set forth below.

---

* Published in the Federal Register on May 20, 1967 (32 F.R. 7494).

The Commssion, acting pursuant to the authority granted by the Federal Power Act, as amended, particularly sections 205, 206 and 309 thereof (49 Stat. 851, 852, 858; 16 U.S.C. 824d, 824e, 825h), *orders:*

(A) Part 2, General Policy and Interpretations, Subchapter A, Chapter I, Title 18 of the Code of Federal Regulations is amended by adding a new § 2.8 to read as follows:

§ 2.8 Simplification of wholesale electric rate schedule filings.

(a) In making changes in rate schedules required to be on file with the Commission, public utilities may find it advantageous to file substitute sheets to reflect changes, in lieu of filing rate schedule supplements.

(1) *Identification—Substitute Sheets:*

(i) At the top right of the page, the sheet number may be designated as "—— Revised Sheet No. ——," followed by "Superseding —— Sheet No. ——." The first of these blanks would show the number of the revision (i.e., First, Second, etc.) and the sheet number would be the same as the sheet replaced. The third and fourth blanks would be filled according to the numbering of the sheet replaced.

(ii) Sheets which are to be inserted between two consecutively numbered sheets may be designated "Original Sheet No. ——," with the blank space filled with the appropriate number and a letter to indicate an insertion (*i.e.*, between Sheet Nos. 1 and 2, Original Sheet No. 1a).

(iii) Customer agreement, if required, may be indicated on the bottom of the page, by the signature of the person authorized to agree to the proposed change. The name and title of the person authorized to file the substitute sheet may also be shown on the bottom of the page.

(b) Whenever pursuant to § 35.12 of this chapter an initial rate schedule filing is to be made, or whenever pursuant to Section 35.13 of this chapter a rate schedule is to be replaced in its entirety or extensively revised (for example if a large number of the pages are to be changed), public utilities may find it advantageous to use a simplified format, such as the following:

(1) *Format.* A brief service agreement setting forth such items as the name of the purchaser, service to be rendered, term of the agreement, and signatures of the parties. Applicable points of delivery and delivery volt-

---

[1] Section 35.2(b) of the Commission's Regulations under the Federal Power Act defines "rate schedule" as follows:

The term "rate schedule" as used herein shall mean a statement of (1) electric service as defined in paragraph (a) of this section, (2) rates and charges for or in connection with that service, and (3) all classifications, practices, rules, regulations or contracts which in any manner affect or relate to the aforementioned service, rates, and charges. This statement shall be in writing and may take the physical form of a contractual document, purchase or sale agreement, lease of facilities, tariff or other writing. Any oral agreement or understanding forming a part of such statement shall be reduced to writing and made a part hereof.

ages, applicable rates and charges and applicable terms and conditions may be incorporated in the agreement by reference to separate appendices attached thereto as follows:

(i) Appendix setting forth in detail delivery points, delivery voltages and metering voltages.

(ii) Appendix containing a statement of the rates and charges, set forth separately under appropriate headings such as: demand charges, energy charges, billing demand determinants, power factor clauses, minimum bill provisions, etc.

(iii) Appendix containing terms and conditions, set forth separately under appropriate headings such as: services, facilities at the points of connection, meter adjustments, continuity of service, liability, etc.

(2) *Identification.*

(i) At the top right of the page, the sheet number may be designated as "Original Sheet No. ——."

(ii) Sheets which are to be replaced or inserted may be designated in the same manner suggested in (a)(1) above.

(Sections 205, 206, 309, 49 Stat. 851, 852, 858; 16 U.S.C. 824d, 824e, 825h)

## ROCKY MOUNTAIN POWER COMPANY, PROJECT NO. 2289

### ORDER CONFIRMING DISMISSAL OF APPLICATION AND DENYING APPLICATION FOR REINSTATEMENT

(Issued May 15, 1967)

On February 16, 1967, the Commission granted a motion to dismiss Rocky Mountain Power Company's application for license of a hydroelectric project in Colorado (Opinion No. 514, 37 FPC 329). The Commission determined that Applicant had failed to show the financial feasibility of the project and that it also had failed to show that a market existed for the power. Nebraska Power Review Board (Board) was granted intervention at the same time.

On March 13, 1967, the Board filed a motion for reconsideration of the Commission's order of dismissal. On March 20, 1967, Applicant filed an "Application for Reconsideration of Application." On April 12, 1967, we granted the motion and application for reconsideration for the purpose of allowing full and adequate consideration, without reinstating the application.

The Nebraska Power Review Board's motion for reconsideration reiterates its concern over the power deficiency which it believes will exist in Nebraska during the coming summer and for a number of years thereafter. It also cites a mandatory wheeling bill which at the time of filing was being considered by the legislature which would facilitate the importation of power from out-of-state sources. In view of these considerations, it requests that we keep this proceeding open for further market evidence.

We appreciate the concern of the Board over the power supply situation in Nebraska and we would not take any action which would adversely affect that situation. However, as stated in Opinion No. 514 there is in this record no basis for concluding that this project would serve to meet that deficiency,[1] nor that the prospective power deficiency would assure that Rocky Mountain Power Company will have either a sufficient market or the firm contracts which would enable it to finance the project.

---

[1] Legislative Bills 319 and 620, the mandatory wheeling measures pending in the 77th session of the Nebraska Legislature were not enacted during that session.

Applicant alleges that it is diligently pursuing contract negotiations with Consumers Public Power District for the sale of power in Nebraska and, in addition, that it has presented to the Missouri Basin Systems Group proposals and plans by means of which project power could be used in combination with other power-producing facilities available to the Missouri Basin Systems Group to serve all of the power users in the deficient areas of Nebraska and neighboring states. However, all of these plans are still in the proposal stage and Applicant has put forward no tangible evidence which would allow us to reasonably conclude that, based on its present efforts, a market exists or will exist for project power.

Applicant does not ask us to continue the hearing at this time, but merely to hold the record open for an additional period during which it might be able to produce firm commitments and evidence of financing. The Applicant would thus have us place the proceedings in the same status as existed prior to the Commission's order of August 19, 1965, which set this matter for hearing, 34 FPC 539.

Applicant has had more than five years to collect, and full opportunity at hearing to present, evidence of financial feasibility and marketability and has still failed to make the proper showing. Therefore, to allow these proceedings to hang in abeyance while Applicant attempts once again to meet the requisite evidence would only thwart the administrative process and would be inconsistent with our statutory duties.

Applicant states that it has negotiated contracts with proposed oil shale developers for the use of water after it has served power purposes. These latter contracts might conceivably bear upon the economic feasibility of the project if that were a marginal matter, but in the absence of any showing of markets or financing they are certainly not enough to warrant further continuance of this proceeding.

We again emphasize that our action in dismissing this application is without prejudice to the filing of a new application at any time in the future Applicant believes it can meet the threshold requirements.

*The Commission finds:*

The assignments of error and grounds for rehearing or reconsideration set forth in the Motion for Reconsideration filed herein by Nebraska Power Review Board and the Application for Reconsideration of Order of Dismissal and for Reinstatement of Application filed herein by Applicant present no facts or legal principles which would warrant any change in or modification of the Commission's Opinion No. 514 and accompanying order.

*The Commission orders:*

Upon reconsideration, the Order of Dismissal of February 16, 1967, is confirmed, and the motion for reinstatement of application filed herein by Applicant is denied.

Commissioner Ross *dissenting.*

Ross, *Commissioner, dissenting:*

The grounds stated by the majority's order denying reconsideration to Rocky Mountain (applicant) lead me to add to my original dissent in this matter.

In the order issued in February, 1967, the majority felt "it incumbent upon [themselves] to bear in mind the present and *potential* needs and supplies of power in Nebraska in disposing of this application."[1] Since the issuance of the majority's initial decision, the Nebraska Power Review Board, which is an intervenor in these proceedings, has emphatically asked the Commission in a motion for reconsideration "to keep said application open" so the applicant would be given an opportunity to present additional evidence and continue negotiations with Consumers Public Power District and other Nebraska suppliers. The Board's motion clearly states that Nebraska's electrical deficiency is of a long-term nature and will not be taken care of by the proposed generation facilities within the state and enumerated by the majority. Indeed, the Nebraska legislature is presently considering a bill involving wheeling that "would make feasible the *importation* of *desperately needed* low-cost power" from out-of-state facilities like the applicant's.

What more does the majority need to allow the case to proceed? Certainly, the Commission's own regulations contemplate no such rigorous standard as the majority is imposing upon the present applicant. Regulation 4.40(i) of the Federal Power Act states:

> * * * In case the applicant can give no positive assurance that there is or will be a demand for the power upon completion of construction of the project, and that it will be used or distributed by the applicant or sold to others for use or distribution, a full and complete statement and explanation shall be made of the applicant's *expectations* in this regard and of the basis therefor. [Emphasis added]

I recognize that this is a regulation pertaining to the filing of an application, but at what point does the applicant's burden become the more substantive burden that the majority seems to require in this case? The rules do not so state; if the majority intends, however, that every licensee be required to meet a more rigorous showing than that implied in Regulation 4.40(i) during the course of its license proceeding, the rules should be so amended to state explicitly to the applicant its obligations.

Furthermore, it seems to me that the majority's rationale here, in essence, eliminates the possibility for a "middle man" in the power supply field. By dismissing applicant's case because there is no definite indication that "users * * * in Nebraska will purchase an amount" from the project, the majority seems to tie the feasibility of a project to the load growth of one utility or a formal group of utilities. However, because of restrictions on the location of their facilities within the boundaries of the state or because they are unable to enter into contracts with non-contiguous territories by operation of state law, the utilities may not be able to undertake certain economical projects. Such projects can often be built by "middle men," like the applicant. Such middle men may be able to draw upon various buyers in the area, often enhancing the development of the project. There are benefits to the buyers, too, who can buy in lesser quantities more tailored to their individual needs and still share in the benefits stemming from large-scale operations. In this very case, the applicant states that in November of 1966 it presented its proposal, by invitation, before the Missouri Basin Systems Group, a planning organization representing numerous municipalities and cooperatives in Minnesota, Nebraska, North Dakota, Colorado, Iowa, Montana, South Dakota, as well as the U.S. Bureau of Reclamation.

Negotiations for power sales are time-consuming, and the orderly procedure of Commission business must be maintained. However, the Commission is aware of the power shortage in the area and has itself emphasized the need for long-range plans to meet increasing power demands.

---

[1] Page 333 of majority opinion. [Emphasis added.]

One other consideration is worth noting. In addition to the considerable time and expense already expended on this case by the applicant, the power suppliers, the courts, the Forest Service, the state commissions, the Interior Department and this Commission, the applicant has finally been able to secure a favorable adjudication of its water rights, giving it priority over the claims of another party. Dismissing the case now may deprive the applicant of an essential element in the successful presentation of its license application. For all these reasons, I would dissent.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## SACRAMENTO MUNICIPAL UTILITY DISTRICT, PROJECT NO. 2101

### ORDER FURTHER AMENDING LICENSE (MAJOR)

(Issued May 15, 1967)

Application was filed on July 14, 1966 by Sacramento Municipal Utility District, licensee for Project No. 2101, for further amendment of its license for the project, known as Upper American River Project, located on tributaries of the American River in El Dorado County, California, and affecting lands of the United States within El Dorado National Forest.

The application seeks Commission authorization to complete the Loon Lake Development on Gerle Creek by the installation of hydroelectric facilities having a capacity of 80,750 kw. License Article 44 provides, among other things, that the Loon Lake hydroelectric facilities shall be constructed as a part of the project "at such time as the Commission may direct." Licensee, seeing a need for additional capacity, desires Commission authorization to proceed now with construction of such facilities. The Loon Lake dam has been completed. As presently proposed, the Loon Lake Development will be constructed generally as described in the license for the project, and as more fully set forth in paragraph (B) below. On the basis of Commission staff analysis, it appears that the Loon Lake Development will be a safe and an economic addition to the existing project works.

According to staff studies, the total annual cost, including operation, maintenance and administration, of the Loon Lake power facilities is estimated to be $1,132,000. The estimated value of power exceeds the estimated annual cost by amounts ranging from $337,000 to $85,000 based upon alternative sources of power.

One of the effects of this amendment will be to increase the installed generating capacity of the entire project by 80,750 kw, or by 107,700 horsepower, with a resultant increase in the annual administrative charge.

The Chief, Forest Service, has advised that the location of the project works comprising the Loon Lake Development, as shown on the exhibits filed as part of the application for amendment, are satisfactory for the protection and utilization of the National Forest lands involved.

The Department of the Interior, in commenting on the application, has advised that the proposed construction will not affect significantly fish and wildlife resources, provided that construction activities and spoil disposition within Gerle Creek drainage do not result in undue water pollution, and the project operation does not interfere with established minimum flow releases for fish, as provided for under license. See license Articles 29 and 57 (18 FPC 228, 234–235) and (31 FPC 473, 475). The Department requested that the

U.S. Forest Service, the California Department of Fish and Game, and the Department's Bureau of Sport Fisheries and Wildlife be given an opportunity to review and comment on the final plans for the completion and the operation of the Loon Lake Development to insure ample protection of fish and wildlife resources affected by the project. Since these agencies have had an opportunity to report on such final plans, apparently the Department is requesting that those agencies be afforded an opportunity to review and comment on detailed construction plans. This is provided for by license Article 59 herein.

*The Commission finds:*

(1) Public notice of the application has been given. No protests or petitions to intervene have been received.

(2) Construction of the proposed additional project works at the Loon Lake Development is economically sound and in the public interest.

(3) The following designated and described exhibits conform to the Commission's rules and regulations and should be approved as part of the license for the project:

| Exhibit | FPC No. 2101 | Showing |
|---|---|---|
| L-131 | 227 | Plan and profile. |
| L-132 | 228 | Machine hall sections. |
| L-133 | 229 | Generator floor plan. |
| L-134 | 230 | Plan at distributor centerline. |

Exhibit M-7 consisting of two typewritten sheets entitled "General Description of Equipment."

(4) The authorized installed horsepower capacity of the project under this amendment is increased to 814,300 horsepower, and the increased annual charge for reimbursing the United States for the costs of administration of Part I of the Federal Power Act, based on such capacity, as hereinafter provided, is reasonable.

*The Commission orders:*

(A) The exhibits designated and described in finding (3) above are hereby approved as part of the license for Project No. 2101.

(B) The licensee for Project No. 2101 is hereby authorized to proceed with the completion of construction of the Loon Lake Development of the project and the Loon Lake Development is redescribed as consisting of: a rock-fill dam with impervious core, designated Loon Lake Dam, approximately 2,265 feet long and about 105 feet high above streambed with a side-channel spillway and ogee weir about 250 feet long on the right bank, an earth-fill auxiliary dam approximately 910 feet long and about 82 feet high and a dike creating a reservoir with storage capacity of about 76,500 acre-feet at maximum normal water surface elevation of 6,410 feet, a 1,050-foot long 10-foot diameter vertical power tunnel to an underground powerhouse containing one 80,750 kw generator, an 18-foot by 18-foot, 20,000-foot long modified horseshoe tailrace tunnel to Gerle Reservoir, and project access roads with 66-foot wide right-of-way extending from the northern terminus of the Eastside Road in NE¼ of Section 3, T. 12 N., R. 14 E., Mount Diablo Base Meridian, to the vicinity of the southernmost bay of Loon Lake Reservoir thence around the west side of the reservoir, across the auxiliary dam to and across Loon Lake Dam.

(C) Article 46 (a) of the license is hereby further amended effective as of April 1, 1967, by substituting "(814,300 horsepower)" for "(706,600 horsepower)" as the presently authorized installed capacity of the project.

(D) The following additional articles are hereby added to the license:

*Article 59.* The Licensee shall, in the interest of preventing undue water pollution and protecting fish and wildlife resources, consult with the U.S. Forest Service, the California Department of Fish and Game and the Bureau of Sport Fisheries and Wildlife of the Department of the Interior, in the preparation of detailed plans for construction and operation of the Loon Lake Development. In the event the licensee and these agencies or any of them are unable to agree on any feature of the detailed plans such disagreement shall be resolved by the Commission after notice and opportunity for hearing.

*Article 60.* The Licensee shall commence construction of the remaining project works comprising the Loon Lake Development within one year of the date of issuance of this order and shall thereafter in good faith and with due diligence prosecute such construction, and shall complete such construction within three years of the date of issuance of this order.

(E) This amendment in the manner set out above shall not operate to alter or amend the license in any other respect, and shall not in any way constitute a waiver of any other part, provision or condition of the license.

(F) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this license amendment. In acknowledgment of the acceptance of this license amendment, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

## CONSOLIDATED GAS SUPPLY CORPORATION, DOCKET NO. CP67-254

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 16, 1967)

On March 7, 1967, Consolidated Gas Supply Corporation (Applicant) filed in Docket No. CP67-254 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas storage facilities, all as more fully set forth in the application.

Specifically, Applicant proposes the construction and operation of a 4,000 horsepower reciprocating engine driven compressor and related equipment at its Lightburn Compressor Station in order to increase the maximum seasonal withdrawals from its Fink-Kennedy Storage Pools located in Harrison and Lewis Counties, West Virginia. The increased withdrawals will be used to meet Applicant's market requirements during colder than normal winter periods. No new sales or services are proposed.

Applicant's Lightburn Compressor Station, presently containing two 2,000 horsepower engines, was constructed pursuant to certificate authorization issued by the Commission to Hope Natural Gas Company on August 12, 1963, in Docket No. CP63-311, 30 FPC 468.[1]

---

[1] On April 1, 1965, Hope Natural Gas Company's name was changed to Consolidated Gas Supply Corporation.

The present Fink-Kennedy storage facilities are capable of meeting 7.4 billion cubic feet of additional requirements during colder than normal winter periods. With the facilities proposed, an additional 5.9 billion cubic feet of requirements can be met for a total of 13.3 billion cubic feet.

The total estimated cost of Applicant's proposed facilities is $1,050,000. Applicant proposes to finance this cost from funds on hand and from funds to be obtained from its parent corporation, Consolidated Natural Gas Company.

After due notice, no protest, petition to intervene or notice of intervention has been filed.

At a hearing held on May 11, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Consolidated Gas Supply Corporation, a West Virginia corporation with its principal place of business in Clarksburg, West Virginia, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of May 26, 1942, in Docket No. G-100 (3 FPC 151).

(2) The facilities hereinbefore described and as more fully described in the application in this proceeding are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Consolidated Gas Supply Corporation, to construct and operate the proposed facilities as hereinbefore described and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized by paragraph (A) above shall be constructed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 8 months from the date on which this order issues.

**Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.**

## EL PASO NATURAL GAS COMPANY, DOCKET NO. CP67-227

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 16, 1967)

On February 13, 1967, El Paso Natural Gas Company (Applicant) filed in Docket No. CP67-227 an application and supplement thereto on April 12, 1967, pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities and the sale and delivery of natural gas to Cascade Natural Gas Corporation (Cascade), all as more fully set forth in the application and supplement.

Applicant proposes to construct and operate a positive displacement measuring and regulation station and necessary appurtenances at a point adjacent to its 6⅝ inch O.D. Wenatchee lateral pipeline located in Chelan County, Washington. Cascade proposes to construct and operate approximately 500 feet of 4-inch main, an odorizer, regulator and two sales meters, from Applicant's site of proposed construction to the Kawecki Chemical Company (Kawecki) which will use the natural gas for space heating and in its aluminum alloying reverberatory furnaces as a processing fuel.

Applicant estimates the cost of the proposed construction at approximately $8,240 and Applicant will finance said construction out of working funds.

Applicant will sell to Cascade under its appropriate effective Rate Schedule DS-1 at 4.5 cents per therm and/or Rate Schedule I-1 at 2.86 cents per therm, now on file with the Commission.

On March 29, 1967, Applicant filed revised Exhibits A and B to its firm service agreement and revised Exhibit B to the interruptible service agreement with Cascade, and requested in connection therewith that the effective date thereof be the date of issuance of our order herein. Since initial deliveries will be at some date subsequent to the order, the effective date shall be the date of first deliveries.

The requirements of Cascade for the first three full years of operation are stated to be:

| | First 3 full years | | |
|---|---|---|---|
| | 1968 | 1969 | 1970 |
| PEAK DAY REQUIREMENTS—THERMS | | | |
| Industrial: [1] | | | |
| Firm | 700 | 700 | 700 |
| Interruptible | 4,000 | 4,000 | 4,000 |
| Total—Therms | 4,700 | 4,700 | 4,700 |
| Total—Mcf at 14.73 psia (1,060 Btu/cu.ft.) | 443 | 443 | 443 |
| ANNUAL REQUIREMENTS—THERMS | | | |
| Industrial: [1] | | | |
| Firm | 86,500 | 86,500 | 86,500 |
| Interruptible | 1,314,000 | 1,314,000 | 1,314,000 |
| Total—Therms | 1,400,500 | 1,400,500 | 1,400,500 |
| Total—Mcf at 14.73 psia (1,060 Btu/cu.ft.) | 132,122 | 132,122 | 132,122 |

[1] Kawecki Chemical Co.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on May 11, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, El Paso Natural Gas Company, a Delaware corporation having its principal place of business in El Paso, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of October 29, 1942, in Docket Nos. G-242 and G-257 (3 FPC 851).

(2) The proposed construction and operation of facilities, and sale of natural gas as hereinbefore described, and as more fully described in the application, supplement, and exhibits in this proceeding are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities, and sale of natural gas is required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon El Paso's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(6) It is appropriate in the administration of the Natural Gas Act and in the public interest to accept for filing Applicant's revised Exhibits A and B to its firm service agreement and the revised Exhibit B to the interruptible service agreement with Cascade, to be effective on the date of first deliveries to Cascade.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to the Applicant, El Paso Natural Gas Company, in this proceeding authorizing the construction and operation of facilities, and the sale of natural gas as hereinbefore described and as more fully described in the application, supplement, and exhibits herein, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized to be constructed and operated by Applicant shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 12 months of the date on which this order issues.

(D) Applicant's revised Exhibits A and B to its firm service agreement (under Applicant's Rate Schedule DS-1) and the revised Exhibit B to the interruptible service agreement (under Applicant's Rate Schedule I-1) with Cascade are accepted for filing effective on the date of first deliveries to Cascade.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## INTERSTATE POWER COMPANY, DOCKET NO. E-7345

### SUPPLEMENTAL ORDER AUTHORIZING ISSUANCE OF FIRST MORTGAGE BONDS

(Issued May 16, 1967)

By order issued April 28, 1967, 37 FPC 824, in the above-entitled matter, the Commission authorized Interstate Power Company (Applicant), to issue and sell at competitive bidding $17,000,000 principal amount of First Mortgage Bonds, due 1967, subject among others, to the provisions set forth in paragraph (B) of that order as follows:

(i) Applicant shall have amended its application pursuant to the requirements of Section 34.2(g) of the Commission's Regulations under the Federal Power Act relating to compliance with competitive bidding requirements, and Section 34.2(h)(1) of those Regulations relating to affiliation, and shall have either filed such amendments or shall have mailed them and advised the Commission by telephone and telegraph, as contemplated in Section 34.9 of the Regulations.

(ii) The Commission, by further order, shall have approved the price to be received by Applicant for the proposed issuance of Bonds and the interest rate thereof.

Applicant on May 16, 1967, filed an amendment, pursuant to the requirements of the aforementioned Commission order, setting forth, among other things, that it proposes to accept as providing the lowest annual cost of money to it, the bid of Halsey, Stuart & Co. Inc. to purchase the proposed issuance of $17,000,000 principal amount of Bonds for the price of 99.145% of principal amount, with an interest rate of 6⅛%.

*The Commission finds:*

(1) Applicant has satisfactorily complied with the requirements of paragraph (B) of the Commission's order issued April 28, 1967, in the above docket, and under the bid it proposes to accept for the Bonds, the price to be received by Applicant therefor and the interest rate thereof are reasonable.

(2) The proposed issuance and sale of Bonds, as hereinafter authorized, will be for a lawful object, within the corporate purposes of the Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance by the Applicant of service as a public utility and which will not impair its ability to perform that service, and is reasonably appropriate for such purposes.

*The Commission orders:*

(A) The price to be received by Applicant for the proposed Bonds and the interest rate thereof under the bid referred to above, are approved as reasonable.

(B) The proposed issuance and sale of Bonds referred to above upon the terms and conditions and for the purposes specified in the application, as supplemented by amendment referred to above, are authorized, subject only to the provisions of paragraphs (A), (C), (D) and (E) of the Commission's order issued April 28, 1967, in the above docket.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

## NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP67-215 (PHASE I)*

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 16, 1967)

On January 27, 1967, Northern Natural Gas Company (Applicant) filed in Docket No. CP67-215 (Phase I) an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities and the sale and delivery of an additional 8,000 Mcf of natural gas per day to an existing customer, the Northern States Power Company, all as more fully set forth in the application in this proceeding (Phase I).

Specifically, Applicant proposes to construct in Phase I approximately 10 miles of 30-inch pipeline loop north of the Clifton, Kansas, compressor station. The total estimated cost of these facilities is $1,115,900, which cost will be financed from internal sources such as reserve accruals, retained earnings and cash on hand.

Applicant proposes to initiate delivery of the proposed 8000 Mcf increase in Northern States' contract demand commencing with the 1967-68 heating season. The increased service to Northern States will be in accordance with Applicant's effective FPC Gas Rate Schedules CD-3 and R-3.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on May 11, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits (Phase I), submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Northern Natural Gas Company, a Delaware corporation having its principal place of business in Omaha, Nebraska, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943 in Docket No. G-280 (3 FPC 967).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding (Phase I) are to be used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the proposed transportation and sale of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed construction and operation of the subject facilities and

---

* The application in this docket is divided into two Phases. This order pertains exclusively to Phase I of said application.

the proposed transportation and sale of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Northern Natural Gas Company, to construct and operate the proposed facilities and to sell and deliver up to an additional 8000 Mcf of natural gas per day to Northern States as hereinbefore described, all as more fully described in the application in this proceeding (Phase I), upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation and the transportation and sale of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, by November 1, 1967.

(D) In accordance with the Commission's Regulations, Applicant shall make appropriate rate filings covering the sale authorized in paragraph (A) above.

(E) The authorization granted in paragraph (A) above is without prejudice to Applicant's right to request amendment of the subject order to authorize Phase II facilities.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

## PANHANDLE EASTERN PIPE LINE COMPANY, DOCKET NO. CP65–87

### ORDER FURTHER AMENDING ORDER AUTHORIZING EXPORTATION OF NATURAL GAS

(Issued May 16, 1967)

On February 21, 1967, Panhandle Eastern Pipe Line Company (Petitioner) filed in Docket No. CP65–87 a petition to amend the order of the Commission issued in said docket on February 4, 1965, 33 FPC 180, as clarified and modified on April 29, 1965, 33 FPC 903, and amended on December 8, 1966, 36 FPC 999. By the instant filing Petitioner requests that the order issued in the instant proceeding be amended further so as to remove the 50,000 Mcf per day limitation presently contained in Finding Paragraph 2(f) of the aforementioned order of December 8, 1966, in order to conform Petitioner's export authorization to the similar modification recently adopted by the Canadian National Energy Board in the import authorization of Union Gas Company of Canada, Ltd. (Union), all as more fully set forth in the petition to amend.

Petitioner exports gas to Canada under various contracts, the most recent of which is dated August 26, 1966. That contract, and the Commission's order of December 8, 1966, contemplate the export by Petitioner to Union of an additional eight million Mcf on a seasonal basis from September through April. The subject 50,000 Mcf per day limitation is applicable to the August 26, 1966 contract.

Said limitation originated in the contract itself as a volume which could not be exceeded by Petitioner without the consent of Union and accordingly was contained in the Canadian National Energy Board's order of September 29, 1966 and the Commission's order of December 8, 1966.

Petitioner states that, in view of current conditions in Canada, as well as the certainty that it will have in excess of 50,000 Mcf per day available for delivery under the subject contract on certain days during the contract period Union has requested that the daily limitation be removed.

By order issued on February 15, 1967, the Canadian National Energy Board modified its order of September 26, 1966 by striking out the phrase "at a rate not exceeding 50 million cubic feet a day."

To conform its authorization to the Canadian authorization, and to permit the delivery of gas within the seasonal limitation, Petitioner requests the modification of Finding Paragraph 2(f) of the Commission's order of December 8, 1966 so as to delete the phrase "and maximum daily volumes" and the phrase "and 50,000 Mcf, respectively,".

On March 24, 1967, the Commission temporarily amended its order of December 8, 1966 in the subject docket by removing the 50,000 Mcf per day limitation contained in Finding Paragraph (2)(f) thereof.

After due notice, no protest, petition to intervene or notice of intervention has been filed.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the Commission's order issued in the instant docket on February 4, 1965, as clarified and modified on April 29, 1965, and amended on December 8, 1966, be amended further as hereinafter ordered.

*The Commission orders:*

(A) The Commission's order issued in the instant docket on February 4, 1965, as clarified and modified on April 29, 1965, and amended on December 8, 1966, is amended further by deleting from Finding Paragraph 2(f) of said order of December 8, 1966, the phrase "and maximum daily volumes" and the phrase "and 50,000 Mcf, respectively," as hereinbefore set forth and as more fully set forth in the petition to amend filed in this proceeding.

(B) In all other respects the subject order, as amended, shall remain in full force and effect.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

## PANHANDLE EASTERN PIPE LINE COMPANY, DOCKET NO. CP66-125

### ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 16, 1967)

On May 1, 1967, Panhandle Eastern Pipe Line Company (Petitioner) filed in Docket No. CP66-125 a petition to amend the order issued in said docket on April 29, 1966, 35 FPC 651, which order authorized Petitioner to construct and operate facilities necessary for the transportation of gas to Marathon Oil Company (Marathon). By the instant filing, Petitioner requests that the authorized period for construction and operation of the subject facilities be extended for a one-year period in order to permit the reassessment of the authorized project, all as more fully set forth in the petition to amend.

Ordering paragraph (C) of the subject order requires that the facilities be constructed within twelve months of the date of the order. Petitioner has subsequently been informed that Marathon is re-evaluating the project which would require the use of gas in the secondary recovery of oil. No deliveries have been made to Marathon under the subject authorization.

Accordingly, Petitioner requests that the Commission grant a one-year extension of the time permitted for construction of facilities in order to permit Marathon and Petitioner to complete their reassessment of the project.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued in the instant docket on April 29, 1966, be amended as hereinafter ordered and conditioned.

*The Commission orders:*

(A) The Commission's order issued on April 29, 1966, in Docket No. CP66-125 is amended by authorizing an additional twelve months during which the facilities authorized therein are to be constructed and thereby extending the authorized period for construction to April 29, 1968, as hereinbefore described and as more fully set forth in the petition to amend filed in this proceeding.

(B) In all other respects the certificate issued in the subject docket shall remain in full force and effect.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

## SHENANDOAH GAS COMPANY, DOCKET NO. CP67-272

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 16, 1967)

On March 22, 1967, Shenandoah Gas Company (Applicant) filed in Docket No. CP67-272 a "budget-type" application pursuant to Section 7(c) of the Natural Gas Act, as implemented by Section 157.7(c) of the Regulations under the Act for a certificate of public convenience and necessity authorizing the construction during the twelve-month period following the issuance of certificate authorization herein, and operation of certain natural gas facilities to be used in the transportation and delivery of natural gas in interstate commerce, all as more fully set forth in the application.

Applicant seeks authorization for the construction and operation of taps on its certificated pipeline facilities for the purpose of distributing gas to domestic, commercial and industrial consumers located along the routes of such facilities. No sales will be made through the proposed facilities to consumers located in areas outside the franchise area of Applicant. No sales for resale are proposed.

Deliveries to any one consumer through Applicant's proposed facilities will not exceed 100,000 Mcf of natural gas annually and such gas will not be used for boiler fuel purposes.

The total estimated cost of Applicant's proposed facilities will not exceed $100,000.

By letter dated March 20, 1967, Washington Gas Light Company has agreed to furnish through open account advances, the funds required for construction of Applicant's proposed facilities.

After due notice, no protest, petition to intervene or notice of intervention has been filed in this proceeding.

At a hearing held on May 11, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Shenandoah Gas Company, a Virginia corporation having its principal place of business in Washington, D.C., is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of April 30, 1954, in Docket No. G-1448 (15 FPC 593).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation and sale of natural gas in interstate commerce and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (c)(7) and (c)(8) of Section 157.7 and paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(6) The authorization granted hereinafter should be limited to the twelve-month period immediately following the issuance of this certificate and the total expenditures for facilities to be constructed thereunder should be limited to $100,000, and the total deliveries to any one customer not to exceed 100,000 Mcf of natural gas per year.

*The Commission orders:*

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant to construct, during the twelve-month period immediately following the issuance of this certificate, and operate the proposed facilities hereinbefore described to transport and deliver natural gas in interstate commerce, all as more fully described in the application in this proceeding.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (c)(7) and (c)(8) of

Section 157.7 and paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(C) The authorization granted in paragraph (A) above is limited to construction during the twelve-month period immediately following the issuance of this certificate and the total expenditures for facilities to be constructed thereunder are limited to $100,000, and the total deliveries to any one customer not to exceed $100,000 Mcf of natural gas per year.

(D) Direct industrial deliveries of natural gas to interruptible customers pursuant to the authorization contained herein shall be subject to curtailment and interruption if the gas is required to meet the existing or future contract demands of Applicant's customers for firm resale service.

(E) Industrial customers to whom firm deliveries are made pursuant to the authorization contained herein shall not be entitled to any priorities or rights to additional gas for meeting any future increase in their requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

## TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC., DOCKET NO. CP67-258

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 16, 1967)

On March 9, 1967, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Applicant) filed in Docket No. CP67-258, as supplemented on March 16, 1967, an application pursuant to Section 7(c) of the Natural Gas Act, as implemented by Section 157.7(b) of the Regulations under the Act, for a certificate of public convenience and necessity authorizing the construction during the calendar year 1967 and the operation of miscellaneous natural gas purchase facilities necessary to take into its certificated main pipeline system natural gas which will be purchased from producers thereof in the general area of Applicant's existing transmission system, all as more fully set forth in the application, as supplemented, in this proceeding.

The purpose of this "budget-type" application is to augment Applicant's ability to act with reasonable dispatch in contracting for and connecting to its pipeline system new supplies of natural gas in various producing areas generally coextensive with said system.

With respect to any offshore facilities which might be constructed under the requested authorization, Applicant has also requested waiver of Section 2.58(a)(2) of the Commission's Rules of Practice and Procedure, which Section provides that no single gas purchase project covered by a "budget-type" authorization shall exceed a cost of $500,000. It appears that the administration of the Natural Gas Act and the public interest does not require waiver of Section 2.58(a)(2); accordingly, Applicant's request for such a waiver should be denied.

The total cost of the proposed facilities is not to exceed a maximum of $2,500,000, with no single project to exceed a cost of $500,000, which cost Applicant proposes to finance from general funds or from revolving credit.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on May 11, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplement and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Tennessee Gas Pipeline Company, a Division of Tenneco Inc., having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued July 15, 1947, in Docket No. G-910 (6 FPC 777).

(2) The facilities hereinbefore described, as more fully described in the application, as supplemented, in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit, within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(6) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(7) The authorization hereinafter granted should be limited to construction during the calendar year 1967 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $2,500,000, with no single project to exceed a cost of $500,000.

(8) Applicant's request for waiver of Section 2.58(a)(2) of the Commission's Rules of Practice and Procedure should be denied.

*The Commission orders:*

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, Tennessee Gas Pipeline Company, a Division of Tenneco Inc., to construct during the calendar year 1967 the proposed facilities hereinbefore described, as more fully described in the application, as supplemented, in this proceeding, and to operate such facilities only to take natural gas supplies from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(C) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(D) The authorization granted in paragraph (A) above is limited to construction during the calendar year 1967, and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $2,500,000, with no single project to exceed a cost of $500,000.

(E) Applicant's request for waiver of Section 2.58(a)(2) of the Commission's Rules of Practice and Procedure is denied.

## TRANSCONTINENTAL GAS PIPE LINE CORPORATION, DOCKET NO. CP67-269

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 16, 1967)

On March 20, 1967, Transcontinental Gas Pipe Line Corporation (Applicant) filed in Docket No. CP67-269 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas purchase facilities, all as more fully set forth in the application.

Applicant seeks authority for the construction, installation and operation of approximately 3 miles of 10-inch transmission purchase lateral and one purchase meter station and appurtenant equipment to receive natural gas to be purchased from Kerr-McGee Corporation (Kerr-McGee), Cabot Corporation (Cabot), Felmont Oil Corporation (Felmont) and Essex Royalty Corporation (Essex) in Ship Shoal Block 214, located in the Block 208 Field, Offshore Terrebonne Parish, Louisiana. Kerr-McGee, as operator under a contract dated January 19, 1967 between Transco and the above-named producers, will deliver to Transco at a central point in Block 214. Applicant's proposed lateral will extend from a point of connection with Transco's existing Southeast Louisiana Gathering System at platform F of Union Oil Company of California in Ship Shoal Block 208, to the Sellers' platform B in Block 214, where the proposed meter station will be constructed by Transco.

Applicant has entered into a gas purchase contract with Kerr-McGee, Cabot, Felmont and Essex for the sale and delivery to Transco of natural gas produced in Block 214, a part of the Block 208 Field, Ship Shoal Area, Offshore Terrebonne Parish, Louisiana; and is presently taking gas from the Block 208 Field under contract dated October 21, 1964 between Transco and Pan American Petroleum Corporation and Union Oil Company of California. The additional gas reserves in the Block 208 Field, presently estimated at 30,000 Mcf of casinghead gas and 200,000,000 Mcf of gas-well gas (14.73 psia) will become a part of Applicant's over-all system gas supply thereby enhancing its ability to meet the natural gas requirements of its customers.

In connection with this application, reference is made to the requests for temporary certificates filed with the Commission by Kerr-McGee, Cabot, Felmont and Essex in their applications in Docket Nos. CI67-1081, CI67-1060, CI67-1077 and CI67-1076, respectively, in which authorizations are sought to commence sales to Transco from Block 214. Temporary authorizations were issued to the respective producers and Transco on April 20, 1967.

The estimated total cost of construction of Transco's facilities is $558,100 and will initially be financed out of funds made available from company funds, temporary bank loans, and permanent financing to be arranged as part of an over-all financing program.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on May 11, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, and exhibits, submitted in support of the authorization, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Transcontinental Gas Pipe Line Corporation, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order issued May 29, 1948, in Docket No. G-704 (7 FPC 24).

(2) The proposed construction and operation of facilities and transportation of natural gas by Applicant, as hereinbefore described and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities and transportation of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to Applicant authorizing the construction and operation of facilities and the transportation of natural gas by Applicant as hereinbefore described and as more fully described in the application, and exhibits in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized by paragraph (A) above shall be completed and placed in actual operation by August 1, 1967, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

## EL PASO NATURAL GAS COMPANY, DOCKET NO. CP67-102

### ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 17, 1967)

On March 21, 1967, El Paso Natural Gas Company (Petitioner) filed in Docket No. CP67-102 a petition, as supplemented on April 12, 1967, to amend the order issued in said docket on January 4, 1967, 37 FPC 2. By the instant filings Petitioner seeks authorization for the rearrangement and expansion of certain natural gas facilities which were authorized by the subject order and through the use of such facilities to transport and deliver additional quantities of natural gas to the American Smelting and Refining Company (AS&R), an existing direct sale customer, all as more fully set forth in the petition to amend.

The order issued in the subject docket on January 4, 1967, authorized Petitioner, *inter alia*, to construct and operate approximately 17.93 miles of 8⅝-inch O.D. pipeline looping a portion of its San Manuel-Hayden, Arizona, pipeline for the purpose of providing an additional firm daily quantity of 2,023 Mcf of natural gas to AS&R and an additional firm daily quantity of 708 Mcf of natural gas to Kennecott Copper Corporation (Kennecott), both companies being existing direct sale customers of Petitioner.

Petitioner has been advised by AS&R that its future requirements for natural gas have been materially accelerated due to further expansion now required for increased copper production near Hayden, Arizona. Accordingly, Petitioner and AS&R have entered into an amendatory agreement dated March 1, 1967, amending the gas sales contract between the parties dated October 12, 1962, and amended on September 1, 1966, so as to provide for a further increase of 5,057 Mcf in the firm daily deliveries by Petitioner to AS&R.

In accordance with said contract Petitioner seeks authorization to transport and deliver an additional 5,057 Mcf of natural gas per day to AS&R. This additional quantity of natural gas, together with the previously authorized increase of 2,023 Mcf, will provide AS&R with additional daily quantities aggregating 7,080 Mcf. Such additional quantities, representing an increase from 4,046 Mcf per day to 11,126 Mcf per day, will be utilized by AS&R in satisfying its increasing requirements for fuel used in its mining, smelting, metallurgical and related operations conducted near Hayden, Arizona. Said volumes of natural gas will be sold by Petitioner to AS&R at a rate of 30.84 cents per Mcf.

To implement delivery to AS&R of the aggregate additional daily quantity of 7,080 Mcf, Petitioner proposes the construction and operation of facilities in lieu of the presently authorized 17.93 miles of 8⅝-inch O.D. loop pipeline. These substitute facilities consist of approximately 28.1 miles of 8⅝-inch O.D. pipeline extending in a northerly and northeasterly direction from a point of connection with Petitioner's pipeline branches providing service to AS&R and Kennecott near Hayden, Arizona. The substitute facilities will also provide for the presently authorized increase of 708 Mcf of natural gas per day in Kennecott's requirements.

The total estimated direct cost of Petitioner's proposed substitute facilities is $628,000. The total estimated cost for all facilities set forth in the application in this proceeding, as amended, including overhead, contigency and required filing fees, is $779,518, representing a net increase in estimated cost of $309,664.

Petitioner proposes to finance the additional cost of the project through the use of working funds, supplemented as necessary with short-term bank loans.

After due notice, no protest, petition to intervene or notice of intervention has been filed.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued in the instant docket on January 4, 1967, be amended as hereinafter ordered and conditioned.

*The Commission orders:*

(A) The Commission's order issued on January 4, 1967, in Docket No. CP67-102 is amended by authorizing Petitioner to construct and operate 28.1 miles of 8⅝-inch O.D. pipeline in lieu of the 17.93 miles of 8⅝-inch O.D. pipeline authorized therein and through the use of said facilities to transport and deliver an additional 5,057 Mcf of natural gas per day to American Smelting and Refining Company, as hereinbefore set forth and as more fully set forth in the petition to amend and supplement thereto filed in this proceeding.

(B) In all other respects the certificate issued in the subject docket shall remain in full force and effect.

---

## OPINION NO. 520

## HUMBLE GAS TRANSMISSION COMPANY, DOCKET NO. CP65-395; MISSISSIPPI VALLEY GAS COMPANY v. HUMBLE GAS TRANSMISSION COMPANY, DOCKET NO. RP66-9

### OPINION AND ORDER ISSUING CERTIFICATE AND AMENDING TARIFF

(Issued May 17, 1967)*

*Syllabus*

1. Where all relevant considerations do not militate in favor of one of the competing applicants, it is Commission policy that service to an industrial customer be made by local distributor rather than its pipeline-supplier. P. 923.
2. In resolving public interest question of whether pipeline or its distributor-customer should make direct industrial sale, it is not determinative that industrial customer can get a slightly lower price from distributor; what is determinative is effect of sale on the other customers of pipeline and distributor. P. 923.
3. Utilizing either an incremental or rolled-in method of costing, it is clear that Humble could only supply Mississippi additional gas under its G-1 schedule at a loss. P. 924.
4. Instant circumstance [*supra* 3] alone, is sufficient to require certification of pipeline to serve industrial customer directly. P. 924.
5. Limitations of paragraph 10 of tariff [prohibiting distributor from selling gas purchased under pipeline's Rate Schedule G-1 to any industrial customer in excess of specified monthly amounts] affords pipeline-supplier a

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

CARVER, *Commissioner:*

Humble Gas Transmission Company (Humble) filed an application pursuant to Section 7 of the Natural Gas Act on June 9, 1965 (amended July 6, 1965) requesting a certificate of public convenience and necessity authorizing it to construct a measuring station and a four-inch pipeline approximately 4,100 feet in length, to maintain and operate approximately 2,350 feet thereof, and to transport, sell and deliver 500,000 Mcf of natural gas annually with a maximum of 3,000 Mcf daily to Diamond National Corporation (Diamond) at its plant near Natchez in Adams County, Mississippi.

Mississippi Valley Gas Company (Mississippi) a local distribution company having the Diamond plant within its service area, intervened in opposition to the Humble application. Mississippi purchases its gas requirements in that area from Humble under an agreement dated September 11, 1963. Mississippi seeks to serve Diamond and contends that Humble should not be certificated to render this service in competition with one of its local distributors.

By order of October 11, 1965, 34 FPC 1127, the Commission issued a temporary certificate to Humble to construct the necessary facilities and to sell gas to Diamond.

In a separate proceeding, on September 2, 1965, Mississippi filed a formal complaint against Humble alleging that one paragraph of Humble's FPC Gas Tariff is unjust, unreasonable and unduly discriminatory or preferential within the meaning of Sections 4 and 5 of the Natural Gas Act. This paragraph provides "Buyer shall not sell gas purchased under seller's rate schedule G–1 to any one industrial consumer in excess of 100,000 cubic feet per month except by written consent of seller" (Paragraph 10,) General Terms and Conditions of Humble's tariff. On September 17, 1965, 34 FPC 873, the Commission issued an order to Humble directing it to show cause why the Commission should not determine that the paragraph is unjust and unreasonable. By order of December 3, 1965, 34 FPC 1415, the Commission granted Mississippi's motion for formal hearing on its complaint and consolidated it with the application by Humble for a certificate of public convenience and necessity to construct and operate the facilities and make the sale to Diamond.

The Presiding Examiner found that Humble should be certificated to make the sale to Diamond and further found that the provisions of the quoted paragraph are just, reasonable, non-preferential, and non-discriminatory and have been applied by Humble in a non-discriminatory manner, and that the complaint filed against Humble by Mississippi should be dismissed and that proceeding terminated.

Staff, Mississippi, and the Public Service Commission of the State of Mississippi take the position that the Examiner was incorrect, that Mississippi, rather than Humble, should make the sale to Diamond and that the quoted paragraph of Humble's tariff should be revised so that Humble may not arbitrarily refuse service to a distributor for a resale to an industrial customer consuming more than 100 Mcf of gas per month.

Mississippi, according to the record, did its best to interest Diamond in locating in the area and worked with the Chamber of Commerce, the City of Natchez, the Mississippi Agricultural and Industrial Board, and representatives of local industries, to that end. Thereafter, when Diamond had decided to locate in the area, Mississippi sought approval from Humble for Mississippi to make a sale to a "new industrial customer," which approval was refused. It does not appear that Humble was informed of the identity of the industrial purchaser, nor that Diamond knew of the requirement that Mississippi obtain Humble's approval before making the sale. A letter (Ex. 33) from Mississippi to Diamond states that its proposed furnishing of the gas would be subject to Mississippi obtaining the necessary supply from Humble. Thereafter Diamond entered into a contract with Humble to purchase the necessary gas for its plant and notified Mississippi that it had arranged to make its purchase elsewhere. The present proceedings followed.

The basic questions before the Commission are: (1) whether Humble should be certificated to construct the facilities and make the sale to Diamond or whether the sale should be made by Mississippi (which needs no certificate); and (2) the propriety of Paragraph 10. We find that the public interest requires the certification of Humble and the invalidation of Paragraph 10.

It is the announced policy of this Commission, where an analysis of all relevant considerations does not militate in favor of one of the competing applicants, that service to an industrial customer be made by the local distributor rather than by its pipeline supplier. *Panhandle Eastern Pipe Line Company*, Opinion No. 510, December 22, 1966, 36 FPC 1107. This policy, however, rather than avoiding an *ad hoc* approach to each comparative proceeding, requires that each case be decided upon its own merits. We agree with the Presiding Examiner that public interest considerations require the certification of Humble.

Mississippi purchases gas from Humble under the latter's G-1 rate schedule at a rate of 17.69 cents per Mcf at 15.025 psia. If permitted to serve Diamond, Mississippi would do so at an average rate of 23.65 cents per Mcf at 14.65 psia, assuming a monthly billing demand of 1000 Mcf and an annual volume of 274,000 Mcf. If the billing demand were 3,000 Mcf per month and the annual volume 500,000 Mcf, Mississippi's price to Diamond would average 25.47 cents per Mcf at 14.65 psia (Tr. 785). Humble proposes to serve Diamond up to 3,000 Mcf per day and 500,000 Mcf per year at the flat rate of 26 cents per Mcf at 15.025 psia, or 25.35 cents per Mcf at 14.65 psia.

The question then is whether the public interest is furthered by requiring Humble to sell to Mississippi at 17.69 cents per Mcf so that Mississippi could resell to Diamond, or by permitting Humble to serve Diamond directly. The comparative cost of facilities is not persuasive. Whether the sale be made by Humble directly or by Mississippi only relatively small amounts need be expended for additional facilities.[1] Nor is it determinative that Diamond can get a slightly lower price from Mississippi. What is determinative is the effect of the sale on the other customers of Humble and Mississippi.

The gas supply for the Humble interstate systems is derived from three sources: Monroe and Vixen Fields and Tensas Gas Gathering Corporation. The Tensas purchase is casinghead gas and supplies a very small percentage of the pipeline's requirements. Since casinghead gas production is geared to the production of oil, there are limitations on its availability. Humble realizes most of its gas supply from its wells in the Monroe Field. But this field, which has been in production since 1916, is now fully developed and its existing daily or annual production cannot be increased. Thus, any additional supply of gas needed by Humble to cover an increase in sales would have to come from the Vixen Field.

---

[1] Approximately $7,800 if Mississippi serves Diamond as compared with approximately $21,000 if Humble effects such service.

Relying in the main on the incremental purchase cost of Vixen Field gas, Humble contends that it is not economically feasible for it to supply Mississippi with gas at 17.69 Mcf for resale to Diamond. Staff and Mississippi, while not disputing the factual basis of this presentation, argue however that the incremental cost is irrelevant and that only the system-wide rolled-in costs should be considered. We do not need to decide whether incremental costing is appropriate since we are satisfied that consideration of costs both on an incremental and rolled-in basis requires the same conclusion, that it would not be compensatory for Humble to supply the additional gas to Mississippi at its existing G–1 rate.

The average price paid by Humble for Vixen Field purchases is 18.28 cents per Mcf or .59 cent per Mcf higher than its G–1 rate. Thus, it is apparent that Humble on an incremental basis would be required to absorb a considerable deficit if it were compelled to sell gas to Mississippi for service to Diamond. The evidence on the rolled-in cost is less precise than that as to incremental cost but it is clear that the rolled-in cost to Humble would exceed somewhat its G–1 rate. The rolled-in cost evidence introduced by Humble purports to show an average system cost for the Diamond sale of 23.28 cents per Mcf for 1966, and only nominally less in 1967 and 1968. While this cost appears to be overstated, we are satisfied that, even after allowing for arguable adjustments, Humble's rolled-in cost would exceed its 17.69-cent G–1 rate.[3] Under these circumstances we think it unnecessary to remand for a precise determination of rolled-in costs.

Thus, utilizing either an incremental or rolled-in method of costing, it is clear that Humble could only supply Mississippi additional gas under the G–1 schedule at a loss. This alone, is sufficient to require certification of Humble to serve Diamond directly. It is compelled when consideration is given to the fact that as a result of having to make a noncompensatory sale Humble may have to file for an increase in its G–1 rate to the detriment of the 14 distribution customers, including Mississippi, now taking under that schedule.

---

[3] For example, even if we were to permit the parties to attack the 10-cent per Mcf cost of pipeline produced gas in the Monroe Field, which we established in *Olin Gas Transmission Corporation,* 17 FPC 685, as an incentive to Olin, Humble's predecessor, to explore for and develop the additional reserves in North Louisiana necessary to serve its jurisdictional customers, it does not appear that there would be significant impact on Humble's cost of service. Based upon information in the 1965 Form 2 filed by Humble, which we take official notice of, we have calculated that Humble's cost of Monroe Field production is in the range of 7 to 9 cents per Mcf. Even if we readjust Humble's cost of service using a 7 cents per Mcf level for its Monroe Field gas, Humble's resulting cost of service would exceed its G–1 rate.

There remains to be determined whether Humble has established the propriety of Paragraph 10 of the General Terms and Conditions of its general sales tariff. As noted, that provision prohibits a G–1 customer from supplying, to an industrial customer, more than 100,000 cubic feet per month of gas purchased pursuant to that rate without first obtaining the written approval of Humble. The justification asserted for that provision is that it is necessary if Humble is to be protected against the possibility that it will be faced with excessive demands especially in the absence of volumetric limitation on takes. We think, however, that Paragraph 10 cannot be permitted to stand. Limitations such as Paragraph 10 afford a pipeline supplier a significant, if not decisive, advantage over its distribution customers in competing for new industrial loads, an advantage which is wholly at variance with the announced policy of this Commission to permit, wherever consistent with the public interest, free and active competition for new markets and growth. Moreover, they do not accomplish their stated objective of protecting the pipeline from excessive demands. That objective could be realized by an overall volumetric limitation on the amount of gas that any particular purchaser can demand, but not by a restriction such as Paragraph 10. For example, Paragraph 10 does not protect Humble from greater demands made by Mississippi or other customers as a result of an increase in its residential or commercial sales. On the other hand, it would permit Humble to veto an industrial sale by Mississippi even though Mississippi's total demand on Humble might be decreasing. Thus, the tariff provision does not give Humble the protection the provision is supposed to provide, yet it has the potential to thwart the public interest. It is, therefore, unjust and unreasonable within the meaning of Section 5(a) of the Natural Gas Act. Humble may and should substitute a reasonable volumetric limitation. However, we do not adopt Humble's specific suggestion for volumetric limitation based on the maximum day's delivery to the buyer during the 12-month period immediately prior to the effective date of the tariff provisions.[8] This suggestion does not take account of weather variations from year to year, nor does it allow for legitimate growth in demand in the immediate future. Humble's other customers should have the opportunity to comment on the proposed limitations. Accordingly, Humble will be directed to file, within 60 days of the date of this Order, revisions of its tariff with the offending clause removed, and with suitable volumetric limitations included. Any and all customers of Humble, all other persons who might be affected, and the staff may within 20 days thereafter file objections and suggestions as to the proposed volumetric limitations.

---

[8] It should be noted that staff's modified proposals to Paragraph 10 suffer from the same defects as Paragraph 10.

We think that oral argument would not add to the presentation of facts and law hitherto made. Accordingly, Mississippi's motion for oral argument is denied.

*The Commission finds:*

(1) Applicant, Humble Gas Transmission Company, a Delaware Corporation with its principal place of business in New Orleans, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in *Humble Gas Transmission Company*, Docket No. CP63-56 (1963), 29 FPC 162, 163, Finding No. (1).

(2) The facilities hereinabove described, all as more fully described in Applicant's application, as amended and supplemented, in the proceeding in Docket No. CP65-395, are to be used in the transportation and delivery of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation of such facilities together with the transportation and delivery of natural gas by Applicant to the Diamond National Corporation are subject to the requirements of subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the facilities as they have already been constructed and are in operation in accordance with the authority therefor granted by a temporary certificate issued by the Commission on October 11, 1965, and the transportation and delivery of natural gas through such facilities by Applicant to make the industrial sale to Diamond are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations issued under the authority delegated to it under the Natural Gas Act and particularly the general terms and conditions as set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(6) The provisions of Paragraph 10 of the General Terms and

**Conditions of Applicant's tariff are unjust and unreasonable within the meaning of Section 5(a) of the Natural Gas Act.**

*The Commission orders:*

(A) A certificate of public convenience and necessity be and the same hereby is issued authorizing the Applicant, Humble Gas Transmission Company, to construct and operate the proposed facilities and to deliver natural gas as hereinbefore described, all as more fully described in the application and exhibits in the proceeding in Docket No. CP65–395, upon the terms and conditions of this Order.

(B) The certificate issued by Paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Regulations of the Commission under the Natural Gas Act and particularly the general terms and conditions as set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(C) Applicant shall remove Paragraph 10 of the General Terms and Conditions from its tariff within 60 days of the date of this Order, and shall give notice of the removal to each customer of Applicant to which said paragraph is applicable.

(D) Humble shall file proposed volumetric limitations applicable to each jurisdictional customer within 60 days of the date of this Order, and shall give notice, to each such customer whose agreement to the proposed limitation has not been obtained and to each state regulatory body having jurisdiction in affected areas, of the proposed limitation, the date of filing thereof, and that objections and suggestions as to the proposed limitation may be filed within 20 days of the filing of such limitation.

(E) The motion for oral argument filed in this proceeding by Mississippi Valley Gas Company on October 17, 1966, is denied.

Commissioner Ross *dissenting in part.*

Ross, *Commissioner dissenting in part:*

We have here the situation of a local distributor, Mississippi Valley Gas Company, which exerted substantial effort in working with local bodies to induce the location of a new industrial plant in its service-area. Ultimately, this effort was successful and Diamond located its new plant only 1200 feet from one of Mississippi's existing laterals. However, Humble Gas Transmission, which is Mississippi Valley's sole source of supply, refused under Article 10 of its tariff to sell the necessary gas to Mississippi for the purpose of supplying Diamond. Instead, Humble itself seeks to make the sale. The record indicates that Humble's rate base is rapidly approaching zero and the contention is made, not unreasonably, that Humble is attempting in every way possible to maximize its more profitable nonjurisdictional business in lieu of making jurisdictional sales to its distributors.

Consolidated in this proceeding is Mississippi's complaint, which challenges the legality of the tariff provision, *i.e.*, Article 10, under which Humble refused to sell to Mississippi for resale to Diamond. While the majority holds Article 10 unjust and unreasonable under Section 5 of the Natural Gas Act,[1] it, in fact, erects a more formidable barrier precluding Mississippi, or any other distributor, from purchasing additional quantities of gas from Humble. The majority achieves this unhappy result by finding, without reservation, that Humble cannot economically make jurisdictional sales of gas under its applicable G-1 tariff. If forced to do so, the majority states that Humble would suffer a loss of 5½¢ on each Mcf sold and therefore should not be required to sell to Mississippi. The majority has thus armed Humble with an impregnable club to beat down the efforts of any of its distributors against raids in their service area by Humble. Mississippi Valley will certainly be surprised to discover that Article 10 was stricken only to be replaced by a more restrictive device. While the majority seems to be leery of doing anything which might precipitate a rate increase filing by Humble, it should recognize that the existence of a low rate is hardly a benefit if no distributor can purchase additional quantities of gas under it.

In my opinion, the majority's approach is erroneous.

When the legality of Georgia Power's load limitation was challenged, Georgia argued that the effect of removing it would necessitate a rate increase of the magnitude of $800,000 annually. The Commission had no difficulty with this contention. It simply said such an argument was irrelevant.[2] On rehearing, the Commission emphasized this conclusion in Opinion No. 487-A, issued May 26, 1966, 35 FPC 818:

> This is not a proceeding to determine just and reasonable rates, and involves the question of whether two provisions in the WR-4 rate schedules of Georgia Power, applicable to wholesale sales to municipally-owned distributors for resale, are unjust, unreasonable and unduly discriminatory and therefore unlawful under Sections 205 and 206 of the Federal Power Act. In considering the relationship between the deleted provisions and the existing rate schedule, we made it clear in our March 30 Order that our refusal to expand this proceeding into a rate case in no way precluded Georgia Power from submitting for filing new rate schedules reflecting increased rates, in accord-

---

[1] The Commission unanimously and explicitly held tariff provisions essentially similar to Article 10, to contravene Sections 205 and 206 of the Federal Power Act, *i.e.*, the counterparts of Sections 4 and 5 of the Gas Act. This action was taken in *Georgia Power Co.*, Docket No. E-7099, *et al.*, Opinion No. 487, March 30, 1966, 35 FPC 436, a citation conspicuous by its absence in the majority opinion.

[2] "Georgia Power's $800,000 revenue loss figure is irrevelant, for possible revenue loss on other sales cannot justify the retention of a discriminatory provision in a rate schedule." Opinion No. 487, *supra*, p. 438.

ance with Section 205 of the Federal Power Act and Part 35 of the Commission's Regulations thereunder. Georgia Power may avail itself of this opportunity at any time, separate from this proceeding, where its contractual commitments permit such a filing.

In the light of this decision, Humble's decision to stipulate that its G–1 rate was compensatory at the prehearing conference in this case was reasonable.[3] The same is also true respecting the Examiner's steadfast refusal to receive evidence regarding the cost of Humble's produced gas. Since this was not an overall rate case, there was no occasion to go behind just and reasonable rate determinations. Certainly, there is no more justification for going behind the propriety of the 10¢ allowance for Humble's own gas than there is for going behind Humble's resale rate of 17.69¢.

During rebuttal, Humble apparently had second thoughts about its stipulation and introduced cost evidence.[4] This evidence purports to demonstrate that Humble's rolled-in cost of service exceeds its G–1 rate by over 5½ cents per Mcf.

This evidence is far from convincing. First, it is difficult for me to conceive that the Humble management has so little regard for its stockholders that it loses 5½ cents on every Mcf that it sells when it has a convenient remedy of filing for a rate increase. Second, not only has Humble failed to seek an increase, but twice, in 1964 and 1965, it voluntarily filed rate *reductions* in its jurisdictional rates resulting in the present 17.69¢ per Mcf. Third, Humble's cost evidence, introduced for the first time on rebuttal, was challenged in only three limited respects during the hearing. Whether or not it would stand up under careful scrutiny in the crucible of a rate case is far from clear.

The majority not only accepts Humble's evidence at face value but attempts to bolster a critical weakness regarding the cost of Humble's own production. As noted above, the difficulty here was that the Examiner consistently refused to allow any evidence on this issue. Rather than simply remanding the case for a limited hearing on this issue, the majority attempts to fabricate a cost to compensate for this void in the evidence. I haven't the slightest idea whether its computation is accurate, and the majority is precluding any careful analysis in its terse "explanation" in footnote 2.

If the majority had been as eager to consider Humble's other costs it would have discovered, as staff contends, that Humble's

---

[3] "What we are saying here, * * * by this stipulation we would not contend that if the test is as the staff argued a systemwide test, and that is the only way to look at it, and we would have to show we couldn't make the sale on an economic basis to Mississippi, if these things are so, then we will not urge and we will not contend that on that systemwide basis the 17.69 is not a compensatory rate." Tr. 113.

[4] Staff's attempts to meet this evidence were rather severely rejected.

Fowler-Baton Rouge system will be fully depreciated in 1968.[5] Obviously Humble's costs will be drastically lower than the 23.28¢ per Mcf figure used by the majority. Yet the majority completely ignores this fact and predicts grave consequences to all of Humble's customers if Humble's application is denied. Specifically, the majority finds that its conclusion is "compelled when consideration is given to the fact that as a result of having to make a noncompensatory sale Humble may have to file for an increase in its G-1 rate to the detriment of the 14 distribution customers, including Mississippi, now taking under that schedule." In finding grave consequences from the mere "filing" of the rate increase, the majority apparently believes that Humble could justify any rate increase it files. Of course, in view of its rate base situation, the possibilities of such justification—or even of a filing—are exceedingly slim.

The majority also finds that Humble's incremental cost of selling to Mississippi exceeds its G-1 rate. The majority's computation of incremental cost is erroneous and inconsistent with the long-established policy of the Commission on this issue. The Commission uses the following test for determining whether a new sale would be economically feasible: measure the estimated revenues with the cost of additional facilities required, the *average* gas cost, and other variable costs (*e.g.*, compressor fuel). The Commission enunciated this principle, and its rationale, in a unanimous opinion rejecting an intervener's claim that incremental gas costs should be utilized:

> However, it is clear that Northern's use of average system purchased gas costs in its incremental cost study was proper. An incremental cost study in a pipeline certificate case normally includes the specific costs directly associated with the particular service proposed, and not general, system-wide costs, except that average gas purchased costs[6] are normally used since the system gas supply is considered available to all customers throughout the system and no particular reserves are deemed earmarked for any particular service.[7]

Far from being unique, this is the test the Commission uses in every pipeline certificate matter, including the half-dozen or so noncontested applications decided weekly, and undoubtedly will be used in the future, except for this case.

How does the majority explain its deviation? What is the rationale for assigning certain reserves to specific customers? Is there a more desirable public purpose to be served by ignoring its normal policy in this case? No answers are given, and we are left to wonder whether the majority, in fact, favors direct sales by pipelines despite its mere language to the contrary.

---

[5] Exhibit 29, Schedule 5, Column (d), line 11.

[6] Of course, average system gas cost includes a pipeline's own production. *Panhandle Eastern Pipe Line Co.,* Opinion No. 510, Docket No. CP66-50, December 23, 1966, 36 FPC 1107.

[7] *Northern Natural Gas Co.,* Opinion No. 463, 33 FPC 1163, 1166 (1965).

Humble itself introduced evidence showing its average system cost reflecting a 10¢ per Mcf allowance for its own produced gas. This evidence, which was uncontested, reflected a cost of 13.45¢ per Mcf for its gas supply. Apparently Humble has sufficient existing capacity to deliver volumes for the Diamond sale since its incremental cost showing, other than gas cost, included only those costs associated with the construction of a lateral to the Diamond plant. Accordingly, under the Commission's historic method, Humble's sale of additional gas to Mississippi for resale to Diamond is economically feasible. This conclusion is consistent with Humble's stipulation that it could economically make additional sales to Mississippi under its filed tariff. (See footnote 3, *supra*)

Viewed in its proper perspective, this is a simple case of a pipeline raiding the service area of a distributor where the interested local regulatory body, the Mississippi Public Service Commission, strongly supports the application of the local distributor. As that Commission stated in its brief on exceptions:

> It was and remains the Mississippi Commission's position that if the local distributor is ready, willing and able to make an initial sale in its certificated area, it and not its interstate pipeline supplier should do so. Quite obviously, both Humble and Mississippi Valley desire to serve the industrial plant of Diamond Natural Corporation because either would receive a substantial benefit if permitted to make the sale. It is our position that Mississippi Valley should make the sale because any benefits received by it ultimately will have a beneficial result on the individual domestic consumer served by Mississippi Valley.

Time and time again, the Commission has emphasized that service by the local distributor is preferred, except in unusual circumstances. The Commission has favored this wise policy not only in the large cases, like *Gulf Pacific*,[8] but in proceedings of a lesser magnitude, such as *Fulton*, *supra*. There are no unusual circumstances here. To the contrary, as the majority finds, Mississippi would make the sale at a lesser rate to Diamond than would Humble. Moreover, while the additional facilities required by either applicant are not substantial, the capital cost to Mississippi for making the sale would be about 1/3 of the cost Humble would incur. Were it not for Article 10 of Humble's tariff, there is no question but that Mississippi and its customers would be reaping the benefits of its successful efforts in locating new business in its service area. In short, Mississippi would be serving Diamond. Since the majority has found that Article 10 is inconsistent with the Natural Gas Act, it is ironic that it nevertheless sanctions Humble's piracy initially justified on the sole basis of that tariff provision.

---

[8] *Transwestern Pipeline Co.*, Opinion No. 500, issued July 26, 1966, Docket No. CP63-204, 36 FPC 176.

For these reasons, I would deny Humble's application for authority to make the proposed sale to Diamond and permit Mississippi Valley, the local distributor, to make the sale.

## INITIAL DECISION

## OF THE PRESIDING EXAMINER UPON AN APPLICATION FOR A CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND UPON THE JUSTNESS AND REASONABLENESS OF PARAGRAPH 10 OF THE GENERAL TERMS AND CONDITIONS OF HUMBLE'S FPC GAS TARIFF, ORIGINAL VOLUME NO. 1

(Issued September 15, 1966)

FRAZEE, *Presiding Examiner:* The Humble Gas Transmission Company (Humble)[1] filed an application, pursuant to Section 7 of the Natural Gas Act on June 9, 1965, as amended on July 6, 1965, requesting a certificate of public convenience and necessity authorizing it to construct a measuring station and a 4-inch pipeline approximately 4,100 feet in length, to maintain and operate approximately 2,350 feet thereof, and to transport, sell and deliver 500,000 Mcf of natural gas annually with a maximum of 3,000 Mcf on a daily basis to the Diamond National Corporation (Diamond). (Docket No. CP65-395). The proposed lateral line is to extend from a point of connection with Humble's existing Fowler-Baton Rouge pipeline facilities[2] to Diamond's industrial plant near the city of Natchez in Adams County, Mississippi.

Upon completion of the construction, Humble proposes to assign title to Diamond, free of cost, that part of the lateral line which extends from the discharge side of the measuring station to the terminal end of the lateral line at Diamond's plant. Humble estimated the proposed facilities would cost $21,000. The 1,750 feet of line to be assigned to Diamond represents about $8,400 of the estimated total cost of the proposed facilities.

Humble would use the proposed facilities to make a direct industrial sale of natural gas to Diamond who will use the gas as boiler fuel to produce steam for processing, for direct-fired driers, and miscellaneous plant uses in a moulded pulp products manufacturing facility under construction near Natchez.

Mississippi Valley Gas Company (Mississippi) filed a petition to intervene on July 12, 1965, opposing the Humble application. Mississippi is a local distribution company[3] selling natural gas in numerous communities, including Natchez, in the State of Mississippi. The Diamond plant, located near Natchez, is within the service area assigned to Mississippi by the Mississippi Public Service Commission. Mississippi purchases its Natchez area natural gas requirements[4] from Humble under a service agreement dated September 11, 1963.

---

[1] Humble is a Delaware Corporation, authorized to do business in the State of Mississippi. Exhibits 1 and 2. It is a natural-gas company under the provisions of the Natural Gas Act. *Interstate Natural Gas Co.*, 3 FPC 416, *affirmed* 331 U.S. 682; Olin Gas Transmission Corp., succeeded to the interests of Interstate Natural Gas Co., and Humble succeeded to the interests of Olin Gas Transmission Co.

[2] Humble owns and operates three separate pipeline systems, only one is jurisdictional. It is commonly referred to in this record as the Fowler-Baton Rouge System. Exhibits 4 and 13. It is separately operated and unconnected with the two intrastate systems. Tr. 435; also see *Olin Gas Transmission Corp.*, 17 FPC 685, 687.

[3] Mississippi's rates, services and facilities are regulated by the Mississippi Public Service Commission.

On August 18, 1965, Humble filed an application for a temporary certificate of public convenience and necessity under the provisions of Section 157.17 of the Commission's Regulations under the Natural Gas Act to construct the facilities, described in its application therefor filed on June 9, 1965, in order to commence the sale to Diamond. By an order issued on October 11, 1965, 34 FPC 1127, the Commission determined that an emergency as contemplated by Section 157.17 of its Regulations under the Natural Gas Act had been shown to exist, whereupon it issued a temporary certificate to construct the facilities and make the sale to Diamond.

On September 2, 1965, Mississippi filed a formal complaint against Humble alleging Paragraph 10 of the General Terms and Conditions of Humble's FPC Gas Tariff, Original Volume No. 1,[5] to be unjust, unreasonable, unduly discriminatory or preferential within the meaning of Sections 4 and 5 of the Natural Gas Act. (Docket No. RP66-9). Mississippi requested a hearing on its complaint and moved to consolidate such hearing with the hearing on Humble's application for a certificate and the order to show cause.

On September 17, 1965, 34 FPC 873, the Commission issued an order to Humble directing it to show cause why the Commission should not find and determine that Paragraph 10 of the General Terms and Conditions of Humble's FPC Gas Tariff, Original Volume No. 1, quoted in fn. 5, is unjust and unreasonable.

Humble filed its answer to Mississippi's complaint and motion on October 1, 1965. By an order issued on December 3, 1965, the Commission granted Mississippi's motion for a formal hearing on its complaint and consolidated it with the application by Humble for a certificate of public convenience and necessity to construct and operate the facilities requested.

Following prehearing conferences, the matter came on for formal hearing which was concluded on May 6, 1966.

The first of the two principal issues to be considered in this proceeding is whether a permanent certificate of public convenience and necessity should be issued to Humble, to supersede the temporary certificate issued to it on August 11, 1965, to construct the facilities and to commence the transportation, delivery and sale of natural gas to Diamond.

The second principal issue relates to the propriety of Paragraph 10 of Humble's FPC Gas Tariff, which is discussed hereinafter at *infra*, pages 939, 940.

Mississippi is one of 14 purchasing-distributors receiving natural gas service from the Fowler-Baton Rouge System under Rate Schedule G-1 of the Humble Tariff.[6] The rate for service under the G-1 rate schedule is 17.69 cents per Mcf.[7]

Officials of Mississippi and others interested in attracting new industries to the State of Mississippi generally, and the Natchez area specifically, learned that Diamond was interested in a new plant location in a southern state and that a location near Natchez was being considered. (Tr. 601). The officials of Mississippi, and others interested, contacted Diamond. Several promotional meetings were held with Diamond officials. A Diamond witness testified that Diamond investigated several prospective plant sites, analyzing each for the availability of raw materials, transportation, labor, taxes and local government concessions, and the availability of natural gas for use as plant fuel. Diamond made its decision in the summer of 1963 to locate its new plant just outside the city limits of Natchez. (Tr. 190).

---

[4] Gas requirements for service to other communities by Mississippi are purchased from four other pipelines.

[5] Paragraph 10 of the General Terms and Conditions of Humble's FPC Gas Tariff, Original Volume No. 1, contains the following provision:

"Buyer shall not sell gas purchased under Seller's Rate Schedule G-1 to any one industrial consumer in excess of 100,000 cubic feet per month except by written consent of Seller."

[6] See Item D, Second Revised Sheet No. 28; Tr. 303-4.

[7] See Item D, Second Revised Sheet No. 5: Exh. 44.

While the negotiations for the location of the plant in Natchez were going on, Mississippi indicated its desire to sell Diamond its natural gas requirements for its Natchez plant. On September 10, 1963, Mississippi submitted a proposal[8] to Diamond and asked for a reply letter of intent regarding the purchase of gas. This, Mississippi said, would enable it to make the necessary arrangements to obtain the gas for Diamond. (Exh. 33, Tr. 604). A follow-up letter went to Diamond on September 24, 1963 (Exh. 34, Tr. 605) to which Diamond replied on September 27, 1963, that its planning was not yet far enough advanced to make any commitments for the purchase of a gas supply. (Tr. 190).

Anticipating the sale to Diamond, there were oral discussions between Mississippi and Humble. On June 18, 1963, Mississippi submitted a formal written request to Humble, as provided by Paragraph 10 of Humble's tariff, asking its consent to attach a large potential industrial customer. (Exh. 46). Humble formally denied Mississippi's request by letter dated June 21, 1963. (Exh. 47).

Douglas J. Miles, who is Vice President, Secretary, Manager of Gas Sales and Supply, and a member of the Board of Directors of Humble (Tr. 236), testified that at the time Humble refused its consent to Mississippi to serve a potential industrial customer (Exh. 46) it was not aware of the identity of the customer and that the refusal of consent was "because it would not be economically feasible for Humble Gas to purchase, transport, sell, and deliver the increased quantities estimated for the large industrial consumer" (Tr. 249) under its G–1 rate schedule price of 17.69 cents per Mcf.

Diamond, a knowledgeable and experienced purchaser of natural gas for industrial use, says it carefully considered the proposals of the only two natural gas suppliers in the area, Mississippi and Humble, and concluded the proposal made by Humble was best suited to its requirements, therefore the sale was awarded to Humble and a contract executed on March 31, 1965 (Exh. 12, Tr. 191). Diamond's witness stated it had no knowledge, at that time, of Humble's refusal to sell the Diamond gas to Mississippi. Diamond notified Mississippi by letter on April 20, 1965, of the contract with Humble (Exh. 35, Tr. 605).

It was the further testimony of the witness Miles that one of Humble's sources of gas supply comes from company-owned production in the Monroe Field[9] in Louisiana. The gas supply situation in the Monroe Field was last considered by this Commission in *Olin Gas Transmission Corp.*, Opinion issued May 15, 1957, 17 FPC 685. (Humble has since succeeded to the Olin interests.) This was a Section 4 rate case based upon a twelve months test period ending October 31, 1954. At p. 700 in the *Olin* opinion, the Commission said:

> No new reserves of any consequence have been added to the field for many years, and available reserves and production are slowly declining. In 1950, total Monroe Field production was 148,592,804 Mcf of natural gas; in 1951, 143,933,172 Mcf; in 1952, 129,785,345 Mcf; in 1953, 114,671,576 Mcf; and in 1954, 107,086,285 Mcf. Further production declines are forecast, and unless additional reserves are found in or near the field area,

---

[8] There were no negotiations as to the price, Mississippi merely submitted its Rate Schedule No. 87.

[9] The Monroe Field was discovered in 1916.

> the Monroe Field is expected to be commercially exhausted by the end of 1963.

Then the Commission continued by saying in the following paragraph:

> Olin is the largest individual producer in the field. It has about 50,000 acres of the field's some 250,000 productive acres and 358 of its 1,868 producing wells. There is no question but that in a few years' time, Olin will be unable to meet its customers' requirements with gas produced by it from the Monroe Field. Without some incentive to produce additional gas for its resale customers, Olin will be required to purchase the needed gas at higher prices from others which will directly result in increased costs to the consumers of gas. * * *

Since the date of the *Olin* Opinion, *supra*, Humble's evidence shows it has conducted an active program of reworking wells and drilling new ones in order to maintain maximum production from its Monroe Field acreage (Exh. 28, Tr. 249,451–53). The Humble witness testified that, through its program, since 1957 the number of company-owned wells have increased from 394 at the end of 1957, to 544 at the end of 1964, an increase of 150 wells. This witness estimated Humble's production from its own wells in the Monroe Field for the year 1966 would approximate 26.9 billion cubic feet of gas. While Humble plans to continue an active drilling program to enable it to maintain deliveries from the Monroe Field, the witness said "There has been a steady decline and there will continue to be a steady decline" in gas supplies and deliveries from the Monroe Field. (Tr. 249). Another Humble witness, W. Ray Booth, who is Manager-Operations, whose responsibilities include, among others, all operational matters related to Humble's gas production, transmission, compression, gas measurements and dispatching (Tr. 447) testified that since April 1963, all of the Humble owned wells in the Monroe Field have been produced to their maximum physical capabilities (Exh. 28; Tr. 452). They are operated "wide open" (Tr. 470).

Humble purchases all gas available from the Tensas Gas Gathering Corporation.[10] This gas is delivered into the Fowler-Baton Rouge System through a Tensas lateral at a point about 67.31 miles south of the Humble De Siard Compressor Station in the Monroe Field (Exh. 13; Tr. 453) and in 1966 is estimated to comprise about 3 percent of Humble's supply.

Humble's only other source of gas supply for its Fowler-Baton Rouge System comes from the Vixen Field,[11] located in Caldwell Parish, Louisiana. This gas is delivered into the System at a point approximately 21.21 miles south of Humble's De Siard Compressor Station in the Monroe Field (Exh. 13; Tr. 448).

Humble's evidence (Exh. 13) shows the actual flow conditions and the sources of supply on the Fowler-Baton Rouge System for the maximum day deliveries during the calendar year 1964—the latest year for which complete data are available. The peak day occurred on February 21, 1964. The gas available on that date from the various sources of supply was:

83, 459 Mcf— 69. 7 percent—Monroe Field.
30, 433 Mcf— 25. 4 percent—Vixen Field.
5, 808 Mcf— 4. 9 percent—Tensas.

119, 700 Mcf—100. 0 percent (Exh. 13; Tr. 449)

---

[10] This is composed principally of oil-well gas (Tr. 453).

[11] Purchases here are made from the Atlantic Refining Company (now Atlantic Richfield) and the Shell Oil Company, the principal supplier being Shell. Items C, F and G; Tr. 250).

The witness Miles testified that for the year 1966, Humble's supply of gas for its Fowler-Baton Rouge System would come from the following sources:

18, 966, 000 Mcf [12]— 58 percent—Monroe Field.
12, 601, 000 Mcf [13]— 39 percent—Vixen Field.
1, 117, 000 Mcf — 3 percent—Tensas.

32, 684, 000 Mcf —100 percent (Tr. 272)

There is no question, from the evidence adduced by Humble on this record, that its supply of company produced gas from the Monroe Field is declining annually despite Humble's efforts to increase its production. Also that Humble's supply from Tensas is decreasing. Therefore, as Humble's evidence clearly shows, it must depend on its "swing" gas, and additional supplies, from the Vixen Field or from other sources of supply not yet contracted for and in all probability at increased costs. (Tr. 254, 345).

Mississippi knew, when it made its formal request to Humble for 340,000 Mcf of gas per year to serve a new potential industrial customer in the Natchez area, that Humble had a problem in obtaining the gas supply at a price that would enable it to sell to Mississippi for resale under Humble's present FPC Gas Tariff (Rate Schedule G–1). (Exh. 46, p. 2, reference May 31, 1963 discussion between Mississippi and Humble officials).

Humble's evidence shows it was necessary for it to refuse to supply the gas requested by Mississippi (Exh. 47) for the reason that the only place it could procure additional gas would be from the Vixen Field, where the average price to Humble is 18.28 cents per Mcf (Tr. 250); that it would not be economically feasible for Humble to pay 18.28 cents per Mcf of gas, plus the costs of transportation and delivery to Natchez, and there sell it to Mississippi for 17.69 cents per Mcf. (Tr. 250).

Since issuance of a temporary certificate to Humble to make a direct sale to Diamond, Humble's evidence shows that with the addition of the Diamond load its supply of, and demand, for, natural gas on its Fowler-Baton Rouge System are in balance (Tr. 423).

Humble has established on this record and the Commission found in the *Olin* case, *supra*, that its available supply of gas from the Monroe Field is in a steady decline.

Humble has also established that its only remaining source of new gas supply is from the Vixen Field, where the average cost to Humble is 18.28 cents per Mcf.

Humble has, therefore, shown by a preponderance of the evidence its increasing reliance on the Vixen Field for its present and future supply of natural gas to meet the requirements of its customers, resale and direct, on its Fowler-Baton Rouge System.

With this cost and supply picture in mind, Humble appears from this record to have had no other recourse except to deny the Mississippi request if it were to avoid a loss sale. On its face a sale to Mississippi at 17.69 cents while paying on the average 18.28 cents (incremental price basis) for Vixen Field gas would produce a .59 cent loss for each Mcf sold. The same incremental price of 18.28 cents related to the direct sale to Diamond at 26.00 cents would produce a 7.72 cents per Mcf gross profit to Humble, which profit would actually be several cents less, if transportation and loading costs were added to the incremental price.

---

[12] This volume does not include field sales of 7,298,000 Mcf nor company use gas of 712,000 Mcf for a total of 8,010,000 Mcf. (Exh. 7, Sch. 2, Lns. 34 and 39; Exh. 18, Col. 4, Lns. 5 and 7.)

[13] This volume includes 500,000 Mcf for the Diamond load. (Exh. 18).

Staff contends, at p. 21 of its brief, that Humble's claimed average system cost of 23.28 cents per Mcf (Exh. 22) to Mississippi is not a true cost figure representative of Humble's cost of service, as it does not reflect the low actual cost of Humble's own production in the Monroe Field. Exhibit 22 indicates that the Monroe Field gas is priced into the cost of service at the 10-cent price[14] along with purchase gas costs ranging from 4.91 cents[15] to 18.28 cents. The average system cost of the Diamond sale developed from this cost of service by Humble is 23.28 cents for the year 1966 and for the years 1967 and 1968 it indicates an average cost of 22.72 and 22.79 cents, respectively. While this average cost appears to be somewhat on the high side,[16] it is doubtful that a cost of service determination utilizing the actual cost of gas from the Monroe Field (alleged by the Staff to be in the area of 2.64 cents[17] and 4.91 cents[18] per Mcf (Staff brief, p. 24)) would produce an average system price below 18.28 cents per Mcf—the average incremental price of gas from the Vixen Field.

The Staff strongly contends it should be permitted to introduce evidence of cost on Humble's Monroe Field production in the instant case,[19] to demonstrate that by conforming to a just and reasonable price standard, as utilized in rate cases, a profitable sale could be made by Humble to Mississippi. The Examiner has, in this instance, denied the cost evidence of the Staff on the grounds that this was not the proper forum in which to consider a Humble rate case; that a just and reasonable price for Humble's Monroe Field production has heretofore been determined in the *Olin* case, *supra*, and further, that the just and reasonable standard is not applicable to a Section 7 application.

The Staff also contends Humble's direct assignment of the Vixen Field costs to the Diamond sale is contrary to the Commission's established allocation principle that the cost of gas from specific sources is not assignable to specific customers. The Staff relies upon *United Gas Pipe Line Company*, 14 FPC 353, 393 and *Battle Creek Gas Company* v. *F.P.C.*, 281 F. 2d 42. While this latter case supports the Staff position, it also supports the assignment of incremental costs to a particular project, for at page 47 the Court said that, "At some point in every gas distribution facility the general system ends and connective links to the local distributors' own equipment begins. At this point the facility becomes so identified with its function as a part of the local distributor's gas plant that it may be unfair to charge its costs to all of the customers of the utility. * * * In such a situation the costs of these facilities are commonly charged as an 'incremental' cost added in to the particular customer's rate base." (Citing *Montana Power Company,* 11 FPC 1). Here, under Humble's contract with Diamond, all of the incremental costs will be recovered exclusively from Diamond and will not be borne by Humble's other customers. This certainly is in the public interest.

---

[14] This was the price arrived at by the Commission in a full scale rate case under Section 4 of the Natural Gas Act, *Olin Gas Transmission Corp.*, 17 FPC 685. The 10 cents per Mcf price for Humble's company-owned production in the Monroe Field, and used by it in its Fowler-Baton Rouge System for resale to its customers thereon, was found to be just and reasonable in 1957 and there has been no rate hearing since that time.

[15] Humble's Exh. 22, Sch. 4, ln. 2, estimates that in 1966 it will purchase 61,000 Mcf of gas in the Monroe Field at an average cost of 4.91 cents per Mcf. However, this volume is only 0.15 percent of the total gas supply estimated to be available to Humble from all sources during 1966.

[16] However, see the Commission discussion at p. 700 of the *Olin* case, *supra*, in regard to the necessity for Humble to purchase from others its needed gas requirements. There, a purchase from United Gas Pipe Line Company was used as an illustration and the Commission said that "On the basis of Olin's actual load factor for the year 1954, the cost would be 23.34 cents per Mcf."

[17] This 2.64 cents per Mcf, referred to in the Staff brief at p. 24, ln. 5, is not a part of the record herein. This was the alleged cost of producing Monroe Field gas used by the Staff in the *Olin* rate case, *supra*.

[18] See fn. 15, *supra*.

[19] The Staff's opposition to the use of the 10-cent per Mcf price for Humble's Monroe Field production is an attack in a Section 7 hearing of a rate previously found to be just and reasonable in a formal Section 4 rate case, *Olin, supra*.

Returning to Humble's present and future supply picture, it can be seen that more and more gas must necessarily be taken from Vixen Field; this will inevitably increase Humble's over-all gas supply cost and will consequently make less profitable in the future Humble's G–1 rate of 17.69 cents per Mcf to its 14 distributor customers.

To summarize, on an incremental basis, gas for the Diamond sale is only available to Humble at a cost of 18.28 cents per Mcf whether the sale to Diamond through Mississippi or directly by Humble. On Humble's system-wide basis, the fully allocated cost of service for the Diamond sale would be 23.28 cents per Mcf. Under either cost computation it is evident the Diamond sale at Humble's presently effective G–1 rate of 17.69 cents per Mcf would be a loss sale and uneconomic for Humble.

Humble's Vice President, Douglas J. Miles, testified that a possible solution, whereby Humble could make the sale of the Diamond requirement to Mississippi, would be for Humble to file for a rate increase. Such a solution, he testified, would not be in the public interest because a rate increase to a level which would make the sale economic would have a substantial cost impact on all 14 G–1 customers, including Mississippi. He said total deliveries to all G–1 customers in 1964 amounted to 10,618,284 Mcf, of this 1,829,151 Mcf, or 17.2 percent, went to Mississippi. Thus, he said, under a general rate increase which would make the Diamond sale economically possible, Mississippi would bear only 17.2 percent of the burden of the rate increase while, to create this benefit for Mississippi, the other G–1 customers would bear the other 82.8 percent of the increase. The witness concluded it was in the public interest to avoid such a rate increase as long as possible (Tr. 253). There can be no argument on this score if the Commission is to follow the mandate of the Natural Gas Act to protect the ultimate consumers of natural gas from higher charges.

The Chairman of the Mississippi Public Service Commission, Norman A. Johnson, Jr., appeared as a witness and testified that his Commission has issued certificates to Mississippi which assign and define the service area in and about Natchez (Exhs. 23, 24, 25 and 26); that Mississippi Public Service Commission has exclusive original jurisdiction over the intrastate business and property of Mississippi; however, he also testified that his Commission would have no jurisdiction over a direct industrial sale made by an interstate pipeline such as the proposed sale by Humble to Diamond. In support of this statement he cited two decisions of the Supreme Court of Mississippi, *United Gas Pipe Line Co.* v. *Miss. P.S.C.,* 1961, 133 So. 2d 521, 241 Miss. 762, 41 PUR 3d 145 and *Texas Gas Transmission Corp.* v. *Miss. P.S.C.,* 1961, 133 So. 2d 526, 241 Miss. 826, 41 PUR 3d 207 (Tr. 386). However, he opposed the issuance of a certificate to Humble to make a direct sale to Diamond on the grounds that neither the Mississippi Public Service Commission, nor the Federal Power Commission would have regulatory control over the sale under the provisions of the Natural Gas Act.

Mississippi opposes the issuance of a certificate to Humble to make the direct sale to Diamond (1) because the Diamond plant is located in its service area as certificated to it by the Mississippi Public Service Commission and (2) because Mississippi was instrumental in persuading Diamond to locate its plant in Natchez. (Mississippi Br. p. 2). Citing several Commission decisions, but relying heavily upon *Southern Natural Gas Company* (1961), 25 FPC 925, and *Northern Natural Gas Company* (1965), 33 FPC 501, (Mississippi Br. pp. 21–26) Mississippi argues "* * * the Commission has established a specific and easily defined policy" that "If the local distributor is ready, willing and able to make the sale then it, not the pipeline, should perform the service." Mississippi concludes by stating it is "ready, willing and, but for Humble's discriminatory refusal * * *" to deliver the requested volumes of gas it would be "* * * able to make the sale" to Diamond. (Mississippi Br. p. 26).

In the *Southern Natural* opinion, *supra*, the Commission held, ***absent unusual circumstances*** [italic supplied] a certificate should be issued to the distributor to make the industrial sale. The Commission concluded by saying (p. 927) "* * * he (the Examiner) has not declared, nor do we declare, that the distributor in all cases, rather than the interstate pipeline, should be permitted to make proposed industrial sales. We shall continue to consider each case on its merits as it arises and make the determinations which are commensurate with the facts and the law applicable thereto." This position was reiterated and followed in the *Northern Natural* opinion, *supra*, at p. 503, where the Commission said "* * * The Commission in *Southern Natural* expressly refrained from establishing a policy that industrial sales should always be made by a distributor. Rather, we concluded there that each such case should be resolved on its individual merits." A certificate was issued to Northern Natural to make the sale.

Applying the Commission policy of considering each case on its merits as the case arises, it is here found and determined there are such unusual circumstances present on this record as, (1) cost considerations for the incremental volume of gas for the Diamond sale, (2) Humble's G–1 rate to Mississippi is lower than the cost, without transportation, overhead, etc., of the only available source of gas required for the Diamond sale, (3) the limiting aspects of Humble's present and future gas supply, (4) possible impact of a rate increase upon all other distributor purchasers from the Fowler-Baton Rouge System should Humble be required to deliver the Diamond volume of gas to Mississippi, and (5) Diamond's preference of supplier and supplier contract in awarding the sale and contract to Humble.

Humble's application to make a direct sale to Diamond should be granted because Humble has amply demonstrated on this record that the public convenience and necessity require that it be authorized to construct and operate the facilities requested in its application in order to render the service to Diamond. The evidence of record does not support the contention of Mississippi that Humble be directed to sell and deliver to it the volume of gas necessary for the Diamond sale, at Humble's G–1 rate of 17.69 cents per Mcf, so that Mississippi may make the sale to Diamond. Consistent with the Commission policy enunciated in the *Southern Natural* and the *Northern Natural* cases, *supra*, this application is decided upon its own merits and the record made herein. The "merits," or "unusual circumstances" hereinabove considered fully justify the granting of Humble's application to make the sale to Diamond and a certificate will therefore be issued.

The second of the two principal issues to be considered is the propriety of Paragraph 10 of the General Terms and Conditions of Humble's FPC Gas Tariff, Original Volume No. 1, which provides as follows:

> Buyer shall not sell gas purchased under Seller's Rate Schedule G–1 to any one industrial consumer in excess of 100,000 cubic feet per month except by written consent of Seller.

Mississippi filed a formal complaint against Humble on September 2, 1965 (Docket No. RP66-9) alleging the foregoing Para. 10 to be unjust, unreasonable, unduly discriminatory or preferential within the meaning of Sections 4 and 5 of the Natural Gas Act. On September 17, 1965, the Commission issued an "Order to Show Cause" to Humble directing it to show cause in a formal hearing why the Commission should not find and determine the aforesaid Para. 10 to be unjust and unreasonable. In this show cause order the Commission said it would "invite any of Humble's customers or other persons who are affected by this tariff provision to intervene in this proceeding in order to submit its views on this matter." [20] The show cause matter was consolidated with Docket No. CP65-395 for hearing.

Paragraph 10 has been effective as a part of the tariff since October 10, 1949 (Tr. 248). Since then, Humble and its predecessors, have granted 19 requests for additional supplies of gas for large industrial customers (Tr. 248). In only two instances has consent been refused, one in 1950 and the other in the instant case. This is the first complaint to be filed against Humble, or its predecessors, alleging Para. 10 to be unjust, unreasonable, unduly discriminatory or preferential or that Humble had been discriminatory in its application of Para. 10 (Tr. 566-567).

The Staff contends that Para. 10 is unjustly discriminatory because it permits Humble to arbitrarily withhold consent to a sale by a G-1 customer to any one industrial consumer in excess of 100 Mcf per month without stating its reasons therefor. Staff submitted a proposal to modify Para. 10 (not to strike it from Humble's tariff) providing that consent shall not be withheld except in the case of inadequacy of facilities, unavailability of gas supply and/or economic feasibility (Exh. 50). Staff's proposal would further require Humble to establish the validity of any denial of consent if Humble itself should later seek an authorization to make the sale and the G-1 customer should oppose the application. Humble has on this record shown exactly the very things proposed by the Staff; it has shown the unavailability of gas supply at a price which would permit it to make an economically feasible sale of the Diamond requirement to Mississippi.

Mississippi urges that any restriction on such new industrial sales should be designed to protect Humble from demands from a G-1 customer where it did not have gas or capacity available to meet the request and, at the same time, give the G-1 customer an opportunity to make the sale unless Humble had a legitimate reason to deny permission. Mississippi also contends that Humble's economic evidence showing the sale to Mississippi would be uneconomic is irrelevant because loss of revenue on a sale cannot justify a tariff provision which, it alleges, is discriminatory.

A former employee of the Commission, now a private consulting engineer specializing in natural gas rates and economics testified on behalf of Humble that he had reviewed the FPC Gas tariffs of natural gas companies on file with the Commission to determine if those companies selling natural gas under general service rate schedules provide, either in their tariff or service agreements or both, a limitation on their volumetric obligations for delivery of gas under such rate schedules. He testified he found that with few exceptions all pipeline sellers of general service gas make such sales under contracts which contain specific volumetric limitations, the exception to this, he said, generally involved sales under old contracts and relatively small volumes. (Tr. 518). He testified he analyzed the filed tariffs of the Class A Natural Gas Companies, of which Humble is one, and found that 45 of the Class A

---

[20] No petitions or notices of intervention were filed in response to this invitation.

Companies have filed rate schedules covering general service type sales and that 38[a] of these contain a volumetric limitation on their obligation to deliver gas to their general service customers. Each of the other Class A Companies' tariff provisions contain certain provisions requiring approval of the seller before the general service buyer may attach an industrial customer. (Tr. 518–519).

It is Humble's position that Para. 10, in its present form, is just and reasonable, nondiscriminatory and nonpreferential. Humble's President testified (Tr. 551) in regard to Humble's gas supply situation and its need for the protection of Para. 10, as follows:

> Q. Is Humble Gas in a position to sell gas to its distribution customers in quantities to meet their domestic, commercial, and industrial requirements without any limit upon the loads that they might attach?
>
> A. No. Furthermore, Humble Gas Transmission Company has not undertaken such an open-ended obligation to supply gas to its distribution customers and it cannot feasibly undertake such an open-ended obligation. In fact, Humble Gas Transmission Company would not undertake such an obligation for any customer. As a practical matter, because of the many unknowns that would be involved in undertaking such an obligation, we cannot do that and we will not do so.
>
> These considerations constitute the basic necessity for the limitation in Paragraph 10 of the General Terms and Conditions of the Tariff of Humble Gas which requires the purchaser to obtain consent from Humble Gas prior to attaching a new industrial customer which would consume more than 100,000 cubic feet per month. As a business matter, we must have the protection afforded by that limitation. It has worked satisfactorily for many years in the past, and we think it can do so in the future. If we were to be compelled to alter the Tariff in this regard, there are other types of limitations which could be devised that might work satisfactorily, provided the modified limitation afforded the sort of substantive protection which is required."

Humble proposes two alternative provisions, if it is required to change the provisions of Para. 10(Exhs. 16 and 17), each of these proposals generally do the same thing as the present provisions of Para. 10 insofar as the limitation, without seller's written consent, on the attachment of large industrial loads. However, the Humble President said, each would be less favorable to the distributor than the present Para. 10.

Obviously disappointed in losing the Diamond sale, which would have increased its sales volumes by approximately 30 percent, Mississippi filed its complaint against Humble. Mississippi alleges it spent time and money in its efforts to induce Diamond to locate its new plant in Natchez. Its Industrial Development representative testified concerning his activities and that he worked with the Natchez Chamber of Commerce and the Mississippi Industrial Development Commission in a joint effort to induce Diamond to locate in Mississippi and at Natchez. Such promotional activities are the customary and normal functions of utility companies, Chambers of Commerce and the Industrial Development Commissions of the several states. Appropriate provision is made in the annual budget of each for such expenditures and the employment of personnel. While it is not specifically shown on this record, it must be assumed the promotional money spent on this, and other such ventures, will be reflected in Mississippi's cost of doing business. It therefore is without relevancy in arriving at a decision in this matter.

---

[a] This number includes Humble.

Humble's operating officials testified that the sale to Diamond will place their supply of and demand for gas in balance. (Tr. 423). Therefore, until additional supplies of gas can be purchased—and any additional supplies will be more costly than the Vixen Field gas—no authorizations can be made to its G-1 distributor buyers to attach a new industrial customer who will require more than 100,000 cubic feet per month.

With its Monroe Field production rapidly declining and with no other source of supply under contract except from the Vixen Field, it would appear that Humble, looking to the future, in order to fulfill its gas supply obligation to its distributors, may simultaneously find it necessary to seek rate relief greater than its present G-1 rate of 17.69 cents per Mcf in order to recover the additional cost of higher priced sources of gas supply.

With this in mind and in a proper forum before the Commission to consider Humble's enlarged gas supply and related cost of service situation, from which new tariff provisions will inevitably flow, it is here determined and found from the evidence on this record that Para. 10, as presently set forth in Humble's filed tariff and as administered by Humble under its present supply and rate situations, is not unjust, unreasonable, discriminatory or preferential, but that it is required and necessary to Humble in its present supply situation.

### FINDINGS AND CONCLUSIONS

Upon consideration of the entire record in these consolidated proceedings, the evidence adduced and the briefs filed, the Examiner finds and concludes, in addition to the findings and conclusions hereinabove stated, that:

(1) Applicant, Humble Gas Transmission Company, a Delaware Corporation with its principal place of business in New Orleans, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in *Humble Gas Transmission Company*, Docket No. CP63-56 (1963), 29 FPC 162, 163, Finding No. (1).

(2) The facilities hereinabove described, all as more fully described in Humble's application, as amended and supplemented, in the proceeding in Docket No. CP65-395, are to be used in the transportation and delivery of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation of such facilities together with the transportation and delivery of natural gas by Humble to the Diamond National Corporation are subject to the requirements of subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Humble, the Applicant, is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the facilities, and they have already been constructed and are in operation in accordance with the authority therefor granted by a temporary certificate issued by the Commission on October 11, 1965, and the transportation and delivery of natural gas through such facilities by Humble to make the industrial sale to Diamond are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Humble, the Applicant, will submit to the Commission the data required by Section 157.7(c) (8) of the Commission's Regulations.

(6) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Humble's compliance with all applicable Commission Regulations issued under the

authority delegated to it under the Natural Gas Act and particularly the general terms and conditions as set forth in paragraphs (a), (c)(4), (e) and (f) of Section 157.20 of said Regulations.

(7) The provisions of Paragraph 10 of the General Terms and Conditions of Humble's tariff are just, reasonable, nonpreferential and nondiscriminatory and have been applied by Humble in a nondiscriminatory manner for the best interests of all of its G–1 distributor customers.

(8) The complaint filed against Humble by Mississippi Valley Gas Company on September 2, 1965 in Docket No. RP66–9 should be dismissed and the proceeding terminated.

### ORDER

WHEREFORE, *It is ordered*, subject to review by the Commission on appeal, or review on its own motion, as provided in its Rules of Practice and Procedure, that:

(A) A certificate of public convenience and necessity be and the same is hereby issued authorizing the Applicant, Humble Gas Transmission Company, to construct and operate the proposed facilities and to deliver natural gas as hereinbefore described, all as more fully described in the application and exhibits in the proceeding in Docket No. CP65–395, upon the terms and conditions of this Order.

(B) The certificate issued by Paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Regulations of the Commission under the Natural Gas Act and particularly the general terms and conditions as set forth in paragraphs (a), (c)(4), (e) and (f) of Section 157.20 of said Regulations.

(C) The complaint filed against the Humble Gas Transmission Company by the Mississippi Valley Gas Company in Docket No. RP66–9 is dismissed and the proceeding is terminated.

HARRY W. FRAZEE,
*Presiding Examiner.*

## INTERSTATE POWER COMPANY, DOCKET NO. E–7345

### SUPPLEMENTAL ORDER AUTHORIZING ISSUANCE OF COMMON STOCK

(Issued May 17, 1967)

By order issued April 28, 1967, 37 FPC 824, in the above-entitled matter, the Commission authorized Interstate Power Company (Applicant) to issue and sell at competitive bidding 267,897 shares of additional Common Stock, par value $3.50 per share, subject to the provisions, among others, set forth in paragraph (B) of that order as follows:

(i) Applicant shall have amended its application pursuant to the requirements of Section 34.2(g) of the Commission's Regulations under the Federal Power Act relating to compliance with competitive bidding requirements, and Section 34.2(h)(1) of those Regulations relating to affiliation, and shall have either filed such amendments or shall have mailed them and advised the Commission by telephone and telegraph, as contemplated in Section 34.9 of the Regulations.

(ii) The Commission, by further order, shall have approved the price to be received by Applicant for the proposed issuance of Stock, the price per share to be received by Applicant for the Common Stock and the amount of any compensation for underwriters to be paid by Applicant in connection with the Common Stock.

Applicant filed an amendment on May 17, 1967, pursuant to the requirements of the aforementioned Commission order, in which it states among other things, that it proposes to offer the Common Stock to the stockholders at a price of $21.60 per share and that it proposes to accept as representing the lowest commitment fee, the bid of Kidder, Peabody & Co. Incorporated to receive $13,299.99 aggregate amount of compensation for commitment to purchase the Common Stock unsubscribed for by stockholders.

*The Commission finds:*

(1) Applicant has satisfactorily complied with the requirements of paragraph (B) of the Commission's order issued April 28, 1967, in the above-entitled docket, and the price to be received by Applicant for the Common Stock is reasonable.

(2) The proposed issuance and sale of Common Stock, as hereinafter authorized will be for a lawful object, within the corporate purposes of Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance of service by Applicant as a public utility and which will not impair its ability to perform that service and is reasonably appropriate for such purposes.

*The Commission orders:*

The price to be received by Applicant for the Common Stock as referred to above upon the terms and conditions, and for the purposes specified in the application as supplemented by the amendment referred to above, are authorized, subject only to the provisions of paragraphs (A), (C), (D) and (E) of the Commission's order issued April 28, 1967, in the above docket.

## ST. JOSEPH LIGHT AND POWER COMPANY AND MICHIGAN WISCONSIN PIPE LINE COMPANY, DOCKET NO. CP67-279

### FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued May 17, 1967)

On March 24, 1967, St. Joseph Light and Power Company (Applicant) filed in Docket No. CP67-279 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Michigan Wisconsin Pipe Line Company (Respondent) to establish physical connection of its transportation facilities with the facilities proposed to be constructed by Applicant and to sell and deliver to Applicant up to 150 Mcf of natural gas per day for resale and distribution in the City of Ravenwood, Missouri, all as more fully set forth in the application.

Applicant proposes to construct and operate a distribution system in the City of Ravenwood together with a regulating station and approximately 2 miles of 2-inch lateral pipeline extending from the proposed regulating station to a delivery point south of the city.

Pursuant to the instant proposal Respondent will construct, in accordance with its lateral line formula, approximately 2,500 feet of the lateral required for service to the City of Ravenwood and will provide the requested service from existing sources of gas supply without the construction of other additional facilities.

Applicant's estimated third year annual and peak day requirements are 14,400 Mcf and 150 Mcf of natural gas, respectively. Said volumes of natural gas will be purchased from Respondent pursuant to its SGS-1 Rate Schedule.

Applicant has been granted a franchise by the City of Ravenwood to provide natural gas service as proposed.

Applicant has petitioned the Missouri Public Service Commission requesting the issuance of a Certificate of Convenience and Necessity authorizing the subject proposal. Final decision on this matter is pending and will be forwarded to the Commission upon issuance.

The total estimated cost of Applicant's proposed project, exclusive of the cost to Respondent of the aforementioned 2,500 feet of lateral pipeline, is $78,000. Applicant proposes to finance its cost of construction with internally generated funds.

On April 17, 1967, Respondent filed an answer to the application herein, stating that it has no objection to the issuance by the Commission of an order as requested by Applicant.

After due notice, no protest, petition to intervene or notice of intervention has been filed.

*The Commission finds:*

(1) Respondent, Michigan Wisconsin Pipe Line Company, a Delaware corporation with its principal place of business in Detroit, Michigan, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of November 30, 1946, in Docket No. G-669 (5 FPC 953).

(2) Applicant, St. Joseph Light and Power Company, is a corporation organized and existing under the laws of the State of Missouri and has its principal place of business in the City of St. Joseph, Missouri.

(3) It is necessary and desirable in the public interest that Respondent be directed to establish physical connection of its natural gas transmission facilities with the proposed facilities of Applicant and to sell and deliver natural gas to Applicant, as set forth in the application and as hereinafter ordered and conditioned.

(4) This order should be conditioned upon Applicant receiving a Certificate of Convenience and Necessity from the Missouri Public Service Commission and being prepared to receive natural gas from Respondent, as proposed, within one year from the date on which this order issues.

(5) The requirement that Respondent serve Applicant, as proposed, will not place any undue burden upon Respondent nor impair its ability to render adequate service to its existing customers.

*The Commission orders:*

(A) Respondent is directed to establish physical connection of its natural gas transmission system with the facilities to be constructed by Applicant and to sell and deliver up to 150 Mcf of natural gas per day to Applicant, all as hereinbefore described and as more fully described in the application.

(B) The authorization granted by paragraph (A) above is conditioned upon receipt by Applicant of a Certificate of Convenience and Necessity from the Missouri Public Service Commission.

(C) Applicant shall be prepared to receive natural gas from Respondent within one year from the date of this order.

(D) Respondent shall notify the Commission of the commencement of service within 10 days thereof.

(E) Respondent shall execute and file with the Commission a service agreement with Applicant in accordance with the Commission's Regulations.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and John A. Carver, Jr.

## SOUTH TEXAS NATURAL GAS GATHERING COMPANY AND TRUNKLINE GAS COMPANY, DOCKET NO. CP66-346; BRADCO OIL & GAS COMPANY, DOCKET NO. CI67-671

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY, AND AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 17, 1967)

On March 9, 1967, South Texas Natural Gas Gathering Company (Gathering Company) and Trunkline Gas Company (Trunkline) filed in Docket No. CP66-346 a joint petition to amend the order of the Commission issued in said docket on August 19, 1966, 36 FPC 489, so as to authorize a new delivery point in Beauregard Parish, Louisiana, for the exchange of natural gas, authorized in the order of August 19, 1966, all as more fully set forth in the petition to amend.

The Commission in its order of August 19, 1966, authorized Gathering Company and Trunkline to exchange up to 15,000 Mcf of gas per day, with deliveries by Trunkline to Gathering Company effected at a point in Brooks County, Texas, and deliveries by Gathering Company to Trunkline at (1) the tailgate of the Eagan gasoline plant, Acadia Parish, Louisiana, and (2) at a point in Jefferson Davis Parish, Louisiana. The exchange agreement between the parties provided for establishment, by mutual agreement, of additional delivery points for the subject exchange, but such points were not authorized by the Commission's order of August 19, 1966, which specified that the establishment of the additional delivery points would necessitate further Commission authorization.

Gathering Company and Trunkline now propose to establish an additional exchange delivery point on Trunkline's facilities in Beauregard Parish, Louisiana, for deliveries by Gathering Company to Trunkline under the subject authorization. At such point, Gathering Company will deliver to Trunkline gas purchased from Bradco Oil & Gas Company, *et al.*, in the North Starks Field, Calcasieu Parish, Louisiana. Trunkline will construct, own and operate the facilities at the new delivery point, which are estimated to cost approximately $9,000. Gathering Company will reimburse Trunkline for all costs except that of the meter run manifold, as was the case with similar presently authorized facilities.

On February 17, 1967, Gathering Company filed as a supplement to its FPC Gas Rate Schedule No. 4, a letter agreement between the parties reflecting the proposed new delivery point heretofore accepted for filing by the Commission in connection with a temporary authorization issued on March 16, 1967.

Due notice of the filing of the joint petition to amend by Gathering Company and Trunkline and opportunity for hearing has been given by publication in the Federal Register on March 24, 1967 (32 F.R. 4514). No protest or petition to intervene has been filed in this proceeding concerning this amendment.

Bradco Oil & Gas Company (Bradco) filed an application on November 21, 1966 pursuant to Section 7(c) of the Natural Gas Act for a Certificate of Public Convenience and Necessity in Docket No. CI67–671 authorizing the sale of natural gas to Gathering Company under a gas purchase agreement dated July 25, 1966. Bradco seeks to initiate the sale of natural gas to Gathering Company, from the North Starks Field, Calcasieu Parish, South Louisiana at a proposed initial rate of 16.0¢.

After due notice, no petition to intervene, notice of intervention, or protest to the granting of the application has been filed.

At a hearing held on May 11, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, and exhibits, submitted in support of the authorization sought, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Trunkline Gas Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 29, 1949, in Docket No. G–882 (8 FPC 250).

(2) Applicant, South Texas Natural Gas Gathering Company having its principal place of business in Corpus Christi, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 22, 1960, in Docket No. G–18907 (24 FPC 987).

(3) Applicant Bradco Oil & Gas Co. (Operator), *et al.*, is engaged in the sale of natural gas in interstate commerce subject to the jurisdiction of the Commission and is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission.

(4) The sale of natural gas hereinbefore described, as more fully described in the application in this proceeding, will be made in interstate commerce subject to the jurisdiction of the Commission, and such sale by Bradco, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(5) Bradco is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(6) The sale of natural gas by Bradco, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(7) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the certificate heretofore issued in Docket No. CP66–346 should be amended so as to authorize the establishment of an additional exchange delivery point on Trunkline's facilities in Beauregard Parish, Louisiana, for deliveries by Gathering Company to Trunkline under the present authorization.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to Bradco in Docket No. CI67-671 upon the terms and conditions of this order, authorizing the sale by Bradco of natural gas in interstate commerce for resale, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, all as hereinbefore described and as more fully described in the application in this proceeding.

(B) The certificate granted in paragraph (A) above is not transferable and shall be effective only so long as Bradco continues the acts or operations hereby authorized in accordance with the provisions of the Natural Gas Act and the applicable rules, regulations and orders of the Commission.

(C) The grant of the certificate issued in paragraph (A) above shall not be construed as a waiver of the requirements of Section 4 of the Natural Gas Act or of Part 154 or Part 157 of the Commission's Regulations thereunder, and is without prejudice to any findings or orders which have been or may hereafter be made by the Commission in any proceeding now pending or hereafter instituted by or against Bradco. Further, our action in this proceeding shall not foreclose nor prejudice any future proceedings or objections relating to the operation of any price or related provisions in the gas purchase contracts herein involved. Nor shall the grant of the certificate aforesaid for service to the particular customer involved imply approval of all of the terms of the respective contracts particularly as to the cessation of service upon termination of said contracts, as provided by Section 7(b) of the Natural Gas Act. Nor shall the grant of the certificate aforesaid be construed to preclude the imposition of any sanctions pursuant to the provisions of the Natural Gas Act for the unauthorized commencement of any sales of natural gas subject to said certificate.

(D) The order issuing a certificate of public convenience and necessity in Docket No. CP66-346 is amended so as to authorize the establishment of an additional exchange delivery point on Trunkline's facilities in Beauregard Parish, Louisiana, for deliveries by Gathering Company to Trunkline, as requested herein.

(E) The amendment authorized by paragraph (D) above and the rights granted thereunder are conditioned upon Applicant's compliance with applicable Commission Regulations under the Natural Gas Act and particularly the conditions set forth in paragraphs (a), (c)(3), (f) and (g) of Section 157.20 of such Regulations.

(F) The facilities authorized to be constructed and operated by Trunkline and Gathering Company shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations, within six months of the date of this order.

(G) In all other respects said order in Docket No. CP66-346 shall remain in full force and effect.

---

## LAKE SUPERIOR DISTRICT POWER COMPANY, PROJECT NO. 2430

### ORDER APPROVING REDESIGNATED LICENSE EXHIBIT AND DELETING LICENSE ARTICLE

(Issued May 18, 1967)

On September 16, 1965, (34 FPC 862) the Commission issued a license to Lake Superior District Power Company, of Ashland, Wisconsin, for constructed

Project No. 2430, known as the Ladysmith Hydro Plant, located on the Flambeau River in the City of Ladysmith, Rusk County, Wisconsin.

Article 32 of the license provided for the filing by the licensee for Commission approval of revised Exhibit K prepared in accordance with the Commission's rules and regulations. The Exhibit K sheet filed with the application for license did not show the entire project boundary and hence did not conform with applicable Commission regulations. The license order pointed out (34 FPC 863) that while Exhibit K was being approved as part of the license, a revised Exhibit K was required. In addition, Article 32 required the filing of a revised Exhibit F, prepared in accordance with the regulations.

Upon further review of the information and showings made in the license Exhibits J and K and Exhibit F, it is concluded that all of the information concerning the ownership of the project lands and project boundary has been furnished.

License Exhibits J and K are designated in the license respectively as Exhibit J: (FPC No. 2430-1) General Map, and Exhibit K: (FPC No. 2430-3) Map of Project in Vicinity of Dam and Powerhouse Area.

By letter dated August 24, 1966, licensee notes that while the Exhibit K map shows only that portion of the project boundary in the vicinity of the dam (no other portion of the project being shown), the project enclosed by a boundary in its entirety and in considerable detail is shown on license Exhibit J (FPC No. 2430-1).

Licensee by letter dated December 6, 1966 authorized the Commission's staff to act for it to redesignate licensee's Exhibit J as "Exhibit J and K (FPC No. 2430-1) General Map."

*The Commission finds:*

(1) In these circumstances Article 32 of the license should be deleted from the license.

(2) The exhibit designated in subparagraph (i) of paragraph (B) of the license as Exhibit J: (FPC No. 2430-1) General Map, should be redesignated as Exhibit J and K: (FPC Nos. 2430-1) General Map, and as so redesignated conforms to the Commission's rules and regulations and should be approved as part of the license for the project.

*The Commission orders:*

(A) The redesignated Exhibit J and K mentioned in the above finding is hereby approved as part of the license for Project No. 2430.

(B) Article 32 of the license for Project No. 2430 is hereby eliminated from the license.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP67-10

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 19, 1967)

On July 18, 1966, Northern Natural Gas Company (Applicant) filed in Docket No. CP67-10 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities and the transportation of natural gas in interstate commerce from a gas supply area in Reeves County, Texas, all as more fully set forth in the application.

Applicant proposes to construct and operate approximately 17.4 miles of 24-inch pipeline, together with 12.7 miles of 8 to 16-inch connecting laterals to gas sources and measuring facilities to enable it to transport gas purchased in the Hamon Field, located in Reeves County, Texas, from Texaco Inc. (Texaco) to a point on Applicant's existing 24-inch pipeline near the Coyanosa Processing Plant located in Pecos County, Texas.

Applicant states that it has entered into a gas purchase contract with Texaco for the purchase of up to 100,000 Mcf per day from the Hamon Field where the total proved and probable reserves are estimated at over two trillion cubic feet, five hundred and thirty-two billion cubic feet of which are committed to Applicant under the contract.

Pursuant to the contract with Texaco, Applicant further states that it will gather the gas and deliver it for conditioning and treatment at Texaco's proposed plant. Applicant proposes to construct various sizes of gathering lines from existing and proposed wells. The 8 to 16-inch lines and the 24-inch line from the Hamon Field to Coyanosa will be known as the Reeves System.

The total estimated cost of Applicant's proposed facilities is $1,786,100, which cost will be financed with cash on hand.

Texaco has filed for authorization to sell the gas to Northern in Docket No. CI67–36. The contract between Applicant and Texaco provides for advance payments should gas not commence to flow by April 1, 1967. In view of the Commission's action with respect to the Shell-El Paso advance payments in Docket No. CI66–897, *et al.*, the Commission is incorporating herein a condition relating to such advance payments.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on May 18, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibit, submitted in support of the authorizations sought, and upon consideration of the record,

***The Commission finds:***

(1) Applicant, Northern Natural Gas Company, a Delaware corporation having its principal place of business in Omaha, Nebraska, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G–280 (3 FPC 967).

(2) The proposed construction and operation of facilities and the transportation of natural gas in interstate commerce, as hereinbefore described and as more fully described in the application, and exhibits, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed construction and operation of facilities and transportation of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs

(a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(6) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that certain conditions relating to advance payments by Applicant be provided herein.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to Applicant authorizing the construction and operation of facilities, and the transportation of natural gas in interstate commerce, as hereinbefore described and as more fully described in the application, and exhibits filed in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized by paragraph (A) above shall be constructed and placed in actual operation as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 12 months from the date on which this order issues.

(D) Any advance payments for natural gas made by Northern to Texaco in accordance with Section 3 of Article X of the subject contract shall be made by Northern at its own risk. The proper treatment for rate making purposes in any Northern rate proceeding and the resulting effect of any such payments will be determined in connection with the final disposition of the application of Texaco Inc. in Docket No. CI67-36.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP67-194*

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 19, 1967)

On January 3, 1967, Northern Natural Gas Company (Applicant) filed in Docket No. CP67-194 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities and to sell and deliver natural gas to new and existing distributors in order to provide natural gas service to 51 communities in the States of Minnesota, Iowa, Wisconsin, Michigan and Nebraska, all as more fully set forth in the application in this proceeding (Phase I).

Specifically, Applicant proposes to construct and operate 4.6 miles of 36-inch loop line north of Beatrice, Nebraska, 280 miles of various diameter branch lines and 47 sales measuring stations. The total estimated cost of these proposed facilities is $5,713,950, which cost will be financed from funds on hand, reserve accruals and retained earnings.

---

* The application in this docket is divided into two Phases. This order pertains exclusively to Phase I of said application.

The gas will be distributed in the communities by new and existing distributor customers and Applicant's Peoples Division as shown in Appendix A hereof.

Applicant's proposed sales of gas to distributor customers for resale will be made in accordance with Applicant's appropriate effective FPC Gas Rate Schedules.

Several petitions to intervene have been filed in this proceeding; one of said petitions has been withdrawn and none of the remaining petitions requests formal hearing or objects to the disposition of this application pursuant to the statutory hearing procedure. Inasmuch as the statutory hearing procedure is being used herein, no further action on said petitions appears necessary.

After due notice, no other petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on May 18, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits (Phase I), submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Northern Natural Gas Company, a Delaware corporation having its principal place of business in Omaha, Nebraska, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G-280 (3 FPC 967).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding (Phase I), are to be used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the proposed transportation and sales of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities and the proposed transportation and sales of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Northern Natural Gas Company, to construct and operate the proposed facilities and to sell and deliver natural gas as hereinbefore described, all as more fully described in the application in this proceeding (Phase I), upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation and the sales of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 12 months from the date on which this order issues.

(D) In the event the actual volumes of sales on any of the proposed branch lines in the third full calendar year of operation exceed the projected total for that branch line, as reflected in Appendix B hereof, Applicant within 60 days thereafter shall submit for the Commission's approval a plan for refunding all or part of any payments made to Applicant so as to conform to actual experience. Such refunds shall be determined by utilizing the same factors used in this proceeding, except that volumes of sales (both contract demand and annual volumes) made at the time such refunds are determined shall be used.

(E) The certificate issued in paragraph (A) above shall not become effective, insofar as it authorizes Applicant to construct the proposed Grasston, Minnesota, branch line, until Applicant submits a contract covering the sale of gas to Le Center Alfalfa Dehydrating Company.

(F) The authorization granted in paragraph (A) above is without prejudice by Applicant's right to request amendment of the subject order to authorize Phase II facilities.

(G) First Revised Sheets Nos. 126-A through 126-D to Applicant's FPC Gas Tariff, Second Revised Volume No. 1, providing for Initial Period Service are accepted for filing to become effective concurrently herewith.

## NORTHERN STATES POWER COMPANY (MINNESOTA), DOCKET NO. E-7347

### ORDER AUTHORIZING THE ISSUANCE OF FIRST MORTGAGE BONDS

(Issued May 19, 1967)

Northern States Power Company (Applicant), incorporated under the laws of the State of Minnesota and doing business in the States of Minnesota, North Dakota and South Dakota with its principal place of business at Minneapolis, Minnesota, filed an application on April 11, 1967, for an order, pursuant to Section 204 of the Federal Power Act, authorizing the issuance of $30,000,000 principal amount of First Mortgage Bonds, due 1995.

Applicant furnishes electric service at retail in 424 communities and adjacent rural territories and electric energy at wholesale for resale in 29 additional communities and to 8 other utility companies, including its subsidiary, Northern States Power Company, a Wisconsin corporation.

The $30,000,000 First Mortgage Bonds are to be dated as of June 1, 1967, and are to mature on June 1, 1995. The interest rate will be determined by the most favorable bid received and accepted. They are to be issued under and secured by a Trust Indenture dated February 1, 1937, from the Applicant to Harris Trust and Savings Bank of Chicago, as Trustee, as supplemented by 15 Supplemental Indentures and to be further supplemented by a new Supplemental Indenture to be dated as of June 1, 1967.

Applicant intends on or about May 29, 1967, to invite sealed, written proposals for the purchase from it of the $30,000,000 new Bonds. The Statement of Terms and Conditions Relating to Bids will contain the following principal provisions:

> Each proposal, which may be made by a single bidder or by a group of bidders, must be for the purchase of all the Bonds. No bidder may submit

> or participate in more than one proposal. Proposals must be submitted to the Applicant at or before 10 a.m., CDST, on June 6, 1967, at the 8th Floor Assembly Room, Harris Trust and Savings Bank, 111 West Monroe Street, Chicago, Illinois. Each proposal must be accompanied by a deposit in the amount of $300,000.
>
> Each proposal shall specify: (a) the annual interest rate to be borne by the Bonds, which rate shall be a multiple of ⅛th of 1%, and (b) the price (exclusive of accrued interest) to be paid to the Applicant, which price shall not be less than 99% and not more than 102¾% of principal amount thereof. Each proposal shall provide that accrued interest from June 1, 1967, to the date of payment for the Bonds and delivery thereof will be paid by the purchaser or purchasers to the Applicant.
>
> Unless the Applicant shall reject all bids or exclude a bid or bids for reasons set forth in the Statement of Terms and Conditions, it will accept the bid which provides for the lowest annual cost of money.

The proceeds from the new Bonds will be used for payment on short-term notes which Applicant estimates will total about $37,000,000* on the date of the issuance and delivery of the new Bonds. The Applicant has been issuing notes to furnish a portion of the funds for its 1967 construction program which has an estimated cost of $99,860,000. This program includes $50,570,000 for electric production facilities, $18,300,000 for electric transmission facilities; $19,400,000 for electric distribution facilities and $11,590,000 for gas, heating, telephone and general facilities. The largest item in the program is $37,170,000 for a 590,000 kw Allen S. King Generating Plant. This program also includes $5.8 million for construction work on the 500 mw Monticello Nuclear Plant.

Written notice of the application has been given to the Minnesota Railroad and Warehouse Commission, the North Dakota Public Service Commission, and the South Dakota Public Utilities Commission and to the Governor of each of those States. Notice has also been given by publication in the Federal Register on April 26, 1967 (32 F.R. 6466), stating that any person desiring to be heard or to make any protest with reference to the application, shall file petitions or protests on or before May 5, 1967, with the Federal Power Commission, Washington, D.C. 20426. No protest, petition or request to be heard in opposition to the granting of the application has been received.

On April 17, 1967, Public Service Commission of North Dakota issued an order approving the issuance of the proposed First Mortgage Bonds.

*The Commission finds:*

(1) Applicant, a corporation, is a public utility within the meaning of Section 204 of the Federal Power Act, subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued May 3, 1965, *Northern States Power Company*, Docket No. E-7202 (33 FPC 942).

(2) The proposed issuance and sale of Bonds, as described above, will constitute an issuance of securities within the purview of Section 204 of the Act.

(3) Applicant is not organized and operating in a State under the laws of which the security issue here involved is regulated by a State commission within the meaning of Section 204(f) of the Act; and the proposed issuance of securities is, therefore, not exempt by virtue of that Section from the requirements of Section 204 of the Act.

(4) The proposed issuance and sale of Bonds, as hereinafter authorized, will be for a lawful object, within the corporate purposes of Applicant and

---

* By order issued March 10, 1967, 37 FPC 526, the Commission authorized Applicant to issue promissory notes in amounts not exceeding an aggregate of $50,000,000.

compatible with the public interest, which is appropriate for and consistent with the proper performance by Applicant of service as a public utility and which will not impair its ability to perform that service, and is reasonably necessary and appropriate for such purposes.

(5) The period of public notice is reasonable.

*The Commission orders:*

(A) The proposed issuance and sale of Bonds, upon the terms and conditions and for the purposes specified in the application, as described above, are authorized, subject to the provisions of this order.

(B) The proposed issuance and sale of Bonds at competitive bidding shall not be consummated until:

(i) Applicant shall have amended its application pursuant to the requirements of Section 34.2(g) of the Commission's Regulations under the Federal Power Act relating to compliance with competitive bidding requirements, and Section 34.2(h) of those Regulations relating to affiliation and shall have either filed such amendments or shall have mailed them and advised the Commission by telephone and telegraph, as contemplated in Section 34.9 of the Regulations;

(ii) The Commission, by further order, shall have approved the price to be received by Applicant for the proposed issuance of Bonds and the interest rate thereof.

(C) This authorization shall expire unless the transaction hereby authorized is consummated within 90 days from the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determinations of cost, or any other matter whatsoever now pending or which may come before this Commission.

(E) Nothing in this order shall be construed to imply any guarantee or obligation on the part of the United States with respect to any securities to which this order relates.

## PUBLIC UTILITY DISTRICT NO. 1 OF SNOHOMISH COUNTY AND CITY OF EVERETT, WASHINGTON, PROJECT NO. 2157

### ORDER PROVIDING FOR HEARING AND CONTINUED WATER RELEASES

(Issued May 19, 1967)

Upon the Commission's own motion, we are ordering that a hearing be held on questions affecting the operation of the project works and water releases from Culmback Dam, one part of a three-dam project licensed as Project No. 2157. Project No. 2157 was authorized for construction in two stages, the first of which has been completed and provides only for the water supply of the City of Everett. Article 28 of the license calls for commencement of construction of the second stage, the power phase, six years from the date of issuance of the license.

In directing this hearing upon the Commission's own motion and the issues specified, the Commission intends that there be consideration of issues raised in the joint petition and complaint for emergency hearing filed by the Washington State Departments of Fisheries and Game on May 15, 1967 and any responses thereto. To facilitate that consideration, this order provides a 10-day period within which joint licensees may respond to the petition and complaint.

Subject to further Commission order in the light of any responses filed herein, the specific issues to be heard shall be as follows: whether the Commission should prescribe additional rules and regulations governing project operations during the period of repair or maintenance of the Culmback Dam and other project works, water releases during that period or future periods of project operation repair or maintenance, the amounts of any such releases and the manner of completing project repairs or maintenance? Subsidiary questions may include *inter alia* whether:

(1) Inspection of the tunnel shows repairs are necessary to the Culmback dam tunnel this year.

(2) Water releases should be required if immediate repairs are necessary.

(3) If immediate repairs are not necessary what provisions, if any, shall be made for future water releases during periods of inspection and repair.

Information available to the Commission indicates that licensee City of Everett proposes to undertake project inspection operations (Culmback Dam) on or about June 1, 1967 in preparation for later project repairs or maintenance. It is anticipated that the results of that inspection and any recommendations will be presented by licensee at the hearing hereinafter provided.

*The Commission further finds:*

(1) It is necessary and appropriate for the purposes of the Federal Power Act, the Commission's Regulations thereunder and the license for Project No. 2157, that a hearing be ordered as hereinafter provided.

(2) The period of public notice given in this matter is reasonable and good cause exists for a 10 day period within which answers to the joint petition and complaint may be filed.

*The Commission orders:*

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by the Federal Power Act, particularly Sections 4(g), 9, 10, 308 and 309 thereof, and pursuant to the terms and conditions of Articles 28 and 31 of the license for Project No. 2157, a public hearing shall be held in Seattle, Washington, commencing 10:00 a.m. (PDT), June 5, 1967 at a location to be fixed by notice of the Secretary.

(B) Within 10 days from the issuance of this order answers to the joint petition and complaint of the Washington State Departments of Fisheries and Game may be filed with the Commission in accordance with the requirements of Sections 1.15–1.17 of the Commission's Rules of Practice and Procedure.

(C) Pending further order of the Commission licensees shall continue present releases of water at Culmback Dam subject however to the termination thereof during a period not exceeding eight hours to facilitate inspection of the Culmback Dam on or about June 1, 1967.

(D) Notices of Intervention and Petitions to Intervene in this proceeding may be filed with the Federal Power Commission, Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.37) on or before May 29, 1967. Petitioners may participate in the hearing subject to Commission action on their petitions to intervene.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## TRANSCONTINENTAL GAS PIPE LINE CORPORATION, DOCKET NO. CP66-233

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND ORDER DENYING PETITION FOR LEAVE TO INTERVENE

(Issued May 19, 1967)

On January 20, 1966, Transcontinental Gas Pipe Line Corporation (Applicant) filed in Docket No. CP66-233, as amended on August 15, 1966, and February 2, 1967, an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities over the three year period 1966-68 and an increase in sales and natural gas service by 397,106 Mcf per day to existing customers in each of the years 1966-69, all as more fully set forth in the application, as amended, in this proceeding.

Specifically, Applicant proposes to construct and operate during the three year period a total of 914 miles of pipeline in the states of Texas, Louisiana, offshore Louisiana, Mississippi, Alabama, Georgia, South Carolina, North Carolina, Virginia, Maryland, Pennsylvania, New Jersey and New York, and 61,170 additional compressor horsepower at compressor stations located in the states of Texas, Louisiana, Georgia, South Carolina, Virginia and Maryland.

Applicant proposes in its application, as amended, to sell gas and to render natural gas service totalling 384,106 Mcf per day under its appropriate firm pipeline resale and storage FPC Gas Rate Schedules. Applicant also requests authorization to increase by 10,000 Mcf per day its transportation service for Sun Oil Company under Applicant's FPC Gas Rate Schedule X-11 and to deliver, on a firm basis, 3,000 Mcf per day to an industrial customer, Owens-Corning Fiberglas Corporation. Additionally, Applicant proposes to continue annual sales of 2,000,000 Mcf to Carolina Pipeline Company under Applicant's FPC Gas Rate Schedule ACQ-2; Applicant also proposes to make a new sale under this latter rate schedule to North Carolina Natural Gas Corporation in the annual amount of 2,000,000 Mcf.

The total estimated and actual cost of the proposed facilities is $245,750,000, which cost will be financed initially through temporary bank loans and cash on hand; permanent financing, as needed, will be by the issuance of first mortgage pipeline bonds and debentures.

Applicant was issued temporary certificates on May 26 and September 30, 1966 authorizing 1966 proposals.

On February 17, 1966, Atlantic Seaboard Corporation filed a petition to intervene in this proceeding requesting either a formal hearing or a condition to be attached to any certificate issued to Applicant. Applicant proposes herein to sell additional gas to Commonwealth Natural Gas Corporation (Commonwealth). Commonwealth is also a customer of Seaboard. Accordingly, Seaboard, in the form of a continuing objection, requests that the disposition of Applicant's proposals in the subject docket to sell additional volumes to Commonwealth be governed by the ultimate disposition, after court review, if any, of the competitive proceeding in Docket No. CP65-102, *et al.;* Applicant's certificate in this proceeding will be so conditioned.

On February 17, 1966, the Village of Freeport, New York, filed a petition to intervene in this proceeding; on February 28, 1966, Applicant and Long Island Lighting Company (LILCO), which also has filed a petition to intervene, filed separate answers in opposition to the granting of the Village's petition.

One of Applicant's proposals in this docket is to construct and operate a natural gas pipeline traversing a new route to the termini of its system in the New York Metropolitan Area extending from a point near New Brunswick, New Jersey, to the New Jersey shore near Laurence Harbor and thence across Lower New York Bay to a point at Long Beach, Long Island, New York. In addition Applicant proposes to transport and sell additional quantities of natural gas through the aforementioned facilities to LILCO.

The Village states that it is engaged in the generation of approximately half of the electric energy distributed in the Village and it purchases the balance from LILCO. LILCO presently sells gas at retail in the Village although, the Village alleges, it does not have the exclusive right to do so. The petition states that the Village is planning the construction of a new electric generating station and is "working on plans to purchase firm gas for local distribution to the public and for utilization in its generating stations". The petition goes on to say, "Freeport has had discussions with officials of Transcontinental Gas Pipe Line Corporation ("Transco") and there do not appear to be any obstacles to the sale to Freeport of an adequate supply of firm gas in the order of 4000 Mcf per day under Transco's filed rate schedules,"* and that, "The most feasible way for this gas to be transported to Freeport from Long Beach is by means of a transportation contract with LILCO * * *"

The Village states that its "chief interest in this proceeding is to be assured that it will have a fair and reasonable opportunity to obtain its required supply of gas as soon as it completes the study of its project; that the terminal be so located as to be accessible, from a physical and engineering view, to connection by Freeport; and that the authorization to Transco including any sales to LILCO, be such as not to interfere with the capability and feasibility of Freeport's future project". The Village does not request an allocation of gas in the instant petition.

The Village alleges that it has a substantial interest in the instant proceeding which will not be adequately represented by others and which may be adversely affected and that the Village's participation will be in the public interest. Section 1.8(b) of the Commission's Rules of Practice and Procedure contemplates participation as an intervener by a party whose interest may be directly affected and not adequately represented by existing parties and to which the intervener may be bound by the Commission's action or any interest of such nature that participation as an intervener may be in the public interest.

The Village seeks to justify its participation in this proceeding by virtue of the fact that sometime in the indefinite future it might possibly become a customer of Applicant. The Village does not presently use natural gas in its electric generating plant and does not operate a natural gas distribution system. It has no natural gas requirements. The Village's standing is similar to that of persons alleging that at some time in the future they may be competitors of an Applicant and upon this premise seek leave to intervene. In the latter cases the Commission has found it necessary for the effective administration of the Natural Gas Act to deny the prospective competitors the right to participate. *Vermont Gas Systems, Inc.*, Docket No. CP65-141, *et al.*, 33 FPC 142; *Pacific Northwest Pipeline Corporation, et al.*, Docket No. G-13018, *et al.* (December 14, 1965).

---

* In its answer, Transco states that this is not correct.

Aside from the Village's position as a potential customer of Applicant, the petition to intervene presents nothing to indicate that its grant or the Village's participation in this proceeding would be in the public interest. Accordingly, the petition will be denied.

Several other petitions to intervene and a notice of intervention have been filed in this proceeding. Such filings have either been in support of the subject application, do not request a formal hearing or have been withdrawn. Inasmuch as this proceeding is being disposed of pursuant to the statutory hearing procedure, no other action on said petitions or notice appears necessary.

After due notice, no other petition to intervene, other notice of intervention or protest to the granting of the application, as amended, has been filed.

At a hearing held on May 18, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, amendments and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Transcontinental Gas Pipe Line Corporation, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 18, 1948, in Docket No. G-1143 (7 FPC 145).

(2) The facilities hereinbefore described, as more fully described in the application, as amended, in this proceeding are to be used in the transportation and/or sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the proposed transportation and/or sales of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed construction and operation of the subject facilities and the proposed transportation and/or sales of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificates issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(2), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(6) The Village of Freeport, New York, is not a customer of Applicant with an interest which may be directly affected and which is not adequately represented by existing parties and as to which the Village may be bound by the Commission's action in this proceeding.

(7) It is not appropriate in the proper administration of the Natural Gas Act and in the public interest to permit the Village of Freeport, New York, to intervene and participate in this proceeding.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Transcontinental Gas Pipe Line Corporation, to construct and operate the proposed facilities set out in Section 2 of Exhibit K to the Second Amendment to the subject application and to transport and/or sell natural gas as hereinbefore described, all as more fully described in the application, as amended, in this proceeding, upon the terms and conditions of this order.

(B) A certificate of public convenience and necessity is issued authorizing Applicant to construct and operate the proposed facilities as summarized in Section 3 of Exhibit K to the Second Amendment to the subject application on the condition that, in the event Applicant's proposal in Docket No. CP65-181 (Phase II) is denied and in the event Applicant is unable to demonstrate to the Commission that said facilities are required to render other sales and services, said facilities shall be removed from Applicant's rate base.

(C) The certificates issued by paragraphs (A) and (B) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(2), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(D) The facilities authorized in paragraph (A) above shall be constructed and placed in actual operation and the transportation and/or sales of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act within 12 months from the date on which this order issues.

(E) The facilities conditionally authorized in paragraph (B) above shall be constructed and placed in actual operation as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act within 12 months from the date a final order issues authorizing the service proposed by Transcontinental Gas Pipe Line Corporation in Docket No. CP65-181 (Phase II).

(F) Prior to the commencement of construction of those facilities proposed to be constructed in the year 1968 (as summarized in Applicant's Second Amendment to its application in this proceeding, Exhibit K, Summary of Docket) Applicant shall submit satisfactory proof of sales commitments for that phase of its proposed expansion.

(G) The authorization hereinabove granted for additional service to Commonwealth Natural Gas Corporation is subject to the ultimate disposition, after court review, if any, of the competitive proceedings at Docket No. CP65-102, *et al.*

(H) The petition for leave to intervene filed by the Village of Freeport, New York, on February 17, 1966, is denied.

## APACHE CORPORATION, DOCKET NO. CI61-336; VAN GRISSO OIL COMPANY, CI63-59; AN-SON CORPORATION, CI63-370; PETROLEUM INTERNATIONAL, INC. (OPERATOR), ET AL., CI64-520

### ORDER ADOPTING AND MODIFYING INITIAL DECISION OF THE PRESIDING EXAMINER

(Issued May 22, 1967)*

### *Syllabus*

1. An essential consideration in issuance of permanent certificates is whether "price is right"—price should be neither higher nor lower than existing level at which substantial volumes of gas are contracted for sale and moved in interstate commerce. PP. 964, 969.
2. In a proceeding under Section 7 of the Natural Gas Act, Commission *issues* certificates of public convenience and necessity to producer-applicants for sales in the Oklahoma Panhandle area, conditioned on an "in-line" price of 17 cents per Mcf.

*William T. Kilbourne* and *Herbert W. Varner* for The Superior Oil Company.

*Donald K. Young* for H. L. Hunt.

*Lawrence Q. Garcia, Mary Moran Pajalich* and *J. Calvin Simpson* for The People of the State of California and Public Utilities Commission of the State of California.

*John S. Cooper, F. T. Searles, M. H. Furbush* and *Stanley T. Skinner* for Pacific Gas and Electric Company.

*John Ormasa* and *H. L. Goth* for Southern California Gas Company and Southern Counties Gas Co. of California.

*Paul S. Davis* for Michigan Wisconsin Pipe Line Company.

*C. Louis Knight* for the Staff of the Federal Power Commission.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

This proceeding involves four applications under Section 7(c) of the Natural Gas Act by the above-named independent producers requesting certificates of public convenience and necessity authorizing the sale in interstate commerce for resale of natural gas produced in Beaver, Harper and Woodward Counties, Oklahoma, in the northwest Oklahoma Panhandle Area. The purchasers are two large pipeline companies, El Paso Natural Gas Company, which proposes to purchase from Apache Corporation, and Michigan Wisconsin Pipe Line Company, which proposes to purchase from Van Grisso Oil Company, An-Son Corporation, and Petroleum International, Inc.

Hearings were held on January 5 and 27, 1967, at which, evidence was submitted by staff on the issue of the appropriate price at which permanent certificates should be granted. On April 12, 1967, Presiding Examiner Harry C. Shriver issued an initial decision granting a certificate of public convenience and necessity to each of the above-named applicants, subject to certain specified conditions, and ordering that a price of 17 cents per Mcf at 14.65 psia, including reimbursement for taxes, be established as the in-line price for natural gas sold by the four applicants in the Oklahoma Panhandle Area.

---

* Initial decision appears on p. 965.

No exceptions have been filed to the Examiner's initial decision. However, upon examination thereof the Commission finds it appropriate to modify certain of the Examiner's technical language to conform with the policy established in Opinion Nos. 390, 29 FPC 1175, 390–A, 30 FPC 479, and 464, 33 FPC 1228. Specifically, such modification is to be accomplished by the following language changes: (1) the insertion in the Examiner's ordering paragraph (B) of a limiting upward Btu adjustment (where such adjustment was not present in the rate schedule) for gas not processed in the plant because of the buyer's unilateral election to by-pass the plant; (2) the insertion in the Examiner's ordering paragraph (C) of a general proportional downward Btu price adjustment to apply to any rate rather than a specific downward price adjustment based upon the present rate; and (3) the deletion from the Examiner's ordering paragraphs (B) and (D) of the requirement that Apache Corporation file rate schedules (since it has already filed rate schedules) rather than supplements to comply with prescribed conditions.

*The Commission finds:*

Upon consideration of the entire record in this matter, the initial decision of the Presiding Examiner, subject to the above-described modifications in ordering paragraphs (B), (C), and (D), should be adopted as the decision of the Commission.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to each of the applicants, Apache Corporation, Van Grisso Oil Company, An-Son Corporation, and Petroleum International, Inc., for the sale in interstate commerce of natural gas for resale as proposed in its application upon the terms and conditions of this order.

(B) The Apache Corporation shall file with the Federal Power Commission within 30 days from the date of this order an amendment or supplement to a gas rate schedule now on file with the Commission, providing for an initial price replacing the initial price as proposed for gas sold under its contract in this proceeding, of 17.0 cents per Mcf at 14.65 psia, including reimbursement for taxes, and subject to the following adjustment:

> The initial rate, for gas processed by the removal of liquid hydrocarbons, shall be adjusted by adding thereto Apache's share of revenues received from the liquid hydrocarbons in accordance with the contract revenue-sharing provisions, and

such rate shall be further adjusted for processing shrinkage by dividing such shrinkage between the Apache Corporation and the El Paso Natural Gas Company in the same proportions as the division of the revenues from the liquid hydrocarbons. As to gas not processed for the removal of liquid hydrocarbons because of El Paso's unilateral election to take quantities in excess of the capacity of its processing plant, the rate schedule may provide for an upward adjustment of 1/100 cent per Mcf for each Btu in excess of 1052 Btu per cubic foot of gas, not to exceed 0.95 cents per Mcf at 14.65 psia.

(C) Each of the applicants, the Van Grisso Oil Company, the An-Son Corporation, and Petroleum International, Inc., shall file with the Federal Power Commission within 30 days from the date of this order an amendment to its rate schedule now filed with the Commission, providing for an initial well-head price of 17.0 cents per Mcf at 14.65 psia, including tax reimbursement, for gas sold under its contract in this proceeding replacing the initial rate as proposed. The initial price shall be subject to upward adjustment for gas containing more than 1000 Btu per cubic foot as proposed in the contract, provided that the applicant's rate schedule shall also provide for a proportional downward price adjustment provision from a base no lower than 1000 Btu.

(D) Each applicant (B) and (C) shall file with the Commission within 30 days after the date of this order an amendment or a supplement to a gas rate schedule now on file with the Commission, complying with the conditions prescribed herein.

(E) The initial decision of the Presiding Examiner issued herein on April 12, 1967, is modified as above set forth, and as so modified said decision, including ordering paragraphs (E) through (H) therein set forth, is adopted by the Commission as its decision in this proceeding, effective as of the date of issuance of this order.

### INITIAL DECISION

### OF THE PRESIDING EXAMINER GRANTING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY PURSUANT TO SECTIONS 7(c) AND (e) OF THE NATURAL GAS ACT

(Issued April 12, 1967)

SHRIVER, *Presiding Examiner:* Each of the four producers in this proceeding has filed an application pursuant to Section 7(c) of the Natural Gas Act, seeking a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce. The gas to be sold comes from the Oklahoma Panhandle; namely, from Beaver, Harper, and Woodward Counties.[1] The purchasers are two large pipeline companies. The Apache Corporation will sell to the El Paso Natural Gas Company. The Van Grisso Oil Company, the An-Son Corporation, and Petroleum International, Inc., will sell to the Michigan Wisconsin Pipe Line Company. The issue in the case is the appropriate price at which permanent certificates should be granted commonly called the "in-line" price.

---

[1] See Appendix I reproduced from the Staff's brief.

### *Procedure*

On September 15, 1966, the Commission issued an order consolidating 13 dockets in *The Superior Oil Company (Operator), et al.*, Docket No. G–16878, *et al.*, which included the 4 instant dockets.[2] Thereafter, public and consumers' interests in California and in Michigan, and one of the pipelines filed notices or petitions to intervene.[3] On October 24, 1966, the Commission issued an order permitting the withdrawal and severance of Docket No. CI64–604 from the consolidated proceeding, *Superior Oil Company (Operator), et al.*, Docket No. G–16878. Eight of the remaining dockets in the consolidated proceeding were severed and permanent certificates issued therein at 17 cents per Mcf at 14.65 psia with adjustments, pursuant to Commission orders dated January 11 and 24, 1967, and February 15, 1967.

A prehearing conference was held in the consolidated proceeding on October 23, 1966. Hearings were scheduled and were held on January 5 and 27, 1967. The only evidence offered was that of the Staff. The only applicants who appeared, or were represented by counsel, were *The Superior Oil Company* (Docket No. G–16878) and H. L. Hunt (Docket No. CI63–182). The applicants in the eight dockets mentioned above filed motions for severance or letters which were treated as such consenting to accept permanent certificates for the sale of gas under their respective applications at an initial price of 17 cents per Mcf at 14.65 psia and subject to specified conditions.[4] There was no objection to the issuance of these certificates by the intervenors. Details as

---

[2] The Applicants and dockets consolidated in the initial proceeding under the Commission's order of September 15, 1966, were as follows:

| | *Docket Nos.* |
|---|---|
| The Superior Oil Co (Operator), *et al* | G–16878. |
| Petroleum, Inc | CI61–226. |
| Sunset International Petroleum Corp., *et al* | CI61–356. |
| John R. Crain and Malcom Deisenroth, Jr., successors to Carol Doube Sutton, *et al* | CI61–1119. |
| H. L. Hunt | CI63–183. |
| Roland S. Bond | G–17090. |
| Sam K. Vierson | CI62–90. |
| Van Grisso Oil Co | CI63–59. |
| An-Son Corp | CI63–370. |
| Petroleum International, Inc | CI64–520, CI64–604. |
| Payne Petroleum Corp | CI65–1143. |
| Apache Corp | CI61–336. |

[3] On October 10, 1966, the People of the State of California and the Public Utilities Commission of the State of California, jointly, filed a Notice of Intervention in one of the instant dockets (CI61–336) and four other dockets. On October 13, 1966, the Pacific Gas and Electric Company petitioned for leave to intervene in the same dockets. On October 14, 1966, the Michigan Wisconsin Pipe Line Company petitioned to intervene in the three remaining instant dockets (CI64–520, CI63–59, and CI64–370) and five others. On October 17, 1966, the County of Wayne, Michigan, petitioned to intervene in the same dockets.

[4] The permanent certificates covering sales by the producers to the Michigan Wisconsin Pipe Line Company were issued subject to the conditions set forth in paragraphs (C), (D), and (E) of the order accompanying Opinion No. 353, *Michigan Wisconsin Pipe Line Company, et al.*, Docket No. CP61–102, *et al.*, 27 FPC 449, 462–463, and paragraphs (B) and (C) of the order accompanying Opinion No. 464, Texaco Inc., *et al.*, Docket No. G–8087, *et al.*, 33 FPC 1228, 1237. The permanent certificates covering sales by the producers to the El Paso Natural Gas Company were issued subject to the conditions set forth in paragraphs (G) and (H) of the order accompanying Opinion No. 390, *El Paso Natural Gas Company, et al.*, Docket No. G–17849, *et al.*, 29 FPC 1175, 1187–1188, as modified by Opinion No. 390–A, 30 FPC 479.

to the settlements and severances are set forth in the above orders of January 11 and 24, 1967, and February 15, 1967. We turn now to the four applicants involved in the instant proceeding.

### *Facts and Contracts*

The Applicants, Van Grisso and An-Son (Docket Nos. CI63–59 and CI63–370) propose, by their applications, to sell natural gas at an initial rate of 19.5 cents per Mcf at 14.65 psia, plus a Btu adjustment, and plus a Btu adjustment and a tax reimbursement, respectively.[5] Petroleum International, Inc., and the Apache Corporation (Docket Nos. CI64–520 and CI61–336) propose to sell gas at 19.5 and 21.0 cents per Mcf at 14.65 psia, including tax reimbursement plus Btu adjustment, and revenues from the sale of liquids, respectively.[6] Each of the four Applicants is presently authorized to sell natural gas under a temporary certificate at 17 cents per Mcf at 14.65 psia. They here seek permanent certificates of authorizations at the higher initial rates.

The Apache contract is dated August 10, 1960, a little more than a month before the Commission promulgated its guideline price for the Oklahoma Panhandle area on September 28, 1960. (Statement of General Policy No. 61–1, 24 FPC 818; Rules of Practice and Procedure, Section 2.56(a)). The other contracts are dated subsequent thereto, An-Son July 26, 1962, Petroleum International, August 28, 1963, and the Van Grisso contract, as amended, April 1, 1965. All of the contracts run for 20-year terms and provide for periodic price escalation. Under the Apache contract the gas is to be delivered to El Paso either at the well mouth or at the outlet of Apache's separators, if installed, at a maximum pressure of 800 psig and a minimum pressure of 100 psig. In the three sales to Michigan Wisconsin the delivery point is either at the wellhead or at the outlet of the well separator. The maximum delivery pressure under the An-Son and Petroleum International contracts is 1050 psig; under the Van Grisso Oil Company contract it is at the wellhead pressure. The minimum delivery pressure under the latter three contracts is 100 psig.

### *"In-Line" Price*

Mr. Eugene C. Zamboni, an engineer employee in the Production Division of the Commission's Bureau of Natural Gas, appeared for the Staff and testified that in his opinion the "in-line" price for the sale of natural gas moving in interstate commerce from the Oklahoma Panhandle area under contracts executed during the period January 1959 to September 28, 1960 (the date of the issuance of the Commission's guideline price), and for the period thereafter and here involved was 17.0 cents per Mcf including tax reimbursement. He testified that the contracts in the instant case covered sales of gas from wells located in counties in the Oklahoma Panhandle area. Mr. Zamboni based his opinion upon information which he had compiled from contracts and producer rate schedules relating to certificate applications contained in the files of the Federal Power Commission. His compilation entitled "Rates of Independent Producers Under Certificate Authorization Issued by the Commission, Docket No. G–16878, *et al.*, The Superior Oil Company, *et al.*, Oklahoma Panhandle Area" was received in evidence as Exhibit 1. This exhibit, among other things, contains a list of the four proposed sales in the instant case, including the sales in the nine other dockets in the consolidated proceeding (Schedule 1) and pertinent sales data thereon; similar data on some 616 permanently certificated sales which were negotiated during the period between January 5, 1959, and April 15, 1965, inclusive (Schedule 2); and data on 30 temporarily authorized sales negotiated between September 24, 1959, and April 13, 1964, inclusive (Schedule 3). The exhibit also contains two bar charts consisting of (1) a distribution of certificated initial rates of producer contracts dated January 1959 to September 28, 1960 for the Oklahoma Panhandle area and (2) a distribution of certificated initial rates of producer contracts dated September 28, 1960 and later for the same area.

---

[5] See Appendix II, reproduced from the Staff's brief and from the Appendix in the Commission's order of September 15, 1966.

[6] *Ibid.* Unless otherwise indicated all prices herein are for gas measured at a base pressure of 14.65 psia and at a temperature of 60° F.

Mr. Zamboni stated that Schedule 2 of the exhibit listed the sales showing the certificated prices including all adjustments except the upward or downward Btu adjustments in contracts which were accepted for filing by the Commission as of June 30, 1965. He said that the total first month's volumes of gas to be moved in interstate commerce under the 616 permanently certificated sales was approximately 16,500,000 Mcf. He indicated that Schedule 2 included settlements, namely, six sales in the 17.0 cents price group certificated as a result of company wide settlements, and a limited number of sales between a pipe line and its affiliated production company. The latter consisted of five sales by the Anadarko Production Company to the Panhandle Eastern Pipe Line Company in the 16.0 cents price group; two sales by Anadarko to Panhandle in the 16.4 to 16.8 cents price group; 14 sales by Anadarko to Panhandle Eastern, one by the Colorado Oil and Gas Company to Colorado Interstate Gas Company and two sales by the Pioneer Production Corporation to the Northern Natural Gas Company in the 17.0 cents price group.

In arriving at his opinion as to the "in-line" price of natural gas moving in interstate commerce in the Oklahoma Panhandle area which was applicable to the instant sales, the witness indicated that he relied upon Schedule 2 after excluding four sales to the Colorado Interstate Gas Company in Docket Nos. CI61-1180, CI62-217, CI62-388, and CI62-396, and 48 other contracts representing contracts between affiliates and sales certificated as a result of settlements, previously mentioned, and sales from previously dedicated acreage acquired by assignment. The four sales to Colorado were said to be unlike the other sales in Schedule 2 in that they provide that the base price will be adjusted downward on a proportional basis from 1133 Btu to 1,000 Btu per cubic foot. The witness stated that he did not rely on the array of temporarily authorized sales (Schedule 3) or on the proposed sales in the consolidated proceeding (Schedule 1) in reaching his opinion as to an "in-line" price. He was of the opinion that the "in-line" price should be the same even if the certificates of affiliated sales and settlements were included in the sales array and volumes which he had considered.

After putting aside 52 of the 616 permanently certificated sales because some were not comparable, it appears that the witness relied in general on 181 sales in arriving at the "in-line" price for the prepolicy period and 383 sales for the postpolicy period, and more specifically upon 101 sales with estimated first month volumes of 5,162,254 Mcf for the first period, and 292 sales with volumes of 6,550, 184 Mcf for the second period. (Tr. p. 38; Exh. 1, p. 2, 3). The latter sales totalling 393 were made at 17 cents per Mcf. The witness concluded that these sales represented 55.8 percent of the contracts and 80.8 percent of the total volume for the first period, and 76.4 percent of the contracts and 76.4 percent of the volume for the second period. He also concluded that the quality and delivery requirements of the four sales in the instant proceeding are reasonably comparable to the certificated sales at the 17.0 percent level in the Oklahoma Panhandle area.

One of the factors for consideration by the Commission in granting a permanent certificate of convenience and necessity pursuant to Section 7(e) of the Natural Gas Act as interpreted by the courts since the *Catco* decision is whether the "price is right." ***Atlantic Refining Company, et al.* v. *Public Service Commission of New York, et al.***, 360 U.S. 378 (1959). In the case commonly referred to as *Catco* the court said that the Commission in granting a certificate might attach such conditions as it believes necessary "where the proposed price is not in keeping with the public interest because it is out of line" (p. 391), and that the Commission would thereby protect the consuming public "while the justness and reasonableness of the price fixed by the parties is being determined under other sections of the Act," so that the conditions imposed "thus act to hold the line awaiting adjudication of a just and reasonable rate." (p. 392). Although the Supreme Court enjoined the Commission to grant certificates of public convenience and necessity only when, after making other necessary findings, the price of gas is not "out of line", the method of determining whether the price is "in-line" remained to be worked out by the Commission and by the courts in individual cases in later decisions. In *United Gas Improvement Company* v. *Federal Power Commission*, 283 F. 2d 817, 822–823 (CA9–1960), certiorari denied, 365 U.S. 879, the court emphasized that the public has an interest in obtaining reasonable rates and an expeditious dedication of needed new gas reserves, that by holding the price line in certificate cases standby protection is afforded to the public pending normal rate proceedings, and that the existing relevant producer prices paid by the pipeline companies in respect to gas produced in the same or in an analogous area and moved in interstate commerce are important by way of comparison in determining whether a particular price is "in-line." The price, it may be concluded, should be neither higher nor lower than the existing price level at which substantial volumes of gas are contracted for sale and moved in interstate commerce.

In 1965 in *United Gas Improvement Company* v. *Callery Properties, Inc., et al.*, 382 U.S. 223, 227, the Supreme Court clarified the standard to be considered in certificate cases by its holding in stating that "consumer protection is afforded by keeping the "in-line" price at the level where substantial amounts of gas have been certificated to enter the market under other contemporaneous certificates, no longer subject to judicial review or in any way 'suspect'. We believe the Commission can properly conclude under Section 7 that adequate protection to the public interest requires as an interim measure that gas not enter the interstate market at prices higher than existing levels."

In *Sunray DX Oil Company, et al.* v. *Federal Power Commission*, 370 F. 2d 181 (CA10–1966), the court said (pp. 189, 190):

> An in line price is intended to reflect the price at which substantial volumes of gas are currently contracted for sale in interstate commerce.
>
> * * * * * * *
>
> Our view is that the possibility of filing for increased rates under Section 4 does not require that the Commission fix the price in a Section 7 proceeding at a figure lower than that at which substantial volumes of gas are currently contracted for sale in interstate commerce.

Although the price line is intended to reflect current conditions in the industry, *United Gas Improvement Company* v. *Federal Power Commission*, 283 F. 2d 817, 824 (CA9–1960), certiorari denied *sub nom. Superior Oil Company* v. *United Gas Improvement Company*, 365 U.S. 879 (1961), it was held in this case to be an abuse of discretion by the Commission in establishing the price line to rely upon producer prices which are under review in pending court or Commission proceedings. But it is not an abuse of discretion, however, to give consideration to some prices not covered by permanent certificates (temporaries) when no appreciable volumes of gas are moved in interstate commerce under permanent certificates since the Commission has nothing upon which to base a decision as to in-lineness unless it turns to the temporaries. *Sunray DX Oil Company* v. *Federal Power Commission, supra*, p. 189.

In the recent case of *Public Service Commission of the State of New York* v. *Federal Power Commission*, 373 F. 2d 816 (CADC–1967), the court reviewed the earlier cases and the evidence appropriately to be adduced in "in-line" cases as well as the applicable principles and limitations imposed upon the Commission in granting certificates of public convenience and necessity pursuant to Section 7(e) of the Act. The court observed that "Congress created the FPC to protect the consumer from the market place, not simply to reflect it," and that the Commission cannot use prices at which producers and pipelines contract (merely at arm's-length) in setting an "in-line" price. Although the court necessarily dealt with the facts of the case before it and with the arguments of the interested parties, the court indicated that the "in-line" price generally should not be dependent merely on current conditions in the industry and that neither the guideline price nor temporarily certificated prices (when there are permanent certificate prices) provide a reliable basis upon which to predicate an "in-line" price.

In view of the testimony and of Exhibit 1, there is no issue in the instant case as to the time when the sales were made in determining a price level, the relevant geographical area, "suspect" sales, or temporary certificates. The distribution of permanently certificated initial prices for gas sold for resale in interstate commerce in the Oklahoma Panhandle area is as follows (Exh. 1, pp. 1, 2):

| Price ¢ per mcf at 14.65 psia | Number of contracts certificated | Total estimated first month volumes in mcf |
|---|---|---|
| *1959 to 9/28/60* | | |
| 8.0–14.5 | 7 | 21,803 |
| 15.0–15.5 | 21 | 300,360 |
| 16.0 | 30 | 716,471 |
| 16.4–16.8 | 22 | 187,259 |
| 17.0 | 101 | 5,162,254 |
| | 181 | 6,388,147 |
| *9/28/60 to 6/30/65* | | |
| 8.0–14.5 | 15 | 133,780 |
| 15.0–15.5 | 20 | 612,430 |
| 16.0 | 52 | 1,205,355 |
| 16.4–16.8 | 4 | 68,440 |
| 17.0 | 292 | 6,550,184 |
| | 383 | 8,570,189 |
| Total | 564 | 14,958,336 |
| *1959–65* | | |
| 8.0–14.5 | 22 | 155,583 |
| 15.0–15.5 | 41 | 912,790 |
| 16.0 | 82 | 1,921,826 |
| 16.4–16.8 | 26 | 255,699 |
| 17.0 | 393 | 11,712,438 |
| Total | 564 | 14,958,336 |

When all of the foregoing contracts which were certificated at prices of 8.0 cents per Mcf to 17.0 cents per Mcf for the pre-guideline period are considered they average slightly less than 16.5 cents, and the average for the post-guideline period is a little less than 16.7 cents per Mcf. The average for the entire period falls between these two figures at about 16.6 cents per Mcf. But it is apparent, however, that the major concentration of certificated sales occurred at between 16 and 17 cents—nearly 89 percent and that nearly 70 percent occurred at 17 cents per Mcf. When the estimated first month's delivery volumes are considered for the entire period 1959 to 1965 it will be observed, as previously indicated, that the sale of the largest volumes of gas were certificated at initial rates of 17 cents per Mcf, namely 78.3 percent. In the instant case the Apache contract is dated August 10, 1960, the others are dated in 1962, 1964 and 1965. The record shows that substantial volumes of gas were permanently certificated for sale and movement in interstate commerce at 17 cents per Mcf. Accordingly, based on the testimony of the witness who testified at the hearing, and the entire record, the Examiner is of the opinion that the proposed contract prices of 19.5 cents and 21.0 cents per Mcf (Appendix I) are out of line and that the present or future public convenience and necessity requires that the subject sales be conditioned at a price of 17.0 cents per Mcf at 14.65 psia with adjustments.

The Staff's witness who expressed his opinion on the "in-line" price for the sale of natural gas in the Oklahoma Panhandle area also recommended that adjustments be made in respect to the sale to the El Paso Natural Gas Company and the three sales to the Michigan Wisconsin Pipe Line Company. He recommended that for gas actually processed, the Commission allow the Apache Corporation 17.0 cents per Mcf at 14.65 psia measured at the point of delivery and adjusted proportionately for processing shrinkage, plus the revenues received from liquids in accordance with the contract, and that for gas bypassing the plant because of El Paso's election to take in excess of the plant capacity, an adjustment be permitted of 1/100 cents per Mcf for each Btu in excess of 1052 Btu at 14.65 psia, with a maximum adjustment of 0.95 cents per Mcf, in accordance with previously certificated sales to El Paso from the same area and under similar contracts in Opinion Nos. 390 and 390-A (29 FPC 1187; 30 FPC 480).

In respect to the three contracts for sales to the Michigan Wisconsin Pipe Line Company, the witness recommended that upward Btu adjustments be approved only on condition that a proportional downward price adjustment provision from a base no lower than 1000 Btu also be included in accordance with Opinion No. 464 and that the contracts be modified accordingly. (33 FPC 1228, 1237). We adopt these recommendations as amplified in the order herein.

### FINDINGS AND CONCLUSIONS

Upon consideration of the record, it is found and concluded, in addition to the findings and conclusions heretofore stated, that:

(1) The applicants, Apache Corporation, Van Grisso Oil Company, An-Son Corporation, and Petroleum International, Inc., are "natural-gas companies" within the meaning of the Natural Gas Act and independent producers of natural gas as that term is defined in Section 154.91(a) of the Commission's Regulations, and are engaged in the sale of natural gas in interstate commerce for resale for ultimate public consumption.

(2) The proposed sales of natural gas by the applicants are required by the public convenience and necessity and certificates therefor should be issued as ordered and conditioned hereinafter.

(3) Each of the applicants is able and willing properly to do the acts and to perform the service proposed in its application in this proceeding and to

conform to the provisions of the Natural Gas Act and the requirements, rules, and regulations of the Commission thereunder.

(4) The prices proposed by the applicants are not in keeping with the public interest because they are "out of line" with the price level at which similar relevant sales are certificated by the Commission as sanctioned by the courts.

(5) The conditions attached to the certificates granted herein are required by the public convenience and necessity.

## ORDER

WHEREFORE, it is ordered, subject to review by the Commission on appeal, or review on its own motion, as provided in its Rules of Practice and Procedure that:

(A) A certificate of public convenience and necessity is issued to each of the applicants in Finding (1) for the sale in interstate commerce of natural gas for resale as proposed in its application upon the terms and conditions of this order.

(B) The Apache Corporation shall file with the Federal Power Commission within 30 days from the date of this order a gas rate schedule, or an amendment or supplement to a gas rate schedule now on file with the Commission, providing for an initial price replacing the initial price as proposed for gas sold under its contract in this proceeding, of 17.0 cents per Mcf at 14.65 psia, including reimbursement for taxes, and subject to the following adjustment:

> The initial rate, for gas processed for the removal of liquid hydrocarbons, shall be adjusted by adding thereto Apache's share of revenues received from the liquid hydrocarbons in accordance with the contract revenue-sharing provisions, and such rate shall be further adjusted for processing shrinkage by dividing such shrinkage between the Apache Corporation and the El Paso Natural Gas Company in the same proportions as the division of the revenues from the liquid hydrocarbons. As to gas not processed for the removal of liquid hydrocarbons the rate schedule may provide for an upward adjustment of 1/100 cent per Mcf for each Btu in excess of 1052 Btu per cubic foot of gas, not to exceed 0.95 cents per Mcf at 14.65 psia.

(C) Each of the applicants, the Van Grisso Oil Company, the An-Son Corporation, and Petroleum International, Inc., shall file with the Federal Power Commission within 30 days of the date of this order an amendment to its rate schedule now filed with the Commission, providing for an initial wellhead price of 17.0 cents per Mcf at 14.65 psia, including tax reimbursement, for gas sold under its contract in this proceeding replacing the initial rate as proposed. The initial price shall be subject to upward adjustment for gas containing more than 1000 Btu per cubic foot as proposed in the contract, provided that the applicant's rate schedule shall also provide for a downward adjustment in price for gas containing less than 1000 Btu per cubic foot, the downward adjustment to be .017 cents per Mcf for each Btu below 1000 Btu per cubic foot.

(D) Each applicant (B) and (C) shall file with the Commission within 30 days after the date of this order a gas rate schedule, or amendment or a supplement to a gas rate schedule now on file with the Commission, complying with the conditions prescribed herein.

(E) The FPC gas rate schedules relating to the four sales herein shall provide that the buyers may receive, at no additional charge per Mcf, gas paid for but not taken at any time in a period of at least five years immediately following payments for such gas not taken, subject to contract provisions to protect against drainage. If the contract terminates before the end of the minimum five year make-up period, a shorter make-up period consistent with the time remaining under the contract will be permitted. (Order No. 334, January 18, 1967; as modified by Order No. 334–A, March 21, 1967, 37 FPC 110, 587).

(F) The Btu content of the gas used in computing the price adjustment approved herein shall be the number of British Thermal units produced by the combustion, at constant pressure, of the amount of the gas which would occupy a volume of 1 cubic foot at a temperature of 60°F. if saturated with water vapor and under a pressure equivalent to that of 30 inches of mercury at 32°F. and under standard gravitational force (980.665 c.m. per sec.) with air of the same temperature and pressure as the gas, when the products of combustion are cooled to the initial temperature of gas and air and when the water formed by combustion is condensed to the liquid state.

(G) The certificates granted herein are not transferable and the exercise of any rights thereunder is conditioned upon compliance by the respective recipients with the Natural Gas Act and all applicable rules and regulations issued thereunder.

(H) The grant of the certificates issued in paragraph (A) above shall not be construed as a waiver of the requirements of Section 4 of the Natural Gas Act or of Part 154 or Part 157 of the Commission's Regulations thereunder and is without prejudice to any findings or orders which have been or which may hereafter be made by the Commission in any proceeding now pending or hereafter instituted by or against the applicants. Further, the action in this proceeding shall not foreclose nor prejudice any future proceedings or objections relating to the operation of any price or related provisions in the gas purchase contracts herein involved. The grant of the certificates herein for service to the particular customers involved shall not imply approval of all of the terms of the contracts, particularly as to the cessation of service upon termination of said contracts, as provided by Section 7(b) of the Natural Gas Act. The grant of the certificates herein shall not be construed to preclude the imposition of any sanctions pursuant to the provisions of the Natural Gas Act for the unauthorized commencement of any sale of natural gas subject to said certificates.

HARRY C. SHRIVER,
*Presiding Examiner.*

## TEXAS EASTERN TRANSMISSION CORPORATION, DOCKET NO. CP64-5; ALGONQUIN GAS TRANSMISSION COMPANY, DOCKET NO. CP65-340

### ORDER AMENDING ORDERS ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 22, 1967)

On February 27, 1967, Texas Eastern Transmission Corporation (Texas Eastern), filed in Docket No. CP64-5 a petition to amend the order issued by the Commission December 19, 1963, 30 FPC 1559, as amended October 28, 1964, 32 FPC 1229, April 5, 1965, 33 FPC 699, August 24, 1965, 34 FPC 572, November 4, 1966, and December 30, 1966, 36 FPC 826, 1171, by authorizing Texas Eastern to sell additional quantities of natural gas to Algonquin Gas Transmission Company (Algonquin), all as more fully set forth in the petition to amend filed in Docket No. CP64-5.

The order of December 19, 1963 as amended to date authorized Texas Eastern to construct and operate additional facilities to provide an additional 563,126 Mcf of natural gas of peak capacity over a four-year period beginning in 1964 to enable Texas Eastern to meet the increased requirements of its customers for natural gas during the four-year period beginning in November, 1964.

Texas Eastern seeks authorization here to sell to Algonquin an additional 3,838 Mcf per day of natural gas under its annual firm gas rate schedules and an additional 2,635 Mcf of natural gas per day under its Winter Service Rate Schedule. The additional annual firm sales are to begin on November 1, 1967 and the additional Winter Service sales are to begin on November 16, 1967.

Texas Eastern states that the additional quantities of natural gas proposed to be sold to Algonquin are needed by the latter to meet its natural gas requirements beginning with the 1967-68 winter heating season. Texas Eastern also states that the additional proposed sales will not affect any service now being rendered by it.

On February 27, 1967, Algonquin filed in Docket No. CP65-340 a petition to amend the order issued by the Commission August 24, 1965, by advancing the date for construction and operation of certain natural gas facilities authorized thereby and by changing the volumes of natural gas authorized for delivery by Algonquin to certain of its resale customers, commencing in November, 1967, all as more fully set forth in the petition to amend.

The above-mentioned order authorized Algonquin to construct and operate certain natural gas facilities over a four-year period, and to sell and deliver certain quantities of natural gas to its customers.

Specifically, Algonquin now seeks authorization to construct and operate in 1967, some of the facilities originally authorized to be constructed and placed in operation in 1968, said facilities being as follows:

(1) 4.6 miles of 20-inch pipeline loop between 1 mile South of valve G-1-6, Berkley, Massachusetts, and valve G-1-7, Freetown, Massachusetts, and

(2) 7.6 miles of 16-inch pipeline loop between valve G-5-1 Attleboro, Massachusetts and valve G-5-2A, Seekonk, Massachusetts.

Algonquin seeks authorization to place the above listed facilities in operation commencing November 1, 1967.

Algonquin also seeks authorization to change the quantities of natural gas to be delivered to certain of its resale customers as follows:

| Customer | Maximum daily quantity increase (Mcf) | Maximum daily winter quantity increase (Mcf) |
|---|---|---|
| Bristol and Warren Gas Co | 100 | |
| Boston Gas Co | | [1] (6,000) |
| Brockton Taunton Gas Co | 500 | 50 |
| The Connecticut Gas Co | | 3,000 |
| The Newport Gas Co | 500 | |
| North Attleboro Gas Co | 40 | 15 |
| Providence Gas Co | 2,700 | 6,200 |
| Total | 3,840 | 3,265 |

[1] Decrease.

Algonquin states that Texas Eastern has agreed to sell and Algonquin has agreed to buy the above-listed additional quantities of natural gas with the Maximum Daily increase commencing November 1, 1967, and the Maximum Daily Winter increase commencing November 16, 1967. Algonquin states that the proposed facilities are currently needed to meet the present requirements of its customers as are the additional quantities of natural gas.

Due notice of the filing of the petitions to amend and opportunity for hearing thereon has been given by publication in the Federal Register on March 10, 1967 (32 F.R. 3952) in Docket No. CP64–5 and on March 16, 1967 (32 F.R. 4146) in Docket No. CP65–340. No protest, petition to intervene or notice of intervention has been filed herein.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's orders issued December 19, 1963, as amended in Docket No. CP64–5 and August 24, 1965 in Docket No. CP65–340 be amended as hereinafter ordered.

*The Commission orders:*

(A) The Commission's order issued December 19, 1963, as amended, in Docket No. CP64–5 is further amended so as to authorize Texas Eastern to increase its sales and deliveries of natural gas to Algonquin by 6,473 Mcf daily; and the Commission order issued August 24, 1965 in Docket No. CP65–340 is amended so as to authorize Algonquin to advance by one year the date for constructing and operating certain of the facilities originally authorized for 1968 and to sell additional volumes of natural gas (7105 Mcf) daily to the seven existing resale customers as hereinbefore described and as more fully described in the application.

(B) In all other respects said orders shall remain in full force and effect.

(C) The amendments authorized by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with applicable Commission Regulations under the Natural Gas Act and particularly the conditions set forth in Section 157.20 in paragraphs (c)(1), (c)(3), (c)(4), (f) and (g) of such Regulations and the filing of revised service agreements reflecting the change in volumes authorized.

(D) In all other respects the orders heretofore issued in these Docket Nos. CP64–5 and CP65–340 remain unchanged.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## UNITED GAS PIPE LINE COMPANY, DOCKET NO. CP60-14

### ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 22, 1967)

On March 23, 1967, United Gas Pipe Line Company (Petitioner) filed in Docket No. CP60-14 a petition to amend the order issued by the Commission on August 11, 1960, 24 FPC 216, as amended December 17, 1962, 28 FPC 1059, and June 25, 1964, 31 FPC 1586, by authorizing Petitioner to increase firm gas deliveries of natural gas to Escambia Chemical Corporation (Escambia) to 36,000 Mcf per day, all as more fully set forth in the petition to amend.

The order issued August 11, 1960, as amended, authorized Petitioner to construct and operate certain natural gas facilities and to deliver volumes of natural gas to, among others, Escambia in volumes not to exceed 30,500 Mcf of natural gas per day.

Petitioner now seeks authorization to increase the firm deliveries of natural gas to Escambia from the previous limit of 30,500 Mcf of natural gas per day to a total maximum daily delivery of 36,000 Mcf of natural gas. Petitioner states that it has entered into an Amendatory Agreement with Escambia dated March 8, 1967, for the additional quantities of natural gas for which authorization is being sought in the instant filing. Petitioner advises that no new facilities will be necessary to deliver the increased quantity of natural gas.

Due notice of the subject application to amend and opportunity for hearing has been given by publication in the Federal Register on April 5, 1967 (32 F.R. 5595). No protest or petition to intervene has been filed concerning this amendment.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued August 11, 1960, in Docket No. CP60-14 as amended, be further amended as hereinafter ordered.

*The Commission orders:*

(A) The Commission's order issued August 11, 1960, in Docket No. CP60-14 as amended, is further amended to authorize Petitioner to increase the firm deliveries of natural gas to Escambia Chemical Corporation in Escambia County, Florida, from 30,500 Mcf daily to 36,000 Mcf daily as requested by Petitioner in the subject petition to amend.

(B) The amended certificate shall not entitle the industrial customer to whom firm deliveries are authorized herein to any priorities to additional gas for meeting any future increase in its requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

(C) In all other respects said order shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## ARKANSAS OKLAHOMA GAS CORPORATION (FORMERLY FORT SMITH GAS CORPORATION), DOCKET NO. G-2191, ET AL.

### ORDER AMENDING ORDERS ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY AND AMENDING ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued May 23, 1967)

On January 5, 1967, Fort Smith Gas Corporation filed a notice of change in name (dated December 29, 1966) to advise the Commission that its corporate name will have been changed to Arkansas Oklahoma Gas Corporation effective January 1, 1967. There is no change in corporate structure, management, facilities or service.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been received.

*The Commission orders:*

(A) The orders issuing certificates of public convenience and necessity to Fort Smith Gas Corporation in Docket Nos. G-2191, G-2333, CP63-2 and CP65-411 are amended by changing the name of the certificate holder to Arkansas Oklahoma Gas Corporation, and in all other respects said orders shall remain in full force and effect.

(B) The order issued in Docket No. CP62-101 directing Mississippi River Transmission Corporation to connect its facilities with and to sell natural gas to Fort Smith Gas Corporation is amended by changing the name of the recipient of the gas to Arkansas Oklahoma Gas Corporation, and in all other respects said order shall remain in full force and effect.

(C) The name, Arkansas Oklahoma Gas Corporation, is substituted for that of Fort Smith Gas Corporation in any and all other Commission matters in which the name Fort Smith Gas Corporation appears.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## CITY OF EUGENE, OREGON, BY AND THROUGH ITS EUGENE WATER & ELECTRIC BOARD, PROJECT NO. 2510

### ORDER ISSUING LICENSE (MAJOR)

(Issued May 23, 1967)

Application was filed on March 29, 1965, and supplemented on August 4, 1965, by City of Eugene, Oregon (Applicant), by and through its Eugene Water & Electric Board, for a license under Section 4(e) of the Federal Power Act (Act) for constructed Project No. 2510, known as the Walterville Project, located on the McKenzie River in Lane County, Oregon, in the vicinity of Walterville. No lands of the United States are affected by the project.

Construction of the project started in 1909 and was completed in 1911 with a hydroelectric installation of two units totaling 1,500 kilowatts of capacity. Installation of a third unit in 1924 increased the capacity to 3,050 kilowatts. Reconstruction of the project commenced in September, 1948, causing the shut down of the power plant in April of 1949. Under the reconstruction the project canal was widened and deepened, an 8,000 kilowatt generating unit was installed and placed in operation by December 3, 1949. Construction of off-stream storage facilities, started in 1951, was completed in 1952. The off-stream facilities consists of a reservoir of 345 acre feet and 4 pumps with a combined capacity of about 300 cfs.

The Secretary of the Army and the Chief of Engineers have approved the plans of the project structures affecting navigation insofar as the interests of navigation are concerned.

The Department of the Interior in reporting on the application, recommended for inclusion in any license for the project, terms and conditions in the interest of fish and wildlife and recreation as set forth in attached Form L-3, and in addition thereto two special conditions in the interests of fish and wildlife substantially as set forth in license Articles 33 and 34.

The Department of Health, Education, and Welfare has reported that the project has no adverse effects on water supply, water pollution control, or vector control, and none is anticipated.

Exhibit R filed as part of the application, consisting of a one-page narrative statement, a one page addendum, and a drawing (FPC No. 2510-14) entitled "Project Recreation Situation", shows only existing public access ways and recreational facilities at the project, and no future plans for recreational development. The project is without a reservoir. We are approving the exhibit as a part of this license to the extent that it shows such existing recreational use of the project. License Articles 18 and 19 provide for additional recreational development of the project consistent with future recreational needs and other project purposes.

Pursuant to petition therefor, the Commission, by its order issued November 10, 1966, permitted the State of Oregon, through its State Game Commission and its Fish Commission, to intervene in this proceeding. The Interveners' interests are associated with fish and wildlife protection and seek a permanent arrangement for such protection through license terms and conditions to insure minimum McKenzie River flows for fish passage around the project powerhouse, and unrestricted freedom of game animal movement substantially as provided for in license Articles 33 and 34.

The McKenzie River originates on the western slope of the Cascade Mountains and flows generally west a distance of 86 miles to its confluence with the Willamette River. The fall of the McKenzie is about 10 feet per mile from river mile 40 to its mouth. The Walterville Project is located at river mile 20.9. There is ample historical evidence of the extensive use of the McKenzie river towards the end of the 19th century for the annual floating of great quantities of logs from at least mile 40 to the Coburg sawmill 6 miles above its mouth, and down the Willamette to sawmills on that river located at Oregon City, Salem and Newburg.

For the reasons set forth in our April 25, 1962 Opinion No. 357 (27 FPC 830), the license herein granted shall have an effective date of January 1, 1949, since neither a declaration of intention nor a timely application for license was filed with respect to the 1949 reconstruction, and a termination date of December 31, 1993.

*The Commission finds:*

(1) Walterville Project No. 2510 is located on a navigable reach of the McKenzie River.

(2) Applicant is a municipality organized under the laws of the State of Oregon, and has submitted satisfactory evidence of compliance with the re-

quirements of all applicable State laws insofar as necessary to effectuate the purposes of a license for the project.

(3) Public notice of the filing of the application has been given. Except for the above-mentioned petition to intervene, no protests or other petitions to intervene have been received. No conflicting application is before the Commission.

(4) The project does not affect a Government dam, nor will the issuance of a license therefor, as hereinafter provided, affect the development of any water resources for public purposes which should be undertaken by the United States.

(5) Subject to the terms and conditions hereinafter imposed. the project will be best adapted to a comprehensive plan for improving or developing a waterway or waterways for the use or benefit of interstate or foreign commerce, for the improvement and utilization of water-power development, and for other beneficial public uses, including recreational purposes.

(6) The installed horsepower capacity of the project hereinafter authorized for the purpose of computing the capacity component of the administrative annual charge is 10,700 horsepower, and the amount of annual charges, based on such capacity, to be paid under the license for the project, for the costs of administration of Part I of the Act is reasonable.

(7) The exhibits designated and described in paragraph (B) below conform to the Commission's rules and regulations and should be approved as part of this license.

*The Commission orders:*

(A) This license is hereby issued to the City of Eugene, Oregon, by and through its Eugene Water & Electric Board (Licensee) under Section 4(e) of the Federal Power Act (Act) for a period effective as of January 1, 1949 and terminating December 31, 1993, for the continued operation and maintenance of Walterville Project No. 2510, located on the McKenzie River, in Lane County, Oregon, and affecting navigable waters of the United States, subject to the terms and conditions of the Act which is incorporated herein by reference as a part of this license, and subject to such rules and regulations as the Commission has issued or prescribed under the provisions of the Act.

(B) The Walterville Project consists of:

(i) all lands constituting the project area and enclosed by the project boundary or the licensee's interests in such lands, the limits of which are otherwise defined, the use and occupancy of which are necessary for the purposes of the project; such project area and project boundary being shown and described by certain exhibits which form part of the application for license and which are designated and described as follows:

Exhibit J: (FPC No. 2510–1) General Map

Exhibit K: (FPC No. 2510–2) Project Area Map

(ii) the project works are as follows: (1) a 4 mile long cut and fill unlined canal (2575 cfs capacity), controlled by a headworks structure containing two 14 x 20 foot tainter gates, terminating at the plant forebay, (2) a pump storage pond on the right bank at the canal, 3 miles below the headworks structure, with a capacity of 345 acre-feet and a surface area of 65 acre, filled by use of four 33,000 gpm (300 cfs total) pumps and drawn down through two 4 x 20 foot radial gates, (3) a forebay, forebay headworks containing a 20 x 22 foot radial gate controlling flow to the powerhouse through a 16.5 x 16.5 foot penstock 130 feet long, and a siphon bypass, (4) an automated powerhouse containing an 8000 kilowatt generating unit, (5) a 12/66 kv substation and 12 kv bus connected to the generator via an underground cable, and two taps to the Leaburg-Currin line, (C) and appurtenant facilities; the location, nature and character of which are more specifically shown and described by the exhibits hereinbefore cited and by certain other exhibits which also form part of the application for license and which are designated and described as follows:

| Exhibit L, sheet | FPC No. 2510 | Showing |
|---|---|---|
| 1 of 11 | -3 | General Plan. |
| 2 of 11 | -4 | Powerhouse Superstructure. |
| 3 of 11 | -5 | Powerhouse Floor Plan. |
| 4 of 11 | -6 | Powerhouse Transverse Section. |
| 5 of 11 | -7 | Powerhouse Longitudinal Section. |
| 6 of 11 | -8 | Penstock Gate. |
| 7 of 11 | -9 | Penstock Plan and Section. |
| 8 of 11 | -10 | Pump Storage Structure Plan. |
| 9 of 11 | -11 | Pump Storage Structure Section. |
| 10 of 11 | -12 | Headworks Map. |
| 11 of 11 | -13 | Headworks Plan. |

*Exhibit M:* consisting of a single typewritten page entitled, "General Description of Equipment", filed in the Commission on March 29, 1965.

(iii) all other structures, fixtures, equipment or facilities used or useful in the maintenance and operation of the project and located on the project area, including such portable property as may be used or useful in connection with the project or any part thereof, whether located on or off the project area, if and to the extent that the inclusion of such property as part of the project is approved or acquiesced in by the Commission; also all riparian or other rights, the use or possession of which is necessary or appropriate in the maintenance or operation of the project.

(C) This license is also subject to the terms and conditions set forth in Form L-3 (Revised September 1, 1966) entitled "Terms and Conditions of License for Constructed Project Affecting Navigable Waters of the United States" (36 FPC 971), which terms and conditions, designated as Articles 1 through 31, are attached hereto and made a part hereof, except Articles 7 and 8 thereof; and subject to the following special conditions set forth herein as additional articles:

*Article 32.* The Licensee shall pay to the United States the following annual charge, effective as of January 1, 1949:

For the purpose of reimbursing the United States for the costs of administration of Part I of the Act, a reasonable annual charge as determined by the Commission in accordance with the provisions of its regulations in effect from time to time. The authorized installed capacity for such purpose is 10,700 horsepower.

*Article 33.* The Licensee shall maintain flows in the McKenzie River past the Walterville Canal not less than those in the following schedule established by the agreement of January 18, 1954, by the Eugene Water and Electric Board, Fish Commission of Oregon, and Oregon State Game Commission:

| Period | Second-feet |
|---|---|
| Jan. 1 through Apr. 30 | 350 |
| May 1 through May 31 | 1,000 |
| June 1 through June 30 | 800 |
| July 1 through July 15 | 750 |
| July 16 through Aug. 31 | 500 |
| Sept. 1 through Sept. 30 | 425 |
| Oct. 1 through Dec. 31 | 350 |

*Article 34.* The Licensee shall construct, maintain, and operate, or arrange for the construction, maintenance, and operation of permanent fish passage and game protective facilities at the project, the specifications for which shall be determined cooperatively by the Licensee, Fish Commission of Oregon, Oregon State Game Commission, and the U.S. Fish and Wildlife Service. In the event the Licensee and the agencies named herein fail to agree on the design for the fish passage and protective facilities, such facilities may be prescribed by the Commission as provided by Article 16 of attached Form L–3.

(D) The aforementioned Exhibit R is hereby approved as part of this license to the extent that it shows existing recreational use of the project.

(E) The exhibits designated and described in paragraph (B) above are hereby approved as part of this license.

(F) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this license. In acknowledgment of the acceptance of this license, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## MIDHURST OIL CORPORATION, DOCKET NOS. G–18150, RI62–414 AND LONNIE D. HARRISON, TRUSTEE (OPERATOR), ET AL., DOCKET NO. RI64–167

### ORDER AMENDING ORDER ACCEPTING OFFER OF SETTLEMENT

(Issued May 23, 1967)

By order issued June 21, 1965, 33 FPC 1274, in the above-entitled proceedings, the Commission approved a settlement proposal filed by Midhurst Oil Corporation (Midhurst) covering settlement rates under two of Midhurst's rate schedules, one of which included Midhurst's FPC Gas Rate Schedule No. 12 which was involved in Docket No. RI64–167. It has come to our attention that by order issued September 16, 1964, in Docket No. G–7258, *et al.*, Lonnie D. Harrison, Trustee (Operator), *et al.* (Harrison) was named co-respondent in Docket No. RI64–167 and permitted to make sales of natural gas to Texas Eastern Transmission Corporation under a contract previously designated Midhurst Oil Corporation (Operator), *et al.*, FPC Gas Rate Schedule No. 18. The settlement order issued June 21, 1965 did not pertain to Harrison.

In view of the above, we think it appropriate to amend our settlement order of June 21, 1965, so as to reinstate the suspension proceeding in Docket No. RI64–167 insofar as said proceeding pertains to sales pursuant to Harrison's FPC Gas Rate Schedule No. 1 (Formerly Midhurst's Rate Schedule No. 18), and reconsolidate said proceeding in the Texas Gulf Coast Proceeding, Docket No. AR64–2.

*The Commission orders:*

For the reasons set forth above, our order of June 21, 1965 is modified so as to reinstate the suspension proceeding in Docket No. RI64–167 insofar as said proceeding pertains to Lonnie D. Harrison, Trustee (Operator), *et al.*, and to reconsolidate said proceeding in the Texas Gulf Coast Proceeding, Docket No. AR64–2.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## MONONGAHELA POWER COMPANY, PROJECT NO. 2477

### ORDER EXTENDING PERIOD OF PRELIMINARY PERMIT

(Issued May 23, 1967)

Application was filed on April 4, 1967 by Monongahela Power Company, permittee for proposed Project No. 2477, for a six-month extension of the period of the permit. The permit was issued for a period of 24 months, effective as of August 1, 1965.

Under its permit, the permittee has been engaged in studies and other preparatory work in connection with installing pumped storage hydroelectric facilities at the U.S. Corps of Engineers' Rowlesburg Reservoir proposed for construction on the Cheat River in Preston County, West Virginia, near the Town of Rowlesburg.

In support of its application, the permittee advises that on June 17, 1966 the Corps advised that it had decided to change its December 1963 plans which had proposed a rock fill dam for its Rowlesburg Reservoir with a separate spillway and outlet works into Fill Hollow, to a concrete gravity dam with spillway and outlet works located in the dam structure. This change in design effected a necessary change in the permittee's plans for construction which caused a four-month delay in the permittee's studies. The permittee advises it plans to proceed immediately with preparation of an application for license for its proposed hydroelectric facilities at the Corps' reservoir, but that a six-month extension of the period of its permit is necessary to complete the application.

*The Commission finds:*

It is appropriate for the purposes of the Federal Power Act to grant the requested extension of the period of the permit.

*The Commission orders:*

The period of the permit for proposed Project No. 2477 is hereby extended through January 31, 1968.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## THE OHIO FUEL GAS COMPANY, DOCKET NO. CP67–224

### FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT OF FACILITIES AND ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 23, 1967)

On February 9, 1967, The Ohio Fuel Gas Company (Applicant) filed in Docket No. CP67–224 an application pursuant to Sections 7(b) and 7(c) of the Natural Gas Act for permission and approval to abandon certain natural gas facilities and for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities for the transportation of natural gas in interstate commerce, all as more fully set forth in the application.

Applicant proposes to construct approximately 8.5 miles of 12-inch transmission pipeline in Stark and Columbiana Counties, Ohio, replacing a like amount of 8-inch pipeline in Applicant's Line V. Construction of these facilities will complete the replacement with 12-inch pipeline of Applicant's Line V which extends between its Holmes Storage Pool and its interconnection with its affiliated supplier, The Manufacturers Light and Heat Company (Manufacturers), at Dungannon, Columbiana County, Ohio.

The 8-inch pipeline sections which are to be replaced will be salvaged and sold as used pipe.

The age and condition of the remaining 8-inch pipeline sections in Line V limit maximum operating pressure to approximately 270 psig. Installation of the replacement facilities will permit operation of Line V at a pressure of 500 psig thereby increasing its capacity.

The total estimated cost of Applicant's proposed construction is $430,000, which cost is proposed to be financed through the issuance and sale of promissory notes or common stock to Applicant's parent company, The Columbia Gas System, Inc. Applicant estimates a salvage recovery of approximately $35,000 from the sale of the replaced 8-inch pipeline.

After due notice, no petition to intervene, notice of intervention or protest has been filed.

At a hearing held on May 18, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, The Ohio Fuel Gas Company, an Ohio corporation having its principal place of business in Columbus, Ohio, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of August 21, 1945, in Docket No. G-371 (4 FPC 1033).

(2) The facilities hereinbefore described and as more fully described in the application in this proceeding are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed construction and operation of facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) The facilities to be abandoned, as hereinbefore described and as more fully described in the application in this proceeding, are used in the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and abandonment of such facilities is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(6) The abandonment by Applicant, as hereinbefore described, is permitted by the public convenience and necessity and an order approving same should be issued as hereinafter ordered.

(7) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of the Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to Applicant, The Ohio Fuel Gas Company, authorizing the construction and operation of facilities as hereinbefore described and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of the Regulations.

(C) The facilities authorized by paragraph (A) above shall be constructed and placed in actual operation as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within one year from the date of this order.

(D) Permission for and approval of the abandonment by Applicant of the facilities hereinbefore described, as more fully described in the application in this proceeding, are granted.

(E) Applicant shall advise the Commission of the date of abandonment of said facilities within 10 days thereof.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## GEORGIA POWER COMPANY, PROJECT NO. 2354

### ORDER GRANTING REHEARING FOR PURPOSE OF GIVING FURTHER CONSIDERATION

(Issued May 26, 1967)

Application for rehearing of the Commission's Opinion No. 518 and order issued March 29, 1967, 37 FPC 620, was filed on April 27, 1967, by the Georgia Power Company, applicant for a license under the Federal Power Act for constructed Project No. 2354, known as the North Georgia Development.

*The Commission finds:*

In order to afford additional time for consideration of the matters set forth in Georgia Power's application for rehearing, it is appropriate and proper in the administration of the Federal Power Act that the rehearing requested by the applicant be granted.

*The Commission orders:*

The rehearing sought by the Georgia Power Company is granted for the purpose of further considering the issues raised in its application.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## IOWA PUBLIC SERVICE COMPANY, DOCKET NO. E-7343

### ORDER AUTHORIZING ACQUISITION OF FACILITIES

(Issued May 26, 1967)

Iowa Public Service Company (Applicant) filed an application on March 8, 1967, for an order, pursuant to Section 203 of the Federal Power Act, authorizing it to acquire certain electric distribution facilities from the Farmers Electric Company (Farmers).

Applicant is incorporated under the laws of the State of Iowa with its principal place of business office at Sioux City, Iowa, and is engaged primarily in the generation, purchase, transmission, sale at wholesale and distribution of electric energy in 30 counties in northwest and north central Iowa and three counties in eastern South Dakota. Applicant is also engaged in natural gas distribution and in heating and water utility business.

Farmers is a small privately-owned electric utility which operates a small distribution system near the Town of Hudson, Black Hawk County, Iowa. It has no generating facilities and purchases energy to meet its requirements from Applicant. As of the end of 1965, Farmers was serving 106 farm customers and 86 non-farm residential customers. During 1965, these customers purchased 1,748,636 kwh.

Under an agreement entered into February 6, 1967, Applicant agreed to purchase Farmers' distribution lines in place and its inventory of materials and supplies for a cash consideration of $114,000. Application states that the consideration was arrived at by negotiations with Farmers. In addition, it will pay a total of about $50,000 to Farmers' customers for their transformers, meters, yard poles and services. Farmers distribution plant has an estimated original cost depreciated of $42,650 and its materials and supplies have an estimated cost of $5,290, for total net assets of $47,940. The Applicant's payment of $114,000 for net assets of $47,940, will result in the creation of an acquisition adjustment of $66,060. The Applicant proposes to eliminate the acquisition adjustment by a debit to Account 435, Miscellaneous Debits to Surplus.

The application states that Farmers has served farms and non-farm residences in the rural area around the Town of Hudson and southwest of Waterloo, Iowa for a number of years. Recently, a large portion of Farmers' service area was annexed into the corporate limits of the City of Waterloo and a portion into the corporate limits of the Town of Hudson. About one-third of Farmers service area was affected by these annexations.

Applicant further points out that the Iowa Commerce Commission has adopted rules and regulations governing levels of construction, operation and maintenance of electric facilities and has cited Farmers for a number of deficiencies. Farmers has no full-time employees and no maintenance equipment nor does it have the resources to immediately correct the deficiencies to expand its system to meet the growth that is anticipated in its service area.

Applicant states that it has equipment and personnel located at its East Division headquarters in Waterloo and can maintain the facilities to the specifications of the Iowa Commerce Commission. Thus, the maintenance equipment, personnel and facilities are close at hand and can provide the type of service that is in the best interest of the public, and, particularly, the customers of Farmers. Furthermore, it also has sufficient generating capacity to continue to provide for growth in the additional service area.

Farmers has two rate schedules, one for "shareholders", the other a considerable higher rate serving 29 "renters". After the transaction is approved the 29 "renter" customers would be served under Applicant's residential rate which is lower. Decreases in charges, on a monthly basis, would range from $.90 (27%) to $9.21 (24%). The Farmers customers now being served under the "shareholder" rates face increased charges. Fifteen of these customers on newly constructed facilities would have an immediate increase ranging from $.86 (14%) at 200 kwh monthly consumption to $2.36 (12.9%) at 800 kwh monthly consumption. The remainder of Farmers' customers would not have their rates changed until the Farmers' system is rehabilitated to meet the Iowa Commission standards which is not expected to be completed for several years.

Written notice of the application has been given to the Iowa State Commerce Commission and to the South Dakota Public Utilities Commission and to the Governor of each of those States. Notice has also been given by publication in the Federal Register on March 25, 1967 (32 F.R. 4554), stating that any person desiring to be heard or to make any protest with reference to the application should on or before April 10, 1967, file petitions or protests with the Federal Power Commission, Washington, D.C. 20426. No petition or protest or request to be heard in opposition to the granting of the application has been received. By order issued March 7, 1967, the Iowa State Commerce Commission approved the transaction.

*The Commission finds:*

(1) Applicant, a corporation, is a public utility within the meaning of Section 203 of the Federal Power Act, subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued August 22, 1963, *Iowa Public Service Company*, Docket No. E-7115 (30 FPC 536).

(2) By the proposed acquisition as described above, Applicant will acquire and merge or consolidate its facilities subject to the jurisdiction of the Commission with facilities of Farmers, another person, within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(3) The proposed acquisition of facilities by Applicant, as described above, upon the terms and conditions set forth in the application, and subject to the provisions of this order will be consistent with the public interest as expressed in Section 203 of the Federal Power Act.

*The Commission orders:*

(A) The proposed acquisition by Applicant of the aforementioned electric facilities, all as described above, is authorized and approved upon the terms and conditions and for the purposes set forth in the application subject to the provisions of this order.

(B) Applicant shall record the proposed transaction herein authorized and the facilities and properties referred to above, as provided in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees.

(C) The authorization shall expire unless the transaction herein authorized and approved is consummated within 90 days from the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuations, estimates or determinations of cost, or any matter whatsoever now pending or which may come before this Commission or any other regulatory body.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC., DOCKET NO. CP67-211 (PHASE I)

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 26, 1967)

On January 25, 1967, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Applicant) filed in Docket No. CP67-211 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities in order to increase its system annual average day delivery capacity and to sell and deliver additional volumes of natural gas to meet the increased requirements of existing customers beginning with the winter season of 1967-68, all as more fully set forth in the application.

Specifically, Applicant proposes to construct and operate approximately 63.4 miles of 30-inch loop pipelines in New York; 1.8 miles of 24-inch pipeline in Pennsylvania; 10.8 miles of 6-inch, 8-inch, and 12-inch loop pipeline and pipeline replacement on delivery laterals in New England; 12.7 miles of 12-inch gas supply gathering lines in the offshore area of Louisiana; and a 5,800 horsepower addition in its existing Compressor Station No. 507F in Louisiana.

The mainline facilities proposed are to be utilized for the purpose of increasing Applicant's system peak day capability east of its New York and Pennsylvania storage fields. Applicant proposes no increase in its system-wide capacity, but will render the increased service, on a design day basis, from unallocated capacity generated on its system through the facilities authorized by the Commission in orders issued in Docket Nos. CP66-180 and CP66-303 on May 10, 1966, 35 FPC 715, and July 20, 1966, 36 FPC 137, respectively.

The net increased natural gas service proposed to be rendered through the operation of the subject facilities is summarized as follows:

| Customer class | Increased peak day quantity | Related design day capacity |
|---|---|---|
| General service | 42,602 | 23,071 |
| Contract demand | 38,040 | 38,040 |
| Nonjurisdictional | (14,087) | (14,087) |
| Subtotal | 66,555 | 47,024 |
| Storage service | 7,000 | ---------- |
| Net increase | 73,555 | 47,024 |

Said increased natural gas service will be rendered pursuant to Applicant's existing FPC Tariff and Rate Schedules.

The total estimated direct cost of Applicant's proposed facilities is $13,626,-500. The project will be financed initially with existing revolving credit funds.

Ultimately, the cost will be included as a part of permanent financing by issuance of pipeline bonds, debentures, or other conventional means.

After due notice The Brooklyn Union Gas Company, Consolidated Edison Company of New York, Inc., and Orange and Rockland Utilities, Inc., filed petitions for leave to intervene to protect their interests only in the event formal hearings were held in this proceeding. On March 24, 1967, Carlisle-Concord Neighborhood Association and the Town of Carlisle, Massachusetts, filed motions to intervene late and petitions for leave to intervene opposing the construction and operation of proposed facilities not involved herein. On March 27, 1967, Town of Sudbury, Massachusetts, filed a similar motion to intervene late and a petition to intervene also relative to facilities not involved herein.

By order of the Commission issued concurrently herewith, hearings have been scheduled and all the above-named petitioners have been permitted to become interveners with respect to matters affecting asserted rights and interests as specifically set forth in their petitions to intervene. The portion of the subject application for which hearings have been scheduled is that related only to matters involving the construction and operation of facilities, comprising some 35 miles of 24-inch loop pipeline proposed to be constructed between Hopkinton and Dracut, Massachusetts, not authorized herein. That portion of the application has been denominated Phase II.

No other petitions to intervene, notices of intervention or protests have been filed.

At a hearing held on May 25, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Tennessee Gas Pipeline Company, a Division of Tenneco Inc., a Delaware corporation with its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of July 15, 1947, in Docket No. G–910 (6 FPC 777).

(2) The facilities hereinbefore described and as more fully described in the application in this proceeding are proposed to be used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the transportation and sale of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The construction and operation of the proposed facilities and the transportation and sale of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4), (e) (f) and (g) of Section 157.20 of said Regulations.

(5) The certificate hereinafter issued should be conditioned upon Applicant's filing with the Commission, in accordance with the Commission's Regulations under the Natural Gas Act, appropriate revised service agreements

with those customers to whom increased natural gas service will be rendered pursuant to the authorization contained herein.

(6) The certification hereinafter issued should not be implied or construed as approval of Applicant's petition to amend filed on March 7, 1967, in Docket No. CP66-180 seeking to amend further the order issued in said docket on May 10, 1966, and amended on December 28, 1966.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to Applicant authorizing the construction and operation of the facilities and the transportation and sale of natural gas as hereinbefore described and as more fully set forth in the application in this proceeding, except those comprising some 35 miles of 24-inch loop pipeline proposed to be constructed between Hopkinton and Dracut, Massachusetts, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation and the transportation and sale of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act within one year from the date of this order.

(D) The certificate issued by paragraph (A) above is conditioned upon Applicant's filing with the Commission, in accordance with the Commission's Regulations under the Natural Gas Act, appropriate revised service agreements with those customers to whom increased natural gas service will be rendered pursuant to the authorization contained therein.

(E) The certificate issued by paragraph (A) above shall not be implied or construed as approval of Applicant's petition to amend filed on March 7, 1967, in Docket No. CP66-180 seeking to amend further the order issued in said docket May 10, 1966, and amended on December 28, 1966.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## UNION ELECTRIC COMPANY AND IOWA SOUTHERN UTILITIES COMPANY, DOCKET NO. E-7324

### ORDER AUTHORIZING ACQUISITION OF FACILITIES

(Issued May 26, 1967)

Union Electric Company (Union Electric) filed an application on November 10, 1966, and supplements in letter form on February 16 and March 29, 1967, and Iowa Southern Utilities Company (Iowa Southern) filed a Certificate of Concurrence on December 1, 1966, and supplements in letter form on February 17 and May 8, 1967, for an order, pursuant to Section 203 of the Federal Power Act, authorizing the sale of certain electric transmission facilities by Union Electric and the acquisition of the same facilities by Iowa Southern.

Union Electric is incorporated in the State of Missouri and is qualified to do business in the States of Missouri, Illinois and Iowa. It is engaged primarily in the generation, transmission, distribution and sale of electric energy in a service area that includes the City of St. Louis and 10 counties in Missouri; 5 counties in Illinois and 4 counties in Iowa.

Iowa Southern is incorporated under the laws of the State of Delaware and is qualified to do business in the State of Iowa. It is engaged primarily in the generation, purchase, transmission and sale of electric energy in 24 counties in south central and southeast Iowa.

The facilities involved in this transaction consist of a 2.46 mile section of a double-circuit 69 kv transmission line extending from Union's Lee substation to Iowa Southern's Agency Street substation and metering equipment located at the Agency Street substation in Burlington, Iowa. The amount of $60,677 which Iowa Southern has agreed to pay for the facilities was arrived at by negotiation. The line section is part of a 17 mile, 69 kv line extending from Union's Lee substation to Iowa Southern's Agency Street substation in Burlington, Iowa. The line has been used for a number of years to deliver energy to an R.E.A. electric cooperative and Iowa Southern under wholesale agreements.

When Iowa Southern's 212 mw steam-electric generating plant at Burlington, Iowa is completed, the company will no longer need to purchase energy from Union as a wholesale customer and at times will have excess capacity and energy for sale. The two systems have therefore terminated the wholesale agreement as of December 31, 1966, and entered into an interchange agreement. This agreement provides, among other things, for a point of interconnection at the southern terminus of the facilities to be sold by Union. The facilities are located within Iowa Southern's service area and are not now used by Union to supply electric energy to any other customers.

The facilities in question, with other facilities Iowa Southern is acquiring and building, will be used in coordination between the Iowa Pool, which includes Iowa Southern, and the Illinois-Missouri Pool which includes Union. The facilities will also be useful to Iowa Southern in serving its Burlington area from the new Burlington plant.

The consideration for the transfer of the facilities will be $60,677. The facilities have an original cost depreciated of $27,182. On the books of Union Electric, the gross gain of $33,495 ($60,677–$27,182) will be credited to Account 421, Miscellaneous Non-operating Income, and income taxes of $10,800 on this gross gain will be debited to the same account, leaving a net gain of $22,695 in this account. On the books of Iowa Southern, an acquisition adjustment of $33,495 will be eliminated by a debit to Account 426, Other Income Deductions.

Written notice of the application has been given to the Missouri Public Service Commission, the Iowa State Commerce Commission and the Illinois Commerce Commission and to the Governors of those States. Notice was also published in the Federal Register on November 29, 1966 (31 F.R. 14998) stating that any person desiring to be heard or to make any protest with reference to the application, should on or before December 22, 1966, file petitions or protests with the Federal Power Commission, Washington, D.C. 20426. No petition or protest or request to be heard in opposition to the granting of the application has been received.

*The Commission finds:*

(1) Union Electric, a corporation, is a public utility within the meaning of Section 203 of the Federal Power Act, subject to the jurisdiction of the Commission, as heretofore described in the Commission's order issued August 15, 1966, in *Union Electric Company, et al.,* Docket No. E-7299 (36 FPC 447).

(2) Iowa Southern, a corporation, is a public utility within the meaning of Section 204 of the Federal Power Act subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued July 1, 1963, *Iowa Southern Utilities Company*, Docket No. E-7103 (30 FPC 1).

(3) By the proposed transaction, Union Electric will dispose of part of its facilities, subject to the jurisdiction of the Commission, which have a value in excess of $50,000 and Iowa Southern in acquiring such facilities, will merge or consolidate its facilities, subject to the jurisdiction of the Commission, with those of Union Electric, another person, all within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(4) The proposed sale of facilities by Union Electric and the proposed acquisition of these facilities by Southern Iowa, as described above, upon the terms and conditions set forth in the application and subject to the provisions of this order will be consistent with the public interest as expressed in Section 203 of the Federal Power Act.

(5) The period of public notice given in this matter is reasonable.

*The Commission orders:*

(A) The proposed sale by Union Electric and the proposed acquisition by Iowa Southern of the aforementioned substation and transmission line facilities, all as described above, are authorized and approved upon the terms and conditions and for the purposes set forth in the application subject to the provisions of this order.

(B) Union Electric and Iowa Southern shall record the proposed transaction herein authorized and the facilities and properties referred to above as provided in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees.

(C) This authorization shall expire unless the transaction herein authorized and approved is consummated within 90 days from the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuations, estimates or determinations of cost, or any matter whatsoever now pending or which may come before this Commission or any other regulatory body and nothing herein shall be construed as an acquiescence by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted by the Commission.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## FLORIDA GAS TRANSMISSION COMPANY, DOCKET NO. CP65-393

### ORDER GRANTING INTERVENTION AND APPROVING SETTLEMENT AND TERMINATING PROCEEDINGS

(Issued May 29, 1967)

On May 1, 1967, we granted rehearing on our own motion in these proceedings to permit further consideration thereof. On May 12, 1967, Florida Gas Transmission Company filed a Settlement Stipulation and Agreement reflecting acceptance thereof by Florida Gas Transmission Company, Pan American

Petroleum Corporation, Austral Oil Company, and Florida Power & Light Company. On May 22, 1967, the New York Public Service Commission, which had previously filed a notice of intervention and an application for rehearing, filed a Response to the Settlement Stipulation and Agreement referred to above, wherein it stated that it would interpose no formal objection to the effectuation of the Settlement Stipulation and Agreement, and if the Commission approved such settlement, it would file no petition to review such order.

We have reached the conclusion that under the circumstances here presented allowing the New York Public Service Commission to intervene as a party is in the public interest, and we so order below. We also conclude that acceptance of the Settlement Stipulation and Agreement proposed as a resolution of this matter by the parties is in the public interest and serves the public convenience and necessity.

As in other cases in which we have approved settlements, this order is without prejudice to any finding or order which has been, or hereafter may be, entered by the Commission, and is without prejudice to any claim or contention which has been, or hereafter may be, made by the parties, the Commission staff, or any other person or party affected by this order, in any proceeding now pending, or hereafter instituted.

*The Commission finds:*

(1) The Settlement Stipulation and Agreement is in the public interest, and it is appropriate in carrying out the provisions of the Natural Gas Act that it be approved and made effective as hereinafter ordered.

(2) That it is in the public interest to allow the intervention of the New York Public Service Commission.

(3) That Florida Gas has complied with the first two sentences of paragraph (B)(4) of the order of March 1, 1967, 37 FPC 424, relating to acceptance of the certificate and effectiveness of the MMBtu Purchase Contract.

*The Commission orders:*

(A) That the New York Public Service Commission is entered as a party in these proceedings.

(B) The settlement of the proceedings on the basis of the Settlement Stipulation and Agreement is approved and made effective subject to the following terms and conditions:

(1) Paragraph (B)(1) of the order of March 1, 1967, shall be amended to read as follows:

> The gas sold by Pan American Petroleum Corporation and Austral Oil Company to FPL under the MMBtu Purchase Contract of March 12, 1965, as amended, shall be produced entirely within the Southern Louisiana area, Mississippi and other downstream States; that from the date deliveries commence through ten years from such date the proportions of gas produced in the off-shore fields (Federal Domain) of Southern Louisiana shall not exceed 82 percent of the total amount of gas produced in the South Louisiana area. The balance of the takes shall be over the ten-year period. The ratio of the off-shore on-shore takes from the Southern Louisiana area shall be reported to the Commission annually.

(2) Pursuant to the terms of the Settlement Stipulation and Agreement, after the expiration of 15 years from the date of the initial delivery of gas to FPL pursuant to the aforementioned contract, the price for gas sold and delivered shall be equal to the applicable "just and reasonable"

> Area Rate established by the Federal Power Commission from time to time for sales of gas in interstate commerce of the equivalent "vintage" of the gas sold and delivered under the MMBtu Purchase Contract. If there is no applicable "just and reasonable" Area Rate, or if there is a "just and reasonable" Area Rate which is not being generally applied to sales of gas in interstate commerce currently being made in the same general geographical area as the sales made under the MMBtu Purchase Contract, the price for gas sold and delivered shall be the then existing highest price approved by the Federal Power Commission for interstate sales made from the same general geographical area of equivalent "vintage" as gas sold and delivered under the MMBtu Purchase Contract. Different sources of gas shall be considered to bear different "vintage" based on dates of initial delivery to the Buyer under the MMBtu Purchase Contract.

(C) This order is without prejudice to any finding or order which has been, or hereafter may be, entered by the Commission, and is without prejudice to any claim or contention which has been, or hereafter may be made by the parties, the Commission staff, or any other person or party affected by this order, in any proceeding now pending, or hereafter instituted.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## ALGONQUIN GAS TRANSMISSION COMPANY, DOCKET NO. CP67-268

### FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT OF FACILITIES AND ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 31, 1967)

On March 17, 1967, Algonquin Gas Transmission Company (Applicant) filed in Docket No. CP67-268 an application pursuant to Sections 7(b) and 7(c) of the Natural Gas Act for permission and approval of the Commission to abandon certain natural gas facilities and for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities for the transportation of natural gas in interstate commerce, all as more fully set forth in the application.

Specifically, Applicant seeks permission and approval of the Commission to abandon approximately 1.19 miles of 26-inch pipeline, part of its J-1 pipeline system in Belmont and Arlington, Massachusetts. Said pipeline, operating subject to a revocable permit, runs through a portion of the roadbed of Massachusetts State Road 2, which is scheduled for regrading and widening. Applicant states that it is not economically feasible to reclaim this section of pipeline as the cost of reclamation would exceed its salvage value.

Accordingly, in order to replace this section of its J-1 system, Applicant seeks authorization to construct and operate approximately 1.21 miles of 30-inch pipeline. In anticipation of expanded service needs, Applicant proposes to use 30-inch pipeline to replace the aforementioned 26-inch pipeline and thereby avoid duplicate construction costs in the future.

The total estimated cost of Applicant's proposed project is $589,600, said cost to be financed through retained earnings.

After due notice, no petition to intervene, notice of intervention or protest has been filed.

At a hearing held on May 25, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Algonquin Gas Transmission Company, a Delaware corporation, having its principal place of business in Boston, Massachusetts, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of February 26, 1951, in Docket No. G–1319 (10 FPC 35).

(2) The facilities hereinbefore described and as more fully described in the application in this proceeding are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed construction and operation of facilities by Applicant are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) The facilities to be abandoned, as hereinbefore described and as more fully described in the application in this proceeding, are used in the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and abandonment of such facilities is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(6) The abandonment by Applicant, as hereinbefore described, is permitted by the public convenience and necessity and an order approving same should be issued as hereinafter ordered.

(7) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of the Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to Applicant, Algonquin Gas Transmission Company, authorizing the construction and operation of facilities as hereinbefore described and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of the Regulations.

(C) The facilities authorized by paragraph (A) above shall be constructed and placed in actual operation as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within one year from the date of this order.

(D) Permission for and approval of the abandonment by Applicant of the facilities hereinbefore described, as more fully described in the application in this proceeding, are granted.

(E) Applicant shall advise the Commission of the date of abandonment of said facilities within 10 days thereof.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## BLUE DOLPHIN PIPE LINE COMPANY, DOCKET NO. CP67–246

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 31, 1967)

On March 1, 1967, Blue Dolphin Pipe Line Company (Applicant) filed in Docket No. CP67–246 an application pursuant to Section 7(c) of the Natural Gas Act, as implemented by Section 157.7(c) of the Regulations under the Act, for a certificate of public convenience and necessity authorizing the construction, during the twelve-month period commencing March 1, 1967, and operation of natural gas facilities for miscellaneous rearrangements not resulting in any change of the transportation service rendered by means of the facilities involved, all as more fully set forth in the application in this proceeding.

Applicant states that it provides transportation services for Shell Oil Company and Dow Chemical Company from offshore Texas to Freeport, Texas, and that it anticipates the need for certain as yet unascertained rearrangements of its transportation facilities. Such rearrangements will not result in any change in the transportation services rendered by Applicant.

The total cost of facilities proposed under this application will not exceed a maximum of $10,000.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on May 25, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Blue Dolphin Pipe Line Company, a Texas corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of June 1, 1965, in Docket No. CP65–323 (33 FPC 1141).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(6) The authorization hereinafter granted should be limited to construction during the twelve-month period commencing March 1, 1967, and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $10,000.

(7) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with Section 157.7(c)(8) of the Commission's Regulations under the Natural Gas Act.

*The Commission orders:*

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, Blue Dolphin Pipe Line Company, to construct during the twelve-month period commencing March 1, 1967, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities for miscellaneous rearrangements as hereinafter provided.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(C) The authorization granted in paragraph (A) above is limited to construction during the twelve-month period commencing March 1, 1967, and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $10,000.

(D) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with Section 157.7(c)(8) of the Commission Regulations under the Natural Gas Act.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## EASTERN SHORE NATURAL GAS COMPANY, DOCKET NO. CP67-282

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 31, 1967)

On March 28, 1967, Eastern Shore Natural Gas Company (Applicant) filed in Docket No. CP67-282 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing an increase totaling 560 Mcf in the firm daily delivery obligations of two existing customers and a decrease of a like amount in the firm daily delivery obligation of another existing customer, all as more fully set forth in the application in this proceeding.

Specifically, Applicant proposes the following:

(1) To increase the firm delivery obligation for Citizens Gas Company (Citizens) from 1560 Mcf per day to 1820 Mcf per day. This increase is necessary for Citizens to meet the natural gas requirements of a new shopping center and a new industrial customer.

(2) To increase the firm delivery obligation for direct consumption at the municipally-owned power plant of the City of Easton, Maryland from 250 Mcf per day to 550 Mcf per day.

(3) To reduce the present firm delivery obligation for the Stauffer Chemical Company (Stauffer) from 6550 Mcf per day to 5990 Mcf per day from the date of issuance of this order until October 1, 1967. By letter agreement, dated March 20, 1967, Stauffer has agreed to this temporary reduction. Applicant will utilize, on an interim basis, the gas resulting from this reduction to supply the increased needs of Citizens and Easton. Applicant anticipates a permanent increased supply from its sole supplier, Transcontinental Gas Pipe Line Corporation.

No additional facilities are required for the subject proposals.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on May 25, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Eastern Shore Natural Gas Company, a Delaware corporation having its principal place of business in Salisbury, Maryland, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued November 29, 1957, in Docket No. G-12200 (18 FPC 710).

(2) The transportation and/or sale of natural gas hereinbefore described as more fully described in the application in this proceeding, will be in interstate commerce, subject to the jurisdiction of the Commission, and such transportation and/or sale by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed transportation and/or sale of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3) and (e) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Eastern Shore Natural Gas Company, to transport and/or sell natural gas as hereinbefore described, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(3) and (e) of Section 157.20 of such Regulations.

(C) The proposed transportation and/or sale of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within one month from the date on which this order issues.

(D) This certificate shall not entitle Easton to whom firm deliveries are authorized herein to any priorities to additional gas for meeting any future increases in its electric generating plant requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

(E) Applicant shall execute and file with the Commission amended service agreements with the City of Easton and Citizens in accordance with the Commission's Regulations.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## IOWA SOUTHERN UTILITIES COMPANY, DOCKET NO. E-7351

### ORDER AUTHORIZING THE ISSUANCE OF FIRST MORTGAGE BONDS

(Issued May 31, 1967)

Iowa Southern Utilities Company (Applicant) filed an application on May 2, 1967, seeking an order pursuant to Section 204 of the Federal Power Act authorizing the issuance and sale at competitive bidding of $8,000,000 principal amount of First Mortgage Bonds, due 1997.

Applicant is incorporated under the laws of the State of Delaware with its principal business office at Centerville, Iowa, and is engaged in the electric utility business in 24 counties in south central and southeast Iowa.

The Bonds are to be dated as of June 1, 1967, and are to mature on June 1, 1997. The interest rate will be determined by the most favorable bid received and accepted. They are to be issued under and secured by Applicant's Indenture dated February 1, 1923, to the Northern Trust Company and Harold H. Rockwell, as Trustees, as supplemented and to be further supplemented by a new Supplemental Indenture to be dated as of June 1, 1967.

On or about June 1, 1967, Applicant proposes to invite sealed written bids for the purchase of the Bonds by newspaper publication and by a public invitation for bids for the purchase of the Bonds, setting forth terms and conditions relating thereto.

All bids must be submitted on the Form of Bid furnished by the Applicant. Each bid must be for the purchase of all the Bonds and may be made by a single bidder or by a group of bidders. Bids must be presented to the Applicant at the office of Middle West Service Company, 69 West Washington Street, 33rd Floor, Chicago, Illinois, before 11 a.m. Chicago time, on Thursday, June 8, 1967, and be accompanied by deposits of $80,000.

Each bid shall specify the interest rate to be borne by the Bonds, which rate shall be a multiple of 1/8th of 1%; and the price to be paid to the Applicant, which price shall not be less than 98% of principal amount and not more than 103% of principal amount. Each bid shall provide that accrued interest from June 1, 1967 to date of payment and delivery will be paid by the purchaser or purchasers to the Applicant.

Unless the Applicant shall reject all bids or exclude a bid or bids for reasons set forth in the Statement of Terms and Conditions Relating to Bids, it will accept the bid which provides for the lowest annual cost of money.

The Applicant's construction program has been financed in part by the issuance of short-term notes.* Notes outstanding are expected to total $9,600,000 at the time of the sale of the new bonds. The proceeds from the $8,000,000 new Bonds will be used to discharge the same principal amount of short-term notes. The Applicant's construction program has an estimated cost of $35,943,200, of which $8,666,800 was spent prior to December 31, 1966, and expenditures for 1967 and 1968 are estimated at $19,895,300 and $7,381,100, respectively. The principal item in this program, construction work on the 212 mw Burlington Generating Station, will require an expenditure of approximately $18,300,000 during 1967 and 1968.

Written notice of the application has been given to the Iowa State Commerce Commission and the Governor of that State. Notice has also been given by publication in the Federal Register on May 16, 1967 (32 F.R. 7304), stating that any person desiring to be heard or to make any protest with reference to the application, should file petitions or protests on or before May 19, 1967, with the Federal Power Commission, Washington, D.C. 20426. No protest, petition or request to be heard in opposition to the granting of the application has been received.

*The Commission finds:*

(1) Applicant, a corporation, is a public utility within the meaning of Section 204 of the Federal Power Act, subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued July 1, 1963, *Iowa Southern Utilities Company*, Docket No. E-7103 (30 FPC 1).

(2) The proposed issuance and sale of Bonds, as described above, will constitute an issuance of securities within the purview of Section 204 of the Act.

(3) Applicant is not organized and operating in a State under the laws of which the security issue here involved is regulated by a State commission within the meaning of Section 204(f) of the Act; and the proposed issuance of securities is, therefore, not exempt by virtue of that Section from the requirements of Section 204 of the Act.

(4) The proposed issuance and sale of Bonds, as hereinafter authorized, will be for a lawful object, within the corporate purposes of Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance by Applicant of service as a public utility and which will not impair its ability to perform that service, and is reasonably necessary and appropriate for such purposes.

(5) The period of public notice is reasonable.

*The Commission orders:*

(A) The proposed issuance and sale of Bonds, upon the terms and conditions and for the purposes specified in the application, as described above, are authorized, subject to the provisions of this order.

(B) The proposed issuance and sale of Bonds at competitive bidding shall not to be consummated until:

(i) Applicant shall have amended its application pursuant to the requirements of Section 34.2(g) of the Commission's Regulations under the Federal Power Act relating to compliance with competitive bidding requirements, and Section 34.2(h) of those Regulations relating to affiliation and shall have either filed such amendments or shall have mailed them and advised the Commission by telephone and telegraph, as contemplated in Section 34.9 of the Regulations;

---

* The Commission approved the issuance of these short-term Notes by order issued April 28, 1967, Docket No. E-7277, 37 FPC 827.

(ii) The Commission, by further order, shall have approved the price to be received by Applicant for the proposed issuance of Bonds and the interest rate thereof.

(C) This authorization shall expire unless the transaction hereby authorized is consummated within 90 days from the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determinations of cost, or any other matter whatsoever now pending or which may come before this Commission.

(E) Nothing in this order shall be construed to imply any guarantee or obligation on the part of the United States with respect to any securities to which this order relates.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## K. R. AND T. GAS COMPANY AND CITIES SERVICE GAS COMPANY, DOCKET NO. CP67-275

### FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued May 31, 1967)

On March 23, 1967, K. R. and T. Gas Company (Applicant), filed in Docket No. CP67-275 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Cities Service Gas Company (Respondent) to establish physical connection of its facilities with the facilities of Applicant and to sell and deliver to Applicant up to 125 Mcf of natural gas for resale and distribution in Elmdale, Kansas, and environs, all as more fully set forth in the application.

Specifically, Applicant proposes to relocate approximately 2,600 feet of its existing 2-inch pipeline in order to interconnect its system with Respondent's 26-inch transmission line at a point approximately 1.63 miles north of Elmdale.

Applicant's estimated third year annual and peak day requirements are 15,000 Mcf and 125 Mcf of natural gas, respectively. Said volumes of natural gas will be purchased under the terms of Respondent's effective rate schedule F-1 at an average rate of 28 cents per Mcf.

The total estimated cost of Applicant's proposed project is $500, which cost will be financed from cash funds on deposit at the Peoples Exchange Bank, Elmdale, Kansas.

On April 12, 1967, Kansas State Corporation Commission filed a notice of intervention, stating that it does not request a formal hearing but asked to be apprised of all matters pertaining to the subject application. On May 8, 1967, the Kansas Commission withdrew its notice of intervention, declaring that it had obtained the information it sought. No other notice of intervention, petition to intervene or protest has been filed.

On May 1, 1967, Respondent filed an answer to the application stating that it has no objection to the issuance by the Commission of an order as requested by Applicant.

*The Commission finds:*

(1) Respondent, Cities Service Gas Company, a Delaware corporation, having its principal place of business in Oklahoma City, Oklahoma, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of December 28, 1943, in Docket No. G–298 (4 FPC 471).

(2) Applicant, K. R. and T. Gas Company, a partnership organization organized and existing under the laws of the State of Kansas, is authorized to construct and operate facilities and distribute and sell natural gas as proposed.

(3) It is necessary and desirable in the public interest that Respondent be directed to establish physical connection of its natural gas transmission facilities with the proposed facilities of Applicant and to sell and deliver natural gas to Applicant, as set forth in the application and as hereinafter ordered and conditioned.

(4) This order should be conditioned upon Applicant being prepared to receive natural gas from Respondent, as proposed, within one year from the date on which this order issues.

(5) The requirement that Respondent serve Applicant, as proposed, will not place any undue burden upon Respondent nor impair its ability to render adequate service to its existing customers.

*The Commission orders:*

(A) Respondent is directed to establish physical connection of its natural gas transmission system with the facilities to be constructed by Applicant and to sell and deliver up to 125 Mcf of natural gas per day to Applicant, all as hereinbefore described and as more fully described in the application.

(B) Applicant shall be prepared to receive natural gas from Respondent within one year from the date of this order.

(C) Respondent shall notify the Commission of the commencement of service within 10 days thereof.

(D) Respondent shall execute and file with the Commission a service agreement with Applicant in accordance with the Commission's Regulations.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## MICHIGAN GAS STORAGE COMPANY, DOCKET NO. CP67–230

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 31, 1967)

On February 13, 1967, Michigan Gas Storage Company (Applicant) filed in Docket No. CP67–230 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the establishment of three new delivery points between Applicant and Consumers Power Company (Consumers), the establishment of a new delivery point between Applicant and Panhandle Eastern Pipe Line Company (Panhandle) and the construction and operation of the necessary metering and regulating facilities at the proposed new delivery points, all as more fully set forth in the application.

Applicant seeks authorization for the following three projects:

(1) to establish three new delivery points for the delivery of natural gas between Consumers and Applicant

(i) in section 24, Sylvan Township, Washtenaw County, Michigan,

(ii) in section 8, Grand Blanc Township, Genesee County, Michigan, and

(iii) in Section 21, Genesee Township, Genesee County, Michigan;

(2) to establish a new delivery point for the delivery of natural gas between Panhandle and Applicant in Section 21, Genesee Township, Genesee County, Michigan; and

(3) to construct and operate the necessary metering and regulating facilities at the proposed delivery points in Section 21, Genesee Township, Genesee County, Michigan.

The purpose of the proposed new delivery point in Section 24, Sylvan Township, Washtenaw County, Michigan, is to afford greater security to the systems of Applicant and Consumers and to increase the capacity of said systems.

The purpose of the proposed new delivery points in Section 8, Atlas Township, and Section 21, Genesee Township, Genesee County, Michigan, is to increase the ability of Consumers to deliver natural gas into the Flint, Michigan, area in order to meet increased requirements of Consumers' customers and to assure continuity of service in such area.

Applicant estimates the total cost of the proposed construction at approximately $92,000, said cost to be financed out of funds on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on May 25, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence including the application and exhibits submitted in support of the authorization sought, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Michigan Gas Storage Company, a Delaware corporation having its principal place of business in Jackson, Michigan, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 3, 1946, in Docket No. G–731 (5 FPC 965).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, will be used in the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and the construction and operation thereof and transportation of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid construction and operation of facilities is required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's

compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

***The Commission orders:***

(A) A certificate of public convenience and necessity is issued to Michigan Gas Storage Company in this proceeding, authorizing the construction and operation of facilities, as hereinbefore described and more fully described in the application and exhibits in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 12 months from the date on which this order issues.

---

## OPINION NO. 519-A

## NORTHERN NATURAL GAS COMPANY, DOCKET NOS. CP65-1, CP65-91 AND CP65-338; NATURAL GAS PIPELINE COMPANY OF AMERICA (PHASE II), CP65-169; TRANSWESTERN PIPELINE COMPANY, CP65-208, CP65-236 AND CP65-237

### OPINION AND ORDER DENYING REHEARING

(Issued May 31, 1967)

### *Syllabus*

1. Argument that Commission refused to consider comparative costs of competing projects is rejected. P. 1006.
2. Under most favorable conditions shown in record, indicated immediate cost advantages from acceptance of Transwestern proposal are more than offset by risks of changed circumstances and handicaps to Natural in obtaining gas supplies and competing as a pipeline. P. 1007.
3. If Natural entered into an exchange transaction with Transwestern it could not use a budget-type authorization under Section 157.7(b) of the Regulations as it could if it were connecting supplies to its own system. P. 1007.
4. Commission *denies* rehearing of prior Opinion and order.

Commissioner Ross *dissenting.*

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

O'CONNOR, *Commissioner:*

On May 1, 1967, Transwestern Pipeline Company, and the People of the State of California and the Public Utilities Commission of the State of California filed applications for rehearing of the Commission's Opinion No. 519 and order issued March 30, 1967, 37

FPC 649. In that opinion we granted certificates to Northern Natural Gas Company and Natural Gas Pipeline Company of America to construct and operate pipelines to connect reserves in the Delaware Basin with their pipeline systems. We denied an alternative proposal by Transwestern to transport through its West Texas and Panhandle lateral lines volumes of gas for Northern or Natural.

Transwestern argues that we have refused to consider the comparative costs of the competing projects. To the contrary we set forth in the opinion a number of comparative figures found in the record but determined from our examination of these figures that even assuming the comparisons most favorable to Transwestern, any such cost advantages were outweighed by other considerations which, in our opinion, required certification of the separate line. Specifically, we found that any initial cost advantage the Transwestern proposal would have over the separate Natural proposal would tend to diminish as Natural would require increasing amounts of gas transported, and over the long range would be outweighed by the other factors discussed in the opinion.

Transwestern expresses doubt about Natural's plans for increased takes of gas from the Delaware Basin. We had cited evidence that Natural expects to take at least 200,000 Mcfd on a peak day from existing Permian Basin sources and has plans for securing about 75,000 Mcfd more each year from the same area, so that Natural would reach 450,000 Mcfd in approximately four years. Through the testimony of Natural's witness the record indicates that its reserves in the Indian Basin amount to over a trillion cubic feet. While this figure is not supported by a reserve study, it is in line with known developments in the area,[1] and supports an initial take of 200,000 Mcfd. It is immaterial that at this time Natural may not have reserves sufficient for the entire 450,000 Mcfd. This is a reasonable prediction for the future based on the potentialities of the Delaware Basin area, and as such is relevant to the issue of whether the Transwestern proposal has as great permanent utility as that advanced by Natural and certificated by us.

Transwestern objects to our statements indicating that its proposed rates are subject to future hazards. Transwestern argues that this Commission has authority to regulate its rates and should not reject its application on the basis of what the Commission might do in some future rate proceeding. This misses the point. What we had in mind was the tendency of any initial rate or cost advantage existing in the Transwestern proposal to erode because, as Transwestern itself proclaimed, the circumstances which justify a particular rate would not necessarily exist as the nature of Transwestern's obligations to serve Natural changed.

---

[1] Natural's Form 15 on file with the Commission shows that its reserves as of January 1, 1967, in the Indian Basin, Dagger Draw, and Bluitt Fields amounts to 1,351,396 MMcf at 14.73 psia. We note also that Natural has recently filed an application in Docket No. CP67-298 to increase the capacity of its Permian Basin pipeline to 225,000 Mcfd.

The essence of our decision, in other words, is that under the most favorable conditions shown in the record the indicated immediate cost advantages from acceptance of the Transwestern proposal are more than offset by the risks of changed circumstances and by handicaps to Natural in obtaining gas supplies and competing as a pipeline. Transwestern answers that its service agreement with Natural would provide that if maximum exchange volumes required by Natural become greater than 158,000 Mcfd, it will promptly apply to the Commission for authorization to install and operate the required additional facilities. In our opinion, aside from the fact that Transwestern does not state its price to Natural would or could remain the same after such construction, this would still seriously impair Natural's freedom to contract for more gas supplies, and we do not think that this kind of enforced combination is justified in the circumstances of this case. When we said that, certification of the Transwestern proposal would be detrimental to Natural, contrary to the implications of California, we were considering not only rates, but were looking at the entire situation. We found these detriments more than inconveniences but rather impediments to successful business functioning by Natural.

Contrary to Transwestern's contentions, if Natural entered into an exchange transaction with Transwestern it could not use a budget-type authorization under Section 157.7(b) of our Regulations as it could if it were connecting supplies to its own system. Such an authorization would not be possible because our Regulations require that gas-purchase facilities involved in a budget-type authorization be connected with the applicant's own system (Section 157.7(b)(4)). There is now no more need for oral argument than at the time of our original opinion and order.

*The Commission further finds:*

The assignments of error and grounds for rehearing set forth in the applications for rehearing filed in this proceeding present no facts or legal principles which would warrant any change in or modification of the Commission's Opinion No. 519 and order.

*The Commission orders:*

(A) The applications for rehearing filed by Transwestern and California are denied.

(B) The request for oral argument by Transwestern is denied.

Commissioner Ross *dissenting.*

Ross, *Commissioner, dissenting:*

I would grant Transwestern's application for rehearing because it is clear to me that the majority has failed to make the findings and conclusions required by the Administrative Procedure Act. Section 1007(b) expressly provides that:

> All decisions * * * shall become a part of the record and include a statement of (1) findings and conclusions, as well as the reasons or basis therefor, upon all material issues of fact, law or discretion presented on the record; and (2) the appropriate rule, order, sanction, relief or denial thereof.

Despite all its expostulations about examining cost figures with regard to services to be provided by Transwestern for Natural, the majority never once states in equivalent terms any figures on the so-called offsetting benefits which the consumers of Natural will receive from separate certification of Natural's proposal. Simply stated, the Commission is indorsing Natural's proposal because Natural doesn't want to exchange gas with Transwestern. Henceforth, it will be sufficient, even in a comparative proceeding, for a pipeline to state that it does not want to enter into a transaction that would accrue to the benefit of the consumers unless it wants to. Parties like Transwestern who may present an economically superior proposal will be at a loss to know just what they must offer in a proceeding, if it is at all possible to offer anything, to persuade the Commission to the contrary of the result reached herein.

One additional point merits comment: it was never my intent that budget-type authorizations, which were simply meant to simplify management's relationships with this Commission, should be used to preclude an exchange transaction. The majority's resort to such an argument seems to support further my belief that what the majority really is rejecting in this case is the concept of exchange transaction between pipelines upon order of the Commission rather than a comparison of Transwestern's proposal to Natural's.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP67-250

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 31, 1967)

On March 6, 1967, Northern Natural Gas Company (Applicant) filed in Docket No. CP67-250 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities, all as more fully set forth in the application.

Applicant seeks authorization to construct and operate a 7,250 horsepower compressor unit at its Beaver, Oklahoma, Compressor Station to compress volumes of mainline natural gas, and to rearrange station piping to convert 3—2,000 horsepower units from mainline to field compressor service. The proposals will enable Applicant to compress the gas from local sources and meet gas purchase obligations under contracts with producers.

Applicant estimates the cost of the proposed construction at approximately $2,419,900, which will be defrayed out of internal sources.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on May 25, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto submitted in support of the authorization sought, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Northern Natural Gas Company, a Delaware corporation having its principal place of business in Omaha, Nebraska, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 6, 1943, in Docket No. G–280 (3 FPC 967).

(2) The facilities hereinbefore described, as more fully described in the application herein, will be used in the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and the construction and operation thereof are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The aforesaid proposed construction and operation of facilities is required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to Applicant authorizing the construction and operation of facilities, as hereinbefore described and as more fully described in the application and exhibits filed in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized by paragraph (A) above shall be constructed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 12 months from the date on which this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## O. F. & R. OIL COMPANY, DOCKET NO. CS67-48

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING SMALL PRODUCER CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY, CANCELLING FPC GAS RATE SCHEDULES, AND TERMINATING CERTIFICATES

(Issued May 31, 1967)

On February 23, 1967, O. F. & R. Oil Company filed in Docket No. CS67-48 an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.40 of the Regulations thereunder for a small producer certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce from the Permian Basin area of Texas and New Mexico, all as more fully set forth in the application.

Applicant is presently authorized to sell natural gas in interstate commerce subject to the jurisdiction of the Commission from the Permian Basin area; therefore, the small producer certificate issued herein shall be effective on the date of this order, the certificates heretofore issued to Applicant for sales from the Permian Basin area will be terminated, and the related rate schedules will be cancelled.

In accordance with the principles set forth in the order issued February 6, 1967, 37 FPC 281, in *Rodman and Late, et al.*, Docket No. CS66-48, *et al.*, Applicant herein, pending judicial review of Opinion No. 468, 34 FPC 159, will be permitted to file for above-ceiling rates. However, before collecting an above-ceiling rate Applicant will be required to file a notice of change in rate, together with any amendments thereto, relating to such sale. Any such notice of change in rate will be subject to suspension pursuant to Section 4(e) of the Natural Gas Act.

After due notice, no petition to intervene, notice of intervention, or protest to the granting of the application has been received.

At a hearing held on May 25, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant is engaged in the sale of natural gas in interstate commerce for resale for ultimate public consumption, subject to the jurisdiction of the Commission, and is, therefore, a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission.

(2) The sales of natural gas hereinbefore described, as more fully described in the application herein, will be made in interstate commerce subject to the jurisdiction of the Commission, and such sales by Applicant, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules, and regulations of the Commission thereunder.

(4) Applicant is an independent producer of natural gas who is not affiliated with natural gas pipeline companies and has not made jurisdictional sales during the preceding calendar year exceeding 10,000,000 Mcf of natural gas.

(5) The sales of natural gas by Applicant, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are required by the public convenience and necessity, and a small producer certificate of public convenience and necessity therefor should be issued as hereinafter ordered and conditioned.

(6) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the certificates heretofore issued to Applicant for sales from the Permian Basin area should be terminated and the related rate schedules should be cancelled.

*The Commission orders:*

(A) A small producer certificate of public convenience and necessity is issued upon the terms and conditions of this order authorizing the sale for resale and delivery of natural gas in interstate commerce by Applicant from the Permian Basin area of Texas and New Mexico, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, all as hereinbefore described and as more fully described in the application in this proceeding.

(B) The certificate granted in paragraph (A) above is not transferable and shall be effective only so long as Applicant continues the acts or operations hereby authorized in accordance with the provisions of the Natural Gas Act and the applicable rules, regulations, and orders of the Commission, and particularly,

(a) The subject certificate shall be applicable only to all future "small producer sales," as defined in Section 157.40(a)(3) of the Regulations under the Natural Gas Act, from the Permian Basin area;

(b) Sales shall not be at rates in excess of those set forth in Section 157.40(b)(1) of the Regulations under the Natural Gas Act; however, Applicant may file notices of changes in rate for any contractually authorized rates in excess of the ceiling rates, which increased rates shall be subject to suspension pursuant to Section 4(e) of the Natural Gas Act and subsequently may be rejected as of the date of filing, as provided by the Order Granting Relief issued February 6, 1967, in Docket No. CS66-48, *et al.;*

(c) Applicant shall file annual statements pursuant to Section 154.104 of the Regulations under the Natural Gas Act.

(C) The certificate granted in paragraph (A) above shall remain in effect for small producer sales until the Commission on its own motion or on application terminates said certificate because Applicant no longer qualifies as a small producer or fails to comply with the requirements of the Natural Gas Act, the regulations thereunder, or the terms of the certificate. Upon such termination Applicant will be required to file separate certificate applications and individual rate schedules for future sales. To the extent compliance with the terms and conditions of this order is observed, the small producer certificates will still be effective as to those sales already included thereunder.

(D) The grant of the certificate issued in paragraph (A) above shall not be construed as a waiver of the requirements of Section 7 of the Natural Gas Act or Part 157 of the Commission's Regulations thereunder, and is without prejudice to any findings or orders which have been or may hereafter be made by the Commission in any proceedings now pending or hereafter instituted by or against Applicant. Further, our action in this proceeding shall not foreclose nor prejudice any future proceedings or objections relating to the operation of any price or related provisions in the gas purchase contracts herein involved. Nor shall the grant of the certificate aforesaid for service to the particular customers involved imply approval of the terms of the contracts, particularly as to the cessation of service upon termination of said contracts as provided by Section 7(b) of the Natural Gas Act. Nor shall the grant of the certificate aforesaid be construed to preclude the imposition of any sanctions pursuant to the provisions of the Natural Gas Act for the unauthorized commencement of any sales subject to said certificate.

(E) The certificate issued herein shall be effective on the date of this order.

(F) The certificates heretofore issued to Applicant in Docket Nos. G–19681 and CI67–310 are terminated and Applicant's FPC Gas Rate Schedule Nos. 1 and 2 are cancelled.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## SHENANDOAH GAS COMPANY, DOCKET NO. CP67–273

### FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT AND ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 31, 1967)

On March 22, 1967, Shenandoah Gas Company (Applicant) filed in Docket No. CP67–273 an application pursuant to Sections 7(b) and 7(c) of the Natural Gas Act for permission and approval to abandon certain facilities in Berkeley County, West Virginia, and for a certificate of public convenience and necessity authorizing certain other facilities for the transportation and sale of increased volumes of natural gas on an interruptible basis to Continental Clay Products Company (Continental), an industrial customer in Berkeley County, West Virginia, all as more fully set forth in the application.

Applicant seeks authorization (1) to abandon 200 feet of 2-inch I.D. steel pipe together with existing regulators and metering equipment which is part of Applicant's 800-foot lateral extension from its main transmission line to Continental in Berkeley County, West Virginia; and (2) to construct and operate 1,500 feet of 4-inch I.D. steel pipeline with necessary metering and regulating facilities extending from its main transmission line to Continental.

The estimated interruptible peak day and annual requirements of Continental for the first three years of operation are:

| | 1st year | 2d year | 3d year |
|---|---|---|---|
| Peak day (Mcf) | 1,643 | 2,062 | 2,062 |
| Annual (Mcf) | 532,400 | 688,500 | 688,500 |

The total estimated cost of the proposed facilities is $17,000 which cost will be financed through open account advances by Applicant's parent, Washington Gas Light Company.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application, has been filed.

At a hearing held on May 25, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence including the application and exhibits thereto submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Shenandoah Gas Company, a Virginia corporation having its principal place of business in Washington, D.C., is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of March 12, 1954, in Docket No. G–1448 (13 FPC 579).

(2) The facilities proposed to be abandoned by Applicant, as hereinbefore described and as more fully described in the application, are used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the abandonment thereof is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The proposed abandonment of the aforesaid facilities by Applicant is permitted by the public convenience and necessity and approval thereof should be granted as hereinafter ordered.

(4) The proposed construction and operation of facilities and transportation of natural gas by Applicant as hereinbefore described and as more fully described in the application are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(5) The aforesaid proposed construction and operation of facilities and transportation of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(6) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(7) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) Permission for and approval of the abandonment by Applicant of the facilities hereinbefore described, as more fully described in the application, are granted.

(B) A certificate of public convenience and necessity is issued to Applicant, authorizing the construction and operation of facilities and transportation of natural gas as hereinbefore described and as more fully described in the application, upon the terms and conditions of this order.

(C) The certificate issued by paragraph (B) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(D) The certificate issued hereby is granted on the express condition that the interruptible service authorized herein shall be curtailed or interrupted to the extent required to meet existing or future contracted maximum delivery obligations of Applicant for firm service to its customers.

(E) Applicant shall advise the Commission of the date of abandonment of the facilities as authorized in paragraph (A) above within ten days of such abandonment.

(F) The facilities authorized herein shall be completed and placed in actual operation, as provided in paragraph (b) of Section 157.20 of the aforesaid Regulations, by September 1, 1967.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## UNITED FUEL GAS COMPANY, DOCKET NO. CP67-228

### FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT AND ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued May 31, 1967)

On February 14, 1967, United Fuel Gas Company (Applicant) filed in Docket No. CP67-228 an application pursuant to Sections 7(b) and 7(c) of the Natural Gas Act for permission and approval to abandon certain natural gas facilities and for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities, all as more fully set forth in the application.

Applicant seeks authorization for the following unrelated projects:

*To construct and operate:*

(1) Approximately 10.3 miles of 6-inch pipeline extending from Applicant's existing 20-inch pipeline in Pike County, Kentucky, northward to its existing distribution system serving the area of Williamson, Mingo County, West Virginia, together with the necessary measuring and regulating facilities,

(2) Approximately 4.3 miles of 4-inch pipeline extending northward from Applicant's 20-inch pipeline in Monroe County, West Virginia, to the area of Ronceverte and Lewisburg in Greenbrier County, West Virginia, replacing approximately 4.3 miles of existing 3 and 4-inch pipeline which Applicant proposes to abandon,

(3) Approximately 0.2 of a mile of 16-inch pipeline which crosses under Buck Creek in Martin County, Kentucky, west of Applicant's Kermit Compressor Station, replacing approximately 0.2 of a mile of existing multiple 10-inch river crossing which Applicant proposes to abandon,

(4) two small segments of 10 and 8-inch pipeline located south of Milton, Cabell County, West Virginia, and replacing two small segments of 10 and 20-inch pipeline which Applicant proposes to abandon. The first involves replacement of approximately 0.1 of a mile of quadruple 10-inch pipeline crossing under Mud River by a single section of 10-inch pipeline. The second involves replacement of approximately 0.1 of a mile of 20-inch pipeline by 0.1 mile of 8-inch pipeline.

(5) to install and operate two 1,320 horsepower, two stage compressor units at its Kermit Compressor Station in Mingo, County, West Virginia,

*To abandon:*

4,125 horsepower of compressor engines at Kermit Compressor Station in Mingo County, West Virginia.

Applicant proposes to replace and augment said compressor and pipeline facilities in Kentucky and West Virginia, which due to age and condition, is required to assure adequacy and reliability of service.

Applicant estimates the cost of the proposed construction at approximately $1,587,600, said cost to be financed through cash on hand or the issuance and sale of promissory notes or common stock to its parent company, The Columbia Gas System, Inc.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on May 25, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence including the application and exhibits thereto submitted in support of the authorizations sought, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, United Fuel Gas Company, a West Virginia corporation having its principal place of business in Charleston, West Virginia is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of March 1, 1944, in Docket No. G-341 (4 FPC 534).

(2) The facilities proposed to be abandoned by Applicant, as hereinbefore described, as more fully described in the application in this proceeding, are used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the abandonment thereof is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The proposed abandonment of the aforesaid facilities is permitted by the public convenience and necessity and permission and approval therefor should be granted as hereinafter ordered.

(4) The facilities hereinbefore described, as more fully described in the application in this proceeding, will be used in the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and the construction and operation thereof are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(5) The aforesaid proposed construction and operation of facilities and the transportation of natural gas in interstate commerce are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(6) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(7) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) Permission for and approval of the abandonment by Applicant of the facilities hereinbefore described, as more fully described in the application in this proceeding, are granted.

(B) A certificate of public convenience and necessity is issued to Applicant authorizing the construction and operation of facilities and transportation of natural gas as hereinbefore described, all as more fully described in the application, upon the terms and conditions of this order.

(C) The certificate issued by paragraph (B) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(D) Applicant shall advise the Commission of the date of abandonment of the facilities as authorized in paragraph (A) above within ten days of such abandonment.

(E) The facilities hereby authorized shall be constructed and placed in actual operation, and the transportation of gas authorized in paragraph (B) above shall commence as provided in paragraph (b) of Section 157.20 of the aforesaid Regulations within 12 months of the date on which this order issues.

## UNITED GAS PIPE LINE COMPANY, DOCKET NO. CP67-242

### FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT OF SERVICES AND FACILITIES

(Issued May 31, 1967)

On February 27, 1967, United Gas Pipe Line Company (Applicant) filed in Docket No. CP67-242 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon and remove certain natural gas facilities, all as more fully set forth in the application.

Specifically, Applicant seeks permission and approval for the abandonment and removal of the following facilities:

(1) 0.15 miles of 6 and 4-inch pipeline and an orifice meter station, serving Allied Chemical Corporation (Allied Chemical) near Orange, Orange County, Texas;

(2) One dual positive meter station and appurtenant facilities, serving Winnsboro Materials, Inc. (Winnsboro Materials) in Franklin Parish, Louisiana; and

(3) 6.6 miles of 18-inch and 4.0 miles of 12-inch lateral supply pipeline from the Rodessa Field, Caddo Parish, Louisiana.

Applicant proposes to remove, salvage and recondition said facilities for use elsewhere on its system as needed.

Service to Allied Chemical commenced on December 1, 1953. The existing contract between the parties dated June 1, 1956, expired by its own terms on January 1, 1967, and Allied Chemical does not desire to extend such agreement.

Service to Winsboro Materials commenced on April 2, 1963, and the existing contract between the parties dated February 5, 1965, was cancelled pursuant to a letter agreement between the parties dated January 25, 1967.

The subject 12-inch segment of the line proposed to be removed from the Rodessa Field was completed and placed in operation on November 30, 1934, and the 18-inch segment was completed and placed in operation on November 22, 1936. Applicant no longer has any gas purchase contracts for gas produced from the Rodessa Field and such facilities are no longer needed in its operations.

Applicant estimates the salvage value of the facilities proposed to be abandoned at $39,445.

After due notice, no protest, petition to intervene or notice of intervention has been filed.

At a hearing held on May 25, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, United Gas Pipe Line Company, a Delaware corporation, having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of November 10, 1942, in Docket No. G-232 (3 FPC 863).

(2) The facilities to be abandoned, as hereinbefore described in the application in this proceeding, are used in the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and abandonment of such facilities is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The abandonment by Applicant, as hereinbefore described, is permitted by the public convenience and necessity and an order approving same should be issued as hereinafter ordered and conditioned.

*The Commission orders:*

(A) Permission for and approval of the abandonment by Applicant of the facilities hereinbefore described, all as more fully described in the application in this proceeding, are granted upon the terms and conditions of this order.

(B) Applicant shall advise the Commission of the date of said abandonment within ten days thereof.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## IOWA SOUTHERN UTILITIES COMPANY, DOCKET NO. E-7044

### SUPPLEMENTAL ORDER AUTHORIZING THE ISSUANCE OF COMMON STOCK AND MODIFICATION OF EMPLOYEE STOCK PURCHASE PLAN

(Issued June 2, 1967)

Iowa Southern Utilities Company (Applicant), incorporated under the laws of Delaware and qualified to do business as a foreign corporation in Iowa, with its principal business office at Centerville, Iowa, filed a supplemental application on April 19, 1967, pursuant to Section 204 of the Federal Power Act, seeking authorization to issue 7,104 additional shares of its Common Stock, par value $10 per share, under its Employee Stock Purchase Plan as modified.

The Commission authorized Applicant to issue 20,000 shares under the plan by its order in this docket issued July 17, 1964, 32 FPC 197. Some 7,104 of the 20,000 shares having been sold, the applicant seeks authorization to issue 7,104 new shares so that it will again have 20,000 shares available under the plan.

Applicant proposes modifications of the plan as follows: (1) the price per share of Common Stock of the Applicant purchased under the plan to be 90% (rather than 95%) of the market bid price on June 15th and December 15th of each year as published in the midwest edition of the Wall Street Journal, but not less than the par value of the stock, and (2) the payroll deductions for the purchase of stock to be a maximum of 20% (rather than 10%) of the employee's regular pay base.

Applicant also requests an exemption from the Commission's competitive bidding requirements. On the basis of the present market price of about $28⅛ per share, the entire 20,000 shares of Common Stock, $10 par value, for issuance under the plan would produce proceeds of about $513,000. In accordance with Section 34.1a(a)(3) of the Commission's Regulations under the Federal Power Act, since the proceeds will be less than $1 million, and also because of the nature of the issuance, competitive bidding is not required.

Proceeds from the sale of the common stock will be used for general corporate purposes.

Written notice of the application has been given to the Iowa State Commerce Commission and the Governor of that State. Notice was published in the Federal Register on May 6, 1967 (32 F.R. 6993) stating that any person desiring to be heard or to make any protest with reference to the application should, on or before May 18, 1967, file petitions or protests with the Federal Power Commission, Washington, D.C. 20426. No petition or protest or request to be heard in opposition to the granting of the application has been received.

*The Commission finds:*

(1) The proposed issuance of an additional 7,104 shares of Common Stock, $10 par value, for a total of 20,000 shares of Common Stock pursuant to the provisions of the Applicant's Employee Stock Purchase Plan as modified will constitute an issuance of securities within the purview of Section 204 of the Federal Power Act.

(2) The proceeds from the sales of the shares of Common Stock for issuance under the Employee Stock Purchase Plan will be less than $1 million, and, therefore, the proposed issuance and sale of Common Stock is exempt from the

competitive bidding requirements by reason of paragraph 34.1a(a)(3) of the Regulations under the Federal Power Act.

(3) The proposed issuance and sale of Common Stock, as hereinafter authorized, will be for a lawful object, within the corporate purposes of Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance of service by Applicant as a public utility and which will not impair its ability to perform that service, and is reasonably appropriate for such purposes.

(4) The period of public notice is reasonable.

*The Commission orders:*

(A) The proposed issuance and sale of 7,104 additional shares of Common Stock, $10 par value, pursuant to the provisions of the Employee Stock Purchase Plan as modified and set forth in the supplemental application is hereby authorized.

(B) The proposed issuance and sale of the additional shares of Common Stock are hereby exempted from the competitive bidding requirements of Sections 34.1a(b) and (c) of the Commission's Regulations under the Federal Power Act.

(C) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determinations or cost, or any other matter whatsoever which may come before the Commission.

(D) Nothing in this order shall be construed to imply any guarantee or obligation on the part of the United States, with respect to any securities to which this order relates.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## NORTHERN NATURAL GAS COMPANY, DOCKET NO. CP65–91

### ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 2, 1967)

On April 5, 1967, Northern Natural Gas Company (Petitioner) filed in Docket No. CP65–91 a petition to amend the order issued by the Commission on March 30, 1967, 37 FPC 649 (Opinion No. 519), so as to authorize Petitioner to construct and operate a 30-inch pipeline and appurtenant facilities in place of the 26-inch pipeline and appurtenant facilities originally authorized, all as more fully set forth in the petition to amend.

In the order of March 30, 1967, under lead Docket No. CP65–1, *et al.* (Opinion No. 519) Petitioner was authorized, among other things, to construct and operate 365 miles of 26-inch diameter pipeline between Kermit, Texas and its Beaver compressor station in Beaver County, Oklahoma. Paragraph (C) of the order directed Petitioner to file within twenty days data showing that the capacity of the 26-inch line is adequate to handle its proven reserves in the Delaware Basin; however, if the reserves are of such volume as to require a larger line, then the 26-inch line shall not be constructed and Northern shall file an amendment for an appropriate size pipeline.

Pursuant to Paragraph (C), Petitioner filed the instant amendment, requesting authority to construct and operate a 30-inch pipeline in lieu of the 26-inch pipeline because such pipeline is not adequate to transport the proven reserves in the Delaware Basin. The 30-inch pipeline will have a capacity of 517,000 Mcf per day.

Petitioner estimates the total cost of the larger facilities together with appurtenances at approximately $47,653,420, said cost to be financed from the sale of sinking fund debentures and, to the extent required, the use of cash-on-hand, reserve accruals and retained earnings.

Due notice of the filing of the petition to amend and opportunity for hearing has been given by publication in the Federal Register on April 20, 1967 (32 F.R. 6228). No protest or petition to intervene has been filed in this proceeding concerning this amendment.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act, and the public convenience and necessity require that the Commission's order issued March 30, 1967, in Docket No. CP65–91 (Opinion No. 519), granting Northern certain certificate authorizations, be amended as hereinafter ordered.

*The Commission orders:*

(A) The Commission's order issued March 30, 1967, in Docket No. CP65–91 (Opinion No. 519), is amended so as to authorize Petitioner to construct and operate 365 miles of 30-inch pipeline between Kermit, Texas and its Beaver Compressor Station in Beaver County, Oklahoma, in lieu of the 26-inch line authorized therein.

(B) In all other respects said order shall remain in full force and effect.

(C) The amendment authorized by Paragraph (A) above and the rights granted thereunder are conditioned upon Petitioner's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the conditions set forth in paragraphs (f) and (g) of Section 157.20 of such Regulations.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## COLUMBIA GULF TRANSMISSION COMPANY, TEXAS EASTERN TRANSMISSION CORPORATION, UNITED FUEL GAS COMPANY, DOCKET NO. CP67–278

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 5, 1967)

On March 24, 1967, Columbia Gulf Transmission Company (Columbia), Texas Eastern Transmission Corporation (Texas Eastern) and United Fuel Gas Company (United Fuel) (jointly called Applicants) filed in Docket No. CP67–278 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities and the exchange of natural gas between the parties, all as more fully set forth in the application.

Columbia Gulf, Texas Eastern and United Fuel seek authorization for the construction and operation of an interconnection between the pipeline systems of Columbia Gulf and Texas Eastern. The proposed interconnection will be located in Adair County, Kentucky, approximately two and one-half miles northeast of the town of Gradyville, Kentucky, at a point on Columbia Gulf's 30-inch pipeline and Texas Eastern's 30-inch and 36-inch pipeline system, approximately 1,945 feet northeasterly from the intersections of the pipelines with Kentucky State Highway No. 959.

Columbia Gulf and Texas Eastern will each install, own and operate at its own expense its own pipeline taps and side valves at the point of interconnection. Columbia Gulf will construct the meter tube section and the tieover line and will acquire and fence the necessary property for the installation of the proposed interconnection. All construction and land costs associated with the interconnection, with the exception of the taps and side valves to be installed by each company, will be shared equally between Texas Eastern and Columbia Gulf.

The proposed interconnection and the proposed exchange of gas are the subjects of an agreement among Texas Eastern, Columbia Gulf and United Fuel dated October 3, 1966. Upon receipt of the authorization herein requested, each Applicant will file this agreement as a special rate schedule to its FPC Gas Tariff.

The subject agreement provides for utilization of the proposed interconnection when either company is confronted with a situation which can be alleviated by deliveries of natural gas from the other. Under the terms of the agreement, either party, upon request from the other, will make such deliveries of natural gas as, in its sole judgment, it can make without impairment of its service obligations to others. Within 60 days following the receipt of deliveries of natural gas, unless a longer period is mutually agreed to, the party receiving such deliveries will be obligated to return a like volume of natural gas to the other or pay for such deliveries at Texas Eastern's 100% load factor price per Mcf under its Rate Schedule DCQ in effect at that time for the zone in which deliveries were made. All such deliveries and receipt of gas and any payments by or to Columbia Gulf will be made for the account of United Fuel.

Applicants estimate the total cost of the proposed construction at approximately $23,600 of which $13,900 will be shared equally by Columbia and Texas Eastern, the balance being for the construction of taps and side valves which each company will construct at its own expense.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on June 1, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence including the application and exhibits submitted in support of the authorization sought, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Columbia Gulf Transmission Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 5, 1958 in Docket No. G-15524 (20 FPC 681).

(2) Applicant, United Fuel Gas Company, a West Virginia corporation having its principal place of business in Charlestown, West Virginia, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found

by the Commission in its order of September 9, 1958 in Docket No. G-13372 (20 FPC 347).

(3) Applicant, Texas Eastern Transmission Corporation, a Delaware corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of March 30, 1949 in Docket No. G-1089 (8 FPC 228).

(4) The facilities hereinbefore described, as more fully described in the application in this proceeding, will be used in the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and the construction and operation thereof and exchange of natural gas by Applicants, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(5) The aforesaid proposed exchange and delivery of natural gas and the construction and operation of facilities are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(6) Applicants are able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(7) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act, and the public convenience and necessity require that United Fuel and Texas Eastern shall file an exchange agreement as special FPC Rate Schedules in accordance with the applicable Commission Regulations.

(8) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to the Applicants in this proceeding, jointly, authorizing the exchange and delivery of natural gas as hereinbefore described, and the construction and operation of facilities for the transportation of natural gas in interstate commerce, as hereinbefore described and as more fully described in the joint application and exhibits in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations, within 6 months of the date on which this order issues.

(D) Applicants shall file the exchange agreement as special rate schedules to their respective FPC Gas Tariffs in accordance with the Commission's Regulations.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## MISSISSIPPI RIVER TRANSMISSION CORPORATION, DOCKET NO. CP67-320

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 5, 1967)

On May 1, 1967, Mississippi River Transmission Corporation (Applicant) filed in Docket No. CP67-320 an application pursuant to Section 7(c) of the Natural Gas Act, as implemented by Section 157.7(b) of the Regulations under the Act, for a certificate of public convenience and necessity authorizing the construction, during the twelve-month period commencing June 1, 1967, and the operation of certain natural gas facilities to enable Applicant to take into its pipeline system natural gas which will be purchased from producers and other similar sellers in the general area of Applicant's existing pipeline system, all as more fully set forth in the application in this proceeding.

The purpose of this "budget-type" application is to augment Applicant's ability to act with reasonable dispatch in contracting for and connecting to its pipeline system supplies of natural gas in various producing areas generally coextensive with said system.

The total cost of the facilities covered by this application will not exceed a maximum of $600,000, with no single project to exceed a cost of $150,000, which costs are proposed to be financed from funds on hand and funds generated from Applicant's operations.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on June 1, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Mississippi River Transmission Corporation, a Delaware corporation having its principal place of business in St. Louis, Missouri, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 29, 1960, in Docket No. CP60-95 (24 FPC 1020).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with Section 157.7(b)(3) of the Commission's Regulations under the Natural Gas Act.

(6) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly, the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(7) The authorization hereinafter granted should be limited to construction during the twelve-month period commencing June 1, 1967, and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $600,000, with no single project to exceed a cost of $150,000.

*The Commission orders:*

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, Mississippi River Transmission Corporation, to construct during the twelve months period commencing June 1, 1967, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities only to take natural gas supplies from producers and other similar sellers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with Section 157.7(b)(3) of the Commission's Regulations under the Natural Gas Act.

(C) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(D) The authorization granted in paragraph (A) above is limited to construction during the twelve-month period commencing June 1, 1967, and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $600,000, with no single project to exceed a cost of $150,000.

## AREA RATE PROCEEDING, ET AL. (PERMIAN BASIN AREA), DOCKET NO. AR61-1, ET AL.; S. T. CONSTANTINE (OPERATOR), ET AL., AND ROY E. KIMSEY, JR. (OPERATOR), ET AL., DOCKET NO. RI60-43

### ORDER SEVERING AND TERMINATING PROCEEDING

(Issued June 6, 1967)

Roy E. Kimsey, Jr. (Operator), *et al.* (Kimsey) has submitted a request that the Commission terminate the proceeding in Docket No. RI60-43 which involves the sale of natural gas to El Paso Natural Gas Company (El Paso) from the

Noekle Field, Crockett County, Texas R. R. District No. 7–c. The subject proceeding concerns a rate increase from 9.5¢ per Mcf to 14.69578¢ per Mcf which was filed by S. T. Constantine (Operator), *et al.* (Constantine), Kimsey's predecessor-in-interest. This proceeding was consolidated with Docket No. AR61–1, *et al.* by the Commission in its order issued December 23, 1960, 24 FPC 1121.

In support of his request, Kimsey states that the base area rate for the gas involved in this sale is 14.5¢ per Mcf as prescribed in Opinion No. 468, 34 FPC 159, and that he has collected only 14.5¢ in Docket No. RI60–43. Kimsey was granted a small producer certificate to make this sale on July 20, 1966 in Docket No. CS66–66. By letter dated May 11, 1967, El Paso informed the Commission that both Kimsey and Constantine billed El Paso at 14.5¢ per Mcf for all gas sold in this proceeding and that El Paso has paid them no more than 14.5¢ per Mcf for the gas. Accordingly, as the price of gas collected in this proceeding did not exceed the applicable area rate, Docket No. RI60–43 should be severed from Docket No. AR61–1 and the proceeding in Docket No. RI60–43 should be terminated.[1]

*The Commission finds:*

For the foregoing reasons, good cause exists for severing Docket No. RI60–43 from the proceeding in Docket No. AR61–1, *et al.*, for terminating the proceeding in Docket No. RI60–43 and for discharging the surety bonds filed by respondents in Docket No. RI60–43.

*The Commission orders:*

(A) The proceeding in Docket No. RI60–43 is severed from the proceeding in Docket No. AR61–1, *et al.*, and terminated.

(B) The surety bonds filed by Constantine and Kimsey in Docket No. RI60–43 are discharged.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## AREA RATE PROCEEDING, ET AL. (TEXAS GULF COAST AREA), GULF RESOURCES, INCORPORATED AND NATURAL GAS GATHERING COMPANY, DOCKET NO. AR64–2

### ORDER GRANTING MOTION TO DISMISS

(Issued June 6, 1967)

Gulf Resources, Incorporated (Gulf) on January 20, 1967, filed a motion to dismiss Natural Gas Gathering Company (Natural) and itself from Docket No. AR64–2.

Gulf gathers and transports gas, which is purchased by Tennessee Gas Pipeline Company, a division of Tenneco Inc. (Tennessee) from various producers at or near the wellhead in Starr and Zapata Counties, Texas, to Tennessee's main transmission line. Gulf's line, including lateral lines, is approximately 75 miles long. Gulf, which does not purchase or sell the subject gas, receives 2.85¢ per Mcf from Tennessee for its transportation service.

The facilities utilized for transportation were at one time jointly owned by Gulf and Natural. Gulf and Natural were not affiliated initially, but Gulf later acquired all of Natural's stock and thereafter absorbed Natural.

---

[1] Although the subject request was not made on behalf of Constantine, he will receive similar treatment since it is clear that he would qualify as a small producer.

Natural which had filed a producer rate schedule covering the charges for the subject service was named a respondent in Docket No. AR64–2 by order issued November 27, 1963, 30 FPC 1354. Gulf was later named a respondent in Docket No. AR64–2 by order issued June 22, 1964, 31 FPC 1578.

Gulf and Natural received permanent certificate authorization by order issued May 10, 1966, 35 FPC 704, in Docket No. CI61–282 and were there classified as pipelines. That order was amended on September 16, 1966, 36 FPC 643, to give effect to the dissolution of Natural as a separate entity.

Gulf asserts in its motion that it is not properly a party in Docket No. AR64–2 because it does not engage in jurisdictional purchases of gas and does not make jurisdictional sales of gas. The Commission in an area rate proceeding has the power to determine the proper rate for a transportation service by an independent producer, and the existence of a jurisdictional sale or purchase is not a prerequisite to the exercise of such power. The foregoing reasons advanced by Gulf therefore do not justify the requested action.

We understand, however, that no evidence has been presented by any party in Docket No. AR64–2 with respect to either the status of Gulf as a producer or pipeline for purposes of regulating its rate or the proper rate for its transportation service. Consequently, there is no justification for retaining Gulf as a respondent in Docket No. AR64–2.[1] Such action will be without prejudice to any future action we may take relating to either the status of Gulf or its transportation rate.

*The Commission orders:*

(A) For the reasons set forth above, Gulf and Natural are dismissed as respondents in Docket No. AR64–2.

(B) The action herein is without prejudice to any action the Commission may take in the future with respect to the status of Gulf as an independent producer or a pipeline for purposes of regulating its rate or the proper rate for Gulf's transportation service.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## NORTHERN STATES POWER COMPANY (MINNESOTA), DOCKET NO. E–7347

### SUPPLEMENTAL ORDER AUTHORIZING ISSUANCE OF FIRST MORTGAGE BONDS

(Issued June 6, 1967)

By order issued May 19, 1967, 37 FPC 955, in the above-entitled matter, the Commission authorized Northern States Power Company, (Applicant), to issue and sell at competitive bidding $30,000,000, principal amount of First Mortgage Bonds, due 1995, subject among others, to the provisions set forth in paragraph (B) of that order as follows:

(i) Applicant shall have amended its application pursuant to the requirements of Section 34.2(g) of the Commission's Regulations under the Federal Power Act relating to compliance with competitive bidding requirements, and Section 34.2(h)(1) of those Regulations relating to affiliation, and shall have either filed such amendments or shall have mailed them and advised the Commission by telephone and telegraph, as contemplated in Section 34.9 of the Regulations.

---

[1] Since Natural is no longer in existence it is clear that it should be dismissed as a respondent.

(ii) The Commission, by further order, shall have approved the price to be received by Applicant for the proposed issuance of Bonds and the interest rate thereof.

Applicant on June 6, 1967, filed an amendment, pursuant to the requirements of the aforementioned Commission order, setting forth, among other things, that it proposes to accept as providing the lowest annual cost of money to it, the bid of Blyth & Co., Inc., and The First Boston Corporation, to purchase the proposed issuance of $30,000,000, principal amount of Bonds, for the price of 100.419% of principal amount, with an interest rate of 6⅛%, resulting in a cost of money to the Applicant of 6.09%.

*The Commission finds:*

(1) Applicant has satisfactorily complied with the requirements of paragraph (B) of the Commission's order issued May 19, 1967, in the above docket, and under the bid it proposes to accept for the Bonds, the price to be received by Applicant therefor and the interest rate thereof are reasonable.

(2) The proposed issuance and sale of Bonds, as hereinafter authorized, will be for a lawful object, within the corporate purposes of the Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance by the Applicant of service as a public utility and which will not impair its ability to perform that service, and is reasonably appropriate for such purposes.

*The Commission orders:*

(A) The price to be received by Applicant for the proposed Bonds and the interest rate thereof under the bid referred to above, are approved as reasonable.

(B) The proposed issuance and sale of Bonds referred to above upon the terms and conditions and for the purposes specified in the application, as supplemented by the amendment referred to above, are authorized, subject only to the provisions of paragraphs (A), (C), (D) and (E) of the Commission's order issued May 19, 1967, in the above docket.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## TEXAS GAS PIPE LINE CORPORATION, DOCKET NO. CP66–418; UNION TEXAS PETROLEUM, A DIVISION OF ALLIED CHEMICAL CORPORATION, DOCKET NO. CI66–1296; NECHES PETROLEUM CORPORATION, DOCKET NO. RI63–193; CLEGG & HUNT (OPERATOR), ET AL., DOCKET NO. RI60–405; RESERVE OIL & GAS COMPANY, DOCKET NO. G–18570 AND RI64–789

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY, PERMITTING AND APPROVING ABANDONMENT, CONDITIONALLY ACCEPTING OFFERS OF SETTLEMENT, AND TERMINATING CERTIFICATE

(Issued June 6, 1967)

On June 16, 1966, Texas Gas Pipe Line Corporation (Applicant) filed in Docket No. CP66–418 an application as supplemented on July 22, 1966 pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the acquisition and operation of certain natural gas facilities and the transportation and sale of natural gas, all as more fully set forth in the application and an offer of settlement related thereto which was filed November 8, 1966.

The purpose of the instant application is to realign the properties and service of Union Texas Petroleum, a Division of Allied Chemical Corporation (Union Texas) and Applicant, so that Applicant will own and operate the transportation facilities required to make sales and deliveries in interstate commerce to Transcontinental Gas Pipe Line Corporation (Transco) and Texas Eastern Transmission Corporation (Texas Eastern). Union Texas, an independent producer, will continue to gather and process gas and will make deliveries to Applicant at the outlet of Union Texas's Winnie Plant and at other points on Applicant's line in or near the North Port Neches Field in Orange County, Texas.

Applicant proposes to acquire, by assignment from Union Texas, those contracts under which gas is purchased for resale to Texas Eastern. Applicant also seeks authority to acquire facilities owned and operated by Union Texas for the purpose of transporting natural gas from the Winnie Plant to Texas Eastern and to Applicant, and to operate such facilities to enable Applicant to continue the sales to Texas Eastern and Transcontinental.

The facilities and contracts to be acquired by Applicant are stated to be:

(1) approximately 30 miles of 10-inch and 12-inch line commencing at the outlet of the Winnie Plant and running in an easterly direction through Jefferson and Orange Counties in the State of Texas to a point of interconnection with the facilities of Applicant near North Port Neches, together with meters and other appurtenant facilities.

(2) approximately 6 miles of 10-inch and 12-inch line commencing at the Winnie Plant and extending in a northerly direction to a connection with the facilities of Texas Eastern in Jefferson County, Texas together with meters and other appurtenant facilities.

(3) dehydration facilities at the Winnie Plant and adjacent to Applicant's Orange Compressor Station, and

(4) certain gas purchase contracts all as more fully described in the application.

Contingent upon approval of Applicant's proposal to acquire and operate the facilities used to serve Texas Eastern, Union Texas seeks authorization in Docket No. CI66–1296 to abandon its sale to Texas Eastern as authorized in Docket No. G–8048.

As a result of the acquisition, Applicant proposes to eliminate the dedicated gas service now rendered to Transco under its Rate Schedule DGS–1 and to Texas Eastern under Union's Rate Schedule 66, and provide service to both customers under new rate schedules not based on dedication of specific gas reserves or gas purchase contracts to particular customers. The terms and conditions of such service will be substantially the same as present, however, the respective rates will be as follows:

| Customer | Rate Schedule (Proposed) | Rate/Mcf | |
|---|---|---|---|
| | | Present | Proposed |
| Transco | CD–1 Demand Charge Commodity Charge | 80¢<br>15.91¢ | 75¢<br>15.75¢ |
| Texas Eastern | G–1 (Union R.S. 66) | 14.4¢ | 16.2¢ |

Other proposed changes in rates and service stemming from the subject acquisition are:

| Service | | Rate | |
|---|---|---|---|
| Present | Proposed | Present | Proposed |
| Gathering by Union Texas of gas purchased by Applicant for Transco—delivery at N. Port Neches. | Gathering by Union Texas of gas purchased by Applicant for Transco & Texas Eastern—delivery into Applicant's facilities. | 2.5¢/Mcf | 1.3¢/Mcf.[1] |
| Gathering and delivery by Union Texas of gas purchased by Texas Eastern. | Same, except that gas will be delivered by Applicant for Union Texas's account. | None | 0.5¢/Mcf to be paid by Union Texas for transportation by Applicant. |

[1] In return Applicant will receive an allowance for Btu loss, shrinkage and fuel use incurred in the operation of the plant. Copies of the agreement for this arrangement will be filed to supersede the contract whereby Union Texas presently performs such services for Applicant under its Rate Schedule No. 70.

The total estimated cost of acquiring the proposed facilities is $714,371 which cost will be financed from current working funds. Applicant proposes to record the acquired properties on its books at the original cost of $1,071,468, less depreciation of $473,336, with the difference between cost of acquisition and book value to be amortized over a 10-year period.

Neches, Clegg & Hunt, and Reserve have filed offers of settlement in their respective dockets in which they seek (contingent upon Commission approval of Applicant's proposal) termination of the suspension proceedings in accordance with the Commission's Second Amendment to its Statement of General Policy No. 61-1, 24 FPC 1107. Acceptance of the offers will reduce their total annual revenues approximately $106,750, based on currently effective rates but would increase total annual revenues approximately $243,350 from the underlying accepted rates.

The following tabulation reflects the details thereof:

| FPC Gas Rate Schedule and Supp. No. | Docket No. | Effective Date | Rates[1] | | |
|---|---|---|---|---|---|
| | | | Approved | Suspended | Settlement |
| Neches sale: 1-7 | RI63-193 | 11- 5-63 | 10.096 | 16.66584 | 15.0 |
| Clegg & Hunt sale: 5-1 | RI60-405 | 11-25-60 | 13.6 | 17.38982 | 15.0 |
| Reserve sales: | | | | | |
| 1-1 | G-18570 | 11- 4-59 | 13.6 | 14.6 | 14.6 |
| -2 | RI64-789 | 12- 2-64 | | 15.6 | |
| 2-1 | G-18570 | 11- 4-59 | 13.38069 | 14.38069 | 14.6 |
| -2 | RI64-789 | 12- 2-64 | | 15.38069 | 14.6 |

[1] Cents per Mcf at 14.65 psia, inclusive of tax reimbursement.

In return for permitting life-of-contract settlement rates of 15.0¢, Neches and Clegg & Hunt propose to eliminate all future price escalation provisions from the subject contracts while Reserve proposes to eliminate present price escalation provisions, including price redetermination provisions, and to substitute prices of 14.6¢ with 1.0¢ periodic price escalations commencing on June 1, 1969, and every 5-year period thereafter. All of these settlement rates will be subject to three-fourths reimbursement of future tax increases. The remaining contract terms for these four sales exceed the 5-year requirement of Commission Order No. 284, 32 FPC 422.

Petitions to intervene were filed by Transco, Texas Eastern and five major customers of Texas Eastern.[1] Subsequently, a conference was called by Applicant on October 25, 1966, at which agreement was reached by Applicant and the interveners on the basis of the subject offer of settlement. All of the interventions were then withdrawn, except for Long Island Lighting Company (LILCO), which filed a qualified withdrawal of its petition to intervene.

LILCO states it does not oppose the requested certificate, as amended by the offer of settlement, but believes that the conversion from the present producer sale by Union Texas to Texas Eastern to a pipeline sale by Applicant to Texas Eastern is wrong both as a matter of principle and of precedent. It is Long Island's position that the appropriate area rate should apply at the points of sale to Transco and Texas Eastern, regardless of which party, Union Texas or Applicant, owns the facilities from which the sales are made. LILCO, however, withdraws its opposition predicated on the understanding that:

(1) approval of the subject settlement will not be binding or persuasive in the disposition of similar situations elsewhere,

(2) approval of the settlement will not determine the point on Union-Applicant's facilities at which area rates for producer sales to pipelines should apply.

It is noted that Applicant in its Offer of Settlement filed on November 8, 1966, states that issuance of a certificate of public convenience and necessity consistent with the terms of the Offer of Settlement will not constitute a determination of any principle or issue binding on any party, nor is any party precluded or prejudiced from asserting or proving any matter or contention in any other proceeding relating to Applicant or any other party. In view of the apparent resolution of controversial matters to the satisfaction of all parties concerned it appears that there is no objection to the proposed settlement. It appears to be in the public interest that the Offer of Settlement filed by Applicant in Docket No. CP66–418 be accepted, a certificate of public convenience and necessity be issued to the Applicant as requested, and that Union Texas should be granted authorization to abandon the facilities and service proposed in Docket No. CI66–1296.

It further appears to be in the public interest to approve the Offers of Settlement filed by the producers, Neches, Clegg & Hunt and Reserve in Docket Nos. RI63–193, RI60–405, G–18570 and RI64–789, respectively, to be effective prospectively from the date of issuance of this order as provided herein. In view of the outstanding suspension proceedings in Docket No. RI62–250 pertaining to Union Texas' present sale to Texas Eastern, which is unaffected by the abandonment authorization granted herein, we shall not terminate the suspension proceedings related to the producer sales to Union Texas for the period prior to the issuance of this order. Such matters shall be resolved in the Texas Gulf Coast Area Rate Proceeding, Docket No. AR64–2, with which these proceedings have been consolidated. Accordingly, both Union Texas in Docket No. RI62–250 and the producers in Docket Nos. RI60–405, G–18570, RI63–193 and RI64–789 will retain their potential refund obligations for the period prior to this order.

After due notice, no petitions to intervene other than those referred to, notice of intervention or protest to the granting of the applications have been filed.

---

[1] Brooklyn Union Gas Company, Long Island Lighting Company, Philadelphia Electric Company, Public Service Electric and Gas Company and the Philadelphia Gas Works Division of United Gas Improvement Company.

At a hearing held on June 1, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the applications and settlement offers in the subject dockets, submitted in support of the authorizations sought, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Texas Gas Pipe Line Corporation, a Delaware corporation having its principal place of business in Houston, Texas is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 29, 1954, in Docket No. G-2405 (13 FPC 1653).

(2) Union Texas Petroleum, is engaged in the sale of natural gas in interstate commerce for resale for ultimate public consumption, subject to the jurisdiction of the Commission, and is therefore, a "natural-gas company" within the meaning of the Natural Gas Act.

(3) The proposed acquisition, and operation of facilities, and the sale of natural gas in interstate commerce, as hereinbefore described and as more fully described in the application in Docket No. CP66-418 filed in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(4) The aforesaid proposed acquisitions and operation of facilities and the sale of natural gas in interstate commerce, are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) The facilities proposed to be abandoned by Union Texas as hereinbefore described and as more fully described in the application, in Docket No. CP66-1296 filed in these proceedings are used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and such abandonment is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(6) The proposed abandonment of the aforesaid facilities by Union Texas is permitted by the public convenience and necessity and permission and approval therefor should be granted as hereinafter ordered.

(7) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(8) Public convenience and necessity require that the certificate issued hereinafter in Docket No. CP66-418 and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (d)(1), (d)(2), (d)(3), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to Applicant, Texas Gas Pipe Line Corporation, authorizing the acquisition and operation of facilities, and the sale of natural gas as hereinbefore described all as more fully described in the application, upon the terms and conditions of this order, effective as of the date of issuance of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable

Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (d)(1), (d)(2), (d)(3), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The acquisitions authorized shall be completed and the facilities placed in operation hereunder, and the sale of natural gas authorized in paragraph (A) above shall commence as provided in paragraph (b) of Section 157.20 of the aforesaid Regulations within 3 months of the date on which this order issues.

(D) The Offer of Settlement filed by Applicant in Docket No. CP66–418 is approved.

(E) Applicant, Texas Gas Pipe Line Corporation, shall make appropriate rate filings in accordance with the Commission's Regulations reflecting the sales and services authorized herein within 30 days of the issuance of this order.

(F) Permission for and approval of the abandonment by Union Texas of the facilities hereinbefore described, as more fully described in the application in this proceeding is granted, effective as of the date of this order.

(G) The Officers of Settlement filed by Neches, Clegg & Hunt, and Reserve in their respective dockets (suspension proceedings), as modified herein are approved.

(H) The certificate issued to Union Texas in Docket No. G–8048 is terminated, Union Texas Rate Schedule No. 66 is cancelled, and the related rate filing, designated as Supplement No. 19 thereto is accepted for filing to be effective as of the date of issuance of this order.

(I) Neches, Clegg & Hunt and Reserve shall within 30 days of the issuance of this order file as supplements to their respective rate schedules, notices of changes in rates reflecting the applicable settlement rates and executed contract amendments as provided for in the subject offer. The notices of change and contract amendments shall be submitted in accordance with Part 154 of the Commission's Regulations under the Natural Gas Act.

(J) Neches, Clegg & Hunt, and Reserve shall retain revenues attributable to the rates which have been collected subject to refund by these producers for the period prior to the date of the issuance of this order and such refund amounts shall remain subject to refund in Docket Nos. G–18570, RI60–405, RI63–193 and RI64–789.

(K) Upon notification by the Secretary of the Commission that they have complied with the terms and conditions of this order the settlement rates proposed by Neches, Clegg & Hunt, and Reserve shall be effective as of the date of this order.

(L) Union Texas shall file, as a supplement to its Rate Schedule No. 70, copies of the gathering and processing agreement as mentioned above.

(M) This order is without prejudice to any findings or orders which have been or may be made hereafter by the Commission, and is without prejudice to claims or contentions which may be made by Applicant, Union Texas, Neches, Clegg & Hunt, Reserve, the Commission staff, or any affected party hereto in any proceedings now pending, or hereafter instituted, including area rate or similar proceedings by or against the above-named parties, or any other companies, persons or parties affected by this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A Carver, Jr.

## TEXAS GAS TRANSMISSION CORPORATION, DOCKET NO. CP67-251

### FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT

(Issued June 6, 1967)

On March 6, 1967, Texas Gas Transmission Corporation (Applicant) filed in Docket No. CP67-251 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval of the Commission to abandon by sale to Indiana Gas and Water Company, Inc. (Indiana) 3.968 miles of 4-inch pipeline, together with Applicant's right title and interest in and to certain agreements of right-of-way and permits, all as more fully set forth in the application.

Applicant seeks permission and approval to abandon by sale 3.968 miles of 4-inch pipeline located in Putnam County, Indiana, commencing at Applicant's Greencastle Check Meter Station and running generally northwest to its Greencastle Sales Meter Station near the south city limits of Greencastle, Putnam County, Indiana. Applicant states that the pipeline is used exclusively to serve Indiana, and that Indiana wants to purchase the pipeline for incorporation into its own system. The sale price for the facilities is $23,000.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application, has been filed.

At a hearing held on June 1, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorizations sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Texas Gas Transmission Corporation, a Delaware corporation having its principal place of business in Owensboro, Kentucky, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of March 30, 1948, Docket No. G-855 (7 FPC 213).

(2) The facilities proposed to be abandoned by Applicant, as hereinbefore described and as more fully described in the application filed in the proceeding, are used in the transportation and sale of natural gas in interstate commerce subject to the jurisdiction of the Commission, and such abandonment is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The proposed abandonment of the aforesaid facilities is permitted by the public convenience and necessity and approval therefor should be granted as hereinafter ordered.

(4) It is appropriate in the administration of the Natural Gas Act that Applicant file a revised service agreement reflecting the change in delivery point resulting from the abandonment of facilities authorized herein.

*The Commission orders:*

(A) Permission for and approval of the abandonment of the facilities hereinbefore described, as more fully described in the application in this proceeding, are granted.

(B) Applicant shall advise the Commission of the date of abandonment of the facilities as authorized in paragraph (A) above within ten days of such abandonment.

(C) Applicant shall file a revised service agreement reflecting the change in delivery point resulting from the abandonment authorized in paragraph (A) above.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## MONTANA-DAKOTA UTILITIES CO., DOCKET NO. CP67-238

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 7, 1967)

On February 24, 1967, Montana-Dakota Utilities Co. (Applicant) filed in Docket No. CP67-238 an application pursuant to Section 7(c) of the Natural Gas Act, as implemented by Section 157.7(c) of the Regulations under the Act, for a certificate of public convenience and necessity authorizing the construction during the calendar year 1967 and the operation of natural gas facilities for the sale of natural gas to direct consumers and existing distributors for resale and for miscellaneous rearrangements, all as more fully set forth in the application in this proceeding.

Applicant proposes to construct a maximum of 8 lateral or loop lines of up to 6-inch diameter pipe with the maximum length being 15 miles and a maximum of 11 taps and meters in order to transport and sell natural gas, previously authorized under certificates for transportation or sale to existing distributors at rates on file with the Commission, for resale in existing market areas, and in order to deliver natural gas to direct consumers located in areas outside the franchise area of any local distributor. Applicant also proposes to construct a maximum of 2 lateral or loop lines of up to 10-inch diameter pipe with the maximum length being 3 miles and a maximum of 2 taps and meters in order to accomplish miscellaneous rearrangements of its facilities.

The deliveries to any one distributor or consumer by means of the proposed facilities will not exceed 100,000 Mcf per year and none of the gas delivered will be used by any distributor or consumer for boiler fuel purposes as defined by the Commission in Section 157.7(c) of its Regulations under the Act.

The total estimated cost of the proposed facilities will not exceed a maximum of $190,000, which cost will be financed with internally generated funds.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on June 1, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Montana-Dakota Utilities Co., a Delaware corporation having its principal place of business in Minneapolis, Minnesota, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of March 22, 1946 in Docket Nos. G-220 and G-402 (5 FPC 64).

**(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation and/or sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.**

**(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.**

**(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.**

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(6) The authorization hereinafter granted should be limited to construction during the calendar year 1967 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $190,000, with the total deliveries to any one distributor or consumer not to exceed a maximum of 100,000 Mcf of natural gas per year and with the gas not to be used for boiler fuel purposes.

(7) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter a statement in compliance with Section 157.7(c)(8) of the Commission's Regulations under the Natural Gas Act.

**(8) The certificate issued hereinafter should be conditioned upon Applicant's compliance with the provisions of Section 157.7(c)(7) of the aforesaid Regulations.**

*The Commission orders:*

**(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, Montana-Dakota Utilities Co., to construct during the calendar year 1967 the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities to sell natural gas to direct consumers and to distributors for resale and for miscellaneous rearrangements as hereinafter provided.**

**(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.**

**(C) The authorization granted in paragraph (A) above is limited to construction during the calendar year 1967 and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $190,000, with the total deliveries to any one distributor or consumer limited to a maximum of 100,000 Mcf of natural gas per year and with the gas not to be used for boiler fuel purposes.**

**(D) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with**

Section 157.(c)(8) of the Commission's Regulations under the Natural Gas Act.

(E) The certificate issued by paragraph (A) above is expressly conditioned upon Applicant's compliance with the provisions of Section 157.7(c)(7) of the aforesaid Regulations, and, further, shall not entitle any industrial customers to whom firm deliveries may be authorized herein to any priorities or rights to additional gas for meeting any future increases in their requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

(F) The certificate issued is granted on the express condition that any interruptible service authorized herein shall be curtailed or interrupted to the extent required to meet existing or future contracted maximum delivery obligations of Applicant for firm service to its customers.

---

## REPORTS BY NATURAL GAS COMPANIES OF CURTAILMENTS OF SERVICE TO INDUSTRIAL CUSTOMERS, DOCKET NO. R-321

### ORDER NO. 344-A

### AMENDING § 260.1(c) OF THE COMMISSION'S REGULATIONS

(Issued June 7, 1967)*

Order No. 344, issued in this proceeding on May 2, 1967 (37 FPC 838, 32 F.R. 7051), revised the supplementary schedule 520A to Annual Report FPC Form No. 2 by, among other things, changing the heading of the schedule to "Curtailments of Field and Main Line Industrial Customers". Since paragraph (c) of §260.1 lists the headings of the schedules contained in the Report form, it should have been amended so as to correctly list the revised heading of the schedule. We are here supplying the inadvertent omission.

*The Commission finds:*

Notice of this amendment prior to adoption is unnecessary and good cause exists for making it effective immediately.

*The Commission*, acting pursuant to the provisions of the Natural Gas Act, as amended, particularly sections 10 and 16 thereof (52 Stat. 826, 830; 15 U.S.C. 717i, 717o), ***orders:***

(A) Section 260.1(c), Subchapter G, Chapter I of Title 18 of the Code of Federal Regulations, is amended by revising the line "Curtailments of Main Line Industrial Customers" therein appearing to read:

"Curtailments of Field and Main Line Industrial Customers".

(Secs. 10, 16; 52 Stat. 826, 830; 15 U.S.C. 717i, 717o)

(B) The amendment here adopted shall be effective upon the issuance of this order.

(C) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

---

*Published in the Federal Register on June 14, 1967 (32 F.R. 8522).

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## PUBLIC INFORMATION—STANDARDIZED CONDITIONS AS TO PRELIMINARY PERMITS OR LICENSES FOR HYDRO-ELECTRIC DEVELOPMENTS, DOCKET NO. R-325

### ORDER NO. 348

### STATEMENT OF GENERAL POLICY PROVIDING CITATIONS TO L-FORMS

(Issued June 7, 1967)*

From time to time the Commission adopts sets of standardized conditions for inclusion in given classes of preliminary permits or licenses issued under Part I of the Federal Power Act. For ease of reference the sets are designated as "Forms" and although they are not binding regulations, and may be departed from in particular cases, the Commission normally adheres to them, as a matter of general policy, in issuing subsequent permits or licenses in similar circumstances. In order that the public be advised of these policies, the Commission publishes and disseminates the orders prescribing such forms when issued and includes them in the printed volumes of the FPC Reports. It is also necessary and appropriate in the administration of the Federal Power Act and the Administrative Procedure Act to facilitate convenient public reference to such forms by listing the forms and their citations in the rules and regulations of the Commission which are codified in the Code of Federal Regulations.

Accordingly, the Commission *orders:*

Part 2, Chapter I, Title 18 of the Code of Federal Regulations is amended by adding the following new section:

§ 2.9 Conditions in preliminary permits and licenses—list of and citations to "P-" and "L-" Forms.

The Commission has approved several sets of standard conditions for normal inclusion in preliminary permits or licenses for hydroelectric developments. In a special situation, of course, the Commission in issuing a permit or license for a project will modify or eliminate a particular article (condition). For reference purposes the sets of conditions are designated as "Forms"—those for preliminary permits are published in Form P-1, and those for licenses are published in Form L's. There are different Form L's for different types of licenses, and the forms have been revised from time to time. Thus at any given time there will be several series of standard forms applicable to the various vintages of different types of licenses. The forms and their revisions are published in the Federal Power Commission Reports and citations thereto are listed below.

New or revised forms may be approved after preparation of this list (which is up to date as of May 25, 1967) and consequently do not appear herein. Any forms currently in use, including those which have not yet appeared in the FPC Reports, may be obtained from the Office of Public Information, Federal Power Commission, 441 G Street, N.W., Washington, D.C. 20426.

Within each of the categories, the last-listed form is the one in use at the date of preparation of the list. The dates in the list are the issuance date of the license order with which the particular form was first published in the FPC Reports.

## IOWA SOUTHERN UTILITIES COMPANY, DOCKET NO. E-7351

### SUPPLEMENTAL ORDER AUTHORIZING ISSUANCE OF FIRST MORTGAGE BONDS

(Issued June 8, 1967)

By order issued May 31, 1967, 37 FPC 1000, in the above-entitled matter, the Commission authorized Iowa Southern Utilities Company, (Applicant), to issue and sell at competitive bidding $8,000,000, principal amount of First Mortgage Bonds, due 1997, subject, among other, to the provisions set forth in paragraph (B) of that order as follows:

> (B) The proposed issuance and sale of Bonds at competitive bidding shall not be consummated until:
>
> (i) Applicant shall have amended its application pursuant to the requirements of Section 34.2(g) of the Commission's Regulations under the Federal Power Act relating to compliance with competitive bidding requirements, and Section 34.2(h) of those Regulations relating to affiliation, and shall have advised the Commission by telephone and telegraph, as contemplated in Section 34.9 of the Regulations.
>
> (ii) The Commission, by further order, shall have approved the price to be received by Applicant for the proposed issuance of Bonds and the interest rate thereof.

Applicant on June 8, 1967, filed an amendment, pursuant to the requirements of the aforementioned Commission order, setting forth, among other things, that it proposes to accept as providing the lowest annual cost of money to it, the bid of Francis I. duPont, A. C. Allyn, Inc., to purchase the proposed issuance of $8,000,000, principal amount of Bonds, for the price of 98.571% of principal amount, with an interest rate of 6⅛%, resulting in a cost of money to the Applicant of 6.23%

*The Commission finds:*

(1) Applicant has satisfactorily complied with the requirements of paragraph (B) of the Commission's order issued May 31, 1967, in the above docket, and under the bid it proposes to accept for the Bonds, the price to be received by Applicant therefor and the interest rate thereof are reasonable.

(2) The proposed issuance and sale of Bonds, as hereinafter authorized, will be for a lawful object, within the corporate purposes of the Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance by the Applicant of service as a public utility and which will not impair its ability to perform that service, and is reasonably appropriate for such purposes.

*The Commission orders:*

(A) The price to be received by Applicant for the proposed Bonds and the interest rate thereof under the bid referred to above, are approved as reasonable.

(B) The proposed issuance and sale of Bonds referred to above upon the terms and conditions and for the purposes specified in the application, as supplemented by the amendment referred to above, are authorized, subject only to the provisions of paragraphs (A), (C), (D), and (E) of the Commission's order issued May 31, 1967, in the above docket.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## PHILLIPS PETROLEUM COMPANY (OPERATOR), DOCKET NO. G-3244, ET AL.

### ORDER DENYING REHEARING

(Issued June 9, 1967)*

On May 10, 1967, Phillips Petroleum Company (Phillips) filed in Docket No. G-3244, *et al.*, an application for rehearing of the order issued in said docket on April 14, 1967, insofar as said order amended the orders issuing certificates in Docket Nos. G-3244, CI65-273 and CI65-624 by authorizing the sales of additional volumes of natural gas and issued a certificate in Docket No. CI66-905 authorizing the sale of natural gas. Each authorization is for the sale of residue gas to El Paso Natural Gas Company from the Permian Basin area of Texas or New Mexico.

Prior to the issuance of the subject authorizations Phillips advised the Commission[1] that it would accept a certificate and certificate amendments at the applicable area rates reflected in its rate schedule-quality statements "or such other rate or rates as may be determined to be applicable to such sales pursuant to a final order entered by the Commission in accordance with the remand of Opinion Nos. 468 and 468-A, 34 FPC 159, 1068, by the U.S. Court of Appeals for the Tenth Circuit, or other judicial review." The order of April 14, 1967, provides that the initial rates for the subject sales "shall be the applicable base area rates prescribed in Opinion No. 468, as modified by Opinion No. 468-A, as adjusted for quality, or the contract rates, whichever are lower; and no increases in rate in excess of said initial rates shall be filed before January 1, 1968."[2] The tabulation in the order of April 14, 1967, noted that "Applicant has agreed to accept authorization for additional volumes pursuant to Opinion No. 468."[3]

In its application for rehearing Phillips submits that it did not agree to accept authorization pursuant to Opinion No. 468, that the Commission has ignored the court's remand of said opinion and stay of the effectiveness of the rates and that Phillips will be deprived of any possibility of collecting higher rates during the moratorium period even though the final order in Docket No. AR61-1, *et al.*, may determine just and reasonable rates in excess of those rates prescribed in Opinion No. 468. Phillips also claims it is entitled to the same relief granted certain small producers in an order issued February 6, 1967, in *Rodman and Late, et al.*, Docket No. CS66-48, *et al.*, 37 FPC 281. Phillips requests that the order of April 14, 1967, be amended by deleting therefrom the condition that no increases in rate shall be filed before January 1, 1968, or in the alternative, that it be permitted to collect current contract rates subject to refund to the extent that such rates are in excess of the rates finally to be determined in Docket No. AR61-1, *et al.*

---

*Reconsideration denied by order issued July 31, 1967, 38 FPC 221.

[1] Letters dated January 25, 1967, with respect to the sales proposed in Docket Nos. G-3244, CI65-273 and CI65-624 and letter dated January 27, 1967, with respect to the sale proposed in Docket No. CI66-905.

[2] Mimeo., p. 6, para. (E).

[3] Mimeo., pp. 9, 13 and 14.

In our order issued March 4, 1966, denying applications for rehearing of Opinion No. 484 (*El Paso Natural Gas Company, et al.*, Docket No. CP64–211, *et al.*) we stated (35 FPC 321, 322):

> Nine producers[2] urge that the stay granted by the Circuit Court of Appeals for the Tenth Circuit of the ordering provisions of Opinion No. 468 should prevent the Commission from applying the price levels established in Opinion No. 468 to determine the in-line initial prices in these certificate proceedings. We think that the applicable area rates established by the Commission after lengthy hearings and the opportunity for full presentations by all interested parties are the best present indication of the proper in-line prices in the area, even though these area rates are subject to court review. We do not think that the public convenience and necessity requires the issuance of certificates at prices in excess of the area rates. [Footnote omitted].

That reasoning is equally applicable here. In view of the petitions for certiorari by the Commission, as well as other parties, which are pending in the Supreme Court, it would not be appropriate at this time to adhere to the Tenth Circuit's remand of the *Permian* decision.

There is also no justification for removing the moratorium provision from the subject certificates. We have refused consistently to waive moratoriums in temporary certificates to permit rate filings in the *Permian* area above the applicable area just and reasonable ceiling prescribed in Opinion No. 468.[4] We have also imposed the same type of moratorium involved here in issuing permanent certificates (Opinion No. 484, 35 FPC 40, 47).

In the *Rodman* order, a policy was adopted by the Commission of granting relief to small producers from certain provisions in their small producer certificates so as to allow them to collect, subject to refund, rates in excess of the applicable area base rate ceiling determined in Opinion No. 468. The basic purpose of that order was to place small producers in the same position with respect to *existing sales* as other producers in *Permian*, thus encouraging those which had small producer certificates to retain them and those which were eligible for such a certificate, but had not yet applied for one, to acquire one. Unlike Phillips, which has no certificate authorization except for the certificate authorization involved here to which it objects, the small producers in the *Rodman* order were making sales pursuant to unconditioned temporary or permanent certificate authorization. These producers thus were in a position to collect, albeit subject to refund, above ceiling rates pending completion of judicial review in *Permian* in the absence of a small producer certificate. Since Phillips is proposing to make new sales and has no outstanding certificate authorization, it is clear that the rationale of the *Rodman* order is not applicable here.

The subject permanent certificates were issued to Phillips under the shortened hearing procedure on the assumption that the terms and conditions thereof should be acceptable to it in view of its letters of January 25 and 27, 1967. It now appears that we were mistaken. Phillips in any event is free to accept or reject the certificates as tendered.[5] However, if Phillips wishes to operate on the basis of a permanent certificate it must do so pursuant to the reasonable conditions we have imposed. In the alternative, it may reject these certificates, and instead await a formal hearing as to the proper initial rate in these dockets.

---

[4] *Sun Oil Company*, order issued October 21, 1965 (undocketed, 34 FPC 1195); *Union Oil Company of California*, Docket No. CI65–683, order issued December 20, 1965, 34 FPC 1505; and *Sohio Petroleum Company*, Docket No. G–17012, order issued June 6, 1966, 35 FPC 900.

[5] If Phillips has commenced service under these certificates, it may not properly reject these certificates now.

*The Commission finds:*

The assignments of error and grounds for rehearing set forth no new facts or principles of law which either were not fully considered by the Commission when it issued the order in Docket No. G–3244, *et al.*, or which, having now been considered, warrant any amendment of said order.

*The Commission orders:*

The application for rehearing filed on May 10, 1967, in Docket No. G–3244, *et al.*, by Phillips Petroleum Company is denied.

## BLANCO OIL COMPANY, ET AL., DOCKET NO. G–20402, ET AL.[1] AND KILLAM & HURD, DOCKET NO. CI61–626

### ORDER DENYING OFFER OF SETTLEMENT

(Issued June 12, 1967)

On March 29, 1967, Blanco Oil Company, *et al.* (Blanco) and Killam & Hurd submitted a joint offer of settlement in these proceedings pursuant to Section 1.18(e) of the Commission's Rules of Practice and Procedure. The offer involves four sales of natural gas made by Blanco, and one made by Killam & Hurd.

Docket Nos. G–20402 and RI64–767 involve proposed rate increases filed by Blanco from an initial rate of 10.5¢ to 15.5¢ and 16.7228¢ per Mcf. Each increase was suspended for the statutory period and placed in effect, subject to refund. This sale is made under Blanco's FPC Gas Rate Schedule No. 6 in the Ingham (Devonian) Field, Crockett County, Texas (Texas Railroad District No. 7(c)) to El Paso Natural Gas Company. Blanco proposes to reduce the currently effective rate of 16.7228¢ per Mcf to 14.5¢ per Mcf which is the rate found to be just and reasonable in the Commission's Opinion No. 468 in the Permian Area Rate Proceeding, Docket No. AR61–1, 34 FPC 159.[2]

Docket Nos. CI61–618 and CI61–626 involve sales of natural gas made by Blanco and Killam & Hurd to Natural Gas Pipeline Company of America in the Northeast Thompsonville Field, Webb and Jim Hogg Counties, Texas (Texas Railroad Commission District No. 4). The sales are made under Blanco's and Killam & Hurd's FPC Gas Rate Schedule Nos. 9 and 1, respectively. The initial rate for these sales was 18¢ per Mcf of natural gas under temporary certificates granted without specific refund conditions. On September 30, 1965, the

---

[1] The other proceedings involved herein affecting Blanco alone are Docket Nos. RI64–350, RI64–767 and RI66–116 and Blanco Oil Company (Operator), *et al.* in Docket No. CI61–618.

[2] Docket No. G–20402 was consolidated in the *Permian* proceeding, and Docket No. RI64–767 was included in the Commission's show cause order, 34 FPC 424, issued with Opinion No. 468. Blanco has not filed a quality statement nor has it applied for a small producer certificate under Order No. 308, 34 FPC 1202.

Commission issued its Opinion No. 478 in *Turnbull & Zoch Drilling Co. (Operator), et al.*, Docket No. G-17960, *et al.*, 34 FPC 1001, wherein it found the proper initial rate for these sales to be 15¢ per Mcf of natural gas. Blanco and Killam & Hurd propose settlement rates of 15¢ from the date of issuance of this order. On May 24, 1967, the Commission's initial rate determination in Opinion No. 478 was affirmed by the United States Court of Appeals for Fifth Circuit in *Continental Oil Company, et al.* v. *F.P.C.* (Nos. 23188, *et al.*). The Court also held that the Commission had the power to order refunds of amounts collected above the in-line rate where equitable considerations made it appropriate to do so.

Docket No. RI64-350 involves a sale of natural gas by Blanco under its FPC Gas Rate Schedule No. 3 to Tennessee Gas Pipeline Company in the Heyser Field, Calhoun County, Texas (Texas Railroad Commission District No. 2). Blanco is presently charging and collecting 18¢ per Mcf of natural gas, subject to refund under Section 4(e) of the Natural Gas Act and proposes a settlement rate of 15¢ per Mcf for this sale. Blanco and Killam and Hurd have charged and collected approximately $497,100 above the proposed settlement rates for the sales involved herein. They propose to make no refunds of such monies.

Protests to the proposal and comments have been filed by the Public Utilities Commission of the State of California and The People of the State of California, Brooklyn Union Gas Company, Public Service Electric and Gas Company and Consolidated Edison Company of New York. The protests in the main center on the fact that Blanco and Killam & Hurd propose to make no refunds, and that in only one instance, the sale to Natural Gas Pipeline Company of America, do they propose a moratorium on increased rates. That moratorium period was set forth in the Commission's Opinion No. 478, and has been affirmed by the Fifth Circuit.

Essentially, Blanco and Killam & Hurd propose to charge prospectively the just and reasonable rate found by the Commission in Permian without making any of the refunds required by the order in that proceeding. We recognize that this refund order is still the subject of court review. They further propose to charge prospectively the rates found to be in-line in Texas District No. 4 without making any refunds which the Fifth Circuit has decided that we have power to order. This latter decision may also be subject to further court review. A similar proposal involving the sale in Texas District No. 2 would be without refunds although any refund obligation has been incurred under Section 4 of the Natural Gas Act rather than Section 7. In these circumstances, approval of the settlement proposal would not be in the public interest. It may be noted, however, that Blanco could file a proposal under its FPC Gas Rate Schedule Nos. 3 and 4 in accordance with the provisions of the Second Amendment to the Statement of General Policy No. 61-1, 18 CFR 2.56, as amended.

*The Commission finds:*

It is necessary and proper in carrying out the provisions of the Natural Gas Act and the Regulations thereunder to deny Blanco's and Killam & Hurd's joint offer of settlement filed with the Commission on March 29, 1967.

*The Commission orders:*

The joint offer of settlement filed by Blanco and Killam & Hurd on March 29, 1967, in these proceedings, is hereby denied.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## CITIES SERVICE GAS COMPANY, DOCKET NO. CP67-67

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY AND ORDER TERMINATING FORMAL PROCEEDING

(Issued June 12, 1967)

On September 19, 1966, Cities Service Gas Company (Applicant) filed in Docket No. CP67-67, as amended on March 10, 1967, an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities in Greene County, Missouri, and to sell and deliver natural gas to The Gas Service Company (Gas Service) for resale and distribution in and about the cities of Ash Grove, Walnut Grove and Willard, Missouri, all as more fully set forth in the application, as amended, in this proceeding.

The estimated third year peak day annual natural gas requirements of the three communities are 1,387 Mcf and 108,500 Mcf, respectively. The proposed sale of gas to Gas Service will be made pursuant to Applicant's FPC Gas Rate Schedules F-2, C-2 and I-2.

Specifically, by its amended application, Applicant proposes to construct and operate a 4-inch lateral line extending 7.07 miles from Applicant's existing 16-inch pipeline, together with measuring and regulating facilities, in Greene County. The total estimated cost of these facilities is $120,000, which cost will be financed from cash on hand.

The original application in this proceeding was noticed on September 27, 1966 (31 F.R. 12975). Several petitions to intervene were filed herein, and, subsequently, by order issued January 25, 1967 (32 F.R. 2399) this matter was set for formal hearing to commence on March 6, 1967. At the hearing on March 6, 1967, the presiding examiner suspended the hearing until further notice to give Applicant an opportunity to amend its application. On March 10, 1967, Applicant filed its amendment, and on March 15, 1967 (32 F.R. 4476) notice of said amendment was issued providing, among other things, that interveners allowed in the proceeding on the original application would not be carried over to the amended application and that such interveners would have to file new petitions if they desired to intervene in the proceeding on the amended application. The notice of March 15, 1967, also provided that upon review by the Commission and in the event no protest or petition to intervene in opposition to the amended application was timely filed, said amended application would be disposed of pursuant to the statutory hearing procedure. No petition to intervene in opposition, notice of intervention or protest to the granting of the amended application having been filed, the amended application shall be disposed of pursuant to the statutory hearing procedure and the formal proceeding in this docket shall be terminated.

At a hearing held on June 9, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, amendment and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Cities Service Gas Company, a Delaware corporation having its principal place of business in Oklahoma City, Oklahoma, is a "natural-gas

company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 28, 1943 in Docket No. G–298 (4 FPC 471).

(2) The facilities hereinbefore described, as more fully described in the application, as amended, in this proceeding, are to be used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the proposed transportation and sale of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities and the proposed transportation and sale of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(6) The construction of the facilities hereinafter authorized should be delayed pending receipt of appropriate authorization by Gas Service from the State of Missouri.

(7) The formal proceeding in this docket should be terminated as of the date this order issues.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Cities Service Gas Company, to construct and operate the proposed facilities and to sell and deliver natural gas as hereinbefore described, all as more fully described in the application, as amended, in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation and the sale and delivery of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act within 12 months from the date on which this order issues.

(D) The construction of the facilities hereinabove authorized shall be delayed pending receipt of appropriate authorization by The Gas Service Company from the State of Missouri.

(E) The formal proceeding in this docket is terminated as of the date this order issues.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## COLORADO INTERSTATE GAS COMPANY, DOCKET NO. CP67-290

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 12, 1967)

On April 7, 1967, Colorado Interstate Gas Company (Applicant) filed in Docket No. CP67-290 a "budget-type" application pursuant to Section 7(c) of the Natural Gas Act, as implemented by Section 157.7(c) of the Regulations under the Act for a certificate of public convenience and necessity authorizing the construction and operation of miscellaneous gas sales and transportation facilities during the period extending from June 1, 1967 through May 31, 1968, all as more fully set forth in the application.

Specifically, Applicant seeks authorization to construct and operate various gas meter stations and mainline or lateral taps, for direct sales to consumers and for sales to existing resale customers. Applicant also seeks authorization to construct and operate various miscellaneous rearrangements of its existing pipeline system.

Applicant states the total estimated cost of the proposed construction will not exceed $300,000, with no single project to exceed a total cost of $50,000, and will be defrayed from current funds.

Applicant seeks authorization to construct and operate the following:

|  | Maximum Number | Maximum Costs |  |
|---|---|---|---|
|  |  | Single Project | All Projects |
| New delivery points | 10 | $25,000 | $100,000 |
| Lateral lines (up to 10-inch dia. 5 miles in length) | 5 | 50,000 | 100,000 |
| Miscellaneous rearrangements (up to 26-inch dia. 1 mile length) | 5 | 50,000 | 100,000 |
| Total | 20 |  | 300,000 |

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on June 9, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization, and upon consideration of the record,

*The Commission finds:*

(1) Colorado Interstate Gas Company, a Delaware corporation having its principal place of business in Colorado Springs, Colorado, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued June 5, 1945 in Docket No. G-294 (4 FPC 936).

(2) The facilities hereinbefore described, as more fully described in the application, in this proceeding, are proposed to be used in the transportation and/or sale of natural gas in interstate commerce and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(6) The authorization hereinafter granted should be limited to construction during the 12 month period extending from June 1, 1967 to May 31, 1968. The total expenditures for facilities to be constructed thereunder should be limited to a maximum of $300,000, with the total deliveries to any one customer not to exceed a maximum of 100,000 Mcf of natural gas per year.

(7) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with Section 157.7(c)(8) of the Commission's Regulations under the Natural Gas Act.

(8) The certificate issued hereinafter should be conditioned upon Applicant's compliance with the provisions of Section 157.7(c)(7) of the aforesaid Regulations.

*The Commission orders:*

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, to construct during the 12 month period extending from June 1, 1967 to May 31, 1968, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities to sell natural gas to direct customers and to distributors for resale as hereinafter provided.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(C) The authorization granted in paragraph (A) above is limited to construction during the 12 month period extending from June 1, 1967 to May 31, 1968. The total expenditures for facilities to be constructed thereunder are limited to a maximum of $300,000, with the total deliveries to any one customer limited to a maximum of 100,000 Mcf of natural gas per year.

(D) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with Section 157.7(c)(8) of the Commission's Regulations under the Natural Gas Act.

(E) The certificate issued by paragraph (A) above is expressly conditioned upon Applicant's compliance with the provisions of Section 157.7(c)(7) of the aforesaid Regulations and, further, shall not entitle direct customers to whom deliveries are authorized herein to any priorities or rights to additional gas at the expense of resale customers desiring to acquire additional gas to meet any future increases in their requirements.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## WILLIAM E. MCCOMMONS, D/B/A MCCOMMONS EXPLORATION COMPANY, ET AL., DOCKET NO. RI63-281

### ORDER DENYING MOTION FOR RECONSIDERATION

(Issued June 12, 1967)

William E. McCommons, d/b/a McCommons Exploration Company, *et al.* (McCommons) filed on May 8, 1967, a motion for reconsideration of the Commission's order issued January 30, 1967, 37 FPC 258, in the above-entitled proceeding. By that order the Commission denied McCommons' motion to terminate Docket No. RI63-281 and to relieve him of a potential refund obligation therein of approximately $54,000. The proceeding involves an increase from 11.9789¢ to 22.8829¢ per Mcf for a sale by McCommons to United Gas Pipe Line Company from Mississippi under his FPC Gas Rate Schedule No. 1. The last sale was made on April 8, 1966.

The Commission in its January 30 order denied McCommons' motion without prejudice to its resubmittal after the just and reasonable rate for the subject sale has been determined in an appropriate area proceeding. It was there determined that resolution of the question as to special relief should await conclusion of the area rate proceeding. Subsequent to the issuance of the January 30 order, an area rate proceeding in Docket No. AR67-1, *et al.* (Other Southwest Area), which includes the area involved here, was instituted by order issued February 28, 1967, 37 FPC 400. The just and reasonable rate for McCommons' sale will be determined in that proceeding.

McCommons' motion presents no new facts or principles of law which were not fully considered by the Commission in the January 30 order, or which, having now been considered, warrant any modification of that order.

*The Commission orders:*

The motion for reconsideration filed herein by McCommons on May 8, 1967 is denied.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## TRUNKLINE GAS COMPANY, DOCKET NO. CP67-287

### FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT OF FACILITIES

(Issued June 12, 1967)

On April 4, 1967, Trunkline Gas Company (Applicant) filed in Docket No. CP67-287 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon by sale certain natural gas facilities in the Hidalgo Field area, Hidalgo County, Texas, all as more fully set forth in the application.

Specifically, Applicant proposes to abandon by sale to Coastal States Producing Company (Coastal States) approximately 5,139 feet of 4-inch O.D. pipeline and two small purchase measuring stations. Said facilities were installed by Applicant to receive into its system natural gas purchased from American Petrofina Company of Texas, *et al.*, (American) in the Hidalgo Field area. Applicant and American have entered into an agreement, dated November 16, 1966, providing for a change in delivery points; by Commission order issued February 15, 1967, in Docket No. CI61-672 said change was authorized. Accordingly, Applicant states that it will no longer need or require the facilities to be abandoned.

Coastal States will pay Applicant $12,000 for the subject facilities, which amount, Applicant states, is the approximate depreciated cost of such facilities.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on June 9, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Trunkline Gas Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of April 29, 1949 in Docket No. G-882 (8 FPC 250).

(2) The facilities to be abandoned, as hereinbefore described, are subject to the jurisdiction of the Commission and the abandonment of such facilities is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) Such abandonment by Applicant, as hereinbefore described, is permitted by public convenience and necessity, and an order authorizing and approving same should be issued as hereinafter ordered.

*The Commission orders:*

(A) Permission for and approval of the abandonment by Applicant of facilities hereinbefore described, all as more fully described in the application in this proceeding, are granted.

(B) Applicant shall advise the Commission of the date of said abandonment within 10 days of the date thereof.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## CITIES SERVICE GAS COMPANY, DOCKET NO. CP63-188 (PHASE II)

### ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 13, 1967)

On April 10, 1967, Cities Service Gas Company (Petitioner) filed in Docket No. CP63-188 (Phase II) a petition to amend the order issued by the Commission December 30, 1963, 30 FPC 1612, as amended October 15, 1964 and November 1, 1965, 34 FPC 1209, so as to authorize an increase in the maximum operating storage pressure in Webb Storage Field, Grant County, Oklahoma, and to acquire gas storage leasehold interests in 240 acres located adjacent to leasehold interests previously authorized for acquisition in Webb Field, at an estimated cost of $24,000, all as more fully set forth in the petition to amend.

In the order of December 30, 1963, the Commission authorized Petitioner to construct, acquire, and operate certain facilities and to acquire certain leasehold interests and gas reserves in order to develop and operate an underground gas storage field, the Webb Gas Field, located in Grant County, Oklahoma. This order was conditioned upon the maximum operating storage pressure not exceeding 1040 psia, at the wellhead.

Petitioner states that at the time of filing the original application, the production history of the Webb Field indicated a total reservoir capacity of 55,600,000 Mcf at original wellhead pressure of 1550 psig. Through the storage development period of the field, it has become evident that water encroachment has temporarily reduced the storage space within the reservoir.

Petitioner states that due to the reduction in storage space it will be unable to inject sufficient volumes of gas at the presently authorized storage pressure to meet the increased peak day demands of its existing customers.

Due notice of the filing of the petition to amend and opportunity for hearing has been given by publication in the Federal Register on April 27, 1967 (32 F.R. 5633). No protest or petition to intervene has been filed in this proceeding concerning this amendment.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act, and the public convenience and necessity require that the Commission's order issued December 30, 1963 in Docket No. CP63–188 granting Cities Service Gas Company certain certificate authorizations, be further amended as hereinafter ordered.

*The Commission orders:*

(A) The Commission's order issued December 30, 1963, in Docket No. CP63–188 is further amended so as to authorize Petitioner to increase the maximum operating storage pressure in its Webb Storage Field, Grant County, Oklahoma, to 2000 psig, and to acquire natural gas storage leasehold interests in 240 acres in Grant County, Oklahoma, which is located adjacent to leasehold interests previously authorized for acquisition in the Webb Field.

(B) In all other respects said order shall remain in full force and effect.

(C) The amendment authorized by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the conditions set forth in paragraphs (f) and (g) of Section 157.20 of such Regulations.

(D) Petitioner shall submit to the Commission reports coinciding with the termination of each injection and withdrawal cycles for the next two years occurring on and after the date of this amending order. The report will show the following:

(1) the total volume of gas in the reservoir;
(2) the volumes of gas injected or withdrawn by months;
(3) the daily maximum injection and withdrawal volumes experienced during the reporting interval;
(4) the shut-in wellhead pressure for each well;
(5) the top storage pressure (wellhead and reservoir) experienced during the reporting interval;
(6) structure maps of the reservoir (when revised); and,
(7) a brief discussion of current operations.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## DUQUESNE LIGHT COMPANY, DOCKET NO. E-7331

### ORDER AUTHORIZING ACQUISITION OF FACILITIES

(Issued June 13, 1967)

Duquesne Light Company (Applicant) filed an application on January 10, 1967 and a supplement thereto on January 27th, for an order, pursuant to Section 203 of the Federal Power Act, authorizing the acquisition of various electric distribution facilities from the Borough of Aspinwall, Allegheny County, Pennsylvania (Aspinwall).

Applicant is incorporated under the laws of the Commonwealth of Pennsylvania and is qualified to do business in Pennsylvania and West Virginia with its principal business office at Pittsburgh, Pennsylvania. Applicant is engaged in the production, distribution and sale of electric energy in the greater parts of Allegheny and Beaver Counties, Pennsylvania.

Aspinwall operates a small municipal system serving the Borough of Aspinwall and three customers in an adjacent municipality. It owns and operates an internal combustion electric generating plant with a total capacity of 2600 kw. It is not interconnected with any other system, but generates all its own requirements. During 1965 it generated 6,865,200 kwh, sold 5,230,589 kwh to 1,261 ultimate consumers and delivered 1,651,243 kwh to public buildings and Borough facilities. Its peak load in 1965 was 1,455 kw.

Under an agreement dated October 12, 1966, Duquesne will acquire all of the electric facilities (except the power plant site, building, and generating facilities) owned by Aspinwall. Applicant has agreed to pay Aspinwall the total purchase price of $510,000 for the electric facilities covered by the agreement upon the effective date thereof.

According to the Applicant the facilities to be acquired have an estimated original cost of $212,100 and an estimated accumulated provision for depreciation of $57,100. Applicant proposes to record the estimated original cost of $212,100 in Account 101, Electric Plant in Service, the estimated accumulated provision for depreciation of $57,100 in Account 108, Accumulated Provision for Depreciation. Applicant also proposes to record an acquisition adjustment in the amount of $355,000 (the difference between the purchase price of $510,000 and the estimate of original cost less accrued depreciation) in Account 114, Electric Plant Acquisition Adjustments, and to write off this amount to Account 435, Miscellaneous Debits to Surplus.

Applicant proposes to serve Aspinwall's customers at the same rates it now charges customers in the nearby areas. According to the application, the monthly bill of the average residential customer in Aspinwall will be reduced by $1.62. The Applicant represents that a few customers, having a relatively low load factor, may possibly receive small increases because of the application of a minimum monthly charge.

According to the application, the proposed transaction will result in improved and more reliable and economical service to the electric customers of Aspinwall for the following reasons: (1) Applicant with its large generating capacity can more efficiently and economically serve the existing and growing needs of such customers; (2) by reason of its interconnections and its substantial and conveniently located resources of personnel, material and equipment, Applicant will be able to restore service promptly in case of interruption; and (3) the services of Applicant's personnel will be available to such customers to enable them to derive maximum benefits from the use of electricity.

Written notice of the application has been given to the Pennsylvania Public Utility Commission and the West Virginia Public Service Commission and to the Governor of each of those States. Notice was also published in the Federal Register on February 3, 1967 (32 F.R. 2440), stating that any person desiring to be heard or to make any protest with reference to said application should on or before February 13, 1967, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). By order dated May 1, 1967, the Pennsylvania Public Utility Commission approved the transaction.

On May 16, 1967 a letter was received from Edward J. Parker, of Aspinwall, Pennsylvania requesting us to review his brief in opposition to the sale which he made before the Pennsylvania Public Utilities Commission. We have reviewed his statement and find that the questions raised by Mr. Parker were confined to the manner in which the sale of the electric facilities was handled by the Borough Council. The Pennsylvania Public Utilities Commission in its order approving the transaction found that after careful examination of the matters involved, it was of the opinion that the transactions proposed are not adverse to the interests of the public in the Borough of Aspinwall.

The procedure to be followed by the Borough Council is governed by the laws of the State of Pennsylvania and the question of whether such laws have been complied with is a determination to be made by the Courts of the State of Pennsylvania and not this Commission.

*The Commission finds:*

(1) Applicant, a corporation, owns and operates facilities for the transmission and sale at wholesale of electric energy which is generated in the State of Ohio and consumed in the State of Pennsylvania, all of which facilities are in addition to, and do not include, facilities used for the generation of electric energy or facilities used in local distribution or solely for the transmission of electric energy consumed wholly by the transmitter. Applicant, therefore, is a public utility within the meaning of that term used in Section 203 of the Federal Power Act.

(2) By the proposed transaction, Applicant will merge or consolidate its facilities subject to the jurisdiction of the Commission with those of Aspinwall, another person, within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(3) The proposed acquisition of facilities by Applicant as described above, upon the terms and conditions set forth in the application, and subject to the provisions of this order will be consistent with the public interest as expressed in Section 203 of the Federal Power Act.

(4) The period of public notice given in this matter is reasonable.

*The Commission orders:*

(A) The proposed acquisition by Applicant of the aforementioned electric facilities, all as described above, is authorized and approved upon the terms and conditions and for the purposes set forth in the application subject to the provisions of this order.

(B) Applicant shall record the proposed transaction herein authorized and the facilities and properties referred to above as provided in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees.

(C) This authorization shall expire unless the transaction herein authorized and approved is consummated within 90 days from the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determination of this Commission or any other regulatory body and nothing herein shall be construed as an acquiescence by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## SOUTH TEXAS NATURAL GAS GATHERING COMPANY, DOCKET NO. CP67-263

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 13, 1967)

On March 14, 1967, South Texas Natural Gas Gathering Company (Applicant), filed in Docket No. CP67-263 an application, pursuant to Section 7(c) of the Natural Gas Act, as implemented by Section 157.7(b) of the Regulations under the Act, for a certificate of public convenience and necessity authorizing the construction during the period July 1, 1967 through June 30, 1968 and operation of gas purchase facilities to enable Applicant to take into its certificated pipeline system natural gas which will be purchased from producers thereof, all as more fully set forth in the application in this proceeding.

The purpose of this "budget-type" application is to augment Applicant's ability to act with reasonable dispatch in contracting for and connecting to its pipeline system new and existing supplies of natural gas in various producing areas adjacent to said system.

Applicant requests waiver of the cost limitations imposed by Section 157.7(b) of the Commission's Regulations under the Natural Gas Act, since its proposed total expenditures exceed such limitations, so that it may maintain its competitive position in acquiring new supplies of natural gas. The total cost of the proposed facilities will not exceed a cost of $1,000,000, with the cost of a single project limited to $250,000, which costs will be financed from cash on hand, from cash generated from normal operations and from internal sources.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on June 9, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, South Texas Natural Gas Gathering Company, a Delaware corporation having its principal place of business in Corpus Christi, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as here-

tofore found by the Commission in its Opinion and order issued August 30, 1962 in Docket No. G–18907 (28 FPC 418).

(2) The facilities hereinbefore described, as more fully described in the application filed in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter a statement in compliance with Section 157.7(b)(3) of the Commission's Regulations under the Natural Gas Act.

(6) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(7) The authorization hereinafter granted should be limited to construction during the period July 1, 1967 through June 30, 1968 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $1,000,000, with no single project to exceed a cost of $250,000.

(8) Good cause has been shown for waiver of the cost limitations imposed by Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

*The Commission orders:*

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, South Texas Natural Gas Gathering Company, to construct during the period July 1, 1967 through June 30, 1968, the proposed facilities hereinbefore described, as more fully described in the application filed in this proceeding, and to operate such facilities only to take natural gas into its certificated facilities from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with Section 157.7(b)(3) of the Commission's Regulations under the Natural Gas Act.

(C) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(D) The authorization granted in paragraph (A) above is limited to construction during the period July 1, 1967 through June 30, 1968, and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $1,000,000, with no single project to exceed a cost of $250,000.

(E) Applicant's request for waiver of the cost limitations imposed by Section 157.7(b) of the Commission's Regulations under the Natural Gas Act is granted.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## SOUTHERN NATURAL GAS COMPANY, DOCKET NO. CP67-231

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 13, 1967)

On February 17, 1967, Southern Natural Gas Company (Applicant) filed in Docket No. CP67-231 an application, as supplemented on March 22, 1967, pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities for the sale and delivery of additional volumes of natural gas to Chattanooga Gas Company (Chattanooga), an existing customer, all as more fully set forth in the application.

Specifically, Applicant seeks authorization to construct and operate approximately 7.9 miles of 24-inch loop pipeline on its main North Line between its Louisville and Reform Compressor Stations.

Applicant and Chattanooga have entered into a contract providing for an increase in Chattanooga's contract demand with Applicant to 37,000 Mcf, effective November 1, 1967, and to 39,000 Mcf, effective November 1, 1968. The currently effective executed service agreement between Chattanooga and Applicant provides for a contract demand of 29,000 Mcf, for the 1967-68 winter season.

The proposed facilities will permit Applicant to flow east from its Pickens compressor station on its main North Line approximately 14,000 Mcf per day of additional gas available at that location, thereby enabling Applicant to deliver the proposed additional 10,000 Mcf of contract demand gas to Chattanooga and also providing Applicant with approximately 4,000 Mcf of excess capacity.

The proposed additional volumes of natural gas will be sold to Chattanooga under Applicant's rate schedule OCD, the same rate schedule under which Applicant is presently authorized to sell gas to Chattanooga.

The total estimated cost of Applicant's proposed facilities is $791,570, which cost will be financed from cash on hand or from current operation.

After due notice, no protest, petition to intervene, or notice of intervention has been filed.

At a hearing held on June 9, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Southern Natural Gas Company, a Delaware corporation having its principal place of business in Birmingham, Alabama, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of October 6, 1942 in Docket No. G-296 (3 FPC 822).

(2) The facilities hereinbefore described and as more fully described in the application in this proceeding are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commis-

sion, and the construction and operation thereof and the transportation and sale of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The construction and operation of the proposed facilities and the transportation and sale of natural gas by Applicant are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of said Regulations.

(5) The certificate hereinafter issued should be conditioned upon Applicant's filing with the Commission of an appropriate revised service agreement with Chattanooga Gas Company in accordance with the Commission's Regulations under the Natural Gas Act.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to Applicant authorizing the construction and operation of the facilities and the transportation and sale of natural gas as hereinbefore described and as more fully set forth in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation and transportation and sale of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act within one year from the date of this order.

(D) The certificate issued by paragraph (A) above is conditioned upon Applicant's filing with the Commission of an appropriate revised service agreement with Chattanooga Gas Company in accordance with the Commission's Regulations under the Natural Gas Act.

## GEORGIA POWER COMPANY, PROJECT NO. 2591

### ORDER ISSUING PRELIMINARY PERMIT

(Issued June 14, 1967)

Application was filed on April 29, 1966, by Georgia Power Company (Applicant) of Atlanta, Georgia, for a preliminary permit under Section 4(f) of the Federal Power Act (Act) for proposed Project No. 2591, to be known as the Upper Oconee Project, to be located on the Oconee River in the Counties of Greene, Morgan, Oconee, Oglethorpe and Clark, Georgia, in the vicinity of Madison, Greensboro, and Athens, and affecting lands of the United States within the Oconee National Forest and within the Piedmont and Broad River Soil Conservation Districts, Greensboro, Georgia.

The Department of the Army and the Chief of Engineers have recommended that any preliminary permit for the project should provide that Applicant coordinate its studies of design, construction and operation with those of the District Engineer, U.S. Army Engineer District, Savannah, Georgia, in the interest of comprehensive planning for the Altamaha River Basin.

The Department of the Interior has recommended for inclusion in any preliminary permit for the project conditions in the interest of fish and wildlife resources as set forth in Article 13.

The U.S. Forest Service has advised that it has no objection to the issuance of a permit subject to the terms and conditions set forth in attached Form P-1, and to a special condition in the interest of alleviating damage to, and achieving maximum utilization of, the National Forest resources affected, as set forth in Article 14.

No construction is authorized by the issuance of this preliminary permit. This permit gives the permittee, during the period of the permit, the right of priority of application for license over other non-Federal entities, while the permittee undertakes the necessary studies and examination required by Section 9 of the Act in order to determine the economic feasibility of the proposed project, the means of securing the necessary financial arrangements for construction, the market for power, and all other information necessary for inclusion in any application for license, should one be applied for under the permit. A license would authorize construction of a project.

The issuance of a preliminary permit for Project No. 2591 as hereinafter provided shall not in any way be construed as precluding the exercise of Commission action contemplated under the provisions of Section 7(b) of the Act.

Applicant requests a preliminary permit for 36 months. It appears appropriate however, that the initial period of the permit should be 24 months as herein provided.

*The Commission finds:*

(1) Applicant is a corporation organized under the laws of the State of Georgia.

(2) Public notice of the filing of the application has been given as required by the Act. No protests or petitions to intervene have been received. No conflicting application is before the Commission.

(3) The proposed project will not affect a Government dam.

*The Commission orders:*

(A) This preliminary permit is hereby issued to Georgia Power Company (Permittee) for a period of 24 months, effective as of June 1, 1967, for the sole purpose of maintaining priority of application for license for proposed Project No. 2591, to be located on the Oconee River in the Counties of Greene, Morgan, Oconee, Oglethorpe and Clark, Georgia, in the vicinity of Madison, Greensboro and Athens, and affecting lands of the United States, subject to the terms and conditions of Sections 4(f) and 5 of the Federal Power Act (Act) which are incorporated herein by reference as a part of this permit, and subject to such rules and regulations as the Commission has issued or prescribed under the provisions of the Act.

(B) According to the application for permit, the proposed project, consisting of a reservoir area of about 25,000 acres at full pool elevation and a capacity of 250,000 kilowatts, would be located between river mile 205 and 215 and would develop about 115 feet of gross head on the Oconee River above Georgia Power Company's proposed Laurens Shoals Reservoir (Project No. 2413).

(C) This preliminary permit is also subject to the terms and conditions set forth in Form P-1 entitled "Terms and Conditions of Preliminary Permit," (16 FPC 1303-1305) which terms and conditions, designated as Articles 1 through 8, are attached hereto and made a part hereof, and further subject to the following special conditions set forth herein as additional articles:

*Article 9.* The Permittee shall submit at the close of each six month period from the effective date of this permit to the Federal Power Commission accurate statements of the work accomplished during the period and of the work contemplated under this permit for the ensuing period.

*Article 10.* The Permittee shall, during the period of project planning, consult with the District Engineer, U.S. Army Engineer District, Savannah, Georgia, concerning design, construction and operation of the project, and formulation adaptable to comprehensive planning for the basin.

*Article 11.* The Permittee shall, during the period of project planning, consult with the Federal, State, and local agencies having an interest in water quality as affected by rates of discharge, reaeration of water, and flowage conditions below the dam.

*Article 12.* The Permittee shall, during the period of project planning, consult with the Federal, State, and local agencies having an interest in outdoor recreation on project lands and waters, in the preparation of an "Exhibit R" which is required for the filing of an application for license pursuant to Section 4.41 of the Commission's Regulations under the Federal Power Act.

*Article 13.* The Permittee shall, during the period of project planning, consult with the Federal, State, and local agencies having an interest in fish and wildlife in project lands and waters, in the preparation of an "Exhibit S" which is required for the filing of an application for license pursuant to Section 4.41 of the Commission's Regulations under the Federal Power Act.

*Article 14.* The Permittee shall, prior to undertaking any investigation work under this preliminary permit on National Forest lands, consult with the Regional Forester, United States Forest Service, Department of Agriculture, Atlanta, Georgia, or his representative, as to reasonable requirements relative to operations, field surveys and investigations, and shall abide by such requirements; and shall cooperate with the Forest Service during the period of this permit to develop a plan for alleviating damage to, and achieving maximum utilization of, National Forest resources insofar as they are affected by any proposed project.

*Article 15.* The Permittee shall, for the purpose of assuring the cooperation required by the terms of the permit, designate a liaison officer to act for the Permittee in keeping the several agencies specified in this permit currently informed, and such liaison officer shall communicate with such agencies within 60 days from the date of issuance of this permit.

*Article 16.* The Permittee shall, during the period of project planning, consult with the Department of the Interior concerning historic properties, in furtherance of the purposes of Public Law 89-665 (80 Stat. 915).

(D) This order shall become final 30 days from the date of issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this preliminary permit. In acknowledgment of the acceptance of this preliminary permit, it shall be signed for the permittee and returned to the Commission within 60 days from the date of issuance of this order.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## PHILADELPHIA ELECTRIC COMPANY, PROJECT NO. 2355

### ORDER MODIFYING LICENSE ORDER

(Issued June 14, 1967)

On February 14, 1967 Philadelphia Electric Company licensee for Muddy Run Project No. 2355 (Applicant), filed an application to modify Article 41 of its license.

Applicant requests it be relieved of the requirement for the fencing of approximately 500 acres of land adjacent to the Muddy Run Reservoir as provided for in Article 41.

In compliance with Article 41 Applicant filed with the Commission on June 8, 1965 a memorandum of understanding between itself and the Pennsylvania Game Commission. On July 28, 1965 the Commission advised the Applicant that the memorandum appeared to comply with Article 41. In further discussions with the Pennsylvania Game Commission regarding procedures for planting, developing and managing the area in question, the Pennsylvania Commission requested that the area be open for public hunting, hiking and bird watching at all times, and indicated that a fence around the area may be detrimental to public utilization of the lands.

*The Commission finds:*

It is appropriate and consistent with the public interest that the license order in Project No. 2355 be modified as hereinafter provided.

*The Commission orders:*

Article 41 of the license order issued September 21, 1964 for Project No. 2355, as amended, is hereby modified as follows:

> *Article 41*. The licensee shall make available to the Pennsylvania Game Commission on a long term lease basis, about 500 acres of land adjacent to the Muddy Run Reservoir. These lands shall be developed to include food and cover plantings, at the Licensee's expense, provided that the Pennsylvania Game Commission will manage the area to provide public hunting, and will bear operation and maintenance costs. The licensee, prior to construction shall negotiate a memorandum of understanding with the Pennsylvania Game Commission, including such details and this agreement shall be filed with the Commission.

## MINNESOTA POWER & LIGHT COMPANY, DOCKET NO. E-7350

### ORDER AUTHORIZING ACQUISITION OF COMMON STOCK

(Issued June 15, 1967)

Minnesota Power & Light Company (Applicant) filed an application on May 1, 1967, for an order, pursuant to Section 203 of the Federal Power Act, authorizing the acquisition of 7,000 additional shares of Common Stock, par value $100 per share, of Superior Water, Light and Power Company, (Superior) a wholly-owned subsidiary. The purchase price will be the total par value of $700,000.

Applicant is incorporated under the laws of Minnesota with its principal business office at Duluth, Minnesota, and is engaged in the electric utility business in the State of Minnesota.

Superior is incorporated under the laws of Wisconsin with its principal business office at Superior, Wisconsin and supplies electric, gas and water service in Superior, Wisconsin and the area immediately adjacent thereto. All of the outstanding stock of Superior is presently owned by Applicant.

Applicant states that it proposes to make the additional investment in Superior for the purpose of enabling the latter company to finance in part the construction of about 30 miles of a 115 kv transmission line which is expected to cost Superior $633,700, and to finance the construction of additional water facilities at Minnesota Point estimated to cost $65,000. The transmission line will provide an interconnection with Lake Superior District Power Company enabling that company, the Applicant and Superior to exchange firm, economy, and emergency energy.

On the books of Minnesota Power & Light, the acquisition of Superior's stock is to be recorded by a debit of $700,000 to Account 123, Investment in Associated Companies, and by a credit of the same amount to Account 131, Cash. On the books of Superior the issuance of the stock is to be recorded by a debit of $700,000 to Account 131, Cash, and by a credit of the same amount to Account 201, Common Stock.

Written notice of the application has been given to the Minnesota Railroad and Warehouse Commission, the Wisconsin Public Service Commission, and to the Governor of each of those States. Notice of the application was also published in the Federal Register on May 19, 1967 (32 F.R. 7479), stating that any person desiring to be heard or to make any protest with reference to said application should, on or before the 31st day of May 1967, file with the Federal Power Commission, Washington, D.C., 20426, petitions or protests. No protest or petition or request to be heard in opposition to the granting of such application has been received.

The Public Service Commission of Wisconsin, by order dated March 21, 1967, granted approval for Superior to issue 7,000 shares of Common Stock and to sell them for not less than $700,000 cash (par value).

*The Commission finds:*

(1) Applicant, a corporation, is a public utility within the meaning of Section 203 of the Federal Power Act, subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued February 12, 1959, *In the Matter of Minnesota Power & Light Company*, Docket No. E-6858 (21 FPC 214).

(2) Superior, a corporation, is a public utility within the meaning of Section 203 of the Federal Power Act, subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued June 3, 1959, *In the Matter of Superior Water, Light and Power Company*, Docket No. E-6881 (21 FPC 815)..

(3) By the proposed transaction, all as described above, Applicant will acquire the securities of Superior, another public utility, within the purview and subject to the requirements of Section 203 of the Federal Power Act.

(4) The proposed acquisition by Applicant of the additional 7,000 shares of

Superior's Common Stock, all as described above, upon the terms and conditions set forth in the application and subject to the provisions of this order will be consistent with the public interest as expressed in the Federal Power Act.

(5) It has not been shown with respect to the proposed transaction, all as described above, that Applicant is subject to any requirement of the Public Utility Holding Company Act of 1935 or a rule, regulation, or order thereunder which would exempt it from the requirements of Section 203 of the Federal Power Act by reason of Section 318 thereof.

(6) The period of public notice given in this matter is reasonable.

*The Commission orders:*

(A) The acquisition by Applicant of 7,000 shares of Superior's Common Stock, all as described above, upon the terms and conditions and for the purposes set forth in the application is hereby authorized and approved subject to the provisions of this order.

(B) This authorization shall expire unless the transaction herein authorized and approved is consummated within 90 days from the issuance of this order.

(C) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determinations of cost, or any matter whatsoever now pending or which may come before this Commission.

(D) Nothing in this order shall be construed to imply any guarantee or obligation on the part of the United States in respect of any securities to which this order relates.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## PENNSYLVANIA GAS COMPANY, DOCKET NO. CP67-280

### FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT OF FACILITIES AND ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 19, 1967)

On March 24, 1967, Pennsylvania Gas Company (Applicant) filed in Docket No. CP67-280 an application pursuant to Sections 7(b) and 7(c) of the Natural Gas Act for permission and approval to abandon certain natural gas facilities and for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities for the transportation of natural gas in interstate commerce, all as more fully set forth in the application.

Due to increasing market requirements in its Erie, Pennsylvania and Jamestown, New York, market areas, Applicant proposes to construct and operate 12.5 miles of 20-inch transmission pipeline near Warren, Pennsylvania replacing approximately 31.6 miles of existing parallel 8-inch and 12-inch pipelines.

Applicant further proposes to abandon in place approximately 17.4 miles of 8-inch transmission pipeline between Warren, Pennsylvania and Jamestown, New York. Applicant states that this pipeline is no longer needed since the completion of facilities pursuant to the order of the Commission issued on May 24, 1966, in Docket No. CP64-199, 35 FPC 781. That order authorized the construction of a new 12-inch pipeline to serve the Jamestown, New York area and required Applicant to apply for abandonment of the old 8-inch pipeline serving the area or to submit to the Commission evidence of good cause for its continued operation.

Applicant also proposes to replace three sections, totaling 1.8 miles of 10-inch transmission pipeline, with 12-inch transmission pipeline along its main transmission pipeline system extending between Warren, Pennsylvania and Jamestown, New York. Applicant cites extensive corrosion of said sections of pipeline and recent New York State highway relocation as reasons for this portion of its proposed project. Rather than replace these sections with the same diameter pipeline, Applicant seeks authority to install 12-inch pipe in order to be in a position to eliminate need for replacement in the future should Jamestown's requirements continue to increase.

The total estimated cost of Applicant's proposed construction and pipeline replacement is $1,090,000, which cost will be financed from company funds and sale of securities to Applicant's parent, National Fuel Gas Company. The New York Department of Public Works will contribute $47,000 to offset the costs occasioned by highway relocation. The pipelines to be abandoned will be left in place and the original cost of $523,000 will be credited to the plant account with a counter debit to depreciation reserve.

After due notice, no petition to intervene, notice of intervention or protest has been filed herein.

At a hearing held on June 15, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Pennsylvania Gas Company, a Pennsylvania corporation having its principal place of business in Warren, Pennsylvania, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of November 10, 1942, in Docket No. G–370 (3 FPC 866).

(2) The facilities hereinbefore described and as more fully described in the application in this proceeding are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed construction and operation of facilities by Applicant are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) The facilities to be abandoned, as hereinbefore described and as more fully described in the application in this proceeding, are used in the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and abandonment of such facilities is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(6) The abandonment by Applicant, as hereinbefore described, is permitted by the public convenience and necessity and an order approving same should be issued as hereinafter ordered.

(7) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of the Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to Applicant, Pennsylvania Gas Company, authorizing the construction and operation of facilities as hereinbefore described and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of the Regulations.

(C) The facilities authorized by paragraph (A) above shall be constructed and placed in actual operation as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within eight months from the date of this order.

(D) Permission for and approval of the abandonment by Applicant of the facilities hereinbefore described, as more fully described in the application in this proceeding, are granted.

(E) Applicant shall advise the Commission of the date of abandonment of said facilities within 10 days thereof.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Carl E. Bagge and John A. Carver, Jr.

## TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC., DOCKET NO. RP67-22

### ORDER TO SHOW CAUSE

(Issued June 19, 1967)

Tennessee Gas Pipeline Company (Tennessee), a Division of Tenneco Inc., is a "natural-gas company" within the meaning of Section 2(6) of the Natural Gas Act and as such is subject to the requirements of the Uniform System of Accounts for Class A and B Natural Gas Companies. An extensive and detailed investigation of Tennessee's books and records covering the years 1953 through 1964, inclusive, by the Staff of the Commission indicates that Tennessee has failed in many respects, hereinafter described in detail, to comply with the requirements of the Uniform System of Accounts.

Tennessee was served with a copy of the Staff's detailed analysis and in accordance with Section 158.1 of the Regulations under the Natural Gas Act was advised of the indicated deficiencies requiring correction to bring its accounts into conformity with the prescribed classifications, practices and procedures. Subsequent correspondence and conferences have failed to adduce justification for Tennessee's departures from the provisions of the Uniform System of Accounts. Under the circumstances it is appropriate and in the public interest that these issues be set for formal proceedings as hereinafter provided. It should also be noted that Tennessee has continued many of the accounting practices herein raised in issue and that the data concerning the dollar impact of the accounting adjustments proposed by this show cause order reflects only the situation as of the end of calendar year 1964.

Additionally, it is not the purpose of this order to encompass the certificate proceedings or related accounting and rate matters, pertaining to the acquisition by Tennessee of natural gas properties in the Bastian Bay and Ship Shoals fields offshore Louisiana. The issues pertinent to these acquisitions will be the subject matter of separate orders hereafter to be issued.

*The Commission finds:*

Tennessee appears to have failed in many respects to comply with the requirements of the prescribed Uniform System of Accounts including, but not limited to, the following items, and should be required to show cause, if any there be, why it should not conform its accounts and records to accord with the adjusting entries hereinafter listed:

(a) *Adjustment Re Non-producing Lease Cost Classified in Account 101, Gas Plant in Service*

| Account | | Debit | Credit |
|---|---|---|---|
| No. | Title | | |
| 105 | Gas plant held for future use | $4,919,011 | |
| 116 | Other gas plant adjustments | 190,303 | |
| 101 | Gas plant in service | | $4,919,011 |
| 111.1 | Accumulated provision for amortization and depletion of producing natural gas lands and land rights | | 190,303 |

Tennessee has reported $4,694,237, applicable to uncertificated and non-producing leasehold costs, and $224,774, applicable to cost of gas leases held for future use as gas plant in service. The Uniform System of Accounts provides that such non-productive gas leases which are held only for future use shall be classified as such. Accordingly, Tennessee should transfer these sums from Account 101 to Account 105.

Tennessee also charged to Account 111.1, $190,303 which represents the excess cost of leases written off in the amount of $1,017,325, over the total depletion provided on the applicable properties of $827,022. However, the text of paragraph (C) of this account provides that Account 111.1 should be charged only with the amount previously credited in respect to property sold, abandoned or otherwise retired from service. Furthermore, Account 797, Abandoned Leases, must be charged with the excess cost of abandoned non-productive leases.

(b) *Adjustment Re Non-productive Well Drilling Costs Capitalized*

| Account | | Debit | Credit |
|---|---|---|---|
| No. | Title | | |
| 116 | Other gas plant adjustments | $7,190,436 | |
| 111.1 | Accumulated provision for amortization and depletion of producing natural gas lands and land rights | 438,500 | |
| 101 | Gas plant in service | | $3,797,179 |
| 107 | Construction work in progress | | 3,831,757 |

Tennessee has recorded $3,797,179, representing non-productive well drilling (dry hole) costs, as gas plant in service. It also has improperly recorded $3,831,757 of such costs as construction work in progress. The Uniform System of Accounts provides for the current expensing of the net cost of drilling dry holes through charges to Account 796, Non-Productive Well Drilling. Accordingly, the amount of $7,628,936 which should have been expensed should be eliminated from capitalized plant investment, Accounts 101 and 107 and the accumulated provision for amortization of $438,500 taken up to December 31, 1964, on such erroneously capitalized costs should be removed from Account 111.1. Since it is no longer possible to charge the net non-productive well drilling costs of $7,190,436 to current operating expenses, such costs should be charged to Account 116, Other Gas Plant Adjustments for ultimate disposition to Account 216, Unappropriated Earned Surplus.

(c) *Adjustment Re Interest During Construction Taken on Production Plant Cost*

| Account | | Debit | Credit |
|---|---|---|---|
| No. | Title | | |
| 116 | Other gas plant adjustments | $16, 704, 706 | |
| 111. 1 | Accumulated provision for amortization and depletion of producing natural gas lands and land rights | 133, 169 | |
| 101 | Gas plant in service | | $1, 377, 884 |
| 107 | Construction work in progress | | 15, 459, 991 |

Tennessee has erroneously computed interest during construction of $15,665,338 on plant balances recorded in Account 107, Construction Work in Progress. These balances consisted of costs of leases held for future exploratory or development drilling and costs of completed non-productive gas wells which should have been classified to Account 105, Gas Plant Held for Future Use and non-productive lease and well drilling costs which should have been expensed. Additional interest during construction on non-productive plant held for future use of $1,172,557 was improperly charged with respect to On System Production properties reconveyed by Tenneco Corporation to Tennessee pursuant to Commission order dated August 28, 1962, in Docket No. CI61-1272, 28 FPC 382. Account 107 provides that interest may be allowed on tangible construction work costs assignable to gas plant actually in service. Accordingly, interest during construction may not properly be charged on non-productive plant or on plant held for future use. Accordingly, a net amount of $16,704,706 should be eliminated from Accounts 101 and 107 and transferred to Account 116 for ultimate disposition to Account 216, Unappropriated Earned Surplus.

(d) *Adjustment Re Hurricane Damage Recoveries Recorded in Account 107, Construction Work in Progress*

| Account | | Debit | Credit |
|---|---|---|---|
| No. | Title | | |
| 107 | Construction work in progress | $645, 532 | |
| 186 | Miscellaneous deferred debits | | $645, 532 |

Tennessee credited to Account 107, Construction Work in Progress, a net credit amount of $645,532 which represented the excess of insurance recoveries over the costs resulting from hurricane damage experienced in late 1963. Tennessee expects to capitalize such losses and estimates that when finally determined they will exceed the related insurance recoveries by $1,200,000. However, Account 186, Miscellaneous Deferred Debits, requires that all items whose final disposition is uncertain shall be recorded therein. Accordingly, the interim net credit amount of $645,532 should be transferred to Account 186 and the full loss when finally determined, should be recorded in Account 182, Extraordinary Property Losses, rather than capitalized.

(e) *Adjustment Re West Cameron Blocks 173 and 180*

| Account | | Debit | Credit |
|---|---|---|---|
| No. | Title | | |
| 116 | Other gas plant adjustments | $300,214 | |
| 107 | Construction work in progress | | $300,214 |

Tennessee recorded $300,214 representing certain costs of $243,084 and interest charges of $57,130 in Account 107, Construction Work in Progress. This sum of $243,084 reflecting production office expenses of $129,517 and operation and maintenance charges of $113,567 of Tenneco Oil Company were assigned by Tennessee to shut-in wells. However, none of this total sum enhanced the value of the shut-in wells. Moreover, these costs were capitalized during a period when construction work for 11.8 miles of pipeline was not proceeding promptly. If construction had proceeded promptly when the certificate authorization therefor was issued, construction work would have been completed earlier and most of the $243,084 would have been charged to operating expenses. The interest charges of $57,130 accumulated on material costs which were subsequently reassigned and not included in final construction costs should be eliminated from Account 107 since that account includes only the cost of tangible properties actually used in gas plant.

(f) *Adjustment Re Classification of Non-Productive Plant as Gas Plant in Service*

| Account | | Debit | Credit |
|---|---|---|---|
| No. | Title | | |
| 105 | Gas plant held for future use | $21,834,648 | |
| 107 | Construction work in progress | | $21,834,648 |

Tennessee recorded $21,834,648 consisting of lease costs applicable to shut-in wells of $6,898,078, costs of productive wells shut-in of $14,647,590 and costs of a platform that may be used in the future for directional drilling of $288,980, to Account 107. None of these property costs relate to gas plant actually in service and therefore these sums should be transferred to Account 105 to reflect the fact that they are plant held for future use.

(g) *Adjustment Re Classification of Accumulated Provisions for Amortization of Intangible Drilling Costs*

| Account | | Debit | Credit |
|---|---|---|---|
| No. | Title | | |
| 111.1 | Accumulated provisions for amortization and depletion of producing natural gas lands and land rights | $2,161,270 | |
| 111.3 | Accumulated provisions for amortization of other gas plant in service | | $2,161,270 |

**Tennessee has recorded in Account 111.1, $2,161,270 applicable to intangible drilling costs capitalized which should be recorded in Account 111.3. The former account is restricted to the amortization and depletion of gas lands and land rights and all other tangible and intangible production plant should be classified to the latter account.**

(h) *Adjustment Re Excessive Interest Capitalized—Docket No. G–11107 Facilities*

| Account | | Debit | Credit |
|---|---|---|---|
| No. | Title | | |
| 116 | Other gas plant adjustments | $2,198,504 | |
| 108 | Accumulated provision for depreciation of gas plant in service | 404,350 | |
| 101 | Gas plant in service | | $2,602,854 |

**Tennessee has included in Account 101, $2,602,854 of interest during construction and charged $404,350 to Account 108 as related depreciation taken on such excessive capitalized plant costs. These entries related to interest capitalized on Docket No. G–11107 plant facilities which was ready for service March 31, 1959, but the company continued to charge interest during construction on such facilities until November, 1959, the date upon which the facilities were placed in service. This accounting practice is contrary to the applicable provision of the Uniform System of Accounts. Thus, Gas Plant Instruction 3(17) specifically provides that when a portion of construction work is placed in operation or ready for service it shall be classified as gas plant in service and interest thereon as a charge to construction shall cease.**

(i) *Adjustment Re Excessive Interest Capitalized Materials and Pipe in Transit*

| Account | | Debit | Credit |
|---|---|---|---|
| No. | Title | | |
| 116 | Other gas plant adjustments | $72,280 | |
| 108 | Accumulated provision for depreciation of gas plant in service | 17,931 | |
| 101 | Gas plant in service | | $90,211 |

**Tennessee capitalized interest on retainage payable to major vendors, between 1954 and 1964, of $90,211. Retainage represents the portion of bills payable which is withheld, for subsequent delayed payment, by the pipeline. The Uniform System of Accounts provides in Gas Plant Instruction 3(17) for interest during construction period on borrowed funds and an imputed cost**

on the company's own funds, insofar as such borrowed or internal monies are actually used for construction purposes. Since the portion of delayed costs representing retainage is not an interest cost actually incurred, such sums should not enter the base upon which interest during construction is computed.

(j) *Adjustment Re Interest Capitalized on Installation Contract Retainage*

| Account | | Debit | Credit |
|---|---|---|---|
| No. | Title | | |
| 116 | Other gas plant adjustments | $258,970 | |
| 108 | Accumulated provision for depreciation of gas plant in service | 73,257 | |
| 101 | Gas plant in service | | $332,227 |

Tennessee also capitalized $332,227 of interest for the period 1953 through 1964 on contract retainage. Tennessee capitalizes interest on total billings received from contractors for installation of pipeline. Therefore, the interest during construction base includes amounts, in advance of cash expenditures, representing contract retainages payable upon satisfactory completion of construction. Accordingly, net excess interest of $258,970 should be transferred to Account 116, for ultimate disposition to Account 216, Unappropriated Earned Surplus.

(k) *Adjustment Re Storage Field Operating Costs and Interest Capitalized During Injection of Top Storage Gas*

| Account | | Debit | Credit |
|---|---|---|---|
| No. | Title | | |
| 116 | Other gas plant adjustments | $343,284 | |
| 108 | Accumulated provision for depreciation of gas plant in service | 32,111 | |
| 101 | Gas plant in service | | $141,022 |
| 117 | Gas stored underground—Noncurrent | | 234,373 |

Tennessee capitalized operating costs incurred during periods when current (as opposed to base) storage gas was being injected into the Colden and Harrison storage fields. Tennessee also capitalized interest during construction on these storage facilities through December 1957 although the plant was ready for service in July 1957. The proposed credit to Account 117 of $234,373 represents operating expenses of $126,482 and interest on base storage gas improperly capitalized of $107,891. The excess interest capitalized after the plant was ready for service amounts to $141,022. Thus, the net excess costs and interests of $343,284 should be transferred to Account 116, for ultimate disposition to Account 216, Unappropriated Earned Surplus.

Gas Plant Instruction 3(17) provides that when plant is ready for service it should be classified as Gas Plant in Service and the capitalization of interest during construction thereon shall cease at that time. Final injections of noncurrent (base) storage gas were made during the months of April and July 1957. At that time, and thereafter, all operating costs incurred in the operation of these storage fields were part of the first yearly storage injection and withdrawal cycle and properly chargeable to current operating expenses.

(l) *Adjustment Re Excessive Charges to Construction From Airplane Clearings*

| Account | | Debit | Credit |
|---|---|---|---|
| No. | Title | | |
| 116 | Other gas plant adjustments | $1,858,080 | |
| 108 | Accumulated provision for depreciation of gas plant in service | 170,698 | |
| 101 | Gas plant in service | | $2,028,778 |

**Tennessee's gas plant in service includes excessive charges to construction costs attributed to business passenger miles flown in company operated planes. During the years 1960 through 1964, inclusive airplane costs charged to pipeline construction overheads amounted to $1.3910 per business passenger mile. However, the same airplanes were used in connection with the operation of Tennessee's unregulated and other company businesses. Much lower average costs were assigned to such non-utility activities. Tennessee had a system average cost of only $0.7599 per business passenger mile and has failed to justify the imposition of disproportionately higher costs on pipeline operations, maintenance and construction activities.**

**General Instruction (E) of the Uniform System of Accounts provides that any payments or accruals in excess of just and reasonable charges shall be included in Account 426, Other Income Deductions, rather than classified as operating expenses. Accordingly, these excessive charges should be transferred to Account 116, Other Gas Plant Adjustments, for ultimate disposition to Account 216, Unappropriated Earned Surplus.**

(m) *Adjustment Re Classification of Common Utility Plant*

| Account | | Debit | Credit |
|---|---|---|---|
| No. | Title | | |
| 118 | Other Utility plant (common) | $7,653,273 | |
| 108 | Accumulated provision for depreciation of gas plant in service | 1,817,091 | |
| 111.3 | Accumulated provision for amortization of other gas plant in service | 160,172 | |
| 101 | Gas plant in service | | $7,653,273 |
| 119 | Accumulated provision for depreciation of other utility plant | | 1,977,263 |

**Tennessee classified in Account 101, $7,653,273 of facilities used in common by its pipeline operation and by various subsidiary and unregulated companies. The Uniform System of Accounts requires that such commonly used plant be recorded in Account 118, Other Utility Plant. Therefore, this plant and related depreciation should be removed from Accounts 101, 108, and 111.3. The related accumulated depreciation of $1,977,263 should be transferred to Account 119, Accumulated Provision for Depreciation and Amortization of Other Utility Plant.**

***The Commission orders:***

**Pursuant to the authority, and in order to effectuate the purposes, of the Natural Gas Act (particularly Sections 8, 9, 10, 14, 15 and 16) and the Uniform System of Accounts Prescribed for Natural Gas Companies, Tennessee Gas Pipeline Company (a Division of Tenneco Inc.) is directed to show cause, if any there be, by answer filed in accordance with Section 1.9(c) of the Com-**

**mission's Rules of Practice and Procedure within 45 days of the date of this order, why the Commission should not find, determine and order that:**

**(1) Adjusting entries be made by Tennessee to bring its accounts and records into conformity with the adjustments set forth in subparagraphs (a) through (m) above;**

**(2) Tennessee be required to make, keep, preserve and report its accounts in the manner prescribed by this Commission in the Uniform System of Accounts Prescribed for Natural Gas Companies;**

**(3) Tennessee make such corrected and substituted accounting entries for the years 1953 through 1964, inclusive, and for all succeeding years, as are consistent and in compliance with the provisions of said Uniform System of Accounts.**

## OPINION NO. 521

## GREAT LAKES GAS TRANSMISSION CO., DOCKET NOS. CP66-110, CP66-111 AND CP66-112; MICHIGAN WISCONSIN PIPE LINE CO., CP66-109; MIDWESTERN GAS TRANSMISSION CO., CP66-119, CP66-120 AND CP66-121; NORTHERN NATURAL GAS COMPANY, CP66-212; NORTHERN NATURAL GAS TRANSPORTATION CO., CP66-213, CP66-214 AND CP66-215

### OPINION AND ORDER GRANTING AND DENYING CERTIFICATES

(Issued June 20, 1967)*

### *Syllabus*

1. Record establishes that Trans-Canada has a reserve life of 21.6 years and deliverability of proven reserves is sufficient to meet its requirements for 14 years. P. 1077.
2. In evaluating which comparative proposals should be certificated, Commission is guided by mandates that it act in furtherance of interests of United States consumers. P. 1080.
3. Commission analysis of investment costs and stated costs-of-service, is not for purpose of passing on propriety of offered rates—this is a certificate, not a rate case; it could not be certain now that rates proposed by applicants would be found justified in the crucible of a rate proceeding. P. 1081.
4. Commission *discusses* costs and rates of comparative proposals. PP. 1081, 1084.
5. Since all proposals here are dependent upon Trans-Canada's reserves, which are found adequate, the gas supply issue is immaterial for comparative purposes. P. 1084.
6. Commission *discusses* market testimony in comparative proposals. PP. 1084, 1085.
7. Commission *rejects* argument that Trans-Canada's market growth in eastern Canada will be insufficient to support either proposal. P. 1084.
8. Commission *concludes* that impact of the Canadian import duty would have a depressing effect on market growth rate and accordingly there has not been an adequate market presentation to support Northern's proposal. P. 1085.
9. Stated generally, Great Lakes' proposal alone will offer possibility of providing United States consumers with an additional source of supply in event of National or local emergency affecting domestic production and will provide a basis for further competition in the midwest. P. 1086.
10. Benefit to our National security from Great Lakes potential cannot be overstated—Commission cannot ignore fact that Great Lakes line may well serve as a competitive stimulus in the midwest. P. 1086.

---

***See Opinion No. 521-A and order denying rehearing issued August 9, 1967, 38 FPC 303. Remanded, *sub nom. Northern Natural Gas Co. v. F.P.C.*, 399 F. 2d 953 [CADC-1968]. See Opinion No. 553 and order on remand issued November 21, 1968, 40 FPC 1331. Opinion No. 580 and order issued July 10, 1970 on remand, 44 FPC 21.**

11. Great Lakes' capacity could well prove to be an economical source of additional gas for Northern, since if occasion arose, those supplies could be utilized to serve increasing market requirements on northern end of its system. P. 1087.
12. Commission *rejects* contention that neither application be approved prior to correlation of our natural gas import policy with the Mandatory Oil Import Program. P. 1088.
13. Section 3 of the Natural Gas Act provides that Commission shall issue an order permitting importation of gas unless it finds that the proposed importation "will not be consistent with the public interest." P. 1088.
14. Decision here is not intended to commit Commission to any long-range policy respecting importation of natural gas; rather it is consistent with past treatment where each import proposal was considered on its merits. P. 1089.
15. It would not be appropriate to consider, in comparative analysis, projects that would be wholly constructed outside United States; therefore intervener's petition to reopen is denied. PP. 1089, 1090.
16. Great Lakes' departure from Seaboard formula in setting rate design is justified. P. 1090.
17. Contention that Great Lakes is not a qualified applicant because equal ownership of its stock by Trans-Canada and American Natural might result in a deadlock is *rejected;* Commission perceives nothing objectionable about arbitration agreement here. P. 1090.
18. Great Lakes' certificate is conditioned to provide that it submit for approval a financing plan providing that common equity be maintained at not less than 15 percent of total capitalization and no dividends be paid on common stock as long as long-term debt exceeds 75 percent of total capitalization. P. 1090.
9. In comparative proceedings under Sections 3 and 7 of the Natural Gas Act, Commission *issues* certificate of public convenience and necessity; *authorizes* importation and exportation of gas; and *issues* Permit for border facilities under authority of Executive Order No. 10485.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

O'CONNOR, *Commissioner:*

In this case we are asked to certificate facilities designed to transport western Canadian gas through the United States for delivery at eastern Canadian markets. Two competing proposals are before us[1]: one filed by the Great Lakes Gas Transmission Company (Great Lakes), the other by the Northern Natural Gas Company (Northern

---

[1] **The applications are before us following waiver, upon application, of the Examiner's decision [Editor's note. Examiner's decision waived by order issued March 3, 1967, 37 FPC 492]. Oral argument was heard on April 21, 1967. A descriptive map is attached.**

Natural) and the Northern Natural Gas Transportation Company (Northern Transportation). Under each proposal Trans-Canada Pipe Lines Limited (Trans-Canada) would make Canadian gas available at Emerson, Manitoba, and have the equivalent volumes returned to it at two delivery points in Ontario, Sault Ste. Marie and at the St. Clair river near Sarnia. Similarly, both proposals contemplate the sale of Canadian gas by the applicant to the Michigan Consolidated Gas Company (Michigan Consolidated) and by the Midwestern Gas Transmission Company (Midwestern) to the Michigan Wisconsin Pipe Line Company (Michigan Wisconsin); the identical volumetric sale is provided for under each proposal. Indeed, the essential difference between the proposals relates to the manner in which the transportation service for Trans-Canada would be performed. The Great Lakes proposal requires the construction of an entirely new pipeline which would be utilized, principally, to through-put Canadian gas; the Northern proposal would utilize both existing and new facilities to effect an exchange of Canadian gas for United States' production. We are asked not only to issue the necessary certificates of public convenience and necessity under Section 7 of the Natural Gas Act authorizing the required construction and sales within the United States, but to authorize as well the requested importations and exportations and the construction of the necessary border facilities pursuant to Section 3 of the Act and Executive Order 10485, respectively. For the reasons stated, we find that our authority should be exercised in favor of the Great Lakes proposal.

## The Great Lakes Proposal

Great Lakes is a Delaware corporation, jointly owned by Trans-Canada and the American Natural Gas Company (American Natural). Trans-Canada is a Canadian corporation which owns and operates a pipeline system extending from Alberta to population centers in Ontario and Quebec. Its reserves are located in Alberta and are delivered to it through the facilities of Alberta Gas Trunk Line Company, Ltd. Between Alberta and Winnipeg, Trans-Canada has a fully looped 34-inch line and from Winnipeg to Toronto it has a single 30-inch line. It connects with Midwestern near Emerson and with other United States companies at Niagara Falls and in northern Vermont.

American Natural is the parent company of both Michigan Wisconsin and Michigan Consolidated. Michigan Wisconsin has pipeline facilities extending into Texas and Louisiana and transmission facilities in Wisconsin, Illinois, Indiana and Michigan. Michigan Consolidated owns transmission and distribution facilities in Michigan extending from the upper peninsula to the Detroit area. Trans-Canada and American Natural have contractually agreed to submit Great Lakes' operational disputes to arbitration.

Great Lakes seeks authority (CP66–110) under Section 7 to construct and operate a 989-mile, 36-inch pipeline extending between points of connection with Trans-Canada at Emerson, Manitoba, and near Sarnia, Ontario. The new line would traverse northern Minnesota, Wisconsin, and the upper peninsula of Michigan, cross the Straits of Mackinac and continue south to the central Michigan underground storage fields of Michigan Wisconsin and from there east to the St. Clair River. North of the Straits of Mackinac a 44-mile, 10-inch lateral would be constructed to Sault Ste. Marie, Ontario. Great Lakes also seeks authority to import and export gas (Docket No. CP66–112), and to build facilities at the international border (Docket No. CP66–111).

The Great Lakes' project will be constructed in two steps: in the first year 157 miles of pipeline will be built between Michigan Wisconsin's central Michigan storage area and the St. Clair delivery point and will be used to transport, for the account of Trans-Canada, 113 $M^2$cfd which it will purchase from Michigan Wisconsin. In return Michigan Wisconsin will purchase an equivalent volume of gas at Marshfield, Wisconsin, from Midwestern, which, in turn, will purchase the gas for that sale from Trans-Canada at Emerson. During the first three contract years Great Lakes will also transport gas from Michigan Wisconsin for the account of Michigan Consolidated for injection into the latter's lower peninsula Belle River Mills storage field.

In the second contract year the 832 miles of pipeline between Emerson and the Michigan Wisconsin storage area, as well as the lateral to Sault Ste. Marie, will be constructed. In that year, Trans-Canada will reduce its purchases from Michigan Wisconsin to 63 $M^2$cfd, and Great Lakes will transport a contract demand of 392 $M^2$cfd for Trans-Canada's account from Emerson to the two Ontario delivery points. Great Lakes will also commence the sale of 20 $M^2$cfd of Canadian gas to Michigan Consolidated for resale in the upper peninsula of Michigan and for injection into the Belle River Mills storage field near St. Clair, Michigan.

Beginning with the third contract year, Trans-Canada will cease purchasing gas from Michigan Wisconsin, and Great Lakes will transport a contract demand of 530 $M^2$cfd. The volume to be transported by Great Lakes for Trans-Canada will reach 600 $M^2$cfd in the fifth year. Michigan Consolidated will increase its purchase from Great Lakes to 40 $M^2$cfd in the third year and to 57 $M^2$cfd in the fourth year, at which level it will thereafter remain. Trans-Canada has obtained the necessary licenses from the Canadian National Energy Board.

Midwestern seeks authority (Docket No. CP66–119) to construct and operate additional facilities on its northern system, consisting primarily of additional compression, and to sell an additional 113 M$^2$cfd to Michigan Wisconsin at Marshfield for resale. From the third year of operation on, when Michigan Wisconsin will no longer be selling gas to Trans-Canada, the entire 113 M$^2$cfd will be utilized by Michigan Wisconsin to meet its domestic requirements. Additionally, Midwestern seeks authority to import 116.332 M$^2$cfd from Trans-Canada (Docket No. CP66–121) as well as authority to build border facilities (Docket No. CP66–120). Under the Great Lakes and Midwestern applications total additional sales of Canadian gas to United States customers will, therefore, amount to 170 M$^2$cfd.

By agreement with the Canadian Government Trans-Canada cannot dispose of its half interest in the Great Lakes project without government authorization and it must plan its operations so as to retain its Canadian line as the principal means of transporting western Canadian gas east. As to the latter Trans-Canada is obligated, at the outset, to use its Canadian line for more than 50 percent of such deliveries and to increase such usage to 60 and then 65 percent as its Eastern market needs grow.[2]

The construction cost of the Great Lakes proposal, through the fifth year, is estimated to be $228,108,000. Of this total $211,669,000 is estimated as the cost of the Great Lakes' line, $13,562,000 as the cost of Midwestern's additional facilities, which includes 5.6 miles of 30-inch looping and the addition of compression, and $2,877,000 as the cost to be expended by Michigan Wisconsin, primarily for the addition of compression. Great Lakes proposes to finance its investment costs by raising $203 million—$145 million through 20-year first mortgage sinking fund bonds, $24 million through 10-year sinking fund promissory notes, and $34 million through the issuance of common stock to be purchased equally by Trans-Canada and American Natural.

The rates which Great Lakes proposes to charge are predicated on a fifth year cost of $41,001,900, representing $35,044,000 in transportation cost of service (which includes a 6.5 percent return on a $211,669,000 net investment base) and $5,957,900 as the cost of gas purchased for resale. The economic feasibility of its line in that year is based on the minimum delivery of 255,500 M$^2$cf. To establish that that amount of gas will in fact be transported Great Lakes relies on long-term (25 years) transportation and sale contracts with Trans-Canada and with Michigan Consolidated, respectively. Pursuant to those contracts Great Lakes will transport up to 677 M$^2$cfd (234,800 M$^2$cf annually) for Trans-Canada and 57 M$^2$cfd (20,800 M$^2$cf annually) for Michigan Consolidated. Relying on distributor contracts and market projections Great Lakes contends that Trans-Canada will require 456,000 M$^2$cf for its eastern Canadian markets by 1970. Applying the requirement that at least 50 percent of the deliveries be made through the existing Canadian line, Great Lakes contends that it will be transporting 224,000 M$^2$cf through its line. In addition to this basic transportation service and the amount to be sold to Michigan Consolidated, Great Lakes will transport an additional 11,000 M$^2$cf for Trans-Canada which amount, since following delivery at St. Clair it will be exported by Trans-Canada to New York and Vermont, is not subject to the 50 percent limitation, and will utilize 10,000 M$^2$cf in fuel and losses. Assuming a transportation and resale annual volume of 255,550 M$^2$cf and a total cost of operations of $41,001,900 Great Lakes' rates to Trans-Canada and Michigan Consolidated would be as follows:

---

[2] **The increase to 60 percent is to commence November 1, 1976, provided that by that time Trans-Canada's market demand in eastern Canada has reached 579,490 M$^2$cfd. If its needs have not grown at the anticipated rate, the 60 percent minimum is deferred until the year after that demand has been reached. The 65 percent minimum is to be reached "within a reasonable time" thereafter.**

| | Demand | Commodity |
|---|---|---|
| | *Per Mcfd per month* | *Per Mcf* |
| For Transportation [3] | $2.54 | 5.0¢ |
| Price at Emerson | 2.706 | [4] 19.745¢ |
| For Sale [5] | 5.24 | 24.75¢ |

[3] The contract gives Trans-Canada the option during the first three years of paying a straight commodity rate of 13.75 cents per Mcf, approximately the demand-commodity-charges at a 95 percent load factor.

[4] This is the contract charge for Jan. 1, 1971, through 1975.

[5] Michigan Consolidated will have the option during the first three years of paying a straight commodity rate of 41.04 cents per Mcf.

At 100 percent load factor these rates amount to 13.35 cents per Mcf to Trans-Canada and 41.98 cents per Mcf to Michigan Consolidated.[6]

---

[6] Midwestern will purchase gas from Trans-Canada at a demand charge of $2.706 per Mcf per month and a commodity charge of 19.745¢ per Mcf for the period Jan. 1, 1971, through 1975. At 100 percent load factor the rate would be 28.63 cents per Mcf. Midwestern will resell the gas to Michigan Wisconsin under its Rate Schedule CD-2 with a demand charge of $3.94 and a commodity charge of 24.92¢, or a rate of 37.9 cents per Mcf at 100 percent load factor. According to the record this price would approximate Michigan Wisconsin's cost of gas in the area. Moreover, to bring an additional 113 M$^2$cfd of its own reserves into its system Michigan Wisconsin may well have to loop its entire line between Janesville and South Louisiana. Michigan Wisconsin's rate for its interim service to Trans-Canada will be $4.60 and 27.75¢, or a rate of 40.88 cents per Mcf at 100 percent load factor. Trans-Canada will pay Great Lakes 2¢ per Mcf as a transportation charge relating to its purchases, during the first two years, from Michigan Wisconsin.

There is no reserve problem. It is contended without dispute, and the record establishes, that Trans-Canada has a reserve life of 21.6 years and that the deliverability of its proven reserves, under existing contracts, is sufficient to meet its requirements for 14 years.

### THE NORTHERN PROPOSAL

As noted, Northern Natural and its newly formed subsidiary, Northern Transportation, propose a project that is capable of performing essentially the same service both for Trans-Canada and Michigan Consolidated as would Great Lakes.[7] Thus, Northern would receive up to 677 $M^2$cfd from Trans-Canada at Emerson and deliver the equivalent volume in Ontario at Sault Ste. Marie and St. Clair. Further, it would purchase sufficient volumes from Trans-Canada to take care of fuel usage and permit the sale of up to 57 $M^2$cfd to Michigan Consolidated. As originally proposed, Northern would have Midwestern sell the 113 $M^2$cfd to Michigan Wisconsin. By supplement to its application it offers in the alternative to make that sale itself from its southern reserves. The Northern proposal is dependent upon the construction of three new pipeline fragments by Northern Transportation which would connect with existing facilities of Northern Natural. In addition, Northern Natural would be required to undertake some expansion of its present system.

Northern Transportation's facilities would be constructed in two stages. For the first year of operation it would construct a 214-mile, 36-inch pipeline between facilities of Michigan Wisconsin near Niles, Michigan and Trans-Canada's facilities at St. Clair. In the second year of operation it would construct 285.4 miles of 36-inch line from Emerson to the facilities of Northern Natural at Sandstone, Minnesota, 417 miles of 36-inch line from Ogden, Iowa, to Niles, (for a total of 916 miles of 36-inch line) and 186 miles of 12-inch line from Republic, Michigan to the Sault Ste. Marie.

The basic Northern proposal is to have Canadian gas delivered by Trans-Canada to Northern Transportation at Emerson. Northern Transportation would bring that gas south into the Northern Natural system at Sandstone where it would be used, in the main, to satisfy Northern's own system requirements north of Ogden, as well as to supply 29 $M^2$cfd to Trans-Canada at Sault Ste. Marie and 57 $M^2$cfd to Michigan Consolidated. In exchange for the Canadian gas so utilized Northern Natural would deliver equivalent volumes, from its domestic reserves, to Northern Transportation at Ogden for delivery to Trans-Canada at St. Clair. To assure Trans-Canada that it will deliver to it domestic gas of the equivalent Btu and specific gravity as the Canadian gas which it receives, Northern Natural has offered, as one alternative, to segregate and in effect dedicate whatever facilities are necessary to transport the required volume to Ogden from its southern reserves.

---

[7] The combined Northern Natural—Northern Transportation proposal hereinafter will be referred to as the Northern proposal.

During the first two years of service Northern Transportation would transport, between Niles and St. Clair, volumes of gas to be purchased by Trans-Canada from Michigan Wisconsin. During the first three years Northern Transportation would also transport to Michigan Consolidated's Belle River Mills storage field gas to be purchased from Michigan Wisconsin at Niles. Northern Transportation seeks the requisite import and export authorizations (Docket No. CP66-215) as well as authority to construct the necessary border facilities (Docket No. CP66-214).

In order to accommodate the large quantity of Canadian gas that would be delivered into its system at Sandstone, Northern Natural proposes to expend $14,575,000 for additional facilities north of Ogden.

The construction cost of the Northern proposal is estimated to be $185,298,000, the cost of the facilities to be constructed by Northern Transportation. No charge is assessed against the proposal for the existing or additional facilities of Northern Natural which will be utilized. In addition, Michigan Wisconsin would expend $2,759,000 and Midwestern $13,562,000.

Northern Transportation proposes to finance its project through the sale of $50,000,000 of common stock, $100,000,000 of sinking fund promissory notes and $19,500,000 of interim notes. All of the securities would be purchased by its parent, Northern Natural, which would itself issue $115,000,000 of debentures, $30,000,000 of preferred stock and $21,000,000 of common stock.

For service to Trans-Canada and Michigan Consolidated Northern relies upon Trans-Canada's western Canadian reserves. For the domestic gas to be substituted for the Canadian gas which it would use on its own system Northern Natural relies on its domestic reserves which are estimated at 14.5 trillion cubic feet and upon its 12-year deliverability. Northern relies upon the same market estimates as were put forth in support of the Great Lakes' proposal.

The rates which Northern Transportation proposes, assuming a cost of service, for the 1970–71 year, representing $31,451,000 in transportation cost (including a 6.75 percent rate of return) and $5,957,900 as the cost of gas purchased for resale, are as follows:

| | Demand | Commodity |
|---|---|---|
| | *Per Mcfd per month* | *Per Mcf* |
| Transportation rate for Trans-Canada | $2.54 | 3.6¢ |
| Resale rate to Michigan Consolidated | 5.16 | 23.2¢ |

At 100 percent load factor the rate to Trans-Canada would be 11.95 cents per Mcf and 40.17 cents per Mcf to Michigan Consolidated.

## The Staff Proposal and Northern's Modification

The staff introduced a proposed project which would make use of facilities of Midwestern, Northern Natural and Michigan Wisconsin. Midwestern would install 343.5 miles of 36-inch looping and compression, at an estimated cost of $77,902,000, between Emerson and Northern's North Branch compressor station in eastern Minnesota. In the fifth year Midwestern would receive 734 M$^2$cfd from Trans-Canada at Emerson and deliver 600 M$^2$cfd to Northern Natural at North Branch and 134 M$^2$cfd to Michigan Wisconsin at Marshfield, Wisconsin.

Of the 600 M$^2$cfd received, Northern Natural would sell 28 M$^2$cfd to Michigan Consolidated in the Upper Peninsula and would deliver 29 M$^2$cfd to Trans-Canada at Sault Ste. Marie. It would use the remaining 543 M$^2$cfd on its own system, delivering an equivalent amount of its domestic production to Michigan Wisconsin at Janesville, Wisconsin. To effect this sale and exchange Northern would be required to expend approximately $62,355,000 for additional facilities, including 186.4 miles of 12-inch line from Republic, Michigan to Sault Ste. Marie, 298.5 miles of 26-inch and 30-inch loop on its Ogden to Janesville line and 85.3 miles of 20-inch loop on the line between its North Branch and Superior compressor stations.

Michigan Wisconsin would use the 134 M$^2$cfd which it would receive from Midwestern and the 543 M$^2$cfd which it would receive from Northern Natural to satisfy its own system requirements. Among other facilities, estimated to cost $74,490,000, it would construct 214 miles of 36-inch line extending from near Niles, Michigan to St. Clair where it would deliver 648 M$^2$cfd to Trans-Canada. It would also deliver 29 M$^2$cfd to Michigan Consolidated at the latter's Belle River Mills storage field.

The cost of the staff project would be $214,747,000, not including the $10,846,000 that Midwestern would have to expend for additional facilities necessary to deliver 113 M$^2$cfd to the American Natural system, or a total cost of $225,593,000.

In support of its proposal the staff contends that it would make maximum utilization of the existing facilities of Midwestern, Northern Natural and Michigan Wisconsin, would eliminate the need to segregate facilities in order to solve the Btu problem presented by an exchange because the facilities proposed are designed to support volumes of gas sufficient to offset any differences in Btu content, and would provide Midwestern with an opportunity to expand.

Northern, when the hearings were reopened in January 1967, presented a modification of the staff proposal. Under that proposal Midwestern would transport 113 $M^2$cfd to Michigan Wisconsin in the first year and Michigan Wisconsin would construct a 36-inch line from Niles to St. Clair. In the second year, Northern Transportation would construct a 30-inch line from Emerson to Northern Natural's facilities at Sandstone, a 12-inch line from Republic to Sault Ste. Marie, and a 36-inch line from Ogden east to Michigan Wisconsin's Station 10, in Wisconsin.

Northern Natural would receive 734 $M^2$cfd of Canadian gas (657 $M^2$cfd delivered to it at Sandstone by Northern Transportation and 77 $M^2$cfd by Midwestern at North Branch) which gas would be used by Northern Natural on its system and delivered to Michigan Consolidated in the Upper Peninsula and to Trans-Canada at Sault Ste. Marie. In exchange for the Canadian gas used on its system Northern Natural would deliver the equivalent volume of United States production to Northern Transportation at Ogden for delivery to Michigan Consolidated and Trans-Canada. The cost of this modified staff project is estimated at $206,622,000 as compared with the total cost of $225,593,000 for its original proposal, the savings allegedly being due to the use of a shorter 30-inch line from Emerson rather than the 36-inch line originally proposed and the direct transportation of gas from Ogden to Michigan Wisconsin's Station 10 rather than via Janesville.

## THE PANHANDLE INTERVENTION

The Panhandle Eastern Pipe Line Company intervened in opposition to each of the proposals. Preliminarily, it argues that from the standpoint of Trans-Canada and its Canadian consumers looping the Canadian line would be preferable to any proposal for the transportation of gas through the United States. It also argues that neither Great Lakes nor Northern has made an adequate market presentation. In addition, in a specific attack on Great Lakes, Panhandle argues that its costs are understated and that its rate design assigns a disproportionate share of fixed costs to demand. The Northern proposal, according to Panhandle, is subject to these same deficiencies.

## COMPARISON OF THE PROPOSALS

In evaluating which, if any, of these comparative proposals should be certificated we are, of course, guided by the mandate that we act in furtherance of the interests of United States consumers.[8] Where, however, the proposal which best serves those interests would also be of particular benefit to consumers in Canada we welcome the opportunity to act in the interests of our Canadian neighbors as well. Such a dual possibility is offered by the Great Lakes' proposal which we here certificate.

## Costs and Rates

There is much discussion and controversy in the record as to the true cost of the alternative projects. The range of the conflicting alternatives is extreme. Great Lakes asserts that the proper cost of service for Northern will be approximately $10.5 million more per year on an incremental basis than its own and $25 million per year on a fully-allocated basis; Northern, on the other hand, claims that the investment costs in its proposal will be some $60 million less than those in Great Lakes and that this differential will permit a savings of some $6,755,000 per year to the customers of Trans-Canada, Michigan Consolidated and itself.

It should be clear that our analysis of investment costs, and of the stated costs-of-service, is not for the purpose of passing upon the propriety of the offered rates. This is a certificate case, not a rate case, and we could not now be certain that the rates proposed by either of the applicants would be found to be justified in the crucible of a rate proceeding. Our concern here is whether the estimates offered to us are reasonable, or rather would be so obviously vulnerable in a rate proceeding as to make present reliance on the tendered rates unfounded for anything more than the short-run. Based upon our analysis, the alleged rate savings to be realized by Trans-Canada and Michigan Consolidated under the Northern proposal ($3,300,000 and $377,000 in the fifth year, respectively) are unrealistic over the long-run.

As noted, Great Lakes has estimated its investment costs, through the fifth year, at $211,669,000. Northern contends that those costs would more closely approximate $260,472,000; the staff estimates them at $214,151,000.

Preliminarily, it is clear that Northern's estimate of the Great Lakes' cost improperly includes the $29,882,000 that Northern allegedly would have to spend to expand its own facilities north of Ogden should it not be certificated. Without taking issue with the magnitude of the expenditure and leaving aside the fact that Northern may be able to avoid any such expansion of its facilities by satisfying its northern needs through purchases from Great Lakes (see *infra*, p. 1087), it is clear that expenditures on Northern's system which are unnecessary to the viability of the Great Lakes project should not be charged against that project. The principal focal points of the remaining discrepancy between the Northern and Great Lakes estimates of the latter's investment cost relate to the cost of river crossings, primarily the crossing of the Straits of Mackinac, the cost of compressor stations, and the fact that Great Lakes' original estimate was predicated on the use of 30-inch pipe which estimate was readjusted to reflect the cost that would be associated with a 36-inch pipe. We find that these objections are not well taken. As to the crossing at the Straits of Mackinac, Northern relied upon the costs that had been submitted to the Interstate Commerce Commission following the construction of a liquid petroleum products line by the Lakehead Pipe Line Company. Aside from the fact that those costs included a $2.3 million overhead charge and a $3 million equipment charge on basic construction costs of but $2.6 million, our experience with river crossings is by now more sophisticated than it was in 1953 when Lakehead crossed the Straits. On the matter of compressor stations, we need note only that Great Lakes supported its estimates with supplier quotations. As to the basic pipeline construction costs, while its initial estimate was based on the use of 30-inch pipe, the Great Lakes estimate on the larger pipe was not only substantiated by the testimony of Mr. David Williams, Jr., of The Williams Brothers Construction Company, but that company offered to complete the major construction effort within the Great Lakes estimate.

We do agree, however, that the staff adjustments, based on increased material costs, are well taken. But we are equally convinced that Great Lakes has justified some of the reductions which it contends should be made before undertaking a comparative analysis. For example, Great Lakes alone proposed the internal coating of its pipeline and allowed 5 percent for omissions and contingencies as opposed to 4.3 percent by Northern. Based upon these and other adjustments Great Lakes contends that its total investment cost, when placed upon a basis comparable with Northern's would be reduced to $200,598,000. Without deciding which of these adjustments are appropriate, it seems clear that based upon all of the foregoing it is reasonable to assume that the cost of service on the Great Lakes project should not exceed the $35 million estimate offered by Great Lakes and upon which it determined its rates.

The correctness of the Northern cost of service of $31,451,000 is, however, open to serious challenge. First, it is predicated on the cost of facilities to be constructed by Northern Transportation alone, to wit, $185 million. It does not include the more than $14 million that Northern Natural would have to expend on its own system merely to accommodate the delivery of Canadian gas. Moreover, even when that additional expenditure is included in the cost of service for the Northern proposal that would represent only the project cost on an incremental basis. In rate proceedings the established policy of this Commission is to set rates on a system-wide rolled-in cost of service. It would appear, therefore, that the Northern proposal would be charged for the transportation services which Northern Natural would perform for it free of charge. This includes not only the delivery of gas, over the Northern Natural system, between Sandstone and Republic for eventual delivery to Trans-Canada and Michigan Consolidated, but the use of Northern Natural facilities to effect the exchange-displacement. Great Lakes introduced a study which shows that utilizing a conventional Mcf-mile allocation, an annual charge of $13 million would have to be assessed against the Northern proposal for those transportation services. While we are not now prepared to pass upon the propriety of that calculation, we are convinced by it that the Northern cost of service is seriously understated and that the alleged rate savings to Trans-Canada and Michigan Consolidated under that proposal would be but short-run.

Moreover, in order to assure Trans-Canada delivery of the same Btu and specific gravity gas as that which it delivers to Northern Transportation, Northern Natural has proposed, in effect, to "dedicate" a line between Ogden and its southern reserves. Apart from the costs that would be involved with any such segregation and dedication it would require Northern Natural to convert to a Btu form of tariff, a conversion that could affect each and every one of its existing customers.

There is an additional consideration relevant to our cost analysis, the effect on Michigan Consolidated. The rate savings to Michigan Consolidated which Northern contends would be available under its proposal ($377,000) represents the difference between the proposed rate of 40.17 cents per Mcf as compared to Great Lakes' 41.98 cent rate. Aside from the fact that Northern has overlooked Great Lakes' tender of a straight commodity rate of 41.04 cents to Michigan Consolidated for the first three years and ignores the reduction that would flow from use of the cheap expansibility which is offered only by the Great Lakes proposal, it ignores as well the increased facilities costs that Michigan Consolidated would have to expend were Northern its supplier in the Upper Peninsula. The record demonstrates that it would cost Michigan Consolidated approximately $45,000 more annually in cost of transmission to take gas from Northern than from Great Lakes. In addition, because the Great Lakes line would closely parallel the Michigan Consolidated system from the Upper Peninsula to the Detroit area it is strategically located so as to permit Michigan Consolidated to make inexpensive taps to serve its load growth rather than constructing the facilities necessary to bring additional gas through its entire system. It is estimated that this advantage will save Michigan Consolidated some $7½ million in capital expenditure over the next five years.

### SUPPLY

Since all of the proposals are dependent upon Trans-Canada's reserves, which we find to be adequate, the supply issue is immaterial for comparative purposes. Although it was contended that the Northern proposal was deficient with respect to supply due to the fact that these reserves were committed to Great Lakes and that should the Great Lakes application be denied Trans-Canada would not enter into a similar arrangement with Northern, we do not feel that we are bound by this assertion. Trans-Canada would properly face that decision only in the event that the Northern proposal were certificated, and we assume that at that time it would act in a manner consistent with the best interest of its Canadian customers. For our purposes here we find that the supply requirements are met by each of the proposals.

### MARKET

Critical to the economic feasibility of each proposal is the need by Michigan Wisconsin for approximately 35,200 $M^2$cf annually, by Michigan Consolidated for approximately 21,000 $M^2$cf annually, and by Trans-Canada for 224,000 $M^2$cf annually in eastern Canada. There is no dispute as to the needs of Michigan Wisconsin and Michigan Consolidated. Panhandle argues, however, that Trans-Canada's market growth in eastern Canada will be insufficient to support either proposal.

In response Trans-Canada put on evidence which would support a 1970–71 need by it of 456,000 $M^2$cf in eastern Canada (including 13,000 $M^2$cf for company use east of Winnipeg but not including the 11,000 $M^2$cf that would be delivered to it at St. Clair for export to New York and Vermont). Based upon the individual company growth evidence before us we find that Trans-Canada's distribution customers in eastern Canada will need approximately 443,000 $M^2$cf annually by the winter of 1970–71. We are persuaded, from Trans-Canada's showing, that the potential for growth of the eastern Canadian market is at least equal, if not better, than similar United States population centers. For example, the market growth in Ontario and Quebec averaged 18 percent annually between 1960 and 1964 and 15 percent annually in the two succeeding years, a percent of growth which far exceeds comparable United States experience. Therefore, it is reasonable to assume that after satisfying its obligation to transport the majority of its gas through its Canadian line, Trans-Canada will nevertheless be able to transport approximately 224,000 $M^2cf$ through the Great Lakes line. It should be noted that in view of the contractual minimum billing requirements, Trans-Canada is encouraged to take full advantage of the use of the Great Lakes line for which it has contracted. On this minimum basis alone Great Lakes would earn a net income of $5,700,000 and a return in excess of 6 percent in the fifth year.

Northern made no independent market showing; it relied upon the Great Lakes presentation. However, even were we to assume that Northern would be able to negotiate the same long-term contracts with Trans-Canada and Michigan Consolidated, we question seriously whether it can be assumed that Trans-Canada would experience the same eastern market growth with Northern as its supplier as it would if it were served through Great Lakes. Canada imposes a 3 cent per Mcf duty on imported gas and it has not been shown that this duty would be waived.[9] While the duty would appear to apply equally to both proposals during the first two years, thereafter it would apply only under the Northern proposal for while Great Lakes would through-put gas for the account of Trans-Canada, Northern would exchange Canadian gas for United States production. On fifth-year volumes this duty would amount to a charge against Trans-Canada and, presumably, its customers, including those in New York and Vermont, of $6,749,000. We cannot help but conclude that the imposition of an additional charge of that magnitude would have a depressing effect on the market growth rate. Accordingly, there has not been an adequate market presentation to support the Northern proposal.

Moreover, the exchange-displacement arrangement presents special problems to Northern Natural. The feasibility of the Northern proposal depends upon Northern Natural's ability to use all of the Canadian gas delivered to it at Sandstone on its own system north of Ogden. Its market growth in that area must exactly pace the increasing requirements of Trans-Canada. In view of the eastern Canadian growth rate to which we have already referred, this is most unlikely. If Northern Natural's growth fails to parallel that of Trans-Canada, it will have to add additional facilities in order to be able to transport the "excessive" Canadian gas south to Northern Transportation at Ogden.

---

[9] Section 3, Chap. 60, Revised Statutes of Canada, and Schedule A, Tariff Item 70905-1.

## ADDITIONAL SUPPLY AND FLEXIBILITY

There are several additional considerations which in our view compel the conclusion that the Great Lakes proposal, rather than the Northern proposal or any of its modifications, is more consistent with the public convenience and necessity of United States consumers. Stated generally, the Great Lakes' proposal alone will offer the possibility of providing those consumers with an additional source of supply in the event of national or local emergency affecting domestic production and it will provide a basis for further competition in the midwest.

The capacity of the Great Lakes project can, with the addition of compression alone, be increased to approximately 860,000 Mcf per day. Since approximately 734,000 Mcf per day will be delivered through that line in the fifth year of operation, and since, as we find, only that delivery is necessary to support the economic feasibility of the line, it is apparent that there will be some cheap expansibility available. This expansibility will potentially be available for utilization by domestic pipelines if such use would be consistent with the best interests of their customers. We think it is significant that in the event of an emergency situation affecting domestic production those pipelines presently serving the midwestern United States may well be able, with relative ease and nominal expense, to take advantage of Great Lakes' ability to transport additional volumes of Canadian gas. The benefit to our national security from this potential cannot be overstated. Moreover, we cannot ignore the fact that the Great Lakes line may well serve as a competitive stimulus in the Midwest. Indeed, it was largely this consideration which prompted the state commissions of Wisconsin and Michigan to intervene on behalf of Great Lakes. In addition, Great Lakes is strategically located so as to be able advantageously to make available to Michigan Consolidated, Michigan Wisconsin, and Northern Natural itself, an additional and prolific source of supply. As to Michigan Consolidated, we have already noted the fact that Great Lakes would parallel the Michigan Consolidated system between the Upper Peninsula and the Detroit area, thus permitting Michigan Consolidated to more efficiently fulfill its distribution responsibilities. As to Michigan Wisconsin, the Great Lakes project offers the considerable advantage of passing through its huge Michigan storage area. This, of course, will permit Michigan Wisconsin, should its own ability to deliver domestic production into its storage area be impeded by national emergency or for any other reason, to take advantage of the Great Lakes capacity.

Finally, the Great Lakes' capacity could well prove to be an economical source of additional gas for Northern itself since, if the occasion arose, it could utilize those supplies to serve increasing market requirements on the northern end of its system. Great Lakes has indicated that were it to be so utilized by Northern, the latter would affect a cost savings of approximately $1,657,754 annually, without considering the additional savings to all customers of Great Lakes that would be realized through the increased use of its line. Northern disputes this and contends instead that to so utilize Great Lakes would cost it $1,789,805 more annually than were it to increase deliveries of its domestic reserves. It is not necessary for us here to determine which of these contentions is appropriate but we do think it significant that in challenging the Great Lakes assertion Northern found it necessary to reduce its prior estimate of the additional facilities that would be required south of Ogden to move additional gas to the northern end of its system from $73,471,600 to $49,867,000. Whatever the appropriate figure would be, it is clear that these additional facilities south of Ogden, as well as the major portion of the $29 million investment said to be required north of Ogden, would be necessary only in the event that Northern were to rely solely on its domestic reserves.

These considerations would require, as well, rejection of both the staff's "project" and Northern's modified project, were we asked to certificate either. Northern, it should be noted, does not ask that we certificate its modified proposal for it frankly concedes that it is inferior to the proposal for which it seeks a certificate due to the use of 30-inch pipe from Emerson, which, although permitting short-term savings, would not be able to accommodate the anticipated long-term volumes of Canadian gas that will be delivered through that segment. We must, of course, be no less mindful of the staff's proposal than of any of the others. For even though we could not certificate the staff's proposal as is, if it were more consistent with the public interest of United States consumers we would be compelled to deny each of the pending applications. However, as already indicated, we consider both the staff proposal and Northern's modified proposal inferior to that of Great Lakes. Each would deny domestic consumers the benefit of an additional supply of gas that would be available both for competitive purposes and as emergency backup in the event of a national emergency or localized difficulty on domestic production. Moreover, each, because they involve exchange-displacements and would, therefore, result in the imposition of the 3 cent per Mcf duty on eastern Canadian consumers, is not supported by an adequate market showing. One asserted advantage of the staff proposal is that Midwestern will be supplying a transportation service rather than having to purchase Canadian gas which the staff considers high-priced. But the average initial rate, at 100 percent load factor, will be 27.29 cents per Mcf (between 1971 and 1975 it will be 28.63), and, since Midwestern presently purchases the entire gas requirements of its northern system from Trans-Canada, the additional purchase of 116,332 Mcf per day (representing 113,000 Mcf per day to be sold to Michigan Wisconsin and the 3,332 Mcf per day required for compressor fuel for this additional sale) should not appreciably increase its average purchase gas cost. In any event, Michigan Wisconsin will be purchasing the 113,000 Mcf per day under Midwestern's existing CD rate schedule.

Whether the cheap expansibility of the Great Lakes' facilities will ultimately be used to serve increased loads in the United States or be devoted to Canadian markets, of course, is not before us at this time. A decision on this matter must await consideration of future applications, at which time we will focus on all of the pertinent considerations as required by the Natural Gas Act.

## OTHER MATTERS

The State of Texas, the Texas Independent Producers & Royalty Owners Association, and the Independent Petroleum Association of America question the need and desirability for the additional importations involved. It is contended that neither application should be approved prior to the correlation of our natural gas import policy with the Mandatory Oil Import Program. For, it is argued, the production of oil and gas are interrelated to the point where the importation of additional gas would have a depressing effect upon domestic oil and gas exploration to the detriment of the national security. Further, we are told that we should not rely upon a supply that is under the control of a foreign government. As a minimum, it is argued that natural-gas imports should not be permitted to exceed the growth rate of domestic production.

Section 3 of the Natural Gas Act provides that the Commission shall issue an order permitting the importation of gas unless it finds that the proposed importation "will not be consistent with the public interest." We have already discussed the advantages inherent in the Great Lakes project, which, not in small part, is the furtherance of our own national security interests. Thus, we disagree with the basic premise of the interveners. Indeed, we have already considered, and rejected, each of the arguments which they here make. See: *Pacific Gas Transmission Co.*, 24 FPC 134, 138 (1960); *The Montana Power Company*, 35 FPC 191 (1966); *Pacific Gas Transmission Company*, 35 FPC 1003, Opinion No. 495, Docket No. CP65-213, *et al.*, June 15,

1966. Here the main Canadian supply (the gas to be transported for Trans-Canada) not only is supported by long-term contracts which contain an appropriate minimum billing provision, but Trans-Canada as half owner of the Great Lakes line has a vital interest in that project's viability.

At the time of the *Montana* case we noted that natural gas imported from Canada was averaging 2.48 percent of domestic market production (35 FPC at p. 195). On the basis of the year 1965 the Canadian imports of 404,686 M²cf were approximately 2.5 percent of domestic production.[10] With approval of this project, importation will be increased 62,050 M²cf annually, or .39 percent of the 1965 domestic production.

Our decision here is not intended to commit the Commission to any long-range policy with respect to the importation of natural gas; rather, it is simply consistent with our past treatment of import proposals where we have looked at each one on its merits. In this particular case only through the certification of the Great Lakes proposal can we take advantage of the most efficient utilization of continental reserves, and only the Great Lakes' proposal enjoys the cheap expansibility to which we have already referred.[11] Therefore, our action today, rather than committing policy down the road, is designed to afford us the flexibility to act in the long-term best interests of the United States. Future imports, of course, will be subject to the surveillance of this Commission and will be considered in the light of the entire public interest including the public interest in continued domestic exploration for new gas reserves.

As noted earlier Panhandle contends that rather than transporting gas through the United States, the looping of the existing Canadian line would be more beneficial to Trans-Canada and its customers. On May 22, 1967, Panhandle reiterated this contention by requesting the reopening of these proceedings to permit the consideration of several alternatives to the Great Lakes line that recently have been offered before the National Energy Board. Both Panhandle's recent petition and its earlier contention are based on an incorrect premise, *to wit*, that in carrying out our responsibilities under Section 7 of the Natural Gas Act this Commission must consider proposals which while arguably beneficial to foreign nationals have no effect on the public convenience and necessity of United States consumers. It follows, therefore, that it would not be appropriate for us to consider, in our comparative analysis, projects that would be wholly constructed outside of the United States, and Panhandle's petition will, therefore, be denied.

---

[10] Natural Gas Section of Bureau of Mines Minerals Yearbook for 1965, U.S. Department of Interior, pp. 2, 6.

[11] The capacity of the Northern proposal is, of course, limited by the capacity of the Northern Natural system. As already noted, merely to accommodate the delivery of the Canadian gas here at issue into its system at Sandstone, Northern Natural would have to expend in excess of $14 million.

Further, we have considered Panhandle's objections to Great Lakes' departure from the Seaboard formula [12] in setting its rate design and find that departure to be justified. Great Lakes divided cost of fuel and losses between demand and commodity on an as-billed basis, and assigned two-thirds of all other costs to demand and one-third to volume. Panhandle argues that Great Lakes has not justified its failure to divide fixed costs equally between demand and commodity. That is, Panhandle contends that Great Lakes' commodity charge is too low. Of course, a lower commodity charge is to the advantage of a pipeline that is desirous of competing for industrial loads and since the record establishes that without that departure Great Lakes would be unable to compete with coal for such loads, a departure from the Seaboard allocation formula appears to be appropriate.

Northern contends that Great Lakes is not a qualified applicant because the equal ownership of its stock by Trans-Canada and American Natural might result in a deadlock necessitating invocation of the arbitration provision in their contract which, Northern asserts, probably is unenforceable under Delaware law as an improper delegation of the authority of the directors. We do not share Northern's concern. First, matters of volume and rates, at least initially, are covered by long-term (25 year) contracts. Secondly, we do not agree with Northern's construction of Delaware law. In *Ringling* v. *Ringling Bros.—Barnum & Bailey Com. Shows*, 29 Del. Ch. 318, 49 A. 2d 603, modified 20 Del. Ch. 53 A. 2d 441 (Sup. Ct. 1947), relied upon by Northern, an arbitration agreement controlling the votes of the directors was upheld, the court stating: "Reasonable provisions for cases of failure of the group to reach a determination because of an even division in their ranks seem unobjectionable." (53 A. 2d at p. 447) We perceive nothing objectionable about the arbitration agreement at bar.

At the suggestion of the staff we shall condition the certificate issued to Great Lakes to provide that the company submit for the Commission's approval a financing plan providing that common equity be maintained at not less than 15 percent of total capitalization and that no dividends be paid on the common stock as long as the long-term debt exceeds 75 percent of the total capitalization. We do not think it necessary, as staff suggests, that the promissory notes be made convertible to common stock.

---

[12] *Atlantic Seaboard Corp.*, 11 FPC 43.

*The Commission further finds:*

(1) Great Lakes, Midwestern and Northern Natural are "persons" within the meaning of Section 2(1) and Section 3 of the Natural Gas Act.

(2) Great Lakes, a Delaware corporation, having its principal place of business in Wilmington, Delaware, upon construction and operation of the facilities and commencement of the sales proposed by it in Docket No. CP66–110 will become a "natural-gas company" within the meaning of the Natural Gas Act.

(3) Midwestern, a Delaware corporation with its principal place of business at Houston, Texas is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission. *Midwestern Gas Transmission Company* (21 FPC 653).

(4) Michigan Wisconsin, a Delaware corporation with its principal place of business at Detroit, Michigan is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission.

(5) Northern Natural, a Delaware corporation with its principal place of business at Omaha, Nebraska is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission.

(6) Northern Transportation, a Delaware corporation with its principal place of business at Omaha, Nebraska upon construction and operation of the facilities and commencement of the sales proposed by it in Docket No. CP66–213 would become a "natural-gas company" within the meaning of the Natural Gas Act.

(7) The facilities hereinbefore described and as more fully described in the applications and the record in this proceeding, are to be used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the transportation and sales of natural gas proposed are subject to the requirements of subsections (c) and (e) of Section 7 of the Natural Gas Act.

(8) Each of the above-named applicants is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(9) The applications of Northern Natural in Docket No. CP66–212 and Northern Transportation Company in Docket No. CP66–213 under Section 7 of the Natural Gas Act have not been shown to be required by the present or future public convenience and necessity.

(10) The importation and exportation of natural gas as proposed by Northern Transportation in Docket No. CP66–215 under Section

3 of the Natural Gas Act and the construction and operation of facilities at the border of the United States near Emerson, Manitoba, near Sault Ste. Marie, Ontario and near St. Clair, Michigan pursuant to Executive Order 10485, as proposed in Docket No. CP66-214, are not consistent with the public interest.

(11) As proposed by Great Lakes in Docket No. CP66-110, the construction and operation of facilities, the transportation of 677 $M^2$cfd (14.73 psia) of natural gas for Trans-Canada, the transportation of 87.6 $M^2$cfd purchased from Trans-Canada, and the sale of 57 $M^2$cfd (14.73 psia) to Michigan Consolidated are required by the public convenience and necessity as hereafter ordered and conditioned.

(12) As proposed by Midwestern in Docket No. CP66-119 the construction and operation of facilities, the transportation of 116.332 $M^2$cfd of natural gas to be purchased from Trans-Canada at a point near Emerson, Manitoba and the sale by Midwestern of 113 $M^2$cfd to Michigan Wisconsin at Marshfield, Wisconsin are required by the public convenience and necessity as hereafter ordered and conditioned.

(13) As proposed by Michigan Wisconsin in Docket No. CP66-109, the construction and operation of facilities, and the transportation and sale of an additional 113 $M^2$cfd to be purchased from Midwestern at Marshfield, Wisconsin, including a sale of 113 $M^2$cfd to Trans-Canada in the first year and 63 $M^2$cfd in the second year, are required by the public convenience and necessity as hereafter ordered and conditioned.

(14) The importation of an additional 116.332 $M^2$cfd by Midwestern from Trans-Canada at a point near Emerson, Manitoba as proposed in Docket No. CP66-121, and the construction and operation of facilities by Midwestern at the border of the United States near Emerson, Manitoba pursuant to Executive Order 10485 as proposed in Docket No. CP66-120, upon which the Secretary of State and the Secretary of Defense have made favorable recommendations, are consistent with the public interest.

(15) The importation of 764.6 $M^2$cfd by Great Lakes in Docket No. CP66-112 at a point near Emerson, Manitoba and the exportation of 677 $M^2$cfd at points near Sault Ste. Marie and St. Clair, Michigan, and the construction and operation of facilities by Great Lakes in Docket No. CP66-111 at the borders of the United States at Emerson, Sault Ste. Marie and St. Clair, pursuant to Executive Order 10485, upon which the Secretary of State and the Secretary of Defense have made favorable recommendations, are consistent with the public interest.

*The Commission orders:*

(A) The applications of Northern Natural in Docket No. CP66–212 and Northern Transportation in Docket Nos. CP66–213, CP66–214 and CP66–215 are denied.

(B) Certificates of public convenience and necessity are issued: to Great Lakes in Docket No. CP66–110 for the construction and operation of facilities, the transportation of 677 $M^2$cfd (14.73 psia) of natural gas for Trans-Canada, the transportation of 87.6 $M^2$cfd purchased from Trans-Canada and the sale of 57 $M^2$cfd (14.73 psia) to Michigan Consolidated; to Midwestern in Docket No. CP66–119 for the construction and operation of facilities, the transportation of 116.332 $M^2$cfd of natural gas, and the sale of 113 $M^2$cfd to Michigan Wisconsin; and to Michigan Wisconsin in Docket No. CP66–109 for the construction and operation of facilities and the transportation and sale of natural gas, including 113 $M^2$cfd to Trans-Canada in the first year and 63 $M^2$cfd in the second year; all as described above and as more fully described in the applications in this proceeding upon the terms and conditions of this order.

(C) The certificates issued in Paragraph (B) and the rights granted thereunder are conditioned upon compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the terms and conditions set forth in paragraphs (a), (c), (e), (f) and (g) of Section 157.20 of such Regulations.

(D) The facilities proposed by Great Lakes shall be constructed in accordance with the time schedule proposed in this proceeding with the first year's construction being completed by November 1, 1967; the facilities proposed by Midwestern and Michigan Wisconsin shall be completed by November 1, 1967.

(E) Within 30 days of the issuance of this order Great Lakes shall submit for the Commission's approval a financing plan providing that common equity be maintained at not less than 15 percent of total capitalization and that no dividends be paid on the common stock as long as the long-term debt exceeds 75 percent of the total capitalization.

(F) Authorization is issued to Midwestern in Docket No. CP66–121 to import 116.332 $M^2$cfd to be received from Trans-Canada at a point near Emerson, Manitoba; and authorization is issued to Great Lakes in Docket No. CP66–112 to import 764.6 $M^2$cfd (87.6 $M^2$cfd to be purchased and 677 $M^2$cfd to be transported) from Trans-Canada at a point near Emerson, Manitoba and to export 677 $M^2$cfd at points near Sault Ste. Marie, Michigan and St. Clair, Michigan.

(G) Presidential Permits under Executive Order No. 10485 to construct, operate, maintain and connect the necessary facilities at the international border are issued to Great Lakes in Docket No. CP66-111 applicable to points near Emerson, Manitoba, and Sault Ste. Marie and St. Clair, Michigan and to Midwestern in Docket No. CP66-120 applicable to a point near Emerson, Manitoba as more fully described in the applications and in the evidence in these proceedings.

(H) Panhandle's petition to reopen proceedings is denied.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## ORANGE AND ROCKLAND UTILITIES, INC., DOCKET NO. E-7348

### ORDER AUTHORIZING ISSUANCE OF PROMISSORY NOTES

(Issued June 20, 1967)

Orange and Rockland Utilities, Inc. (Applicant) filed an application on April 11, 1967, pursuant to Section 204 of the Federal Power Act for authority to issue short term Promissory Notes in the maximum principal amount of $35,000,000.

Orange and Rockland Utilities, Inc. is organized under the laws of the State of New York with its principal business office at Nyack, N.Y. and owns and operates an electric utility system serving all of Rockland County, most of Orange County and part of Sullivan County, all in New York. Its wholly-owned subsidiaries, Rockland Electric Company and Pike County Light and Power Company, operate electric utility systems in New Jersey and Pennsylvania, respectively, serving areas contiguous to that served by the parent company.

The notes are to be issued from time to time to commercial banks or similar institutions and will mature within one year from their dates of issuance and in any event no later than June 30, 1968. The notes will bear interest at not more than ¼% above the New York prime rate in effect at the time of the borrowings.

The new notes are to be issued to finance construction expenditures estimated at $19,629,900 in the remainder of 1967 and estimated at $13,789,000 in the first six months of 1968. The construction program includes a 195 mw generating unit to be installed in the Applicant's Lovett Plant by 1969. For this generating unit, the estimated costs for the remainder of 1967 total $9,673,000 and the estimated costs for the first half of 1968 total $8,107,000. The program also includes an estimated expenditure of $906,000 during the same periods in 1967, 1968, for construction of 6.4 miles of 500 KV line and 14.8 miles of 345 KV line (The Applicant's portion of the PJM—Con. Ed transmission line). The Applicant plans to issue long-term debt and/or equity securities in the last quarter of 1967 or in the first half of 1968. The permanent financing plus retained earnings are expected to be sufficient to pay off all notes outstanding.

Written notice of the application has been given to the New York Public Service Commission, the New Jersey Board of Public Utility Commissioners, the Pennsylvania Public Utility Commission, and to the Governor of each of those States. Notice was also published in the Federal Register on May 2,

1967, (32 F.R. 6748), stating that any person desiring to be heard or to make any protest with reference to said application should on or before May 5, 1967, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). No petition or protest or request to be heard in opposition to the granting of the application has been received.

*The Commission finds:*

(1) Applicant, a corporation, is a public utility within the meaning of Section 204 of the Federal Power Act subject to the jurisdiction of the Commission as heretofore determined and set forth in the Commission's order issued August 13, 1958 in the matters of *Orange and Rockland Utilities, Inc.* and *Rockland Electric Company*, in Docket No. E–6827 (20 FPC 205).

(2) The proposed issuance of Promissory Notes in the aggregate principal amount of $35,000,000, all as described above, will constitute an issuance of securities within the purview of Section 204 of the Act.

(3) The proposed issuance of Promissory Notes in the aggregate principal amount of $35,000,000, all as described above, will be in excess of 5% of the par value of the other securities of Applicant, and, therefore, will not be exempt by virtue of Section 204(e) from the requirements of Section 204(a) of the Act.

(4) Applicant is not organized and operating in a State, under the laws of which the issue here involved is regulated by a State Commission within the meaning of Section 204(f) of the Act, and the proposed issuance is, therefore, not exempt by virtue of that Section from the requirements of Section 204 of the Act.

(5) The proposed issuance of Promissory Notes will be exempt from the competitive bidding requirements of Section 34.1a of the Commission's Regulations under the Federal Power Act by reason of paragraph 34.1a(a)(2).

(6) The proposed issuance of securities, as hereinafter authorized, will be for a lawful object within the corporate purposes of Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance of service by Applicant as a public utility, and which will not impair its ability to perform that service, and is reasonably necessary and appropriate for such purposes.

(7) The period of notice given in this matter is reasonable.

*The Commission orders:*

(A) The proposed issuance of Promissory Notes in the aggregate principal amount of $35,000,000, outstanding at any one time, upon the terms and conditions and confined to the purposes set forth in the application, all as described above, is hereby authorized, subject to the provisions of this order.

(B) This authorization is expressly conditioned upon the final maturity of said Notes being not later than June 30, 1968.

(C) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determination of cost or any other matter whatsoever now pending or which may come before this Commission.

(D) Nothing in this order shall be construed to imply any guarantee or obligation on the part of the United States in respect to any security to which this order relates.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## UNITED STATES DEPARTMENT OF THE INTERIOR, SOUTHWESTERN POWER ADMINISTRATION, DOCKET NO. E-7172

### ORDER TEMPORARILY EXTENDING CONFIRMATION AND APPROVAL OF RATES AND CHARGES

(Issued June 20, 1967)

The Secretary of the Interior, acting on behalf of the Southwestern Power Administration (SWPA) and pursuant to The Flood Control Act of 1944 (58 Stat. 887) on March 16, 1967 filed a request for the extension of the Commission's confirmation and approval, which expires July 1, 1967, of rate schedules and contractual rates and charges applicable to the integrated system of SWPA.

The Secretary requests that in the event action is not taken by the Commission before the expiration date of these rate schedules and contractual rates and charges that temporary extension of confirmation and approval be granted for the existing rates until Commission's final action is taken. The Commission has not completed its review of these rates.

*The Commission orders:*

The confirmation and approval of SWPA's Rate Schedules F-1, IC, EE and P-2 and the contractual rates and charges set forth in contracts between SWPA and Texas Power and Light Company (Contract Ispa-177), Southwestern Electric Power Company (Contract 14-02-001-782) and Oklahoma Gas and Electric Company and Public Service Company of Oklahoma, (Contract Ispa-356) are hereby temporarily extended to September 30, 1967 or to such earlier date as the Commission's final action is taken.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## ALGONQUIN GAS TRANSMISSION COMPANY, DOCKET NO. CP67-317

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 21, 1967)

On April 28, 1967, Algonquin Gas Transmission Company (Applicant) filed in Docket No. CP67-317 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of 1.07 mile of 30-inch O.D. pipeline under the Hudson River near Stony Point and Buchanan in Rockland and Westchester Counties, New York, all as more fully described in the application.

The proposed pipeline will loop two 24-inch O.D. pipelines already in operation between Stony Point and Buchanan, New York, and provide assurances of the continuity of natural gas service to Applicant's customers. The proposed construction will also return Applicant's system to its original comparative standby capacity.

The estimated cost of the proposed pipeline is $2,007,000, which cost will be financed through the use of retained earnings, short term loans if required, and finally by inclusion as necessary in Applicant's next long term issue of debt securities.

Due notice of the filing was issued on May 11, 1967. No petition to intervene, notice of intervention, or protest to the granting of the application has been filed.

At a hearing held on June 15, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Algonquin Gas Transmission Company, a Delaware corporation, having its principal place of business in Boston, Massachusetts, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of February 26, 1951, in Docket No. G–1319 (10 FPC 35).

(2) The facilities hereinbefore described and as more fully described in the application in this proceeding are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules, and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities and the transportation of natural gas by Applicant are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of the Commission's Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to the Algonquin Gas Transmission Company authorizing the construction and operation of the facilities and the transportation of natural gas in interstate commerce as hereinbefore described and as more fully set forth in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation and the transportation of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, by January 1, 1968.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## MONTANA-DAKOTA UTILITIES CO., DOCKET NO. CP67-271

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 21, 1967)

On March 22, 1967, Montana-Dakota Utilities Co. (Applicant) filed in Docket No. CP67-271 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of approximately 11.78 miles of 4½-inch natural gas pipeline and metering and regulating facilities in Butte County, South Dakota, and Crook County, Wyoming, for the transportation and delivery of natural gas to International Minerals and Chemical Corporation (International) near Colony, Wyoming, on an interruptible basis, all as more fully set forth in the application.

Applicant proposes to construct and operate a lateral pipeline looping its existing pipeline used to serve the bentonite processing plants of National Lead Company and Archer-Daniels-Midland Company near Colony, Wyoming. The new line and metering and regulating facilities will be used to deliver natural gas to International for bentonite processing, and said line will also provide the additional capacity necessary to serve additional fuel requirements of Archer-Daniels-Midland Company and other customers who may desire service in the area.

International's estimated third year maximum day and annual natural gas requirements are 1,500 Mcf and 300,000 Mcf, respectively. Existing peak day obligations in the area are 1,400 Mcf of natural gas and are anticipated to increase to 1,800 Mcf in the near future.

The proposed pipeline is estimated to cost $140,400 and the metering station is estimated to cost $9,850. The facilities will be financed with internally generated funds and/or short term bank loans and with an advance in aid of construction by International of $73,500 to be repaid with a credit on monthly bills.

The gas authorized to be transported and delivered to International will be sold at the rate of 31.25 cents per Mcf at 13.2125 psia.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on June 15, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Montana-Dakota Utilities Co., a Delaware corporation having its principal place of business in Minneapolis, Minnesota, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of March 22, 1946 in Docket No. G-402 (5 FPC 64).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, will be used in the transportation and delivery of natural gas in interstate commerce subject to the jurisdiction of the Com-

mission, and the construction and operation thereof and the transportation and delivery of natural gas are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of facilities and transportation and delivery of natural gas by Applicant are required by the public convenience and necessity, and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder should be conditioned upon the Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to Applicant authorizing the construction and operation of facilities and the transportation and delivery of natural gas as hereinbefore described, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized herein shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Regulations under the Natural Gas Act within six months from the date on which this order issues.

(D) The certificate issued hereby is granted on the express condition that the interruptible service authorized herein shall be curtailed or interrupted to the extent required to meet existing or future contracted maximum delivery obligations of Applicant for firm service to its customers.

## NATURAL GAS BOARD OF THE TOWN OF VINA, ALABAMA, AND TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC., DOCKET NO. CP67-283

### FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued June 22, 1967)

On March 29, 1967, Natural Gas Board of the Town of Vina, Alabama (Applicant) filed in Docket No. CP67-283 an application and a supplement thereto on May 1, 1967 pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Tennessee Gas Pipeline Company, a Division of Tenneco Inc., (Respondent) to establish physical connection of its transmission facilities with the facilities proposed to be constructed by Applicant and to sell and deliver to Applicant volumes of natural gas for resale and distribution by means of such facilities, all as more fully set forth in the application and supplement thereto.

Applicant proposes to construct and operate a lateral pipeline extending from a point of connection with Respondent's gas transmission pipeline approximately 2 miles to the Town of Vina, Alabama and a gas distribution system within the Town.

Applicant estimates the Maximum Daily and Maximum Annual Requirements for the first three years as follows:

| Year | Maximum Daily Requirements (Mcf) | Maximum Annual Requirements (Mcf) |
|---|---|---|
| 1st | 57.6 | 5,329 |
| 2nd | 92.0 | 8,102 |
| 3rd | 150.2 | 12,946 |

Applicant estimates the total cost of the proposed construction at approximately $80,000, which cost is to be financed by the issuance and sale of Natural Gas Revenue Bonds.

On April 27, 1967, Respondent filed an answer to the application in the proceeding stating it does not oppose the granting of the application for an order directing it to render the service requested.

Due notice of the filing of the subject application and opportunity for hearing thereon have been given by publication in the Federal Register on April 14, 1967 (32 F.R. 6010). No protest, petition to intervene, notice of intervention or request for hearing has been filed in this proceeding.

*The Commission finds:*

(1) Tennessee Gas Pipeline Company, a Division of Tenneco Inc., a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued July 15, 1947 in Docket No. G-910 (6 FPC 777).

(2) Applicant is legally authorized to engage in the local distribution of natural gas to the public within the meaning of Section 7(a) of the Natural Gas Act.

(3) It is necessary and desirable in the public interest to direct Respondent to establish physical connection of its transmission facilities with the facilities proposed to be constructed and operated by Applicant, and to sell and deliver to Applicant, under a service agreement to be executed by Applicant with Respondent in accordance with the Commission's Regulations, up to 151 Mcf per day of natural gas for distribution and resale, as hereinbefore described and as more fully described in the application in this proceeding.

(4) Applicant should be prepared to receive natural gas from Respondent for distribution in the town of Vina, Alabama within one year from the date of the issuance of this order.

**(5) The requirement that Respondent serve Applicant, as requested will not place an undue burden upon it nor impar its ability to render adequate service to its existing customers.**

***The Commission orders:***

**(A) Tennessee Gas Pipeline Company, a Division of Tenneco Inc., is directed to establish physical connection of its facilities with the facilities proposed to be constructed and operated by Applicant, and to sell and deliver up to 151 Mcf of natural gas daily to Applicant under a service agreement to be executed by Applicant with Respondent and filed in accordance with the Commission's Regulations, for distribution and resale, as hereinbefore described and as more fully described in the application in this proceeding. Such service shall be rendered pursuant to Respondent's presently filed appropriate rate schedule.**

**(B) Respondent shall report to the Commission in writing the date of commencement of service to Applicant within 10 days thereof.**

**(C) Applicant shall be prepared to receive service as directed herein within one year from the date of issuance of this order.**

---

**Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.**

## PUBLIC INFORMATION, DOCKET NO. R-326

## ORDER NO. 349

### AMENDING STATEMENT OF ORGANIZATION TO MORE FULLY DESCRIBE THE FUNCTIONS AND RESPONSIBILITIES OF THE OFFICE OF PUBLIC INFORMATION

**(Issued June 22, 1967)**

**For many years the Commission has maintained, in its Office of Public Information, a specially staffed and equipped public reference room where the public may examine and obtain copies of material in the Commission's public files and records. The heretofore published organization statement describing the Office of Public Information (18 CFR 3.4(e)(11)), states only that the Office is responsible for the public information activities of the Commission. Both the letter and the spirit, however, of the Freedom of Information Act (P.L. 89-487) require that the responsibilities and functions of the Office be described in greater detail so that all members of the public, not only those practitioners and members of the press who are already familiar with the operation of the Office, may know of the services it is designed to perform. Accordingly,**

***The Commission finds:***

**The amendment to its general rules here adopted is necessary and appropriate in the administration of the Federal Power and Natural Gas Acts.**

***The Commission*, acting pursuant to authority granted by section 309 of the Federal Power Act and section 16 of the Natural Gas Act (16 U.S.C. 825h; 15 U.S.C. 717o) and in accordance with section 552 of Title 5 of the United States Code, as amended by P.L. 89-487, 80 Stat. 250, *orders:***

**(A) Effective upon the issuance of this order, Part 3, Subchapter A, Chapter I of Title 18 of the Code of Federal Regulations is amended by revising subparagraph (11) of § 3.4(e) to read as follows:**

**§ 3.4 Organization.**

* * * * * * *

**(e) *The staff.***

* * * * * * *

**(11) The Office of Public Information.**

**(i) *Responsibilities.* (*a*) The Director of Public Information plans, directs and controls the programs and activities of the Office of Public Information, and in addition is responsible for: insuring that the information provided to the public is in compliance with the policies and interpretations established in accordance with the law on Freedom of Information; clearing speeches and material prepared by the staff for publication; establishing and maintaining liaison with embassies of foreign governments on matters of concern to the Commission, and with the Department of State and the Agency for International Development with respect to foreign visitors; making arrangements for lectures and tours in the electric power and natural gas industries for foreign visitors; arranging press conferences and radio and television appearances for the Commission or Chairman; attending Commission meetings to achieve necessary insight and familiarity with matters to be released as public information; maintaining liaison with public information representatives of electric and natural gas utilities, other Federal government agencies, state and local governments, and trade associations; and advising the Commission, Chairman, and Executive Director on public information matters.**

**(*b*) The Office of Public Information is responsible for all functions required in carrying out the Commission's public information program including: liaison for the Commission on public information matters with members of Congress, the press, and the natural gas, electric power and related industries, with professional organizations, financial houses, and the public, including educational institutions, students, libraries, and commercial, domestic and industrial consumers of electric power and natural gas; control of the issuance of maps and publications; final editorial clearance of material prior to publication; preparation of announcements and press releases regarding official Commission activities; and provisions for information and reference services to the press, industry representatives and the public.**

**(ii) *Functions.* The Office of Public Information provides liaison for the Commission on matters of public information; prepares announcements concerning Commission actions, activities, decisions and opinions; prepares and issues all press releases on Commission activities; collects, compiles, prepares and distributes the Commission's Annual Report to the Congress; assists in determining the need for and preparation of Commission reports and publications; recommends to the Commission editorial presentation, format and typography of reports and publications; and is responsible for the final coordination and editorial review of reports and statistical matter prior to publication for conformance with Commission direction; sells, distributes and publicizes Commission reports and publications, including automatic data processing tapes, printouts, and listings, and collects and accounts for money collected from such sales; maintains a public reference room and provides to the public,**

members of the press, and the industry access to the public files and records of the Commission as defined in the Commission's Rules of Practice and Procedure, including facilities and services for obtaining copies of such information; and answers written, personal, and telephonic inquiries relating to all phases of the Commission's activities and matters pending before the Commission. The Director of Public Information and designated assistants act as consultants to the Commission, to individual Commissioners, and to members of the staff concerning matters of public information.

(B) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## CRISP COUNTY POWER COMMISSION v. GEORGIA POWER COMPANY, DOCKET NO. E-7120

### SUPPLEMENTAL ORDER REQUIRING CONSTRUCTION OF INTERCONNECTION FACILITIES, GRANTING PETITION FOR LEAVE TO INTERVENE, REOPENING RECORD, AND DENYING PETITIONS FOR LEAVE TO FILE COMMENTS

(Issued June 23, 1967)

On December 5, 1966, we issued a Tentative Opinion No. 508 in this proceeding, which ordered an interconnection of the facilities of Georgia Power Company with the facilities of the Crisp County Power Commission (Crisp County), pursuant to Section 202(b) of the Federal Power Act, and prescribed the terms and conditions of service under that interconnection. Opportunity was afforded the parties to file briefs on exception to the Tentative Opinion and briefs were filed by both Georgia Power and Crisp County. Neither Georgia Power nor Crisp County in their briefs on exceptions have questioned the necessity of a permanent interconnection between the two systems. The exceptions to the Tentative Opinion have been directed to the Commission's determination of the appropriate terms and conditions for interconnected operation between Georgia Power and Crisp County and the apportionment of the cost of establishing the interconnection.

We are ordering the record reopened for further evidence with respect to certain issues relating to the terms and conditions of interconnected operation, but that need not delay the establishment of permanent interconnection facilities. On April 22, 1966 in Docket No. E-7288, 35 FPC 629, we ordered a temporary interconnection between the parties and by supplemental order issued December 5, 1966, 36 FPC 949, we ordered the capacity of the temporary interconnection to be increased. It is necessary and appropriate that the parties proceed to establish permanent interconnection facilities without delay. The terms and conditions of the interconnection and the proportion of the cost of the facilities to be borne by each party will be determined by further order of the Commission in this proceeding.

From February 23, 1967 to March 31, 1967, petitions were filed by 24 persons not parties to this proceeding seeking leave to file "data, views and arguments" with respect to the Commission's Tentative Opinion No. 508, issued

December 5, 1966[1]. In addition, the American Public Power Association and the City of Gainesville, Florida, neither of which is a party to the proceeding, filed oppositions to the petitions and asked, in the alternative, that if the petitions were granted, they too be permitted to file data, views and arguments in this matter. Crisp County and the staff of the Federal Power Commission filed answers opposing the petitions. Georgia Power Company filed an answer supporting the petitions.

Our consideration of these petitions and answers leads us to conclude that general industry-wide participation in this case is not appropriate. As we pointed out in Opinion No. 508 (mimeo. ed. p. 8):

> In adopting the rates, terms and conditions discussed herein, we do not suggest that these are the norm to be required by the Commission in every interconnection case under Section 202(b). We realize that appropriate rates, terms and conditions for any interconnection are dependent upon the nature and circumstances of the particular situation.

The further hearings which we now provide will facilitate a final resolution of issues directly affecting Crisp County, Georgia Power and possibly the latter's corporate affiliates. These parties are best able to develop the specific issues which will be decided in this case. Any application of the final decision in this docket to other utilities would depend upon facts to be developed on other evidentiary records. Clearly such questions are not properly a part of this case.

On April 3, 1967, Alabama Power Company, Gulf Power Company and Mississippi Power Company (joint petitioners) jointly filed motions and petitions seeking leave to intervene and to reopen the record. These petitioners are affiliates of respondent, Georgia Power Company, and are members, with Georgia Power, of the Southern Company Pool. Joint petitioners state that the new operating conditions imposed on Georgia Power by the Tentative Opinion will affect Georgia Power's contributions and commitments to the Pool and thus will have a direct effect on joint petitioners. As support for their motion to intervene out of time, joint petitioners state that it was not until after the issuance of Opinion No. 508 that they realized this case would have an impact on the Southern Pool.

---

[1] The petitions were filed as follows:

| | |
|---|---|
| February 23, 1967 | Alabama Power Company |
| | Gulf Power Company |
| | Mississippi Power Company |
| March 3 and 31, 1967 | Southwestern Electric Power Company |
| March 6, 1967 | Appalachian Power Company |
| | Indiana & Michigan Electric Company |
| | Jersey Central Power & Light Company |
| | Kentucky Power Company |
| | Kingsport Power Company |
| | Metropolitan Edison Company |
| | New England Power Company |
| | New Jersey Power & Light Company |
| | Ohio Edison Company |
| | Ohio Power Company |
| | Pacific Gas and Electric Company |
| | Pennsylvania Electric Company |
| | Southern California Edison Company |
| | Virginia Electric & Power Company |
| | Wheeling Electric Company |
| March 7, 1967 | Arkansas Power & Light Company |
| | Louisiana Power & Light Company |
| | Mississippi Power & Light Company |
| | New Orleans Public Service, Inc. |
| March 7, 1967 | Gulf States Utilities Company |

We believe that these joint petitioners have shown good cause for granting permission to intervene out of time in this proceeding, for the limited purpose of showing the effects which the terms and conditions of the interconnection, as set forth in Opinion No. 508, may have upon their respective and combined interests as members of the Southern System Pool. In this connection it appears from questions raised in Crisp County's brief on exceptions and in joint petitioners' motions that it may be appropriate for us to give further consideration to the appropriate reserves for Crisp County to maintain under interconnected operation with Georgia Power.

Although the record in this case contains substantial evidence on Southern Pool operations, the operation of the Pool is complex and involved and it may be helpful to the Commission to have further evidence. As a part of the further hearings ordered herein, specific inquiry should be made into the Southern System Pool rate schedules[2] insofar as they would affect or be affected by the interconnection between Crisp County and Georgia Power. This further evidence may be helpful in considering costs and benefits to Georgia Power and Crisp County by reason of the interconnected operation contemplated in Opinion No. 508.

*The Commission further finds:*

(1) It is appropriate for purposes of the Federal Power Act, particularly Sections 201, 202, 205, 206, 307, 308 and 309 thereof, to reopen the record in this proceeding to receive additional evidence for the purposes as set forth in the recital above.

(2) Good cause has been shown to permit Alabama Power Company, Gulf Power Company and Mississippi Power Company to intervene out of time in this proceeding for the limited purpose of showing the effects which the terms and conditions of the proposed interconnection, as set forth in Opinion No. 508, may have upon their respective and combined interests as members of the Southern System Pool.

(3) Good cause has not been shown for granting the petitions for leave to file comments of Appalachian Power Company, *et al.*, Arkansas Power & Light Company, *et al.*, Gulf States Utilities Company, Southwestern Electric Power Company, the American Public Power Association, and the Gainesville Utilities Department and the City of Gainesville, Florida. In view of finding (2) above the petition of Alabama Power Company, *et al.*, need not be passed upon.

(4) The completion of the further hearings ordered herein, the provisions of Opinion No. 508 fixing the terms and conditions of the interconnection between Crisp County and Georgia Power shall be subject to further order of the Commission. However, in order that the reopening of the record not delay physical construction of the interconnection facilities, it is necessary and appropriate that these parties advise the Commission of their plan of construction of the 110 kv interconnection facilities described in finding (4) of Opinion No. 508 within 20 days hereafter. It is necessary and appropriate that Georgia Power and Crisp County physically commence construction of the interconnection within 60 days hereafter and complete it expeditiously, absent a showing of good cause why this cannot be done.

---

[2] Southern Services, Inc. Rate Schedule FPC No. 34, Alabama Power Company Rate Schedule FPC No. 96, Georgia Power Company Rate Schedule FPC No. 712, Gulf Power Company Rate Schedule FPC No. 39, Mississippi Power Company Rate Schedule FPC No. 87.

*The Commission orders:*

(A) The record in this proceeding is hereby reopened and remanded to a hearing examiner of the Commission with the direction that he receive further evidence on the matters as referred to in finding (1) above. The public hearing for this purpose shall be held at the Commission's hearing room, 441 G Street, N.W., Washington, D.C., at a time to be fixed by the Examiner.

(B) Alabama Power Company, Gulf Power Company and Mississippi Power Company are hereby granted leave to intervene in the above entitled matter subject to the rules and regulations of the Commission: *Provided, however*, that the participation of such interveners shall be limited to the matters specifically set forth in finding (2) above; and *Provided further*, that the admission of such interveners shall not be construed as recognition by the Commission that they might be aggrieved by any order or orders entered in this proceeding.

(C) The petitions for leave to file comments by the persons referred to in finding (3) above are hereby denied.

(D) The members of the Southern System, namely interveners Alabama Power Company, Gulf Power Company and Mississippi Power Company, and respondent Georgia Power Company, shall file with the Commission their proposed direct evidence in writing on or before July 24, 1967. Such direct cases shall include evidence showing how the Southern System companies would propose to operate their respective systems or modify their Pool rate schedules, if at all, if the terms and conditions set forth in Opinion No. 508 should be put into effect, and how those terms or conditions should be changed, if at all, so as to give recognition to any minimum reserves or other operating conditions which the Southern System companies believe should be observed by Crisp County under interconnected operation. All submittals shall be in the form and style as set forth in the Commission's Rules of Practice and Procedure. A pre-hearing conference shall be convened in a hearing room of the Commission at 10:00 a.m. (EDT) on July 27, 1967 for the purpose of setting dates (1) for filing rebuttal evidence, which may include proposals for changes in the Southern System Pool rate schedules mentioned in the recital above, and (2) reconvening the hearing for purposes of cross-examination. Any further testimony shall be as directed by the hearing examiner. The hearing examiner is directed to complete the hearing without undue delay.

(E) Within 20 days from the date of this order Georgia Power and Crisp County shall advise the Commission of their plan of construction of the 110 kv interconnection facilities described in finding (4) of Opinion No. 508.

(F) Within 60 days from the date of this order Georgia Power and Crisp County shall physically commence construction of the interconnection facilities referred to in Paragraph (E) above and complete that construction expeditiously.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## WILLIAM HARVEY DENMAN, TRUSTEE, ET AL. v. J. M. HUBER CORPORATION, DOCKET NO. RI67-113; MOBIL OIL CORPORATION v. CARL F. MATZEN, ET AL., DOCKET NO. RI67-114; WESTERN NATURAL GAS COMPANY v. ELMER HENNIGH, ET AL., DOCKET NO. RI67-310; PAN AMERICAN PETROLEUM CORPORATION v. LELAND C. WAECHTER, ET AL., DOCKET NO. RI67-400

### ORDER MODIFYING RULING AND GRANTING MOTIONS FOR CLARIFICATION OF ORDER, AMENDMENT OF ANSWER, AND CONSOLIDATION

(Issued June 23, 1967)

The proceeding in Docket No. RI67-113 was begun by a petition for a declatory order filed by William Harvey Denman, Trustee, *et al.* (Denman) following the decision of the Fifth Circuit Court of Appeals in *J. M. Huber Corporation* v. *Denman*, 367 F. 2d 104 (1966). J. M. Huber Corporation (Huber) filed an answer and a cross-complaint to Denman's petition and Denman filed an answer thereto. The proceedings in Docket No. RI67-114 and Docket No. RI67-310 were instituted by complaints filed by Mobil Oil Corporation (Mobil) and Western Natural Gas Company (Western), to which answers were filed by the lessor defendants named in each proceeding. Mobil and Western submitted replies to these answers.

By order issued April 3, 1967, 37 FPC 707, the Commission consolidated these proceedings for hearing. The common question presented is whether royalty payments made to the lessors named in these proceedings are subject to this Commission's jurisdiction under the Natural Gas Act. By order issued May 8, 1967, the Commission permitted intervention or the filing of amici briefs as requested by various lessor interests, producers, distributors and pipeline companies, including The Land and Royalty Owners of Louisana (LAROLA).

*The Ruling on Admission of Evidence*

The Presiding Examiner in prehearing conference ruled that "* * * under the Commission's order issued April 3, 1967 * * * the evidence to be received must relate and be confined to the issues set forth in the hearing order as it relates to the royalty interests named in the petitions and complaints named in the above dockets, *i.e.*, that this proceeding is not a general investigation of all other royalty interests." The Examiner was asked to explain his ruling. The following dialogue took place:

> MR. POLAND: Mr. Examiner, in connection with your ruling, I had understood you to say that you would not permit the presentation of evidence such as was perhaps suggested by Mr. McGrath as evidence pertaining to specific circumstances surrounding the effect of jurisdiction over royalty owners in Louisiana.
>
> On the other hand, I did not understand your Examiner's ruling to be so broad as to rule out the presentation of general industry evidence as to the impact of an order asserting jurisdiction over royalty owners. In other words, for example, if groups here should show industry practice and how that might effect the Commission's ruling in these cases or the impact of assertions of jurisdiction over royalty payments, as to how that

might affect these particular cases, I do not understand your ruling to rule out that type of evidence.

Am I correct?

PRESIDING EXAMINER: It does. It rules out that type of evidence. (Tr. 121.)

From this ruling, LAROLA, Humble Oil & Refining Company (Humble) and the State of Texas have appealed.

The Examiner was correct in excluding evidence as to particular royalty agreements and particular circumstances other than those involving the royalty interests party to these proceedings. We think, however, that evidence relating to the general industry contracting practices with respect to gas leases should be admitted so that the Commission may be fully informed as to the general background of the problem and possible economic and legal consequences before making its determination. As specific items of evidence are presented the Examiner should rule upon the admissibility in accordance with the views here expressed.

The Examiner was quite correct in stating that this proceeding is not a general investigation of royalty interests other than those involved in these proceedings, and nothing in this order or in any other order issued heretofore in this proceeding should be construed to the contrary.

*The Huber Motions*

Two motions have been made by Huber. On May 5, 1967, Huber moved to clarify the Commission order of April 3, 1967, to make it clear that Huber's complaint in Docket No. RI67-113 is consolidated in this proceeding. This was the intent of the April 3 order and, to the extent any such clarification is necessary, Huber's motion is granted. Huber further moved to amend its complaint by interlineation to correct inadvertent omission. Specifically, Huber wishes to insert "V" between "IV" and "VI" on page 8 of its answer to the complaint in Docket No. RI67-113. There being no objection, Huber's motion is granted.

*The Pan American Motion to Consolidate*

On May 11, 1967, Pan American Petroleum Corporation (Pan American) filed its complaint against Leland C. Waechter, *et al.*, requesting the Commission to institute a hearing to determine whether it has regulatory jurisdiction over rates at which royalty payments are to be made under Pan American Gas Rate Schedule No. 84. On the same day, Pan American moved to consolidate its proceeding with the other dockets that are the subject of this order. It appears that the same issues are presented in all these proceedings, and that no undue delay will result from granting Pan American's motion, to which there has been no opposition. Accordingly, the motion is granted. In view of the likelihood that consolidation of additional proceedings that may be instituted may delay decision in the present dockets, the Commission does not anticipate that motions for consolidation of such additional proceedings will be granted.

*The Commission orders:*

(A) The rulings of the Presiding Examiner with respect to admission of evidence to be presented in this proceeding shall be made in accordance with the foregoing.

(B) The motion of J. M. Huber Corporation for clarification of the order of April 3, 1967, in this proceeding, and its motion to amend its answer and complaint in Docket No. RI67-113, are granted.

(C) The motion of Pan American Petroleum Corporation to consolidate Docket No. RI67–400 for hearing with the other dockets that are the subject of this order is granted.

## FLORIDA GAS TRANSMISSION COMPANY, DOCKET NO. CP67–321

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 23, 1967)

On May 1, 1967, Florida Gas Transmission Company (Applicant) filed in Docket No. CP67–321 an application pursuant to Section 7(c) of the Natural Gas Act, as implemented by Section 157.7(b) of the Regulations under the Act, for a certificate of public convenience and necessity authorizing the construction during the twelve-month period commencing July 1, 1967, and the operation of gas purchase facilities to enable Applicant to take into its certificated main pipeline system natural gas which will be purchased from producers or other similar sellers thereof, all as more fully set forth in the application in this proceeding.

The purpose of this "budget-type" application is to augment Applicant's ability to act with reasonable dispatch in contracting for and connecting to its pipeline system new supplies of natural gas in various producing areas generally coextensive with said system.

The total cost of facilities covered by this application will not exceed a maximum of $1,000,000, with no single project to exceed a cost of $250,000, which costs will be financed from internally generated funds.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At the hearing held on June 15, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Florida Gas Transmission Company, a Delaware corporation having its principal place of business in Winter Park, Florida is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of December 28, 1956, in Docket Nos. G–9262 and G–9960 (16 FPC 118).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

**(4) The construction and operation of the proposed facilities by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.**

**(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after expiration of the authorization granted hereinafter, a statement in compliance with Section 157.7(b)(3) of the Commission's Regulations under the Natural Gas Act.**

**(6) Public convenience and necessity required that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.**

**(7) The authorization hereinafter granted should be limited to construction during the twelve-month period commencing July 1, 1967 and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $1,000,000, with no single project to exceed a cost of $250,000.**

***The Commission orders:***

**(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, Florida Gas Transmission Company, to construct during the twelve-month period commencing July 1, 1967, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding and to operate such facilities only to take natural gas supplies from producers or other similar sellers who have received authorization from the Commission to sell natural gas to said Applicant.**

**(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with Section 157.7(b)(3) of the Commission's Regulations under the Natural Gas Act.**

**(C) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.**

**(D) The authorization granted in paragraph (A) above is limited to construction during the twelve-month period commencing July 1, 1967, and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $1,000,000, with no single project to exceed a cost of $250,000.**

## SOUTHERN NATURAL GAS COMPANY, DOCKET NO. CP67-289

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

**(Issued June 23, 1967)**

**On April 6, 1967, Southern Natural Gas Company (Applicant) filed in Docket No. CP67-289 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities and the transportation and delivery, on a firm and interruptible basis, to MacMillan Bloedel United Inc.**

(MacMillan) for use by the latter as fuel in its new wood products plant located near Pine Hill, Wilcox County, Alabama, all as more fully set forth in the application in this proceeding.

Specifically, Applicant proposes to construct and operate a line tap and a metering and regulating station on its main South Line in Perry County, Alabama, and a metering station at MacMillan's plants near Pine Hill. Applicant will deliver gas to the Wilcox Gas District (Wilcox) for the account of MacMillan from the main South Line and Wilcox will transport said gas to MacMillan's proposed plants.*

Applicant proposes to deliver a total of 28,600 Mcf of gas per day to MacMillan, of which volume 550 Mcf per day will be a firm delivery and the balance an interruptible delivery.

Applicant and MacMillan have entered into a contract, dated February 10, 1967, providing for the proposed sale of natural gas. Said contract provides further for the sale of interruptible and firm volumes at rates subject to certain adjustments as set forth in said contract, of 24 cents per Mcf and 34 cents per Mcf, respectively.

The total estimated cost of Applicant's proposed facilities is $87,030, which cost will be financed from cash on hand.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on June 22, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Southern Natural Gas Company, a Delaware corporation having its principal place of business in Birmingham, Alabama, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of October 6, 1942, in Docket No. G-296 (3 FPC 822).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are to be used in the transportation and delivery of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the proposed transportation and delivery of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The proposed construction and operation of the subject facilities and the proposed transportation and delivery of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's com-

---

*In Docket No. CP67-274, Wilcox has filed an application for an order under Section 7(a) of the Natural Gas Act directing Southern to establish physical connection of its transmission facilities with the facilities proposed by Wilcox and to sell and deliver natural gas for resale and distribution. The order in Docket No. CP67-274 is being issued concurrently with the subject order, *infra*, p. 1115.

pliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(6) The deliveries of natural gas hereinafter ordered should be limited to a total volume of 28,600 Mcf per day (14.73 psia), with the firm portion of that amount being limited to 550 Mcf per day and with the remaining portion being interruptible deliveries.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Southern Natural Gas Company, to construct and operate the proposed facilities and to transport and deliver natural gas as hereinbefore described, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be constructed and placed in actual operation and proposed transportation and delivery of natural gas authorized in paragraph (A) above shall commence, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act, within 12 months from the date on which this order issues.

(D) The deliveries of natural gas authorized in paragraph (A) above shall be limited to a total volume of 28,600 Mcf per day (14.73 psia), with the firm portion of that amount being limited to 550 Mcf per day and with the remaining portion being interruptible deliveries.

(E) This certificate shall not entitle the industrial customer to whom firm deliveries are authorized herein to any priorities to additional gas for meeting any future increases in its requirements at the expense of firm resale customers desiring to acquire additional gas to meet any future increases in their requirements.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## TRANSCONTINENTAL GAS PIPE LINE CORPORATION, DOCKET NO. CP67-173

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 23, 1967)

On December 16, 1966, Transcontinental Gas Pipe Line Corporation (Applicant) filed in Docket No. CP67-173 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing additional natural gas service totaling 4,415 Mcf per day for twelve of Applicant's existing resale customers, all as more fully set forth in the application in this proceeding.

**Specifically, Applicant proposes to make the following additional sales:**

| Customer | Rate Schedule | Mcf per day at 14.6 psia |
|---|---|---|
| Greenwood, South Carolina, City of | CD-2 | 500 |
| North Carolina Gas Service Division of Pennsylvania and Southern Gas Company. | CD-2 | 700 |
| United Cities Gas Company Georgia Division | CD-1 | 1,150 |
| Greer, South Carolina, City of | G-2 | 300 |
| United Cities Gas Company South Carolina Division | OG-2 | 450 |
| Clanton, Alabama, City of | G-1 | 190 |
| Commerce, Georgia, City of | G-1 | 450 |
| Covington, Georgia, City of | G-1 | 130 |
| Lawrenceville, Georgia, City of | G-1 | 170 |
| Madison, Georgia, City of | G-1 | 115 |
| Monroe, Georgia, City of | G-1 | 130 |
| Social Circle, Georgia, City of | G-1 | 130 |
| Total | | 4,415 |

**Applicant proposes no new facilities in the subject application. On January 20, 1967, Applicant was granted a temporary certificate authorizing the proposed additional sales.**

**After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.**

**At a hearing held on June 15, 1967 the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,**

***The Commission finds:***

**(1) Applicant, Transcontinental Gas Pipe Line Corporation, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 18, 1948, in Docket No. G-1143 (7 FPC 145).**

**(2) The proposed transportation and sales of natural gas hereinbefore described, as more fully described in the application in this proceeding, are to be in interstate commerce, subject to the jurisdiction of the Commission, and such proposed transportation and sales of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.**

**(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.**

**(4) The proposed transportation and sales of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.**

**(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of such Regulations.**

***The Commission orders:***

**(A) A certificate of public convenience and necessity is issued authorizing Applicant, Transcontinental Gas Pipe Line Corporation, to sell and deliver natural gas as hereinbefore described, all as more fully described in the application in this proceeding, upon the terms and conditions of this order.**

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a) and (e) of Section 157.20 of such Regulations.

## TRANSWESTERN PIPELINE COMPANY, DOCKET NO. CP67-292

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 23, 1967)

On April 10, 1967, Transwestern Pipeline Company (Applicant) filed in Docket No. CP67-292 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale of natural gas to Southern Union Gas Company (Southern) together with the construction and operation of minor taps and valves incident thereto, all as more fully set forth in the application.

Specifically, Applicant seeks authorization to sell up to 25,000 Mcf of natural gas per year to Southern for resale to its right-of-way farm customers, in Loving, Winkler, Ward, Reeves and Crane Counties, Texas, for domestic and irrigational use and to install and operate the necessary incident minor facilities.

Applicant will make the proposed sale to Southern under its presently effective Rate Schedule RW-1 at a flat rate of 26.5 cents per Mcf. Rate Schedule RW-1, available for right-of-way customers, covers the sale of interruptible gas for irrigational and farm use and firm gas for residential use.

Applicant states that the total cost of any facilities incident to such sales will be reimbursed to Applicant by Southern.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on June 15, 1967, the Commission on its own motion received and made part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Transwestern Pipeline Company, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order issued October 10, 1963 in Docket No. CP63-290 (30 FPC 997).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, will be used in the transportation of natural gas in interstate commerce subject to the jurisdiction of the Commission, and the construction and operation thereof are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed installation and operation of facilities and sale of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) Upon the terms and conditions of this order a certificate of public convenience and necessity is issued to Applicant authorizing the installation during the twelve-month period commencing with the date of this order, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate the facilities for the delivery and sale of up to 25,000 Mcf of natural gas annually to Southern Union Gas Company pursuant to Applicant's FPC Gas Rate Schedule RW-1.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are hereby conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 and (c)(8) of Section 157.7 of such Regulations.

(C) The certificate is granted on the express condition that the interruptible service authorized herein shall be curtailed or interrupted to the extent required to meet existing or future contracted maximum delivery obligations of Transwestern for firm service to its customers.

(D) Applicant shall execute and file with the Commission, in accordance with the Commission's Regulations, an appropriate service agreement covering the authorized service.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## THE WILCOX COUNTY GAS DISTRICT AND SOUTHERN NATURAL GAS COMPANY, DOCKET NO. CP67-274

### FINDINGS AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS

(Issued June 23, 1967)

On March 23, 1967, The Wilcox Gas District (Applicant) filed in Docket No. CP67-274, as supplemented on May 1, 1967, an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Southern Natural Gas Company (Respondent) to establish physical connection of its transmission facilities with the proposed facilities of Applicant and to sell and deliver natural gas to Applicant for resale and distribution in the communities of Pine Hill and Camden, and environs, Wilcox County, Alabama, all as more fully set forth in the application.

In addition, Applicant also proposes to transport natural gas purchased by MacMillan Bloedel United, Inc. (MacMillan) from Respondent. Applicant will receive said gas from Respondent's main South Line in Perry County, Alabama, and will transport said gas by means of proposed facilities and deliver same to MacMillan's proposed new plants near Pine Hill.*

Specifically, Applicant proposes to construct and operate approximately 43.28 miles of 8-inch transmission line and two 3-inch lateral lines totaling approximately 22.77 miles, as well as the distribution facilities necessary for service to the two communities and their environs.

The total estimated third year peak day and annual natural gas requirements for the two communities is 665 Mcf and 51,913 Mcf respectively.

The total estimated cost of the proposed project is $1,650,000, which cost will be financed by the issuance of revenue bonds.

On April 10, 1967, Respondent filed an answer to the subject application stating no objection to the issuance of the requested order.

Due notice of the filing of the application and opportunity for hearing thereon has been given by publication in the Federal Register on April 8, 1967 (32 F.R. 5750). No protest or petition to intervene has been filed in this proceeding.

*The Commission finds:*

(1) Respondent, Southern Natural Gas Company, a Delaware corporation having its principal place of business in Birmingham, Alabama, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of October 6, 1942, in Docket No. G-296 (3 FPC 822).

(2) Applicant, The Wilcox County Gas District, is a public corporation existing and organized under the laws of the State of Alabama and is legally empowered to engage in the local distribution of natural gas to the public within the meaning of Section 7(a) of the Natural Gas Act.

(3) It is necessary and desirable in the public interest to direct Respondent to establish physical connection of its natural gas transportation system with the proposed facilities of Applicant and to sell natural gas to Applicant under a service agreement to be executed by Applicant and Respondent, in accordance with the Commission's Regulations, and to deliver up to 665 Mcf of natural gas per day for distribution and resale as hereinbefore described.

(4) The requirement that Respondent serve Applicant as hereinafter ordered will not impair Respondent's ability to render adequate service to its existing customers.

(5) Applicant should be prepared to receive natural gas from Respondent within one year from the date of issuance of this order.

*The Commission orders:*

(A) Respondent is directed to establish physical connection of its natural gas transportation system with the proposed facilities of Applicant and to sell up to 665 Mcf of natural gas daily to Applicant and to deliver said gas under a service agreement to be executed by Applicant with Respondent, in accordance with the Commission's Regulations, for distribution and resale as hereinbefore described and as more fully described in the application in this proceeding. Such service shall be rendered pursuant to Respondent's presently filed appropriate FPC Gas Rate Schedule, and, further, in accordance with the Commission's Regulations, Respondent shall file with the Commission the executed service agreement to be entered into between Respondent and Applicant.

---

*In Docket No. CP67-289, Southern has filed an application for a certificate authorizing natural gas service for MacMillan. The order in Docket No. CP67-289 is being issued concurrently with the subject order, *supra*, p. 1110.

(B) Respondent shall report to the Commission in writing the date of commencement of service to Applicant within ten days thereof.

(C) Applicant shall be prepared to receive service as directed herein within one year from the date of issuance of this order.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## BANGOR HYDRO-ELECTRIC COMPANY, DOCKET NO. E-7316

### ORDER AMENDING ORDER AUTHORIZING ACQUISITION OF FACILITIES

(Issued June 26, 1967)

By order issued December 22, 1966, 36 FPC 1095, in the above docket, Bangor Hydro-Electric Company (Bangor) was authorized to acquire all of the electric facilities of Hampden and Newburg Light and Power Company (Hampden).

Pursuant to an agreement between the parties Bangor was to transfer 4,393 shares of its Common Stock in exchange for Hampden's outstanding Preferred and Common Stock, Bangor acquired the 4,393 shares on the over-the-counter market for a total cost of $90,057. This cost compared with Hampden's net assets of $73,533 as of December 31, 1965 would have created an acquisition adjustment of $16,524 which Bangor proposed to eliminate by a Debit to Earned Surplus.

The agreement was contingent upon receipt of a ruling from Internal Revenue Service to the effect that Hampden's stockholders would not be subject to taxes on the exchange of stock. To date, the Internal Revenue Service has refused to issue a favorable ruling. As a result, Bangor and Hampden on May 19, 1967, entered into a new agreement to the effect that in the event that the Internal Revenue Service determines the transaction to be taxable and such a determination is ultimately upheld, Bangor will transfer 440 additional shares of its Common Stock to the stockholders of Hampden in accordance with the agreement, to compensate the stockholders for the taxes paid.

If it becomes necessary for Bangor to issue 440 additional shares of its Common Stock, the acquisition cost of Hampden's net assets will be increased by Bangor's cost of the acquisition of its stock. The current acquisition cost of the additional shares would be about $8,800. Bangor proposes to eliminate any additional acquisition adjustment created by the transfer of the additional shares by a Debit to Earned Surplus.

By amendments to its original application filed May 22 and 25, 1967, Bangor requests that the Commission issue a supplemental order permitting the transfer of 440 additional shares of its Common Stock in the event that the Internal Revenue Service finds the transaction to be subject to taxes and such a finding is ultimately upheld.

*The Commission finds:*

The proposed transfer by Bangor of 440 additional shares of its Common Stock to the stockholders of Hampden in the event that the Internal Revenue Service finds the transaction taxable on behalf of the stockholders of Hampden is reasonable and will be consistent with the public interest as expressed in Section 203 of the Federal Power Act.

*The Commission orders:*

(A) The Commission's order issued December 22, 1966, is hereby amended to the extent that in the event the Internal Revenue Service determines the transaction to be taxable on behalf of the stockholders of Hampden that Bangor is authorized to transfer 440 additional shares of its Common Stock to the stockholders of Hampden all as set forth in the amendments to its application referred to above subject to the provisions of this order.

(B) In the event that Bangor transfers the additional shares of its Common Stock as provided in (A) above, Bangor shall notify the Commission within 30 days thereof and submit journal entries showing the disposition of the additional acquisition adjustment thereby created by a Debit to Earned Surplus.

(C) All other terms and conditions of the Commission's order issued December 22, 1966, shall remain in full force and effect.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## CONSUMERS POWER COMPANY, DOCKET NO. E-7352

### ORDER AUTHORIZING THE ISSUANCE OF FIRST MORTGAGE BONDS

(Issued June 26, 1967)

Consumers Power Company (Applicant), filed an application on May 15, 1967, with the Federal Power Commission pursuant to Section 204 of the Federal Power Act seeking authority to issue and sell at competitive bidding First Mortgage Bonds in the aggregate principal amount of $80,000,000. Applicant is incorporated under the laws of the State of Maine and is qualified to do business in Michigan with its principal place of business at Jackson, Michigan, and is engaged in the generation, purchase, distribution and sale of electricity in 1,522 communities and townships including rural areas, and in the purchase, distribution and sale of natural gas in 658 communities and townships all in the State of Michigan.

The New Bonds which Applicant proposes to issue on or about July 27, 1967 will mature on July 1, 1997. The New Bonds will constitute an additional series of First Mortgage Bonds to be issued under the Applicant's indenture dated as of September 1, 1945, and to be supplemented by all indentures supplemental thereto, including a fourteenth supplemental to be dated as of July 1, 1967. The company proposes to sell the New Bonds at competitive bidding in accordance with the applicable requirements of the Commission's Regulations under the Federal Power Act. The interest rate of the Bonds will be determined by the successful bidder in the bids submitted by such bidder upon competitive bidding.

The Applicant intends on or about July 12, 1967 to invite sealed, written proposals for the purchase from it of the $80,000,000 new Bonds. The Public Invitation for Proposals contains the following provisions:

> Each proposal must be for the purchase of all the Bonds and may be made by a single bidder or by a group of bidders. No bidder may submit or participate in more than one proposal. Each proposal must be presented to the Applicant at the office of Messrs. Winthrop, Stimson, Putnam & Roberts, 40 Wall Street, New York, N.Y., on July 19, 1967, before 11:00 a.m., EDST, and be accompanied by a deposit $1,600,000.

> Each proposal shall specify the rate of interest to be borne by the Bonds, which rate shall be a multiple of ⅛ of 1%; and shall also specify the price (exclusive of accrued interest) to be paid to the Applicant, which price shall not be less than 100% nor more than 102¾% of the principal amount. Each proposal shall provide that the purchaser or purchasers of the Bonds shall pay to the Applicant accrued interest on the Bonds from July 1, 1967, to the date of payment therefor and delivery thereof.
>
> Unless the Applicant shall reject all proposals or exclude a proposal or proposals for reasons set forth in the Public Invitation for Proposals, it will accept the proposal which provides for the lowest cost of money.

As a condition to this Bond issue, Applicant proposes to include a provision that the Applicant may not call the issue for the purposes of refunding with money borrowed at a lower cost for a period of five years (usually referred to as a "no-call provision"). Applicant is aware of the Commission's long-standing policy of requiring full callability in long term debt issues. However, Applicant maintains that the inclusion of a five-year no-call provision would result in substantial interest savings to the Applicant. In support of its position, Applicant has submitted several studies.

We have reviewed the studies and memoranda submitted by the Applicant in favor of the "no-call" provision and we are well aware of the arguments for and against the inclusion of such provision. The question is a close one, and we recognize that there is merit in the arguments on both sides.

We recognize that the market establishes the yield of debt securities based on many factors including the terms under which such securities are callable. In market circumstances where lenders favor call protection, securities requiring full callability may not attract the attention of a wide enough segment of the investment community so as to obtain the best exposure and most favorable price. Because of the careful attention paid by the issuers to the market in determining the most advantageous position on callability, we believe that the decision in general should be left to management's discretion as to whether or not a five-year no-call provision should be utilized. We note that the Tennessee Valley Authority, a Federal Agency, has gone to the long-term capital market four times since 1960 and each bond issue has had five-year call protection.

In recognition of this belief, we are, therefore, changing our policy and henceforth as a general rule we will not object to the inclusion by Applicants before us, of a provision in a Bond issue whereby the Applicant agrees not to call the issue for the purposes of refunding with money borrowed at a lower cost for a period not to exceed five years from the date of issuance. Thus, in this case, we have no objection to the Applicant's use of the five-year no-call provision in the proposed Bond issue as requested.

According to the Application the net proceeds from the sale of the New Bonds will be used first, to discharge short-term bank loans incurred and to be incurred prior to the sale of the New Bonds to secure funds for construction purposes (which, at April 30, 1967, amounted to $28,000,000) and second, to provide a portion of the funds required for the construction or acquisition of permanent improvements, extensions and additions to the Company's property.

Present plans call for the expenditure by the Company of approximately $135,176,000 in 1967 for the construction or acquisition of property additions. The 1967 expenditures include an estimated $21,432,000 on generating stations, including (1) an estimated $2,608,100 on the second unit of 385,000 kw rated capacity of the James H. Campbell Plant, located 10 miles north of Holland, Michigan, (2) an estimated $14,300,000 on the proposed Palisades Generating Plant, to be located 5 miles south of South Haven, Michigan, (3) an estimated $2,797,000 to provide facilities for receiving, unloading and storing coal delivered by Unit Trains at the D. E. Karn and J. C. Weadock Plants, located 2.5 miles northeast of Bay City, Michigan, (4) an estimated $50,000 on three proposed Peaking Units of 20,000 kw each, to be located at the J. R. Whiting Plant located 9 miles southwest of Monroe, Michigan, J. C. Weadock Plant, located 2.5 miles northeast of Bay City, Michigan, and the Gaylord Generating Plant, located 1 mile west of Gaylord, Michigan, (5) an estimated $800,000 to install electrostatic precipitators on all five units at the B. C. Cobb Plant, located adjacent to the north city limits of Muskegon, Michigan, and (6) $876,900 for miscellaneous generation; $27,923,200 for electric transmission line and substation additions; $30,635,900 for electric distribution line and substation additions; $42,429,000 for gas properties; and $12,755,900 for general and miscellaneous.

It is anticipated that the sources of additional funds required for the Company's 1967 construction program will be depreciation accruals, cash on hand, retained earnings and/or short-term bank loans. No additional permanent financing is presently contemplated for 1967.

Written notice of the application has been given to the Michigan Public Service Commission and the Governor of that State. Notice has also been published in the Federal Register on June 2, 1967 (32 F.R. 7988), stating that any person desiring to be heard or to make any protest with reference to the application shall file petitions or protests on or before June 6, 1967 with the Federal Power Commission, Washington, D.C. 20426. No protest, petition or request to be heard in opposition to the granting of the application has been received.

*The Commission finds:*

(1) The Applicant owns and operates facilities which may be facilities for the transmission of electric energy in interstate commerce and it may be a public utility within the meaning of that term as used in Section 204 of the Federal Power Act.

(2) The proposed issuance and sale of Bonds, as described above, will constitute an issuance of securities within the meaning of the purview of Section 204 of the Federal Power Act.

(3) Applicant is not organized and operating in a State under the laws of which the security issue here involved is regulated by a State Commission within the meaning of Section 204(f) of the Act, and the proposed issuance of securities is, therefore, not exempt by virtue of that Section from the requirements of Section 204 of the Act.

(4) The proposed issuance and sale of Bonds, as hereinafter authorized, will be for a lawful object, within the corporate purposes of the Applicant and compatible with the public interest, which is appropriate for and consistent with the proper performance by Applicant of service as a public utility and which will not impair its ability to perform that service, and is reasonably appropriate for such purposes.

*The Commission orders:*

(A) The proposed issuance and sale of Bonds, upon the terms and conditions and for the purposes specified in the application, as described above, are authorized, subject to the provisions of this order.

(B) The proposed issuance and sale of Bonds at competitive bidding shall not be consummated until:

(i) Applicant shall have amended its application pursuant to the requirements of Section 34.2(g) of the Commission's Regulations under the Federal Power Act relating to compliance with competitive bidding requirements, and Section 34.2(h)(1) of those Regulations relating to affiliation, and shall have either filed such amendments or shall have mailed them and advised the Commission by telephone and telegraph, as contemplated in Section 34.9 of the Regulations.

(ii) The Commission, by further order, shall have approved the price to be received by the Applicant for the proposed issuance of Bonds and the interest rate thereof.

(C) This authorization shall expire unless the transaction hereby authorized is consummated within 90 days from the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service accounts, valuation, estimates or determinations of cost, or any other matter whatsoever now pending or which may come before this Commission.

(E) Nothing in this order shall be construed to imply any guarantee or obligation on the part of the United States in respect to any security to which this order relates.

Chairman White *concurring.*

Commissioner Ross *dissenting.*

WHITE, *Chairman, concurring:*

I concur with the majority's decision in this proceeding, including its determination that a five year no-call provision may be included. The issue is a close one and where, as here, there is little evidence available to us that a five year no-call provision would be contrary to the public interest, yielding to management's judgment strikes me as a most reasonable disposition of the matter. I am concerned, however, with the majority's statement that its position here constitutes a flat reversal of the Commission's long-standing policy of requiring full callability. It is significant to me that the Securities and Exchange Commission which has far broader authority in the area of security issuances than the FPC has not seen fit to alter its policy of requiring full callability and there is no evidence that it is considering such a policy change. Thus the majority's decision to make a complete reversal of the Commission's policy on callability puts us in opposition to the firm position of a sister agency without what I consider to be sufficiently broad study of the entire matter.

In the proceeding before us at this time we are confronted with only one security issuance and do not have evidence of the long-term impact which a policy change might have on the industry and investment community in general nor have we had a comprehensive study of the experience under our existing policy. Therefore, I would limit our determination here to circumstances of this situation and I am not prepared to subscribe to any long-range reversal of the Commission's present policy on callability. I would hope that this experiment with permitting a five year no-call provision will be of some guidance in making future determinations.

ROSS, *Commissioner, dissenting:*

Previously, the Commission had decided that the guiding principle in settling differences of opinions as to the desirability of refund provisions in bond issuances should be determined in favor of full callability. Its rationale was stated in the *Puget Sound Power & Light* case as follows[1]:

> * * * we believe it to be in the public interest, in the case of a regulated industry such as the electric utility industry, that this "hire" be stated, in such a manner as to allow the debtor to take advantage of any future fortuitous market conditions which might result in lower annual costs of money to it.

Ordinarily, call provisions enable the issuer to call bonds at any time for the purpose of refunding them at lower rates. Using a typical bond issue, the interest rate must decline approximately .65 of a percentage point to make refunding a desirable course of action.[2] The range of average bond yields over the past ten years indicates that the fluctuations in interest rates were probably considerable enough to warrant refunding in many instances.[3]

The desire for a no-call provision on the buyer's part is particularly strong when high interest rates prevail in the long-term money market. Because the buyer is of the opinion that interest rates will become lower within a five-year period, he feels it worth something to preclude refunding of the bond issuance beyond the normal disincentive provided in the typical re-call formula. The issuer, on the other hand, must balance the lower costs resulting from the buyer's desire for an assured return, against the possibility of savings from refunding the issue within the five-year period if interest rates fall. Thus, the more convinced the buyer is that interest rates will fall, the more vigorously he will insist on a no-call provision. On the other hand, the more inclined the issuer is to yield, the more he is of the opinion that interest rates will remain high over the five-year period.

To persuade the Commission to reverse its policy, Consumers Power had to present data supporting two logically inconsistent positions; (1) that interest

rates would remain high and therefore, management would never have opportunities to gain savings from refunding and (2) that despite the inevitable, clear prospect of (1), the investors would be willing to pay a significant extra amount for a no-call provision because of their belief that Consumers Power would refund.

Thus, to support its position that interest rates would remain high and therefore, the no-call provision could not work to its detriment, Consumers Power presented as exhibits a set of papers by Professor Gies, Professor of Finance at the University of Michigan, and Professor McCracken, Professor of Business Administration at the University of Michigan. The essence of both papers was that investors could look to high interest rates in the future. In the words of Professor Gies, the demands upon our economy would "push capital returns and the yield on corporate securities to *new higher ground* in the decade of the 70's."[4] [emphasis added] Professor McCracken likewise found that "the basic environment * * * must be expected to be one of fairly firm interest rates."[5] Yet, the result of these predictions is nothing less than a refutation of the desirability of a no-call provision on the investor' part, for, to quote Professor Gies, "If the investor is confident that interest rates will rise or at least not drop before the call privilege becomes effective, then for him the delayed call provision is worthless."[6] What the professors are saying is that the other evidence presented by Consumers Power representing opinions from financial institutions like the First National City Bank of New York to the effect that no-call provisions could be worth up to 20 basis points to a borrower indicates that the investment community is willing to buy a worthless item, *i.e.*, a no-call provision. The statements from the investment houses, which harbor their own sets of financial experts, indicate a down-turn in interest rates that would make a no-call provision worth the extra basis points mentioned in their letters. In view of this difference of opinion from two such reputable sources, presented by the applicant's own exhibits, I am unable to conclude, as the majority must, that the public interest would be better served by the inclusion of a no-call provision which assumes that interest rates in the future will remain high or climb higher. Moreover, I am surprised that my fellow Commissioners would subscribe to such an assumption!

Without quarreling with the theories presented by Professors Gies and McCracken, I note also that there is also a school of thought mentioned by Professor Gies as the "apparently prevailing view" that a growing economy with full employment as a national goal will seek to hold off any substantial increase in interest rates since it will restrict business expansion. That view would indicate that there is a likely probability that interest rates will go down.

From the spare language of the majority opinion, it seems that the majority has chosen to reverse a long-standing policy on the grounds that "the decision (on callability), in general, should be left to management's discretion * * *" They thus choose to ignore the realities of financing for public utilities. The largest block of potential buyers of public utility bonds are the insurance companies, trust, pension and endowment funds who prefer low risks.[7] The accumulation of large amounts of capital by these groups and their influence upon the market was noted by Chairman Martin of the Federal Reserve Board in the following excerpt from a recent speech:

---

[4] Gies, p. 15. Exhibit B of Consumers Power application.

[5] McCracken, p. 7. Exhibit A of Consumers Power application.

[6] Gies, *op. cit.*, p. 2.

[7] At the end of 1965, the United States life insurance companies alone "held $17.0 billion or about two-fifths of the long-term financing of all privately owned utilities." *Life Insurance Fact Book*, 1966, p. 76.

> Changes have been particularly evident in the market most directly concerned with financing long-term business investment—that for corporate bonds. Certainly this is no longer a retail market in the customary sense of the word. The principal suppliers of funds are now insurance companies, corporate pension funds and, more recently, the retirement systems operated on behalf of the state and local government employees * * *
>
> Underwriting practices also reflect the character of the market's dominant customers. In a retail market where large bond issues must be distributed to a great number of individuals or small institutions, underwriting syndicates must make a massive sales effort to market bonds in small denominations. But where large institutional investors are the principal takers, potential customers are readily canvassed and are likely to subscribe for large blocks.[8]

There are indications that the managements of public utilities are not altogether immune from the preferences of groups like the trust funds. Put bluntly, the fact is that management may sympathize in public with the preference for no-call provisions but privately is relieved that agencies like the Federal Power Commission and the Securities and Exchange Commission have precluded no-call provisions. As a result, the managements have been free to exercise the callability provision whenever market conditions proved favorable after the issuance of the bonds.

During periods of "tight" money when there is intense competition for the relatively scarce supply of money, it is easy to see how management would be prone to adopt any and all conditions set forth by the money market. To the extent that the Commission serves as a buffer to assure managers of public utilities the right to take advantage of changes in a more favorable money market for the further benefit of their consumers and stockholders, it is merely serving one of its many regulatory functions.

One other issue remains to be discussed, that of the effect of the majority's decision on the generally compatible policies between the SEC and the FPC in their regulation of financing for the electric utilities industry. As a rule, it seems good policy to me to coordinate major changes in policy where two federal agencies have jurisdiction over different companies in the same industry. There are 24 electric companies over which the Federal Power Commission has direct jurisdiction of bond issuances; the SEC has jurisdiction over approximately 18 active systems of which there are 88 electric and/or gas utility subsidies.[9] In its 1966 Report, the SEC stated that it "has continued to require that bonds and preferred stock sold by registered holding companies and their subsidiaries be refundable at the option of the issuer upon reasonable notice and that any redemption premium be reasonable in amount."[10] The SEC noted that its "continuing studies * * * with respect to electric and gas utility bond issues sold at competitive bidding, whether or not subject to the Act, indicated that the presence or absence of a restriction on free refundability has not affected the number of bids received by an issuer at competitive bidding." In view of the SEC's policy and studies, it appears most appropriate to solicit the views of the SEC so that a difference in regulatory policies will not lead to further confusion for investors.

---

[9] 1966 SEC Annual Report, p. 77.

[10] *Id.*, at p. 82.

I think this issue is one that cuts to the essence of the regulatory function. It serves to illustrate Professor Lewis' remarks that "regulation is not easy, either for the regulated or for those who regulate. Inevitably, it must always contemplate, and frequently must require, the subordination of management judgments to the judgment of the agency charged by the public with the regulatory task. This is its very nature."[11] In my opinion, this is just such an instance. Until more substantive reasons are presented for changing a hitherto valid Commission policy, I dissent to the majority's decision with regard to the call provision.

In all other respects, I concur with the majority's decision regarding the issuance of the bonds.

## MINOR PROJECT LICENSE APPLICATIONS—EXHIBIT RELATING TO FISH AND WILDLIFE RESOURCES, DOCKET NO. R-306

## ORDER NO. 350

### PRESCRIBING A NEW EXHIBIT S TO § 131.6

(Issued June 26, 1967)*

On August 1, 1966, the Commission issued a notice of proposed rulemaking in this proceeding (31 F.R. 10582, August 6, 1966) wherein it proposed to amend Part 131 of the Commission's regulations to require the submission of an Exhibit S, relating to the conservation of fish and wildlife resources, with an application for license for proposed minor projects, *i.e.*, unconstructed projects having 2,000 horsepower or less of installed capacity.

The submissions of Exhibit S will expedite the processing of such applications by identifying potential problems with respect to fish and wildlife resources and suggesting possible solutions thereto earlier in the course of the proceeding than is now possible under existing procedures. It will also facilitate the Commission's compliance with the requirements of the Fish and Wildlife Coordination Act, as amended (16 U.S.C. § 666), for consultation with the U.S. Fish and Wildlife Service, Department of the Interior and appropriate state fish and wildlife agencies on the conservation of fish and wildlife resources affected by a project.

We received nine responses to the notice,[1] six of which expressed unqualified support of the proposed rule. The California Department of Fish and Game in commenting upon the instant rulemaking proposal, while strongly endorsing the proposed rule, recommends that it be made applicable to applications for new licenses for minor projects. We understand the Department's comments to mean applications by owners of constructed minor projects who may desire to seek relicensing thereof.

---

*Published in the Federal Register on July 4, 1967 (32 F.R. 9650).

[1] (1) Idaho Fish and Game Department, (2) Commonwealth of Pennsylvania, Department of Forests and Waters, (3) State of Utah, Department of Fish and Game, (4) Public Service Commission of Wisconsin, (5) State of California Department of Fish and Game, (6) State of Washington Department of Game, (7) The Commonwealth of Massachusetts, Division of Fisheries and Game, (8) State of Arkansas, Game and Fish Commission, and (9) The Department of the Interior.

In reviewing the comments in this proceeding we have considered the question as to whether an Exhibit S requirement should be prescribed for applications covering constructed major projects, constructed minor projects and applications for relicensing of constructed minor projects. This proceeding follows an earlier rulemaking proceeding wherein the Commission prescribed Exhibit S as a requirement of license applications for unconstructed major projects pursuant to Section 4(e) of the Federal Power Act and constructed major projects for which relicensing may be sought pursuant to Section 15 of that Act.

In view of the notice of proposed rulemaking in this docket our action here will be limited to prescribing an Exhibit S requirement for unconstructed minor projects. We shall, however, consider the desirability of further amending our regulations to prescribe an Exhibit S type of requirement in license applications for constructed minor projects and constructed major projects, as well as in the relicensing of constructed minor projects. Pending the conclusion of that review and the completion of any Commission action thereon the Commission will require, in applications, in individual cases, particular information of the type covered by Exhibit S as may be desirable, not otherwise provided pursuant to existing general regulations.

The Utah Department of Fish and Game suggests that a more adequate appraisal of the fish and wildlife resources of a project area would be obtained if the U.S. Fish and Wildlife service and the appropriate state fish and game agency be assigned the responsibility of preparing the Exhibit S in lieu of the license applicant. The preparation, however, of exhibits in support of an application is the responsibility of the applicant and should not be transferred to other agencies. Since the applicant is required to consult with the other agencies in connection with the preparation of its Exhibit S and since they will be given an opportunity to comment on the exhibit following its submittal, we believe that substantially the same result will obtain.

The Public Service Commission of Wisconsin requests that the proposed rule be so worded that license applications for minor and major projects under the Federal Power Act which involve systems subject to Wisconsin's regulatory authority reflect determinations and procedures made by Wisconsin regarding plant operation, investment and hydraulic flows. The Wisconsin Commission additionally requests that language be added to the proposed rule requiring a description of the effect of the proposed project on riparians and other water users and the applicant's consultation and cooperation with the state regulatory commission that enforces statutes or regulates the water right of riparian or use, level and flow of water. In our judgment it would be inappropriate to incorporate such proposals in this order.

To the extent that an Exhibit S of a license application may deal with plant operation, investment, flows or water rights of interest to the Wisconsin Public Service Commission, it would be given notice of the filing of such application under existing Commission procedures. In addition, pursuant to the Fish and Wildlife Coordination Act, copies of the Exhibit S would be sent to the appropriate state fish and wildlife agencies, which would include Wisconsin's Department of Resources Development which we understand is interested in the protection of fish and aquatic life. Moreover, the rule as proposed would require consultation by the applicant with these agencies on matters of fish and wildlife prior to the filing of Exhibit S. Thus, both under existing Commission procedures and the proposed rule, ample consultative opportunities are afforded interested parties to make their views known to this Commission prior to licensing of a project.

*The Commission*, acting pursuant to the provisions of the Federal Power Act, as amended, particularly §§ 4(e), 9, 10(a), 10(i), and 309 thereof (41 Stat. 1065, 1068; 49 Stat. 858; 16 U.S.C. 797(e), 802, 803, 825h), *orders:*

(A) Part 131, Subchapter D, Chapter I, Title 18 of the Code of Federal Regulations is amended as hereinafter set forth:

Section 131.6 is amended by revising the first paragraph of the Note appended to the section and adding a new paragraph at the end of the note as follows:

§ 131.6 Application for license for minor project having installed capacity of 2,000 horsepower or less.

* * * * * * *

NOTE: The following requirements are prescribed with respect to the filing of: the project map as Exhibit K; the plans of structure as Exhibit L; and the information relating to the conservation of fish and wildlife resources as Exhibit S.

* * * * * * *

Exhibit S, to be submitted with applications for unconstructed projects, shall show the following information:

The effect, if any, of the project upon the fish and wildlife resources in the project area or in other areas affected by the project and proposals for measures considered necessary to conserve and, if possible, to enhance fish and wildlife resources affected by the project. The exhibit shall include functional design drawings of any fish ladders proposed to be constructed in compliance with section 18 of the Federal Power Act, such other facilities or developments as may be necessary for the protection, conservation, improvement and mitigation of losses of fish and wildlife resources in accordance with section 10(a) of the Act, and cost estimates for such facilities and developments. The Applicant shall prepare this exhibit on the basis of studies made after consultation and in cooperation with the United States Fish and Wildlife Service, Department of the Interior, and appropriate state fish and wildlife agencies and in case of public lands, advise Federal Agencies having jurisdictional responsibilities therefor of its proposed plans. The exhibit shall include a statement on the nature and extent of applicant's consultation and cooperation with the above agencies.

(B) This amendment shall become effective July 27, 1967.

(C) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

# OPINION NO. 522

## ALGONQUIN GAS TRANSMISSION COMPANY, DOCKET NO. CP65-340; TENNESSEE GAS TRANSMISSION COMPANY,[1] DOCKET NO. CP66-263

### OPINION AND ORDER DIRECTING PHYSICAL CONNECTION OF FACILITIES AND SALE OF NATURAL GAS AND DENYING MOTION TO AMEND CERTIFICATE

(Issued June 27, 1967)*

### *Syllabus*

1. Having examined the merits of the proposed service by Algonquin vis-a-vis service by Tennessee. Commission *concludes*, upon comparative analysis, that public convenience and necessity requires service by Tennessee. P. 1132.
2. Conclusion that Tennessee should serve Hartford turns on comparative merits of Algonquin and Tennessee with respect to savings to Hartford and its ultimate consumers. P. 1133.
3. Evidence conclusively establishes that Hartford and its customers will obtain significant economic benefits from addition of Tennessee as second source of gas supply. P. 1133.
4. Record shows that a delivery to Hartford by Tennessee for account of Algonquin would cost Hartford substantially more than if it purchased the requirements directly from Tennessee. P. 1134.
5. Rejecting argument that it has no power to institute Section 7(a) proceedings on its own initiative, Commission states that plain meaning of Section 7(a) is controlling and each of its requirements is met here. PP. 1134, 1135.
6. Commission's right to initiate action under Section 7(a) on its own motion is not placed in doubt by fact that other provisions of the Act, specifically Sections 4(e) and 5(a), expressly provide for action on Commission's own motion while Section 7(a) does not. P. 1136.
7. Mere failure to use authority granted by Section 7(a) does not negate its continuing existence. P. 1137.
8. Instant decision should not be misunderstood as signaling the institution of a 7(a) proceeding every time a pipeline files a certificate application. P. 1138.
9. *Affirming* Examiner's ruling that show cause order permits a finding that Tennessee be required to deliver gas to Hartford at Farmington as well as North Bloomfield, Commission *observes* that law clearly supports such finding, for courts have stated that strict rules of pleading are not applicable to administrative tribunals. PP. 1139; 1170.
10. Congress has entrusted Commission with a mandate to assure natural gas service to ultimate consumers at lowest reasonable rates. P. 1141.
11. Tennessee's ability to provide adequate service to existing customers will not be impaired by issuance of Section 7(a) order directing Tennessee to provide service to Hartford. PP. 1142; 1170.
12. Commission *rejects* Algonquin's contention that it was denied due process and a fair hearing. P. 1142.

---

*Initial decision appears on p. 1163. Rehearing denied by order issued August 25, 1967, 38 FPC 514.

**13. In proceedings originating under Section 7 of the Natural Gas Act and subsequent order to show cause, Commission *issues* certificate of public convenience and necessity to Tennessee; *directs* Tennessee to connect its facilities with and sell gas to Hartford Gas Company and *denies* Algonquin's motion to amend certificate.**
**Commissioner Ross *concurring***
**Commissioner Carver *dissenting***

*Charles E. McGee* and *John T. Ketcham* for Algonquin Gas Transmission Company
*Harold M. Mulvey* and *John G. Hill, Jr.* for the State of Connecticut
*William R. Connole* and *Howard S. Spering* for The Hartford Gas Company
*B. J. Williamson* and *W. C. Braden, Jr.* for Tennessee Gas Transmission Company
*George P. Lewnes* for the Staff of the Federal Power Commission

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

BAGGE, *Commissioner:*

## *Facts*

This proceeding originated with a motion filed on September 22, 1965, by Algonquin Gas Transmission Company (Algonquin), a "natural-gas company" within the purview of Section 1(b) of the Natural Gas Act (Act), to amend the certificate of public convenience and necessity issued to Algonquin on August 24, 1965, 34 FPC 572, in Docket No. CP65-340. By said Motion to Amend Algonquin seeks authorization under Section 7(c) of the Act to construct and operate 23.6 miles of 16-inch lateral line facilities commencing at its present transmission line at Southington, Connecticut, and terminating at North Bloomfield, Connecticut, so as to serve the Hartford Gas Company (Hartford), with 5,071 Mcf of natural gas on a peak day during the winter 1966–67 and 6,500 Mcf on a peak day during the winter 1967–68. The estimated cost of constructing the facilities proposed by Algonquin is $2,887,000.

By order issued February 16, 1966, 35 FPC 230, we directed Tennessee Gas Transmission Company (Tennessee), in Docket No. CP66-263 to show cause why Tennessee, as an alternative to Algonquin's proposal, should not be ordered pursuant to Section 7(a) of the Act to serve a portion of Hartford's natural gas requirements for the years 1966–67 and 1967–68. For purposes of adjudicating the comparative merits of Algonquin's Motion to Amend Docket No. CP65-340 and Tennessee's Docket No. CP66-233, the two dockets were consolidated for hearing and disposition.

The facts and positions of the parties are fully described in an initial decision issued by Examiner Ames W. Williams on September 21, 1966, *infra*, p. 1163. Hence they need be recounted here only briefly. By order issued August 24, 1965, we granted, with conditions, the authorizations sought in *Texas Eastern Gas Transmission Corp.*, Docket No. CP64–5, and *Algonquin Gas Transmission Co.*, Docket No. CP65–340. Docket No. CP64–5 involved a system-wide expansion of Texas Eastern Gas Transmission Corp. (Texas Eastern) from which Algonquin receives its entire gas supply, to increase Texas Eastern's capacity and enable it to meet the growing requirements of, among others, Algonquin. Concurrently, in Docket No. CP65–340 Algonquin proposed a four-year system-wide expansion designed to increase its capacity by 152,730 Mcf in order to meet the 1966–69 requirements of those of its customers which had then executed precedent agreements covering incremental volumes for each of the four years. At the time Algonquin filed its application in Docket No. CP65–340, Hartford had not executed precedent agreements to cover all four years. Hartford had executed, however, precedent agreements to cover the first two years; namely, the year commencing November 1, 1966, and the year commencing November 1, 1967. By order of August 24, 1965, we authorized Algonquin in Docket No. CP65–340 to construct and operate facilities to deliver the following incremental volumes to Hartford:

| Commencing | Rate Schedule F-1 | Rate Schedule WS-1 | |
|---|---|---|---|
| | Maximum Daily Quantity (Mcf) | Maximum Daily Quantity (Mcf) | Winter Contract Quantity (Mcf) |
| Nov. 1, 1966 | 600 | | |
| Nov. 16, 1966 | | 2,500 | 150,000 |
| Nov. 1, 1967 | 3,000 | | |
| Nov. 16, 1967 | | 1,200 | 72,000 |
| Total | 3,600 | 3,700 | |

Subsequent to the issuance of our Show Cause Order, Tennessee filed on February 24, 1966, its "Response to Order to Show Cause," wherein Tennessee stated that it would, on direction of this Commission, establish physical connection of its facilities with and sell natural gas to Hartford. Accordingly, at the hearing held in these proceedings, Tennessee produced a witness and evidence to demonstrate its ability to render such service. Because Tennessee has unallocated capacity on its transmission line, Tennessee's estimated incremental cost of rendering such service to Hartford would be limited to $52,000 required for construction of two metering facilities. The requirements sought by Hartford from Tennessee are as follows:

| Commencing | Rate Schedule CD-6 | Rate Schedule LNG | |
|---|---|---|---|
| | Maximum Contract Quantity (Mcf) | Daily Quantity (Mcf) | Winter Quantity (Mcf) |
| Nov. 1, 1966, a total of | 3,162 | | |
| Oct. 1, 1967, a total of | | 4,386 | 30,600 |
| Nov. 1, 1967, a total of | 3,264 | | |
| Oct. 1, 1968, a total of | | 6,732 | 46,920 |
| Nov. 1, 1968, until Nov. 1, 1988, a total of | 4,896 | | |
| Oct. 1, 1969, until Oct. 1, 1989, a total of | | 9,282 | 52,020 |

## *Historical Background*

In the original certificate proceedings which concerned natural gas service to the geographical area here in question, Algonquin and Northeastern Gas Transmission Company (then a subsidiary of Tennessee) each sought authorization to serve New England markets. After vigorously contested proceedings, the Commission granted each applicant authorization to construct and operate facilities to serve a portion of the total volumes there in question. *Tennessee Gas Transmission Co., et al.*, 9 FPC 262 (1950); *Tennessee Gas Transmission Co., et al.*, 9 FPC 271 (1950); *United Gas Pipe Line Co., et al.*, 10 FPC 35 (1951); *Northeastern Gas Transmission Co., et al.*, 10 FPC 86 (1951); *Algonquin Gas Transmission Co., et al.*, 12 FPC 209 (1953). As a result of those authorizations, certain geographical areas, such as the Hartford area, necessarily contained the transmission facilities of both Algonquin and Tennessee. Therefore, while the Commission in the 1950–1953 period broadly allocated the virgin New England natural gas market, it left open the potential for future competition.

The lateral line which Algonquin proposes to construct would commence at Southington, Connecticut, and terminate in North Bloomfield, Connecticut. In addition to serving Hartford at the North Bloomfield delivery point, the new lateral would enable Algonquin to back feed gas into its Farmington-Southington lateral, which serves Hartford at Farmington and also Connecticut Light and Power Company at Southington and Plainville.

Hartford presently purchases gas from Algonquin at the following four delivery points: Rocky Hill-Cromwell, Farmington, Glastonbury, and Bloomfield. At Rocky Hill-Cromwell, Farmington, and Glastonbury the gas is physically delivered through Algonquin's pipeline facilities to Hartford. At the Bloomfield delivery point, on the other hand, the gas is physically delivered to Hartford by Tennessee for the account of Algonquin. In other words, Tennessee delivers the gas to Hartford through Tennessee's facilities while Hartford pays Algonquin directly under the provisions of Algonquin's rate schedule. Algonquin in turn is obligated to reimburse Tennessee with a volume of gas equal to that which Tennessee delivers to Hartford for Algonquin's account.

These proceedings arise from Hartford's need to receive gas at a new, fifth delivery point located at North Bloomfield. Beginning in the latter part of 1964 Algonquin and Tennessee maintained negotiations looking to the establishment of a new delivery point on Tennessee's line for the account of Algonquin. Negotiations, however, were terminated when Algonquin informed Hartford that the two pipeline companies were unable to conclude an agreement which would satisfy Hartford's needs. These events then prompted Algonquin's proposal to construct the 23.6-mile lateral here in question.

Interveners in these proceedings are the Public Utilities Commission of Connecticut and Hartford. Hearing commenced on March 20, 1966, recessed from March 21 until April 4, and concluded on April 7, 1966. Initial briefs were submitted on May 9, 1966; staff submitted its brief on June 6, 1966; and reply briefs were filed on June 27, 1966. Staff and the interveners, PUC of Connecticut and Hartford, filed briefs supporting service to Hartford by Tennessee. The proceedings are before us on exceptions to the Examiner's initial decision of September 21, 1966, which denied Algonquin's Motion to Amend and issued an order under Section 7(a) of the Act directing Tennessee to serve Hartford. Exceptions to the initial decision were taken by Algonquin and Hartford.

### *Holding*

We agree with the Examiner's conclusion that Algonquin's Motion to Amend should be denied and that an order should issue under Section 7(a) of the Act requiring Tennessee to serve Hartford. Accordingly, with the additional findings expressed herein, and to the extent consistent herewith, we adopt the initial decision and order as our own.

### *Discussion*

The proceedings were heard upon a consolidated record under the doctrine of *Ashbacker Radio Corp.* v. *F.C.C.*, 326 U.S. 327 (1945). We have examined the merits of the proposed service by Algonquin vis-a-vis service by Tennessee, and conclude upon comparative analysis that the public convenience and necessity require service by Tennessee. Since the requirements of economic feasibility[2], financial feasibility, gas supply[3], and Hartford's market needs[4] are satisfied by both Algonquin and Tennessee and accordingly are not in issue, our conclusion turns on the comparative merits of Algonquin and Tennessee with respect to savings to Hartford and its ultimate consumers.

*Savings to Ultimate Consumers*

The evidence conclusively establishes that Hartford and its customers will obtain significant economic benefits from the addition of Tennessee as a second source of gas supply. The record in these proceedings shows direct dollar benefits to Hartford in the amount of $685,000 for the first five years of service from Tennessee. These savings are due in large part to the elimination of Hartford's need to construct a liquified natural gas plant estimated to cost $1,160,000 since Tennessee will provide Hartford with LNG service. A portion of the savings can also be attributed to Tennessee's lower rates.[5] The Connecticut Public Utilities Commission, which actively participated throughout these proceedings, has made clear that the savings realized by Tennessee's service as a second source of gas supply will be reflected in Hartford's filings with the Connecticut Commission, and accordingly will inure to the benefit of Hartford's customers.

The addition of Tennessee as a second source of supply provides public benefits. We perceive no harm to any party. As noted above, Hartford and Hartford's customers will obtain substantial rate benefits from increased operating economies. At the same time, Algonquin will suffer no loss of presently certificated sales to Hartford. Hartford will purchase from Algonquin the entire volumes for which it has contracted under precedent agreements covering 1966 and 1967. Moreover, Hartford has included data in its presentation which indicates that its plan for future operations includes, subject, of course, to our certification, substantial additional gas supplies from Algonquin as a means of realizing maximum operating efficiency.

---

[2] The Examiner ruled in his initial decision that Algonquin's proposal would not be economically feasible. By rolling-in the revenues and costs of Algonquin's proposal to serve Hartford in Docket No. CP65–340 with the proposal presented by Algonquin's Motion to Amend in these proceedings, however, Algonquin's proposed lateral would yield a rate of return of sufficient magnitude to justify a comparative analysis of service by Algonquin vis-a-vis service by Tennessee.

[3] Algonquin's gas supply is based upon the volumes certificated to be sold by Texas Eastern Gas Transmission Corporation to Algonquin in Docket No. CP64–5. Tennessee's gas supply is based upon the volumes certificated in Docket Nos. CP65–120 and CP66–180.

[4] Hartford's market estimates were not contested in these proceedings.

[5] Assuming a 66⅔ per cent load factor, 14.73 psia, and correction for Btu differential (1023 Btu gas is delivered by Tennessee whereas Algonquin delivers 1033 Btu gas), Tennessee's filed rate would average 57.2¢ per Mcf while Algonquin's rate at the time of hearing averaged 59.8¢ per Mcf. Subsequent to the hearing, rate reductions were filed by Algonquin. Its current rate averages 58¢ per Mcf (Tr. p. 741) at 66⅔ per cent load factor.

It should be noted that our order of February 16, 1966, stated that the possibility of a delivery by Tennessee for the account of Algonquin should be examined. In this regard, evidence was introduced into the record which showed a substantial imbalance in deliveries between Algonquin and Tennessee resulting from the existing Tennessee-Algonquin "delivery for the account of" arrangements. It was this imbalance that caused Tennessee to decline Algonquin's offer to establish a new delivery to Hartford for the account of Algonquin. Moreover, the record shows that in these proceedings a delivery to Hartford by Tennessee for the account of Algonquin would cost Hartford substantially more than if Hartford purchased the requirements here in question directly from Tennessee. Under a "delivery for the account of" arrangement, Hartford would buy its requirements from Algonquin under Algonquin's rate schedule even though the gas physically was delivered to Hartford by Tennessee. Thus, Algonquin's higher rates and Hartford's need to construct a liquified natural gas plant would require Hartford to expend over the first five years of operation $685,000 more than it would expend by purchasing the gas from Tennessee under Tennessee's rate schedule.

In its brief on exceptions, Algonquin raises several issues. The threshold issue concerns the legality of our February 16, 1966, Order to Show Cause issued under Section 7(a) of the Act. The issue, as well as the others, will be discussed below.

### *The Legality of the Order to Show Cause*

Algonquin argues that our Show Cause Order of February 16, 1966, is unlawful in that it lacks statutory sanction. The argument made is that Section 7(a) of the Act and the Regulations thereunder require that a person file an application requesting a Section 7(a) directive, and that the Commission has no power to institute Section 7(a) proceedings on its own initiative. We disagree.

Section 7(a) of the Act provides:

> Section 7. (a) Whenever the Commission, after notice and opportunity for hearing, finds such action necessary or desirable in the public interest, it may by order direct a natural-gas company to extend or improve its transportation facilities, to establish physical connection of its transportation facilities with the facilities of, and sell natural gas to, any person or municipality engaged or legally authorized to engage in the local distribution of natural or artificial gas to the public, and for such purpose to extend its transportation facilities to communities immediately adjacent to such facilities or to territory served by such natural-gas company, if the Commission finds that no undue

burden will be placed upon such natural-gas company thereby: Provided, That the Commission shall have no authority to compel the enlargement of transportation facilities for such purpose, or to compel such natural-gas company to establish physical connection or sell natural gas when to do so would impair its ability to render adequate service to its customers.

The plain meaning of Section 7(a) is controlling. Congress provided that whenever the Commission (1) "after notice and opportunity for hearing," (2) "finds such action necessary or desirable in the public interest," (3) "it may by order direct a natural-gas company * * * to establish physical connection of its transportation facilities with the facilities of, and sell natural gas to, any person * * * engaged * * * in the local distribution of natural gas to the public," (4) "Provided, That the Commission shall have no authority to compel * * * such natural-gas company to establish physical connection or sell natural gas when to do so would impair its ability to render adequate service to its customers." Each of those requirements is met in these proceedings: notice was issued on February 16, 1966, and hearings were held thereafter; we find issuance of a Section 7(a) order "necessary or desirable in the public interest"; Hartford is "engaged * * * in the local distribution of natural * * * gas to the public"; and, as discussed below, service by Tennessee will not impair Tennessee's ability to provide adequate service to its existing customers.

Algonquin, and the dissent, would impose a further limitation on the Commission's authority under Section 7(a); we would be precluded from acting except where there is a formal application filed requesting us to act, presumably filed by a "person or municipality engaged or legally authorized to engage in the local distribution of natural gas to the public." While there is no statutory basis for any such limitation and no statement in the legislative history that any one intended such a limitation, the restriction is sought to be spelled out by a series of negative implications—(1) by the fact that the legislative history is barren of any express statement that the Commission could act on its own initiative, (2) by the presence of express language to this effect in other sections of the Act (and in Acts upon which the Natural Gas Act was patterned), (3) by the alleged predominance of Sections 7(c) and (f) over Section 7(a) and (4) by the fact that the Commission has not hitherto exercised authority under Section 7(a) on its own motion. While in our opinion none of these contentions, even if taken at face value, would serve to negate the express statutory language (at least in the absence of direct and authoritive legislative history to this effect), none of them is, in our opinion, persuasive.

It is, of course, true that Section 1(21) of the Interstate Commerce Act, 49 U.S.C. 1(21), upon which Section 7(a) was at least in part patterned, provides that the ICC may act under that section "upon complaint or upon its own initiative without complaint" (see also Section 214(a) of the Communications Act of 1934, 47 U.S.C. 214(d)). This does not prove or even indicate that Section 7(a), which both as originally introduced and as passed made no reference either to a complaint or Commission action on its own motion, was intended to be limited to the former.

In explaining Section 7(a), drafted by the Commission, to the House Committee, the Solicitor of the Commission, Mr. DeVane, expressly referred to the "similar" provisions in the Federal Power Act, the Interstate Commerce Act, and the Communications Act authorizing the regulatory commissions acting under each of these statutes to order physical connections to support his contention that Section 7(a) "is not in any sense new" (Hearings before a subcommittee of the House Committee on Interstate Commerce, H.R. 11662, 74th Cong. 2nd Sess., p. 37). He did not suggest that Section 7(a) of the Natural Gas Act was broader or more limited than any of the corresponding sections in the other above-named statutes although the Federal Power Act expressly denies the Commission authority to act on its own initiative while the other two Acts expressly grant such authority. However, two years earlier, FPC Commissioner Seavey and Mr. DeVane had made similar remarks to the Congressional committees studying the provisions of the interconnection section of what is now Section 202(b) of the Federal Power Act at the time when that section, like Section 7(a), contained no language either specifically granting or specifically denying complaints on the initiative of the Commission (Hearings before the House Committee on Interstate and Foreign Commerce on H.R. 5423, 74th Cong., 1st Sess., Part 1, pp. 392, 533). Significantly, Section 202(b) of the Federal Power Act was subsequently amended to limit the Commission's authority to cases in which a complaint was filed by specified parties. The Congress, when the Natural Gas Act was passed two and a-half years later, made no such limitation.

The right of the Commission to initiate action under Section 7(a) on its own motion is not placed in doubt by the fact that other provisions of the Act, specifically Sections 4(e) and 5(a), expressly provide for action on the Commission's own motion while Section 7(a) does not. Sections 4(e) and 5(a) also expressly provide for action upon complaint of specified groups. It would be just as rational to argue that these groups are not empowered to invoke 7(a) unless specifically authorized as it is to argue that the Commission cannot invoke 7(a) unless specifically authorized. Such an interpretation would leave us in a rather embarrassing situation in which we would have a statute which is unusable because no one can invoke it. If one were to speculate as to the difference between the language in Sections 4(e) and 5(a) and that in Section 7(a), it would seem reasonable to assume that in the case of Sections 4(e) and 5(a) there was a desire to limit the entities which could initiate action while in Section 7(a) there was not.[6]

Furthermore, we fail to understand the suggestion that Section 7(a) is somehow subordinate to Section 7(c) and therefore cannot be used to achieve a second supply[7]. In *Home Gas Co.* v. *Federal Power Commission*, 231 F. 2d 253 (CADC–1956) cert. denied 352 U.S. 831 (1956), in support of the contention that a second source of supply could be made available to a community only pursuant to an application filed under Sections 7(e) and (g) and not pursuant to Section 7(a), it was argued that Section 7(a) was intended to have limited application and therefore had to be accorded a restrictive reading. The Court rejected the claim, stating in words applicable here (231 F. 2d at 258):

> To uphold petitioner's contentions would in effect force us to consider the above noted sections as being mutually exclusive. This we cannot do. Indeed, we find them complementary. No basis exists in the legislative history of the Act, and certainly none in the plain language of the text, for the creation of a third limitation on § 717(f)(a), as petitioners urge, namely where the area involved is already being served by a natural-gas company.

While the Commission, to the best of our knowledge, has not previously acted on its own under Section 7(a), there is no administrative construction of the Act of which we are aware, to say nothing of any construction contemporaneous with the Act's passage, which negates such authority.* It is, of course, clear that mere failure to use authority granted does not negate its continuing existence. See, *e.g.*, *Phillips Petroleum Co.* v. *Wisconsin*, 347 U.S. 672 (1954).

Two recent cases on statutory interpretation are also in point with regard to the whole problem of what our authority in this area is. In *American Trucking Association, Inc.* v. *A. T. & S. F. Ry. Co.*,

---

[6] While the analogous provisions of the Interstate Commerce Act and Communications Act talk in terms of complaints generally, those acts in other sections define the class of persons who may file complaints.

[7] Section 7(a) in its present form was a part of the Natural Gas Act from the beginning. Section 7(c) in its present form came into the picture later and, as originally adopted in 1938, had a much more limited scope than it does now.

* [Editor's note. The Commission issued a show cause order under Section 7(a) in *Panhandle Eastern Pipe Line Company,* 12 FPC 1357, see order denying rehearing issued August 25, 1967, 38 FPC 514].

35 U.S. L. Week 4465 (U.S. May 30, 1967), the Supreme Court in interpreting the Interstate Commerce Act stated (at p. 4468):

> The very complexities of the subject have necessarily caused Congress to cast its regulatory provisions in general terms. Congress has, in general, left the contents of these terms to be spelled out in particular cases by administrative and judicial action * * *

and at p. 4469:

> * * * We cannot accept arguments based upon arguable inference from non-specific statutory language, limiting the Commission's power to adopt rules which, essentially, reflect its judgment in light of current facts * * *

In *Niagara Mohawk Power Corporation* v. *F.P.C.*, 379 F. 2d 153 (CADC–1967), the Court of Appeals for the District of Columbia Circuit in interpreting the Federal Power Act stated:

> The Act is not to be given a tight reading wherein every act of the Commission is justified only if referable to express statutory authorization. On the contrary, the Act is one that entrusted a broad subject-matter to administration by the Commission, subject to Congressional oversight, in the light of new and evolving problems and doctrines.

This decision should not be misunderstood as signaling the institution of a 7(a) proceeding every time a pipeline files a certificate application. This is not our intention. We expect the pipelines and their customers to continue to plan for future needs and to prepare and submit the best method they can conceive for accommodating those needs. We further expect that their proposals will be best suited to the public interest and that there will be few occasions to exercise our authority under Section 7(a) to consider alternatives.[8]

This case constitutes an exception. When natural gas service was introduced into the New England area, it was apparent that two pipelines could not be certificated to afford that service unless each was assured a share of the then existing markets. Accordingly, in an endeavor to provide a basis for the development of two viable sources of supply which eventually would be capable of competing for what obviously would be greatly increased market needs, the Commission broadly allocated the New England markets. At the time Algonquin first made its proposal rejected herein, there apparently had been created a *de facto* division of markets between Algonquin and Tennessee with neither competing for the load growth in areas served by the other and with their customers apparently treating the *status quo* as what was necessarily to be the pattern for the future. Thus, when Hartford needed service at North Bloomfield, it negotiated with Algonquin, its traditional source of supply. Hartford left it to Algonquin to negotiate an exchange with Tennessee, which had the facilities necessary to make the deliveries. When the negotiations between Algonquin and Tennessee broke down, the result was an application by Algonquin to construct over $2,800,000 worth of pipeline to bring gas to an area adjacent to the existing Tennessee line. We could not be certain but that this Commission's past actions might have been misunderstood as intending to freeze the New England markets to the detriment of appropriate competition. In these circumstances, we concluded that the alternative should be explored.

---

[8] Of course, the number of situations in which this authority can be utilized is greatly limited by the limitations contained in Section 7(a) itself.

It, of course, does not follow that it would be appropriate for the Commission to institute a 7(a) proceeding on its own motion in all cases where our preliminary examination of a 7(a) or 7(c) application indicates that there might be a cheaper source of supply available than the one sought in the application. This is merely an indicator which would raise the possibility that two or more suppliers are not competing with each other. Other, less objective, factors must also be studied and balanced with the cost factor in determining whether a 7(a) proceeding should be instituted.

*The Scope of the Show Cause Order*

The Examiner ruled that our Show Cause Order permits a finding that Tennessee be required to deliver gas to Hartford at Farmington as well as at North Bloomfield (*i.e.*, the new area which Hartford has recently been enfranchised to serve). Algonquin's argument points to the language of the Show Cause Order, which repeatedly refers to service in the "new area." With respect to Algonquin's argument, the Examiner stated, "This view, in the Examiner's opinion, is unreasonable if permitted to prevail would defeat by a technicality the very purpose of the Show Cause Order."

The law clearly supports the Examiner's finding, for the courts have stated that strict rules of pleading are not applicable to administrative tribunals. "The key to pleading in the administrative process is nothing more than an opportunity to prepare." 1 Davis, *Administrative Law*, § 8.04 at p. 525. The position of the federal courts with respect to this issue was elucidated in *New York C. & H.R.R.* v. *I.C.C.*, 168 F. 131, 138–39 (S.D.N.Y. 1909), where the court declared in reviewing an I.C.C. order:

> If this order were a judgment of a court, we should without hesitation say that the facts alleged in the petition did not support it. The Interstate Commerce Commission is, however, an administrative tribunal dealing with practical problems. So long

> as parties affected by its orders appear and are fully heard, we think it would be most unfortunate to deny its power to grant such relief as the facts shown upon the investigation should call for, even though such facts might be outside the issues raised * * * The strict rules of pleading should not be held applicable to it. *Before we declare an order of the Commission invalid as being outside the issues, we think that we should be satisfied that it is outside the issues actually presented to the commission upon which the parties were heard.* [Emphasis added.]

Similarly, in *Northwestern Bell Telephone Co.* v. *Nebraska State Railway Commission*, 297 U.S. 471 (1936), the Supreme Court disposed of a contention that a commission's notice did not cover the action taken by emphasizing, "Possibility of doubt as to the purpose of the hearing was removed in its course before the Commission." Professor Davis states in his treatise (1 Davis, *Administrative Law*, § 8.04 at p. 525):

> Deficiencies in a pleading may be cured by informal communication, by formal amendment, by a bill of particulars, by prehearing conferences, or by ample continuances at the hearings. And the question on review is not the adequacy of the original notice or pleading but is the fairness of the whole procedure. [Footnotes omitted.]

Assuming, arguendo, that the Show Cause Order issued in these proceedings was defective, the defect was cured and Algonquin nevertheless was afforded a fair hearing: (1) On the opening day of hearing and thereafter Algonquin was made aware that delivery at Farmington was in issue; (2) Algonquin was present at an informal prehearing conference on February 2, 1966, at which time the issues were discussed; (3) The proposed deliveries at Farmington were briefed and discussed by Algonquin, among others; and (4) A recess in the hearing was taken between March 21, 1966, and April 4, 1966, throughout which period Algonquin knew that Farmington was in issue. Accordingly, we shall herein order Tennessee to deliver gas to Hartford at Farmington as well as at North Bloomfield.

### *Competition and the Duplication of Facilities*

By certificating both Tennessee and Algonquin in the original proceedings, the Commission necessarily created a potential for competition between the two companies. A division of markets was essential in the early 1950's if two independent companies were to survive. Needless to say, they have survived and prospered to the point where they are now in a position of being able to compete for the growing New England consumer load. Indeed, one beneficial result of the division was to insure that there would exist in the future viable alternate sources of supply available to serve the distribution customers in the New England market area. The growth of gas consumption in Hartford's general service area has caused this potential to be realized. The essence of the issue facing us is whether we should grant Algonquin's Motion to Amend, thus preserving Algonquin's status as Hartford's sole supplier, in the face of a record which clearly shows that service by Tennessee would save Hartford $658,000 over a five-year period, that Tennessee's further investment would be approximately $2,800,000 less than that required by Algonquin, and that service by Tennessee would eliminate Hartford's need to invest $1,160,000 to construct a liquified natural gas plant. Equally pertinent is that Algonquin will lose none of its existing load and will suffer no loss of existing revenues as a result of our directing Tennessee to serve Hartford. Hartford will purchase from Algonquin the entire volumes of gas for which it has contracted under precedent agreements. Moreover, as pointed out earlier in this opinion, Hartford has included data in this record which indicates Hartford's intent to purchase substantial additional gas supplies from Algonquin in future years. These economic facts compel denial of Algonquin's Motion to Amend, and support issuance of an order under Section 7(a) of the Act requiring service by Tennessee.

In two recent decisions we have made clear "that a pipeline has no vested interest in a market that must be perpetually protected by regulation. *Columbia Gulf Transmission Company*, Opinion No. 512, issued January 24, 1967, 37 FPC 118 at p. 130. "A monopoly * * * should not be automatically and consistently protected where it is demonstrated that competition would produce greater benefits to the public." *Ibid.* See also *City of Hamilton, Ohio*, Opinion No. 513, issued January 24, 1967, 37 FPC 209 at p. 217. The Act is clear on this point. Section 7(g) provides:

> Nothing contained in this section shall be construed as a limitation upon the power of the Commission to grant certificates of public convenience and necessity for service of an area already being served by another natural-gas company.

And, the Court of Appeals stated in *Panhandle Eastern Pipe Line Co.* v. *F.P.C.*, 169 F. 2d 881, 884 (CADC–1948):

> Nothing in the Natural Gas Act suggests that Congress thought monopoly better than competition or one source of supply better than two, or intended for any reason to give an existing supplier of natural gas for distribution in a particular community the privilege of furnishing an increased supply.

Congress has entrusted this Commission with a mandate to assure natural gas service to ultimate consumers at the lowest reasonable rates. On this record, service by Tennessee will effectuate that mandate.

*Due Process*

The Examiner found that Tennessee is able and willing to render the service sought by Hartford and that such service will not impair Tennessee's ability to provide adequate service to its other customers. Algonquin excepts to this finding on the ground that Tennessee's evidentiary presentation is insufficient in that it was primarily a "case by reference" to Tennessee's Docket No. CP66–180 to which Algonquin was not a party.

Tennessee filed its application in Docket No. CP66–180 on December 3, 1965, and on March 18, 1966, 35 FPC 398, we issued a temporary certificate authorizing Tennessee to construct, but not to operate, the facilities requested therein. On May 10, 1966, 35 FPC 715, a permanent certificate was issued to Tennessee authorizing the construction and operation of the proposed facilities. Exhibit G–1 of Docket No. CP66–180 was incorporated by reference in these proceedings as item D by Reference. Item D consists of a flow diagram entitled "Flow Diagram Reflecting Peak Day Design New England Area," and shows that upon certification of Docket No. CP66–180 Tennessee would have 9,696 Mcf per day of unallocated capacity in New England from which to render service to Hartford. On the basis of this flow diagram and the testimony of Tennessee's witness, the Examiner found, and we also find, that the issuance of an order under Section 7(a) of the Act directing Tennessee to provide the service sought by Hartford will not impair Tennessee's ability to provide adequate service to its existing customers.

We do not agree with Algonquin's contention that it was denied due process and a fair hearing. On the opening day of hearing, Item D was admitted into evidence, without objection, in accordance with the requirements of Section 1.26(3)(ii) of our Rules of Practice and Procedure. It was thus made a part of this record. All parties were then afforded an opportunity to cross-examine Tennessee's witness, Mr. Stark, who supported Item D. More than thirty pages of the transcript concern cross-examination of Mr. Stark by counsel for Algonquin. Among other subjects, counsel cross-examined Mr. Stark's direct testimony that Tennessee had sufficient unallocated capacity to render the service sought by Hartford. Moreover, Algonquin was afforded the opportunity, but chose not, to present evidence in rebuttal of Mr. Stark's testimony and Item D. As the record stands before us, we conclude that the Examiner's procedures in admitting Item D into evidence, affording Algonquin an opportunity to cross-examine Tennessee's witness, and permitting Algonquin, if it chose, to present testimony and exhibits in rebuttal, satisfy the requirements of due process and a fair hearing.

We are not persuaded by Algonquin's argument that due process was denied because Docket No. CP66–180 had not been decided at the time hearing commenced in these proceedings. The issue presented here does not concern the Examiner's reliance on extra-record material considered under the doctrine of official or judicial notice. Rather, the content of Item D was made a part of this record under the customary methods used in admitting any evidence. We are not here dealing with a conclusion of fact arrived at in a different proceeding without affording the parties to these proceedings an opportunity to cross-examine. We are dealing, rather, with evidence which was introduced in another proceeding and which was also independently introduced in these proceedings as an exhibit subject to cross-examination and rebuttal by all parties. The testimony of Mr. Stark and the content of Item D are entitled to the same dignity afforded any other testimony and evidence.

In addition, Mr. Stark testified that, independent of Docket No. CP66–180, Tennessee has 4,866 Mcf of unallocated capacity on its transmission line in New England available for service to Hartford. The reason is that subsequent to Tennessee's construction of the facilities authorized in Docket No. CP65–120, adjustments were made in Tennessee's maximum contract obligations which released capacity on its transmission line. On the basis of that unallocated capacity itself, Tennessee physically can meet the first two years of Hartford's maximum contract requirements and shows the capacity to meet 4,866 Mcf of Hartford's third year maximum contract requirements of 4,896 Mcf.

It is too late for Algonquin now, with the benefit of hindsight, to argue that Mr. Stark was not the proper witness to testify concerning Tennessee's unallocated capacity. That argument should have been made to the Examiner at the proper time during the hearing. All parties to these proceedings were given the opportunity to challenge witness Stark's qualifications and testimony by cross-examination and rebuttal, and to object to the admission into evidence of Item D. That is all that due process requires.

### *Additional Exceptions*

Algonquin has taken exception to several other matters, including the form in which the Examiner's decision was written. We have considered each of those exceptions and find each to be without merit.

Hartford's single exception remains for disposition. Hartford excepts to the Examiner's statement that Hartford has entered into a precedent agreement with Algonquin for Hartford's requirements during 1968–69 and 1969–70. The Examiner's statement is in error, and instead should provide that Hartford informed Algonquin that Hartford would enter into such precedent agreement only after Algonquin received the authorization it seeks in these proceedings.

*The Commission further finds:*

(1) Hartford Gas Company is a person engaged in the local distribution of natural gas to the public within the meaning of Section 7(a) of the Natural Gas Act.

(2) Algonquin Gas Transmission Company and Tennessee Gas Transmission Company are "natural-gas companies" within the meaning of Section 1(b) of the Natural Gas Act.

(3) The motion filed by Algonquin Gas Transmission Company to amend the certificate issued in Docket No. CP65–340 is not required by the present or future public convenience and necessity and accordingly should be denied.

(4) It is necessary in the public interest that an order issue under Section 7(a) of the Natural Gas Act directing Tennessee Gas Transmission Company to establish physical connection of its transportation facilities with, and sell natural gas to Hartford Gas Company at North Bloomfield, Connecticut, and Farmington, Connecticut.

(5) The issuance of an order under Section 7(a) of the Natural Gas Act directing Tennessee Gas Transmission Company to serve the natural gas requirements of Hartford Gas Company in Docket No. CP66–263 will not impair Tennessee Gas Transmission Company's ability to render adequate service to its customers.

*The Commission orders:*

(A) Tennessee Gas Transmission Company is hereby directed, pursuant to Section 7(a) of the Natural Gas Act, to connect its facilities with and sell natural gas to Hartford Gas Company at North Bloomfield, Connecticut, and Farmington, Connecticut.

(B) Sales of natural gas by Tennessee Gas Transmission Company to Hartford Gas Company shall be limited to the following quantities:

| Commencing | Rate Schedule CD–6 | Rate Schedule LNG | |
|---|---|---|---|
| | Maximum Contract Quantity (Mcf) | Daily Quantity (Mcf) | Winter Quantity (Mcf) |
| Nov. 1, 1966, a total of | 3,162 | | |
| Oct. 1, 1967, a total of | | 4,386 | 30,600 |
| Nov. 1, 1967, a total of | 3,264 | | |
| Oct. 1, 1968, a total of | | 6,732 | 46,920 |
| Nov. 1, 1968, until Nov. 1, 1988, a total of | 4,896 | | |
| Oct. 1, 1969, until Oct. 1, 1989, a total of | | 9,282 | 52,020 |

(C) The certificate herein issued to Tennessee Gas Transmission Company and the order issued pursuant to Section 7(a) of the Natural Gas Act in Docket No. CP66-263 are conditioned upon Tennessee Gas Transmission Company's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set out in paragraphs (a), (b), (c)(4), (e) and (f) of Section 157.20 of said Regulations.

(D) The motion filed by Algonquin Gas Transmission Company to amend the certificate issued in Docket No. CP65-340 is hereby denied.

(E) Except as herein granted, the exceptions to the Examiner's decision are hereby denied.

(F) The Examiner's decision, to the extent not inconsistent herewith, is hereby adopted as part of this Opinion and order.

Commissioner Ross *concurring*.

Commissioner Carver *dissenting*.

Ross, *Commissioner*, *concurring:*

I concur with the majority's opinion and its decision in this case. My only purpose in writing this statement is to indicate why I don't think that the Commission will need to institute many actions on its own motion under Section 7(a).

In the typical case, a distributor seeks out the most economic source of gas from a pipeline. If the pipeline has no objections and possesses the supply and capacity to satisfy the distributor's requirements, the pipeline or the distributor files an appropriate application with the Commission. The Commission then evaluates the proposal in the light of possible alternatives. If the pipeline does object, the distributor files an application under Section 7(a). This represents good management—the normal situation in which the distributor is satisfying its public service responsibilities by trying to obtain the best and least expensive service available for its customers.[1]

However, there may be those few situations where a distributor is less concerned with the efficiency and economy of its service. It is those rare cases where the Commission may be required, in the public interest, to protect a distributor from itself.

In the case where a distributor has one source of supply, it may be reluctant to take any action which might tend to end long-time personal friendships. It may be fearful of retribution if it seeks to continue its existing supply, and in addition, to acquire a second source of supply. There may be the fear that its application for a second supplier would be denied in which event it would be left solely to the mercy of its original supplier. Also, some distributors are not aggressive, but simply prefer the *status quo*. Why rock the boat? Further, there may even be an understanding between potentially competitive pipelines which neither the distributor nor the second potential pipeline supplier is anxious to assume the burden of upsetting. In these cases, the public is served by a Commission ready, willing and able to step in and tread where others fear to tread. To put it bluntly, the Commission does the distasteful or uncomfortable work of and for someone else when the public is thereby served.

---

[1] See, for example, the successful efforts of Lynchburg, Hamilton, Chattanooga, and Carolina Pipeline Co. to obtain a second, and more advantageous source of supply.

This is one of those exceptional cases where neither the distributor nor the second potential pipeline supplier filed an appropriate application seeking to realize the several advantages inherent in direct service by Tennessee. Indeed, it is a case which appears to involve some of the factors discussed above. That there undoubtedly is more to this case than meets the eye is apparent from the reactions of Hartford and Tennessee. Why would Hartford fail to file an application under Section 7(a) when the economics seemed so favorable and apparent? Why did Hartford initially support Algonquin's application and then, only after the Commission instituted this proceeding on its own motion, vigorously argue in favor of direct service by Tennessee? Tennessee initially assumed the role of an innocent bystander and, like Hartford, after the Commission instituted this case, strongly supported the recommendation of Staff and Examiner for service directly by Tennessee. Are our Staff and the Examiner that much better informed regarding the potential savings to Hartford?

Thus, it seems apparent that the institution of 7(a) proceedings on the Commission's own motion will not occur too frequently. However, it can be expected whenever and wherever it becomes necessary, as I have said before, to protect a distributor from itself for the benefit of its customers.

CARVER, *Commissioner, dissenting:*

The Commission today overrules the cases wherein fifteen years ago it divided the New England natural gas market between two pipelines on a distributor-by-distributor basis.[1] The Commission today also rewrites a Congressional enactment to its taste, transmuting Section 7(a) of the Natural Gas Act from its proper and established function of shielding would-be municipal or distributor customers of pipelines against arbitrary withholding of service, into a new and frightening efficacy as a weapon to enable the Commission itself to assume the function of feasibility and service planning to an unprecedented and unauthorized extent.

---

[1] The Commission is somewhat less than forthright about the reversal of the cases certificating the two pipelines on a distributor-by-distributor basis. On page 1131 it is asserted that the authorizations were "to serve a portion of the total volumes there in question," while on page 1138 reference is made to the need that each pipeline be "assured a share of the then existing markets * * * the Commission broadly allocated the New England markets." Thus by paraphrasing and interpreting the cases, it is made to appear that the Commission originally intended the result ordered today. Such an assertion will not survive a reading of the cases.

Reversal of past Commission policy is a Commission prerogative, so long as the charter authority of the Commission is not exceeded. But the method of reversing a policy presents a separate kind of question—one which ought to align Commissioners whose views on the wisdom of the reversal may be divergent. In an industry where multimillion-dollar business investments are made in reliance on regulatory pronouncements, stability of policy is at a premium. One hundred eighty degree changes ought to be supported by impeccable procedures.

### *Action Sua Sponte under Section 7(a)*

The threshold question is whether Section 7(a) authorizes the Commission to proceed as it did. Algonquin urged that it did not at every stage of the proceedings.[2] Discussion of this basic jurisdictional question was avoided by Tennessee completely, and was treated only casually by Staff,[3] and was recognized as material only by Hartford.[4]

The Commission's power to institute Section 7(a) proceedings on its own initiative is concededly hitherto untested. The legal analysis to support this was undertaken at the Commission level after briefs to the Commission were all submitted.

The rationale for consideration of this threshold legal question of the Commission's authority to act *sua sponte* shifted somewhat. One ground was that the meaning of Congressional silence on the subject of the Commission authority to act on its own motion was to be deduced from a comparative reading of Section 7(a) with Section 202(b) of the Federal Power Act. Further analysis of legislative history took into account the comparability of two other statutes, after the Commission's attention was called to the fact that during Congressional consideration of that section the suggestion was made that 7(a) is patterned after provisions in the Interstate Commerce Act and the Communications Act, which provisions authorize those Commissions to direct involuntary extensions of service. It was recognized that the significance of these references lay in the fact that both the ICC and FCC may require the extension of common carrier service in a proceeding *upon complaint or upon its own initiative without complaint*, and that the relationship of such language in somewhat related regulatory schemes should not be ignored by the Commission in determining the scope of its authority under Section 7(a).

---

[2] Algonquin's Brief, May 9, 1966, pp. 39–48; Reply Brief June 27, 1966, pp. 45–46; Brief on Exceptions, Oct. 21, 1966, pp. 36–40.

[3] Staff initial brief, of June 6, 1966, takes up the question at pp. 36–42, without citation of authority or reference to legislative history. Staff's brief on exceptions of November 10, 1966, pp. 17–23, similarly fails to do more than disagree with the contention that Section 7(a) does not authorize the Commission to act on its own motion.

[4] Hartford's brief of June 27, 1966, closes upon the question. Its author, a former Commissioner, fails however to address himself to the question of whether the Commission on its own motion may institute Section 7(a) proceedings, in the light of the fact that it had never done so before. Hartford's brief opposing exceptions, November 10, 1966, faces the issue squarely but not helpfully, arguing that it is "axiomatic" that the Commission could do on its own motion what it could do on the motion of an affected party, and citing a Show Cause Order issued subsequent to this case and relying on the "precedent" of this case.

As the Opinion discloses, the Commission finally settled upon the primary ground of "plain meaning" of the statute.[5] It also attempts to negate the thrust of the argument in this dissent, namely, that the meaning of Section 7(a), when read with the related regulatory statutes, with other provisions of the Natural Gas Act, and with long-continued administrative interpretation is not only not "plain" to the effect that the Commission has the authority to act on its own motion, but on the contrary indicates the opposing construction quite strongly. As presently framed in the Opinion, the real basis for the Commission's conclusion that Section 7(a) should be read as authorizing action *sua sponte* is difficult to identify.

Taking the Commission's generalized arguments as adequate concession that the legislative history *is* relevant delving more deeply into that question, and other aids to interpretation of the statute, yields, as stated, a contrary conclusion.

Section 202(b) of the Federal Power Act permits the Commission to order electric interconnections when consistent with the public interest "upon application of any State Commission or of any person engaged in the transmission or sale of electric energy." Section 7(a) of the Natural Gas Act does not contain this limiting language. This fact, taken alone, would support the Commission's conclusion.

But as noted earlier, Section 7(a) was not modeled on the Federal Power Act as much as it was on the basic regulatory legislation, particularly that applicable to railroads and communications. The forerunner of Section 7(a) made its first appearance as a separate part of an early version of the Wheeler-Rayburn Act, which became the Federal Power Act of 1935. At that time, both Sections 7(a) and 202(b) [then numbered differently] had identical language. Both were patterned after the language of the comparable section under the Interstate Commerce Act which is the undisputed model for subsequent regulatory legislation in the communications, gas, and electric industries. Section 1(21) of the Interstate Commerce Act specifically provided and still provides for interconnection proceedings *sua sponte*:

---

[5] A statute is subject to literal interpretation under the plain meaning rule only "where the intention of the legislature is so apparent from the face of the statute that there can be no question as to the meaning * * *" *People ex rel Wood v. Sands*, 102 Cal. 12, 36 Pac. 404, 405 (1894).

> (21) Power of commission to require adequate facilities or extension of line; penalty.—The commission may, after hearing, in a proceeding upon complaint *or upon its own initiative without complaint*, authorize or require by order any carrier by railroad subject to this chapter, party to such proceeding, to provide itself with safe and adequate facilities for performing as a common carrier its car service as that term is used in this chapter, and to extend its line or lines: Provided, That no such authorization or order shall be made unless the commission finds, as to such extension, that it is reasonably required in the interest of public convenience and necessity, or as to such extension or facilities that the expense involved therein will not impair the ability of the carrier to perform its duty to the public * * * Feb. 28, 1920, c. 91, sec. 402, 41 Stat. 478. [Emphasis supplied.]

Similarly, Section 214(d) of the Communications Act of 1934, itself a counterpart of 1(21) of the Interstate Commerce Act, provided explicitly for action on that Commission's own motion:

> (d) The Commission may, after full opportunity for hearing, in a proceeding upon complaint *or upon its own initiative without complaint*, authorize or require by order any carrier, party to such proceeding, to provide itself with adequate facilities for performing its service as a common carrier and to extend its line; but no such authorization or order shall be made unless the Commission finds, as to such extension, that it is reasonably required in the interest of public convenience and necessity, or as to such extension or facilities that the expense involved therein will not impair the ability of the carrier to perform its duty to the public * * * June 19, 1964, c. 652, §214, 48 Stat. 1076. [Emphasis supplied.]

The 1935 Wheeler-Rayburn Act was passed after the title dealing with natural gas regulation had been deleted without explanation. The remaining electric titles contained the forerunner of 202(b), which, as the Commission noted, was changed from the form which it had when originally introduced. The Commission on pages 1136–1137 suggests that Section 202(b) was "amended". It was changed in the legislative process prior to passage; strictly speaking it was not "amended" and has not been since enactment. The changes which were made in it, were to emphasize the voluntary nature of any program for interconnections and coordination and I take issue with my colleagues that the legislative history shows that the making of these changes in the Federal Power Act indicated that the original draft of what became 202(b) in a different form, and what became Section 7(a) without change was *not* subject to the interpretation which 7(a) has when read with the statutes upon which it was modeled directly. It is far more reasonable to conclude that the changes made in Section 202(b) from the time of the introduction of the first bill until the Federal Power Act was passed represented an abundance of Congressional emphasis on the philosophy of voluntarism, the same philosophy originally indicated simply by omitting the *sua sponte* language contained in the acts upon which the power and gas acts were both modeled.[6] Certainly it cannot be argued, considering the ICC and FCC models, that the Congress did not know how to give the Commission the power to act on its own motion.

Indeed, Congress showed its ability clearly to specify when the Commission has authority to initiate action on its own motion in other sections of the Natural Gas Act. Section 4(e) contains the specific language "upon its own initiative without complaint;" so does Section 5(a). Section 5(b) is explicit in a slightly different form. These sections were concurrently enacted with Section 7(a). Section 7(f) though subsequently enacted, provides that the Commission "upon its own motion or application" may hold hearings and determine service areas, strong evidence of the continuing Congressional view that authority to act absent a complaint was a matter for explicit Congressional determination.

The superior appositeness of the Interstate Commerce Act as the primary model of the Natural Gas Act is found in the fact that certification authority and related powers embodied in Section 7 of the Natural Gas Act are not found in the Federal Power Act to this day. It should also be remembered that the Federal Trade Commission, not the Federal Power Commission, conducted the investigations which led to enactment of the Natural Gas Act and Parts II and III of the Federal Power Act.[7]

The Courts have noted this comparability. In *Federal Power Commission* v. *Natural Gas Pipeline*, 315 U.S. 575, 584, the Supreme Court stated: "Section 5 of the Act was modeled on the provisions of the Transportation Act, 49 U.S.C. #13, 15 * * *" In *Hope Natural Gas Co.* v. *Federal Power Commission*, 196 F. 2d 803 (CA4–1952), the Circuit Court of Appeals in interpreting Section 4(e) recognized the close relationship between the Interstate Commerce Act and the Natural Gas Act saying:

> There can be little doubt as to the correctness of the Commission's decision, if it be remembered that the language of the

---

[6] When words used in a prior statute are omitted from subsequent legislation, a change in meaning is presumed. *Allen* v. *Grand Central Aircraft*, 347 U.S. 535 (1954). See *Sutherland, Statutes and Statutory Interpretations*, (3d ed.), sec. 5201.

[7] Section 1(a) of the Natural Gas Act states "as disclosed in reports of the Federal Trade Commission made pursuant to Senate Resolution 83 and other reports made pursuant to the authority of the Congress * * *" as the reason for the natural gas regulation embodied in the Natural Gas Act.

> suspension provision of the statute here under interpretation was taken bodily from the Interstate Commerce Act and that it has long been given the interpretation placed upon it by the Commission here. (196 F. 2d 803, 806-807.)

The same position was voiced in several committee reports and Congressional hearings on the proposed legislation. For example, the discussion on page 37 of the House Committee Hearings in setting out the purpose of Section 7(a) stated:

> Section 7(a) of this bill authorized the Commission to require extensions from the pipelines to communities for the purpose of giving service to the communities. A provision similar to that seems to be quite important so as to authorize the Commission under certain circumstances to require a pipe-line company to furnish gas to a local distribution company.
>
> That is similar to a provision in the Federal Power Act by which under certain circumstances physical connections may be required between electric lines; and, of course, physical connections are made between railroads and between telephone companies. In other words, the provision here is not in any sense new. It is in all the other Congressional Regulatory Acts of this nature.

The direct relationship between Section 7(a) and Section 1(21) of the Interstate Commerce Act was also pointed out during the hearings on H. R. 11662 (pp. 41-42):

> MR. COOPER. That is what I was trying to get; you say you would have the power to require them to extend their lines?
>
> MR. DE VANE. Congress has already conferred similar jurisdiction over other forms of transportation. Under the Interstate Commerce Act the I.C.C. has authority to make railroads extend their lines, if it is reasonable to do so.

During the hearings Solicitor De Vane commented:

> Assume also that another community along the pipeline wants gas, and the company does not want to sell gas to that community. Section 7 would authorize the community *to apply to the Commission* to compel the company to give the service. [Emphasis added] Hearings on H.R. 11662, p. 38.[8]

The only reference to 7(a) during the Congressional debates made the same point:

> * * * I remind the House of this fact. When we pass this bill without any apparent opposition, the people of this country demanding it, it will affect not only the great cities where gas

---

[8] **At no time during the hearings was there any reference to the Commission initiating a 7(a) proceeding on its own motion.**

> is consumed, *but the little fellow in my State back through the rural sections in whom I am interested, where these pipelines have been running for years, and perform no service to the people along them. They are under no regulation whatever. After this bill is passed, I think the rural sections, having given the rights away to those lines feeding the great metropolitan sections of the country, will find through the machinery of this law a medium of relief so that service will come to them* * * *
> Cong. Rec. Vol. 81, p. 6724. [Emphasis supplied.]

The point that certification authority is not present in the Federal Power Act has been mentioned. As originally enacted in 1938, the Natural Gas Act required certificates of public convenience and necessity only when one pipeline entered an area serviced by another,[9] to *prevent* competition.[10] In 1942, Section 7 was amended to extend certification requirements to all pipeline extensions irrespective of the existence of an original supplier, and to eliminate the inhibition against competition.[11] The initiative for a proposal under the new Section 7(c) rested with the applicant, but the legislative history and established administrative practice show that the Commission, in addition to the choice of authorizing or rejecting an application, is given the power to attach reasonable conditions to a certificate. The history of the 1942 amendments shows that Congress contemplated that this conditioning authority among other things encompassed the extension of service to customers adjacent to the pipeline.[12] The point of the rationale for Section 7(c) disappears if the Commission's authority under Section 7(a) were as broad as the Commission now finds it to be. Legislative concern about the breadth of the proposed new conditioning authority was allayed by the assurance *that the applicant need not accept the certificate.*[13]

[9] Public Law No. 688, 75th Congress, Chapter 556, 3rd Session [H.R. 6586], 52 Stat. 825, June 21, 1938.

[10] Hearings before the Committee on Interstate and Foreign Commerce, House of Representatives, 75th Cong., 1st Sess., on H.R. 4008, March 24 and 25, 1937, at pp. 81–84. See also Cong. Debates, 81 Cong. Rec. at pp. 6720–6733.

[11] Secs. 7(c) and 7(g), 56 Stat. 83 (1942); 15 U.S.C. § 717f(c) and § 717f(g).

[12] Hearings on H.R. 5249 (1941) at pp. 23–24:

MR. SOUTH. I want to ask one further question with reference to the language beginning line 25, page 3.

COMMISSIONER MANLY. Yes sir.

MR. SOUTH. I presume those certificates, as a general practice, are issued upon an application?

COMMISSIONER MANLY. Yes; invariably upon application.

MR. SOUTH. As a practical matter, the authority given to the Commission here could be used—and I am wondering if it is generally used—for the purpose of broadening or extending the application in such a way as to better serve the public interest.

COMMISSIONER MANLY. That has been the case, I am sure, in the administration of all of the cases that have come before this Commission. It has been primarily this, sir: That a company, in making an application for a certificate, would set up a claim that it would do such-and-such things; that it would put a line in at such-and-such time; that it would have such-and-such gas reserves; that it would charge such-and-such rates.

MR. SOUTH. *Or serve a particular section of the community sought to be served?*

COMMISSIONER MANLY. *Yes sir; that it would serve a particular community, and so forth.* [Emphasis supplied.]

Section 7(a) is neither subordinate nor superior to Section 7(c). The sections are, or ought to be, complementary. The legislative history of Section 7(c) sheds light on how Congress intended 7(a) to be utilized.

*Home Gas Company* v. *Federal Power Commission*, 231 F. 2d 253 (CADC–1956), supports a restrictive reading of Section 7(a); it only superficially supports the proposition for which the commission opinion cites it. The petitioner in that case argued that the only means of obtaining a second source of supply was under a certificate granted pursuant to Sections 7(c) and 7(e) and not by order under 7(a). The District of Columbia Court of Appeals rightly concluded that 7(c) did not restrict 7(a), regarding the nature of *gas service* requested under 7(a). In holding that the only restrictions imposed by Congress were those contained in the proviso (*i.e.*, that the Commission could not order facilities enlarged or the existing source impaired), the Court obviously was not ruling that the Commission was free to impose on the pipeline companies planning functions reserved to them in Section 7(c). The assertion that this Commission cannot institute a 7(a) action on its own motion is an implicit limitation not negatived in the case.

Two additional points should be remembered: one is that this is the *first* case to apply Section 7(a) in this fashion, twenty-nine years after the Natural Gas Act was passed. The Supreme Court's language in *Federal Power Commission* v. *Panhandle Eastern Pipe Line Co.*, 337 U.S. 498, 513–514, seems applicable:

> Thus for over 10 years the Commission has never claimed the right to regulate dealings in gas acreage. Failure to use such an important power for so long a time indicates to us that the Commission did not believe the power existed. In light of that history we should not by an extravagant, even if abstractly possible, mode of interpretation push power granted over transportation and rates so as to include production.[14]

---

[13] Hearings on H.R. 5249 (1941), at p. 23.

COMMISSIONER MANLY. Now, what the Commission does under ordinary conditions is to require those conditions to be set forth in the authorization for a certificate that is accepted by the company as a condition precedent to the actual issuance of the certificate, so that in all intents and purposes the company has a right to reject a certificate containing any conditions which are unreasonable, onerous, or have no relevancy to the issue.

MR. SOUTH. That is what I have in mind. If they are too burdensome, then the application could be withdrawn.

COMMISSIONER MANLY. They could come back before the Commission and ask for a rehearing if they regard the terms and conditions as being onerous.

[14] This position has been stated by the Supreme Court on several occasions, *e.g.*, *Federal Trade Commission* v. *Bunte Bros.*, 312 U.S. 349, and *Norwegian Nitrogen Prod. Co.* v. *United States*, 288 U.S. 294.

Another point is that since 1951 this Commission has repeatedly requested legislative amendments to Section 7 to authorize the Commission to require pipelines to interconnect facilities, which draft legislation invariably has made provision for initiation of such proceeding on the Commission's own motion as well as by application.[15]

The Commission's Regulations under the Natural Gas Act enumerate the proper form and procedures for initiating 7(a) proceedings. Section 156.1 specifies "Who may apply," as "Any person or municipality as defined in section 2 of the Natural Gas Act engaged or legally authorized to engage in the local distribution of natural or artificial gas to the public * * *"[16] Nothing is said regarding initiation of action under the section on the Commission's own motion.

The Natural Gas Act and its legislative history show no support for the nuances of application of Section 7(a) reflected in this Opinion. The self-denying limitations urged in it do not save the Commission's action from the fatal step of transgressing the legislative line. However desirable some may think it to be for the Commission to have the dominant planning role, I cannot find that Congress has yet given it to us.

### *Savings*

The Commission asserts (p. 1133) that its "conclusion turns on the comparative merits of Algonquin and Tennessee with respect to savings to Hartford and its ultimate consumers" and that service by Tennessee will effectuate a mandate to assure natural gas service to ultimate consumers at the lowest reasonable rates.

These attractive generalities do not withstand close scrutiny of the record. As to "savings", the record shows neither the fact of savings, nor that they will be passed on to Hartford's customers.

The "savings" are of two kinds—cheaper gas, and economies related to Hartford purchasing LNG service from Tennessee rather than constructing its own LNG plant.

The possibility that Hartford might be able to earn money, as presumably Tennessee will, from operating an LNG facility is not mentioned.

---

[15] Early proposals encompassed a new Section 7(j) which authorizes the Commission "* * * upon its own motion or upon complaint * * *" to order interconnections during any war or when the Commission determines an emergency exists due to a shortage in gas, facilities or other causes.

More recently, the Commission has proposed new subsections 7(i)(1) and (2). Subsection 7(i)(1) would authorize interconnection of pipeline facilities "upon its own motion or upon application or complaint * * *" Similar authority was proposed under subsection 7(i)(2) in the case of emergency. (See S. 1843 and H.R. 7586, 88th Congress.) The proposal was renewed to the 89th Congress (FPC 1964 Annual Report, p. 9) but the proposed bills were not actually transmitted.

[16] Section 156.1. Made effective by Order No. 234, 26 F.R. 4847, June 1, 1961, 25 FPC 1028.

The discussion on "savings" is completely speculative. Its weakness is demonstrated by an examination of the assertion that "a portion of the savings can also be attributed to Tennessee's lower rates." Recognizing that the record made before the Examiner is inadequate, the Commission resorts to a footnote to justify this vital point:

> [5] Assuming a 66⅔ percent load factor, 14.73 psia, and correction for Btu differential (1023 Btu gas is delivered by Tennessee whereas Algonquin delivers 1033 Btu gas), Tennessee's filed rate would average 57.2¢ per Mcf. while Algonquin's rate at the time of hearing averaged 59.8¢ per Mcf. Subsequent to the hearing, rate reductions were filed by Algonquin. Its current rate averages 58¢ per Mcf. (Tr. p. 741) at 66⅔ percent load factor. (p. 1133.)

Thus the Commission makes two vital assumptions; a 66⅔ percent load factor and a rate no longer in effect. Based upon existing filed schedules, Algonquin's rates are lower than Tennessee's at monthly load factors of 40–65% and at 85–100%, and Tennessee's rates are lower *only* at the 65–80% bracket. No analysis is presented of actual load factors on a monthly basis, the basis upon which real dollars change hands. The point, of course, is that the record is utterly devoid of the solid information necessary to support the savings upon which the opinion is so strongly postulated.

The record is worse on the presumptive operating savings to Hartford by reason of having access to LNG service from Tennessee. The LNG rates upon which the Commission makes comparisons *have not yet been accepted* for filing under Section 4(e) of the Natural Gas Act; the plant has not been placed in service and its construction and operating costs are not known; and construction and operations of LNG plants present new and relatively untested technologies, the cost factors of which are not fully stabilized.

The Commission presumably would notice its order wherein Tennessee was granted the certificate to build the LNG plant in question. The order in Docket No. CP65–352 specified that deficiencies of the rates to meet actual unit costs of LNG service would *not* be assessed against any other class of service.

Even indulging all the most favorable assumptions, Hartford's "savings" related to LNG service over the next five years would be around $120,000 annually. Leaving out the income tax factor, which would halve the net benefit to Hartford, the speculative savings to Hartford would be under one percent of its annual revenues. The Connecticut Commission's assurances notwithstanding, rate reductions to Hartford's customers appear completely unlikely.

An unspoken assumption of the Opinion is that LNG service is available to Hartford only if Algonquin is denied a certificate and Hartford becomes a contract demand customer of Tennessee. Such a requirement of Tennessee's *proposed* LNG tariff is accepted at face value. The Commission and the record are silent on possible alternatives, such as requiring a change in the tariff as a condition of the Commission's certificate. Speaking hypothetically, revision of the Tennessee LNG tariff to permit LNG service to other than contract demand customers answers the argument about savings made in the Commission's opinion because the bulk of the projected savings are related to LNG service.

Also, if the Commission would notice its own docket it would see that it has herein glossed over some policy questions on the rate design of LNG service. Tennessee in seeking LNG plant construction authority, showed estimated sales to 18 customers of a maximum of 121,454 Mcf per day and a maximum winter quantity of a little over 3 million Mcf. The 18 precedent agreements of course did *not* include Hartford. Now the Commission is giving Tennessee the benefit of a doubt to be resolved not here, but in CP65-352, namely, that there will be enough warm days in winter to liquefy the additional quantities of gas necessary to meet Hartford's needs. Upon whom does the burden of miscalculation fall, and who takes the responsibility for it?

### *The order requiring examination of alternatives in the public interest*

In the section on "Savings to Ultimate Consumers" the Commission "notes" that the order of February 16, 1966, specified that the possibility of a delivery by Tennessee for the account of Algonquin should be examined.

It certainly did so order. The full language is as follows:

> This show cause proceeding will, of course, not be limited solely to the question of whether Tennessee could provide the service directly to Hartford consistent with the standards of Section 7(a), but should also include the comparative benefits, if any, if such service were to be rendered by Algonquin either by exchange agreement with Tennessee or by transportation by Tennessee for the account of Algonquin.

*Scenic Hudson*[17] came down from the Court of Appeals on December 29, 1965. It may be inferred that when this Show Cause Order was issued just six weeks later, the lessons of that case were still fresh in the minds of the Commissioners.

---

[17] *Scenic Hudson Preservation Conference, et al. v. Federal Power Commission, and Con. Ed. Co. of N. Y., Inc.*, 354 F. 2d 608 (CA2-1965), cert. denied 384 U.S. 941 (1966).

It seems, however, that such a surmise is erroneous. For my own part, I cannot see how any Commissioner who participated in the issuance of that Show Cause Order could countenance the record before the Commission in this case as conforming with the spirit of *Scenic Hudson*.

The Commission "notes" the *Scenic Hudson* standard in the section of the Opinion relating to savings. It is taken to be disposed of, apparently, by the record on "imbalances"—that is, one of the alternatives directed to be examined was presumably examined and found wanting on this ground.

The testimony on imbalances in deliveries related to the existing exchange agreements, of which there were five.[18] Such testimony, in addition to not relating to the question specified by the Commission, also fails to show "a substantial imbalance." It does show, at Tr. 540, an imbalance in favor of Tennessee on March 1, 1966, of 81,000 Mcf. But it also shows that the imbalance does not impose physical limitations upon additional exchanges (Tr. 552), and that imbalance is not a static situation. It fluctuates from month to month and year to year, and at times favors Algonquin (Tr. 583). The record even shows a reduction of the imbalance of 25% in the 21-day period from March 1, 1966, to March 22, 1966 (Tr. 582).

### *Duplication of Facilities and Competition*

The discussion of duplication of facilities and competition in the Commission's Opinion contains inconsistencies deserving of comment.

Although the cases wherein two pipelines were certificated to serve New England are being overruled to the extent that they allocated the market on a distributor-by-distributor basis, the Commission's action in certificating the two pipelines is given retrospective approval by saying that the Commission at the time consciously envisioned the time when the two pipelines would actively compete with each other.

If the Commission had such prescience 14 years ago, it didn't make it explicit, and so far as anything said then by the Commission discloses, the exact opposite was more nearly in their minds.[19] But in either event, the Commission can be read as saying now that duplication of facilities can further the objective of competition.

---

[18] Docket No. G-8872, Aug. 15, 1955, covering service by Tennessee to "Hartford Gas Company (Hartford), a customer of Algonquin;" Docket No. G-13146, Nov. 15, 1957, covering service by Algonquin to "The Housatonic Public Service Company (Housatonic) for the account of Tennessee;" Docket No. G-17392, April 1, 1959, covering service by Algonquin Tennessee for sale to the Housatonic Public Service Company its requirements for resale in the Wallingford, Connecticut area; Docket No. G-17409, April 15, 1959, covering service by Tennessee to Connecticut Gas Company for the account of Tennessee; and Docket No. CP65-217, May 12, 1965, covering service by Tennessee to New Haven Gas Company, "as existing customer of Algonquin" for the account of Algonquin.

At the same time, the Commission finds the public interest served by avoiding duplication of facilities, citing in support of certificating Tennessee in this case the fact that Hartford will thus be able to avoid building an LNG plant, and Algonquin will be able to avoid building the proposed Bloomfield lateral.

What serves the public interest can be both duplication of facilities and avoidance of duplication of facilities. This is sound enough pragmatism, but in a case which changes old rules and makes new ones in so many ways as this one, the public and the regulated industry are deserving of somewhat better and clearer explanation of what is being done and why.

We are assured that the special efficacy of Section 7(a) to spur competition or encourage interventions was Congressionally intended. We are also assured that this power will be exercised only where two pipelines intersect, or where the service area of one pipeline company reaches to within a mile or two of the other pipeline, as here. We are not told how the Congress made this sub-distinction.

One weakness of the Commission's opinion is its narrowness of view as to what competition really is. The results of the decision today are more anti-competitive than competitive. For example, by broadening the proceeding beyond the so-called "new area" of North Bloomfield, and by denying Algonquin permission to build the new line, the Commission has awarded Tennessee a monopoly far more rigid than that which Algonquin has enjoyed in its reliance on Commission certificates. Algonquin is prevented from improving its system to maintain viability to compete for suburban growth. It loses the opportunity to interconnect with the Farmington service line and thus "backfired" into that system. The loss to Algonquin must eventually redound to the detriment of its remaining customers but in addition both Hartford and Connecticut Gas will lose the option they now have to require the two pipelines to bid against each other for newly franchised areas near North Bloomfield and additional requirements of other new service areas. This view of competition as having a larger frame of reference than opening the Hartford market to a new supplier may not be the more persuasive, but an expert administrative body might not make its decision on the arithmetic of the immediate transaction—especially when the arithmetic differences are not only thin, but highly speculative.

---

[19] For a detailed study of the entire proceedings for certification of the New England, which reaches this conclusion and is most critical of it, see the doctoral dissertation of Rev. Thomas John Shanley, O. P., entitled *The Introduction of Natural Gas into New England and the Public Interest, 1950–1953*, University of Notre Dame, 1966.

There is a circularity in the Commission's Opinion wherein the discussion about what Section 7(a) means is followed by a discussion of what it does not mean. We are told: "This decision should not be misunderstood as signaling the institution of a 7(a) proceeding every time a pipeline files a certificate application. This is not our intention." (p. 1138) The concurring Commissioner at least is plain-spoken and understandable about the standard he would use in determining when to apply Section 7(a); the Commissioners speaking for the Commission leave nothing but doubt.

How it views the exchange agreements, and pipeline reliance on the pattern established in them is not made clear. Although a "cheaper source of supply" is said to be merely an indicator, and that other, less objective factors, must also be studied and balanced with the cost factor in determining whether a 7(a) proceeding should be instituted, the "other, less objective factors," are not identified. And such "other, less objective, factors" not only were not "studied and balanced with the cost factor in determining whether a 7(a) proceeding should be instituted", that is prior to the issuance of the Show Cause Order, but they were not studied and balanced in the hearing which followed the Show Cause Order or at all.

What the Commission is doing with Section 7(a) speaks much louder than what it says it will do.

The Commission's *action* today stands for this kind of rule: For any market at or near the point of intersection of two pipelines, the objective of competition requires that new growth increments of that market shall be awarded to a second pipeline if it has a cheaper rate, or can serve the growth areas with a lesser expenditure in facilities, or both.

This stifles more than serves competition. With such a rule facing them, can we expect pipelines with higher costs to vigorously compete in the areas where the customers are capable of being served with gas from a cheaper pipeline?

Furthermore, this preoccupation with the rate level is an unfortunate precedent, as is the uncritical acceptance of "avoided investment".

The ramifications are numerous. Intertwined in this case, and not surfaced either in the record or in the Commission's Opinion, are other issues which the Commission is grappling with—lateral line policy, rate design, incremental pricing, and whether the Commission ought to take into account the factor of "growth" in looking to the health of a regulated company.

No challenge faces regulation greater than that related to recognizing and accommodating to competitive forces, both within the natural gas industry and from other fuel sources. This challenge will require the broadest perspective, the greatest vision. Now is not the time to return to the simplistic test of cheaper rates, or formulary views about the wisdom of having multiple supply sources. The problem is really a great deal more complex than the Commission today recognizes.

### *The Record*

I have not at any time said that under all the facts and circumstances the public interest would not be served by making Tennessee's gas and LNG service available to Hartford. The burden of this dissent is that the record before the Commission doesn't support such action, both from the standpoint of a Section 7(a) show cause proceedings being selected as the legal vehicle, and from the standpoint of the failure of parties, and particularly Staff counsel, to comply with the letter and spirit of that show cause proceeding, its legality aside.

The failure of the record to develop the alternatives specified by the Commission to be considered has been repeatedly mentioned. Why this is so becomes evident as the Transcript of the hearing is reviewed.

The question posed in the Show Cause Order was whether a "delivery for the account of" arrangement might serve the public interest. Algonquin's witness Thorn addressed himself to this in his prepared testimony. He described the existing agreements and how they worked, the negotiations with Tennessee and with Hartford for getting a new one to serve the North Bloomfield area, and why, in his view at least, these negotiations fell through. (Tr. 80–81, 84, 91–92.) Hartford's witness Willis, also on direct examination and also responsive to the Show Cause Order, outlined Hartford's experience with them (Tr. 135–140, 198). Tennessee's witness did not touch the subject at all on direct. Staff put in no direct case on this, or any alternative.

At the outset of the hearing, Staff Counsel paraphrased the Show Cause Order. He interpreted the motive of the Commission in a manner which presaged his theory of the case. (Tr. 41, 42.)

Staff Counsel's theory was different from and inconsistent with that specified in the Show Cause Order. In his vigorous cross-examination of Algonquin's witnesses, Hartford's witnesses, and Tennessee's witness, he directed his questions toward a purpose made explicit in his briefs, namely, that the parties were misconstruing the distributor-by-distributor pattern of certification of the two pipelines in 1953, and that the two pipelines had followed a pattern of conduct which suggested collusion and worse. (Tr. 43, *et seq.*; 469, *et seq.*; 563, *et seq.*; Tr. 619, *et seq.*)

An antitrust cast of the case was made explicit: (a) beginning at Tr. 456, Staff counsel suggested an agreement not to compete, which witness Thorn denied; (b) at Tr. 467, a "design" for non-competitiveness was suggested; (c) at Tr. 557, it was suggested that Tennessee was "holding off"; (d) at Tr. 579, Tennessee's witness Stark was cross-examined on conversations looking toward "division of the market."

In his brief to the Examiner, counsel was candid:

> * * * we shall, more importantly, through a historical documentation of a parade of incidents in conjunction with a discussion of the related malignant web of circumstances spewed on this record, expose that Algonquin and Tennessee, whether by design or happenstance have contrived not to compete with each other for markets in New England. (Staff Brief of June 6, 1966, p. 4.)

Under the subtitle "FAILURE TO COMPETE—DESIGN OR HAPPENSTANCE???? Staff counsel concludes that it was "obligatory upon the Examiner and the Commission to resolve aforehand that every questionable fact, if indeed any questionable facts exist, will be mitigated in favor of certification of a second supplier for Hartford." (Staff Brief of June 6, 1966, p. 23.)

That the Examiner was not impressed by this theory is explicit in his opinion:

> The propriety of the exchange agreements between Algonquin and Tennessee previously approved by the Commission are not in issue in this proceeding and despite the Staff counsel's collateral attacks upon their validity, and [in] the absence of any evidence to the contrary, it must be assumed that such agreements are in the public interest.
>
> The record, while revealing that competition between Algonquin and Tennessee for the distributor market in the case of Hartford was something less than vigorous, did not produce any probative evidence of collusion or of a conspiracy between the pipelines to stifle competition. Such a charge by Staff counsel must, therefore, fall as unsupported. (Examiner's decision issued 9/21/66, p. 1169.)[20]

The Commission's Opinion today gives no more weight to the charge of collusion than the Examiner did. (The concurring opinion of Commissioner Ross emphasizes the possibility of collusion, however.) But the Commission does not grapple with the evident fact that a record prosecuted on a theory which presupposes the illegality or possible criminality of the alternatives designated by the Commission for examination for its compliance with the public interest is hardly likely to comply with the requirements of the Show Cause Order or of *Scenic Hudson.*

---

[20] Staff counsel did not except to the Examiner's findings that the previously certificated exchange agreements were not improper. But in his brief to the Commission he persists in his criticism, calling them "odious." (Staff Brief of Nov. 10, 1966, p. 8.)

*Tennessee's position*

The Commission grants a certificate to a reluctant Tennessee, which twice had to remind Staff counsel that it had no proposal, and was not a certificate applicant. (Tr. 122; 210.) It does *not* support the interpretation of Section 7(a) which the Opinion sets forth, maintaining, as we have noted earlier, a discreet silence. It emphasizes in its Brief that the onus for its entry into the Hartford market is upon Hartford, not upon Tennessee. (Tenn. Brief on November 10, 1966, p. 12.)

Tennessee's reply brief of June 27, 1966, states the competition issue so clearly that I adopt it:

> The mere existence from the beginning of natural gas service to New England of two pipeline suppliers has assured the general benefits of competition to New England. This was the choice of the Commission in the beginning. *It* determined that there would be two suppliers and certificated the geographic location of the respective pipeline systems. The resulting presence of two suppliers to the entire geographic area has assured the fruits of realistic competition to New England. Tennessee's expansion of service to, and broadening of types of service for, the parts of New England accessible from its system must be to a large extent the result of the sure knowledge that if it did not do the job, Algonquin or some other competitor would.
>
> Staff, however, narrows its view to only those very limited areas contiguous to both the Tennessee and Algonquin systems. Examination of the geographic location of these systems, however (see, for example, Exhibit #7), demonstrates that these contiguous areas are indeed very limited in number and involve very few customer companies. Each of the distributors companies serving these limited areas has been from the beginning either a customer of Tennessee or a customer of Algonquin. It is the distributing company customer who has the unilateral right to elect how and from whom it will seek its natural gas. Thus, as Mr. Stark stated (Tr. 575):
>
>> Mr. Lewnes, the competition has always been there. The distribution companies recognize that there are two pipeline companies there, and that they are both willing to sell gas.

> The *distribution company* has the unilateral right to purchase its gas from whom it sees fit, based on its own economies, based on its own planning. [Emphasis supplied.]
>
> It is obvious, of course, that a distributor must give consideration to a multitude of items before determining if indeed a second supplier is desirable. Hartford's evidence and brief in these proceedings demonstrate the studies and decisions with which a distributor is confronted in deciding on a second supplier * * * (pp. 4–5.)

### *Hartford's position*

Hartford, too, was consistently reluctant to take the responsibility for the Commission's ordered proceedings, affirming during the hearing before the Examiner, and in briefs and argument to the Commission, that it was *not* a Section 7(a) applicant.

### *Recommendations for remand*

Hartford's need for gas is unquestioned. On the basis that a dissenter should be prepared to take the responsibility of stating how he would decide, I can state that I do not believe a dismissal of the proceedings is necessary, even on the jurisdictional question, if Hartford will, belatedly, take the responsibility of filing a bona fide Section 7(a) application.

If it does so, then an emergency interconnection on a "delivery for the account of" basis could be made in a fashion to preserve the rights of all parties, while a remand to build a true *Scenic Hudson* comparative record would be in order. Such a remand could build a record of all the alternatives, together with the facts upon which the implications of changing the pattern of service to New England as previously certificated, could be considered.

## INITIAL DECISION
## OF THE PRESIDING EXAMINER GRANTING
## CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued September 21, 1966)

WILLIAMS, *Presiding Examiner:* This matter came on for hearing pursuant to Federal Power Commission (Commission) order of February 16, 1966, 35 FPC 230, consolidating the above-captioned dockets and requiring Tennessee Gas Transmission Company (Tennessee)[1] to show cause why it should not be required under Section 7(a) of the Natural Gas Act to establish a physical connection of its facilities with those of The Hartford Gas Company, a distributor, (Hartford) and render service as indicated therein.

Previously, on August 24, 1965, 34 FPC 572, the Commission certificated expansions by Texas Eastern Gas Transmission Company (Texas Eastern) and

---

[1] Now Tennessee Gas Pipeline Company, A Division of Tenneco Inc.

Algonquin Gas Transmission Company (Algonquin). Texas Eastern is the sole supplier of Algonquin and its authorized expansion was, in part, to meet the latter's requirements for its customers who had entered into four-year precedent agreements for the years 1966 through 1969.

Hartford, a long-time customer of Algonquin, however, signed a contract for only the first two years of expanded service, with the gas to be delivered at existing delivery points, and Algonquin's facilities were accordingly tailored to meet the second-year requirements.

With the expectation of supplying Hartford additional increments of gas in 1968 and 1969, Algonquin on May 21, 1965, advised the Commission that it would seek an amendment to its certificate in Docket No. CP65–340 to include facilities to serve Hartford's requirements for such years provided Hartford would execute a precedent agreement for its 1968 and 1969 requirements.

On September 22, 1965, Algonquin filed a motion to amend the certificate issued to it on August 24, 1965, to include the installation of 23.6 miles of 16-inch pipeline, extending from its main transmission line at the junction of the existing Southington lateral in Connecticut in a generally northerly direction and terminating at or near North Bloomfield, Connecticut. It is alleged that this lateral, costing some $2,887,000, will enable Hartford to obtain a supply of gas for the Bloomfield area without having to augment its entire distribution system.

Algonquin further alleges that in addition to providing Hartford with a source of gas in the Bloomfield area, the proposed lateral will permit Algonquin to supplement existing facilities serving the Farmington, Connecticut, area of Hartford's present distribution system, as well as the Bristol-Plainville area of The Connecticut Gas Company's distribution system. The new lateral would intercept the existing line to Farmington about midway on the route to Bloomfield, which connection would permit backfeeding of the system when necessary. Hartford has signed a precedent agreement with Algonquin, dated September 16, 1965, for additional gas as follows:

| | Maximum Daily Quantity (Mcf at 14.73 psia) | | |
|---|---|---|---|
| | F-1 | WS-1 | Total |
| Additional required; | | | |
| November 1968 | 3,400 | 2,000 | 5,400 |
| November 1969 | 3,400 | 2,200 | 5,600 |
| Total | 6,800 | 4,200 | 11,000 |

The motion to amend the certification of August 24, 1965, however, raises a problem in that Algonquin now proposes to deliver at the terminus of the new lateral the 1966 and 1967 increments of gas previously authorized for delivery at existing delivery points by way of facilities designed and constructed for such purpose.

On November 8, 1965, the Commission requested Algonquin to furnish certain supplemental information relating to its motion to amend the certificate of August 24, 1965. In particular, Algonquin was required to detail (1) what portion of the authorized increase in contract demand volumes of firm and winter peak service would be delivered, through the facilities sought in its amendment, to communities now being served and to communities to be served pursuant to Hartford's newly enfranchised territory; (2) what, if any, facilities, in addition to those included in the motion to amend, would be required to serve the distribution systems proposed to be constructed by Hartford in the newly chartered territory and (3) whether or not the existing Wethersfield lateral, now supplied by the existing Cromwell delivery point, can be extended by Hartford to render satisfactory service in the new area in lieu of Algonquin's proposed facilities.

The essence of Algonquin's reply of November 22, 1965, to these queries is (1) that of the peak volume of 6500 Mcf required for the year 1967–1968, 1800 Mcf per day would be used for service in four communities not now receiving service (Simsbury, Avon, Granby and East Granby) and 4700 Mcf per day would be required by existing customers; (2) Hartford will extend its lines to the communities of Canton and Burlington, but that no present plans have been made for initiating service in the communities of Bolton, Hebron, Marlborough, East Hampton and Portland and (3) it is not economically feasible to extend the Wethersfield lateral to render the services proposed in the amendment.

Upon receipt of Algonquin's explanation, the Commission issued the order dated February 16, 1966, previously mentioned, which consolidated for hearing the Algonquin application with a show-cause order against Tennessee.

The Commission took notice of the fact that the new area proposed to be served by Hartford, through use of the volumes to be delivered from the proposed Algonquin lateral, is presently traversed by Tennessee and that the proposed Algonquin lateral would, if constructed, parallel and duplicate the existing 16-inch pipeline of Tennessee. Hartford filed a petition on February 24, 1966, to intervene in the scheduled hearing and the Public Utilities Commission of the State of Connecticut on March 10, 1966, filed a notice of intervention. In the interim, Tennessee responded to the order to show cause, stating that upon completion of the facilities proposed in Docket No. CP66–180 it will have sufficient unallocated capacity in its New England pipeline system to render the additional gas service required by Hartford and will, upon direction by the Commission, establish a physical connection with Hartford in order to render the required service.

The formal hearing began on March 21, 1966, and concluded on April 7, 1966. A record of some 710 pages was compiled, including 23 exhibits and 10 items by reference to the files of the Commission. The issues were thoroughly and competently briefed by all parties to the proceeding.

### *Algonquin's Position*

In its amended application Algonquin seeks authority to use the proposed 16-inch lateral to deliver to Hartford, at locations not designated in its original application, a major portion of the maximum daily quantities of gas certificated by the Commission on August 24, 1965, and no additional deliveries are herein proposed. The amounts authorized in the original proceeding in excess of existing contract quantities are:

*Maximum Daily Quantity—Mcf at 14.73 psia*

| Commencing | Rate Schedule F-1 | Rate Schedule WS-1 |
|---|---|---|
| November 1966 | 600 | 2,500 |
| November 1967 | 3,000 | 1,200 |
| Total | 3,600 | 3,700 |

Algonquin contends that by reason of the extensive litigation, beginning in 1950, between it and Northeastern Gas Transmission Company, Tennessee's predecessor subsidiary, a division of the market between the two pipelines was, in effect, achieved and tacitly recognized by the Commission.[3] Predicated upon this belief is Algonquin's theory that a certain amount of duplication and paralleling of facilities necessarily follows and, therefore, must be condoned because the situation was created by the Commission. Staff objection to Algonquin's proposed lateral, principally because it would extend near Tennessee's 16-inch pipeline, is characterized by Algonquin's counsel as "unsound, unfair and, under the conditions prevailing in the New England area, against the public interest, as well as contrary to the regulatory philosophy behind the creation of Algonquin and Tennessee."

As a result of the close proximity of Algonquin's and Tennessee's facilities in the New England area, a number of instances have occurred where one pipeline serving a distributor finds, due to the distributor's acquisition of newly enfranchised territory, that service from the other pipeline would be more economical. Such situations have frequently resulted in "swap-outs," or exchange agreements that allow the closest supplier to deliver increments of gas for the account of the other pipeline without taking on the distributor as its own customer and without bestowing upon the distributor the benefit of a rate differential if one should happen to exist.

There are apparently five "delivery-for-the-account-of" agreements by Tennessee for Algonquin and two by Algonquin for Tennessee. Ostensibly, the failure of Algonquin to negotiate another exchange agreement with Tennessee for the delivery of gas to Hartford at Bloomfield for the account of Algonquin prompted it to file the application that is the subject of the present litigation.

Algonquin directly challenges the constitutionality of the Commission's Show Cause Order of February 16, 1966, and alleges that the agency is completely devoid of authority under Section 7(a) of the Natural Gas Act to require upon its own motion the permanent connection of a pipeline company with a distributor. Counsel for Algonquin, in support of his allegation, points out that both Tennessee and Hartford are unequivocal in denying that their participation in the present proceeding is in the capacity of 7(a) applicants, but, on the contrary, that their attendance is only as a result of the Commission's specific direction. Counsel also cites, apparently as evidence of a lack of self-assurance or conviction upon the Commission's part, a number of its annual reports to Congress wherein the Commission has requested the enactment of legislation empowering it "to require natural gas companies to interconnect their facilities with others engaged in the sale and distribution of natural gas and to sell or exchange gas with such persons together with authority to prescribe the terms, arrangements and conditions for such interconnections and the compensation payable therefor." Counsel further observes, in emphasizing his point, that such authority is sought only for *emergency* connections and not for a *permanent* junction such as is obviously contemplated in the instant case. A further reference is made to the 1964 Annual Report wherein it is stated:

> Section 7(a) now gives the Commission limited authority to direct a natural gas company to interconnect with and sell gas to a local distributing company, but is silent on interconnection of the pipeline systems themselves.

---

[3] Tennessee Gas Transmission Co., *et al.*, Docket No. G–1248, *et al.*, 9 FPC 262; United Gas Pipe Line Co., *et al.*, Docket No. G–1447, *et al.*, 10 FPC 35; Northeastern Gas Transmission Co., *et al.*, Docket No. G–1568, *et al.*, 10 FPC 36; Algonquin Gas Transmission Company, *et al.*, Docket No. G–1319, *et al.*, 12 FPC 209

Counsel for Algonquin, while apparently conceding that the Commission has some authority under Section 7(a) of the Natural Gas Act to direct an interconnection between a pipeline and a distributor, nevertheless maintains "that the Commission's authority is so limited that it does not extend to forcing upon a pipeline company a Section 7(a) proceeding when none has been requested by anyone and where the act of the Commission is upon its own initiative."

### *Hartford's Position*

Following the Commission's issuance of the Order to Show Cause on February 16, 1966, Hartford revised its gas supply requirements to delineate its proposed purchases with Algonquin as the sole supplier and with a dual supply furnished by Algonquin and Tennessee. The Hartford requirements sought from Tennessee are as follows:

| Commencing | Rate Schedule CD-6 Maximum Contract Quantity (Mcf) | Rate Schedule LNG | |
|---|---|---|---|
| | | Daily Quantity (Mcf) | Winter Quantity (Mcf) |
| Nov. 1, 1966, a total of | 3,162 | | |
| Oct. 1, 1967, a total of | | 4,386 | 30,600 |
| Nov. 1, 1967, a total of | 3,264 | | |
| Oct. 1, 1968, a total of | | 6,732 | 46,920 |
| Nov. 1, 1968, until Nov. 1, 1988, a total of | 4,896 | | |
| Oct. 1, 1969, until Oct. 1, 1989, a total of | | 9,282 | 52,020 |

The possibility of obtaining part of its revised requirements from Tennessee is particularly attractive to Hartford because of the potentially great savings in purchased gas costs involved in such an attachment.

In addition to its present pipeline source of gas, Hartford owns and operates a propane vapor plant and has purchased the necessary land for a contemplated liquified natural gas storage plant.

The availability of LNG pipeline service from Tennessee will save Hartford and its customers some $685,000 over a five-year period as compared with service from Algonquin coupled with the cost of LNG plant operation. Hartford maintains that attaching an additional source of supply will simplify future discussions with its supplier for supplemental volumes and will avoid the investment of some $1,160,000 dollars in a liquified natural gas plant, an investment which must be constantly implemented with load growth.

It is Hartford's position that the resulting savings from a dual source of supply will be passed on to its consumers and that Algonquin, as shown by Exhibit No. 17, will be assured of the revenues projected in its original and amended applications without the necessity of having to spend $2,887,000 for an uneconomical undertaking such as the proposed lateral.

### *Position of the State of Connecticut Public Utilities Commission*

The State Commission is cognizant of the fact that the Algonquin lateral will cost $2,887,000 and that such sum will eventually be included in the computation of the cost of service for the pipeline. The State Commission is also concerned that despite this expenditure. Algonquin cannot render LNG service to Hartford and the latter company would have to undertake the construction of its own plant at an initial investment cost of $1,160,000, and total annual operating cost of $200,000 which would be paid for by Hartford's consumers.

Service by Tennessee, on the other hand, would obviate the necessity for Hartford's building a LNG plant and eliminate the expenditure by Algonquin for a duplicate facility.

The State Commission urges, therefore, the certification and physical connection of Tennessee with Hartford and that the former be directed to sell both contract demand and LNG volumes in the necessary amounts on its applicable and effective tariffs to Hartford for use in its distribution system.

### *Tennessee's Position*

Tennessee states that it adopts no affirmative position in this proceeding and that its presence is solely by direction of the Commission pursuant to the Show Cause Order of February 16, 1966.

Tennessee's sales manager testified at length that in compliance with such order he contacted Hartford and ascertained the amounts of gas it desired to purchase, under what rate schedules and where deliveries were to be made.

Tennessee in the light of such information, concluded that the volumes of gas desired by Hartford could be delivered from currently unallocated capacity in the New England area without jeopardizing service to its existing customers and, since the delivery points at Farmington and Bloomfield are traversed by its 16-inch line, interconnection with Hartford would only require the installation of metering facilities at a nominal cost.

Tennessee also relates that it stands ready to commence LNG service to Hartford on October 1, 1967, the scheduled completion date of the latter's plant.

### *Staff Counsel's Position*

Staff vigorously opposes Algonquin's amended application for multiplicity of reasons including infeasibility, the apparent lack of competition between Algonquin and Tennessee, the paralleling and duplication of existing facilities and the concomitant hardships which would be imposed upon the rate-paying public.

Staff counsel has presented a detailed review of the development and certification by the Commission of natural gas pipeline service in the New England area. Taking issue with Algonquin's position, he maintains that the Commission did not make an immutable allocation of customers based upon some geographical delineation, but rather a division of immediately forseeable requirements designed to maintain the economic feasibility of both supplier's projects through the use of the respective distributors' fifth-year requirements with a minimum duplication of facilities.

The suppliers, however, as alleged by Staff counsel, have operated in the New England area as though "endowed with a legal usufruct both as to the original fifth-year requirements and all future requirements of the respective distributors each was initially authorized to serve--." The subsequent dealings of Algonquin and Tennessee in the area are considered by Staff counsel to be "enmeshed in a set of circumstances, unravelled on cross-examination, which raises an overwhelming suspicion of collusion."

The five "delivery-for-the-account-of" agreements executed between 1955 and 1965 by Tennessee and Algonquin and authorized by the Commission, are regarded with particular suspicion because of three common factors:

(1) The distributor customer was not a party to the filing.

(2) Each filing contains a recitation that the authorization sought therein is in the public interest since it will result in construction cost savings, in most instances, to the distributor.

(3) There is an absence of any reference to the relative rates of the two pipeline companies.

Staff counsel challenges Algonquin's assertion that the proposed North Bloomfield lateral would be of great benefit to its system by backfeeding and supplying additional capacity on the Southington-Farmington lateral, and further charges that the Southington-Farmington lateral was constructed without the requisite Commission authorization.

### *Discussion of the Issues*

Without resorting to a repetitious review of the lengthy litigation preceding the present situation with respect to the development of natural gas service in the New England area, the Examiner is inclined to espouse the opinion as expressed by Staff counsel, namely: that the Commission did not and does not intend to create spheres of influence in New England upon a geographical basis as between pipelines. Regardless of the fact that exchange agreements or swap-outs have been approved by the Commission that benefit one or the other supplier and appear to lend some credence to Algonquin's territorial theory, it is inconceivable that such an end result was intended. Exchange agreements as in the instant case, for example, can rebound to the distinct disadvantage of the consumer because Tennessee's rates are substantially lower than Algonquin's. Therefore, the circumstances surrounding each individual agreement must be carefully examined in order to protect the public interest.

While some duplication of facilities, was, of course, inevitable in resolving the original certification dilemma, there is little justification for a belief that the Commission will permit such an uneconomical practice to continue in perpetuity. On the contrary, the Commission in numerous recent decisions has made it quite clear that competition is a necessary element in its scheme of natural gas regulation (*Chattanooga Gas Company* v. *East Tennessee Natural Gas Company*, Docket No. RP65–3, Opinion No. 494, June 8, 1966, 35 FPC 902).

The propriety of the exchange agreements between Algonquin and Tennessee previously approved by the Commission are not in issue in this proceeding and despite the Staff counsel's collateral attacks upon their validity, and the absence of any evidence to the contrary, it must be assumed that such agreements are in the public interest.

The record, while revealing that competition between Algonquin and Tennessee for the distributor market in the case of Hartford was something less than vigorous, did not produce any probative evidence of collusion or of a conspiracy between the pipelines to stifle competition. Such a charge by Staff counsel must, therefore, fall as unsupported.

The feasibility, however, of Algonquin's proposed lateral to North Bloomfield is not only questionable, but appears to be without any tincture of merit since it is predicated upon revenues associated with volumes of gas *previously certificated* by the Commission on August 24, 1965, for delivery to Hartford through the existing Cromwell and Glastonbury delivery points. This fact is conclusively demonstrated by Algonquin's application in the original proceeding, Exhibit G–II, page 2 (Item "A" by reference in this record).

The Examiner is satisfied that the Commission was acting within the limits of its statutory authority in issuing the Show Cause Order of February 16, 1966, and he rejects Algonquin's argument that the inquiry is limited exclusively to the service to be rendered by Tennessee or Algonquin to Hartford in the North Bloomfield area. This view, in the Examiner's opinion, is unreasonable and if permitted to prevail would defeat by a technicality the very purpose of the show cause order.

Section 7(a) of the Natural Gas Act authorizes the Commission "* * * after notice and opportunity for hearing, finds such action necessary or desirable in the public interest, it may by order direct a natural gas company * * * to establish physical connection of its transportation facilities with the facilities of, and sell natural gas to, any person or municipality engaged * * * in the local distribution of natural or artificial gas to the public * * * if the Commission finds that no undue burden will be placed upon such natural gas company thereby: *Provided*, That the Commission shall have no authority to compel * * * such natural gas company to establish physical connection or sell natural gas when to do so would impair its ability to render adequate service to its customers. (52 Stat. 824 (1938); 15 U.S.C. Sec. 717 f(a))."

Following the issuance of the show cause order a Tennessee witness, as previously related, contacted Hartford to ascertain the volume of gas it desired to purchase and under what rate schedules. The same witness testified at length during the hearing and stated unequivocally that the volume of gas required by Hartford could be delivered from Tennessee's unallocated pipeline capacity without impairing its ability to render adequate service to its existing customers. For Commission authority to direct such a physical connection, if it places no undue burden on the pipeline and it will not impair the pipeline's ability to render adequate service to its presently attached customers, see *The Manufacturers Light & Heat Co.*, v. *F.P.C.*, 206 F. 2d 404 (CA3-1953) and *Central Illinois Public Service Co.*, v. *F.P.C.*, 338 F. 2d 682 (CA7-1964).

Obviously, the public interest requires that Hartford receive its supplemental gas supply from Tennessee instead of Algonquin since, in the latter case, it would be required to purchase gas at a higher rate and to build a new liquified natural gas plant at an estimated initial cost of $1,160,000. Also, Algonquin would be required to spend almost three million dollars to duplicate Tennessee's existing facilities. On the other hand, the record shows that Tennessee's only expense in serving Hartford would be the installation of two metering facilities at a cost of approximately $52,000. The magnitude of the resulting savings to the rate payers of both Algonquin and Hartford requires the certification of Tennessee to supply Hartford's supplemental requirement.

With respect to Staff counsel's charge that Algonquin's Southington-Farmington lateral was illegally constructed and not exempt under Section 2.55(c) of the Commission Rules, it appears that Algonquin upon the advice of counsel acted in good faith in extending the Southington-Farmington lateral believing it to be exempt under the prevailing rules at the time of construction. This fact coupled with the elapsed time now involved and the relatively insignificant amount of construction does not, in the opinion of the Examiner, warrant the disturbing of such a conclusion and the possible subjection of Algonquin to the general penalties provisions of Sections 20 and 21 of the Natural Gas Act if such issue is to be pursued.

## PROPOSED FINDINGS AND CONCLUSIONS

Upon consideration of the entire record including briefs of counsel, it is found and concluded in addition to all other findings and conclusions contained herein that:

(1) Algonquin and Tennessee are "natural-gas companies" within the meaning of the Natural Gas Act.

(2) The "Motion to Amend" filed by Algonquin in Docket No. CP65-340 must be denied since Algonquin has not sustained its burden of proof that the project is economically feasible—the overwhelming evidence of record requiring a holding to the contrary.

(3) Algonquin's proposed construction of the North Bloomfield lateral is found not to be in the public interest since:

(a) It would be duplicative of facilities authorized in the original proceeding.

(b) It would parallel and duplicate existing facilities of Tennessee which are capable of rendering a service to Hartford more in the public interest.

(4) An order under Section 7(a) of the Act should issue requiring Tennessee to intertie its existing mainline facilities with those of Hartford and to deliver to Hartford volumes of gas consistent with the proposal detailed herebefore. The issuance of such an order is required by the present and future public convenience and necessity.

(5) Tennessee is able and willing to perform the services sought by Hartford as outlined hereinbefore. The rendition of such services to Hartford will not impair Tennessee's ability to adequately serve its other customers.

(6) The proposed service to be rendered by Tennessee to Hartford will not, economically or otherwise, deprive or aggrieve Algonquin. Said service will not affect heretofore authorized sales made by Algonquin to Hartford.

## ORDER

WHEREFORE, *It is ordered*, subject to review by the Commission on appeal, or on its own motion, as provided in its Rules of Practice and Procedure, that:

(A) A certificate of public convenience and necessity be and the same is hereby issued, authorizing and directing Tennessee Gas Transmission Company to establish physical connection of its presently existing transportation facilities with the distribution facilities of The Hartford Gas Company and to construct and operate the facilities necessary to transport, sell and deliver natural gas to the same as more fully described in the record herein in Docket No. CP66-263 upon the terms and conditions of this order.

(B) The certificate and order issued by paragraph (A) above and the rights granted thereunder are conditioned upon Tennessee's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions as set out in paragraphs (a), (b) any necessary facilities shall be completed and in actual operation within thirty days from the date hereof, (c)(4), (e) and (f), of Section 157.20 of said Regulations.

(C) The application for a certificate of public convenience and necessity filed by the Algonquin Gas Transmission Company in Docket No. CP65-340 is denied and the proceeding thereunder is terminated and dismissed.

AMES W. WILLIAMS,
*Presiding Examiner.*

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## HENRY FORD AND SON, INCORPORATED, AND NIAGARA MOHAWK POWER CORPORATION, PROJECT NO. 13

### ORDER APPROVING TRANSFER OF LICENSE

(Issued June 27, 1967)

On August 30, 1965, Henry Ford and Son, Incorporated (Ford) a New York corporation, and Niagara Mohawk Power Corporation (Niagara Mohawk), a New York corporation, filed a joint application pursuant to Section 8 of the Federal Power Act (Act) seeking authority to transfer the license for the Green Island project, F.P.C. Project No. 13 from the former to the latter. The Green Island project is located on the Hudson River in Albany County, New York at the United States Lock and Dam at Green Island. The license for this project was issued for a period of 50 years with an effective date of March 3, 1921.

Ford represents that it has fully complied with the terms and conditions of its license, as amended, and that it has fully satisfied and discharged all of its liabilities and obligations thereunder to the date hereof and obligates itself to pay all annual charges owing under the license to the date of transfer. Upon Commission approval of the proposed transfer and completion of the conveyance of the properties, Niagara Mohawk agrees to submit to the Commission certified copies of all instruments of conveyance; Ford agrees to deliver and Niagara Mohawk agrees to accept and permanently retain all license instruments and all maps, plans, specifications, contracts, reports of engineers, accounts, books, records, and any other pertinent documents.

Contingent upon final written approval by the Commission of the proposed transfer, Niagara Mohawk accepts all the terms and conditions of the subject license, as amended, and agrees to be bound thereby to the same extent as though it were the original licensee thereunder. These include terms and conditions relative to project net investment and charges for the expropriation of excessive profits to the United States. License Article 1 incorporates by reference *inter alia* the provisions of Sections 3 and 10(e) of the Federal Water Power Act (41 Stat. 1064, 1069).[1]

In passing upon the subject transfer we do not deem it necessary to definitely fix at this time Ford's net investment in Project No. 13 or to enter upon a hearing pursuant to Section 10(e) of the Act and Regulation 18—Expropriation of Excessive Profits, Federal Power Commission Orders, No. 9 Rules and Regulations Approved On and Effective from February 28, 1921[2]. To date the Commission has not determined Ford's net investment in Project No. 13 or its excessive profits, if any. There is presently pending before the Commission a rulemaking proceeding wherein the Commission will determine the principles and procedures to be applied in ascertaining project net investment. Notice of Proposed Rulemaking, Hydroelectric Project Licenses: Calculation of "net investment" Under Section 3(13) of the Federal Power Act, issued January 20, 1966.

---

[1] See also Regulation 18—Expropriation of Excessive Profits, Federal Power Commission Orders, No. 9 Rules and Regulations, Approved on and Effective from February 28, 1921.

[2] See also Regulation 17—Amortization Reserves.

The accounts, books and records of Ford associated with Project 13 are to be transferred to and retained by Niagara Mohawk. As the successor to Ford, Niagara Mohawk obligates itself as a condition of the transfer of license to subject itself to all conditions of the license and Act as they now apply to Ford. As noted, these include terms and conditions relative to project net investment and charges for the expropriation of excessive profits to the United States.

In affording this consideration of these questions we have reviewed available office data bearing upon Ford's operations and the magnitude of its earnings and profits. These data do not indicate that Ford has experienced excessive profits. Should Ford or Niagara Mohawk consider it desirable from their respective standpoints to have a formal hearing and ruling upon that question prior to acceptance of the transfer of license the Commission will entertain an application therefor.

The office data thus reviewed include Ford's reported project capital costs, accumulated provision for depreciation, operating revenues, expenses, and allowances for return and taxes, including Federal income taxes, all in calculating Ford's realized return on invested capital.

Ford, as a wholly-owned subsidiary of Ford Motor Company, supplied a portion of the physical output of its electric facilities to the parent for use in the latter's manufacturing operations, furnished a portion to the United States free of charge and sold a portion to a utility for resale. The licensee's capital and operating expense needs were supplied by the parent company. In reporting to this Commission, Ford has calculated project revenues as including an allowance for return. Ford's revenues from sales of project output for utility resale purposes are as reported to this Commission.

Additionally, we have examined Ford's possible alternative power costs as compared to its expenditures in constructing and operating Project No. 13. This comparison leads us to conclude that such costs are substantially comparable over the period of project operation, 1923 through 1960.[3]

Commission authorization of the acquisition of the project facilities by Niagara Mohawk has been granted by our order of even issuance date in Docket No. E-7260, *infra*, p. 1176.

*The Commission finds:*

(1) Public notice of the filing of this application has been given and no protests or petitions to intervene have been received.

(2) Niagara Mohawk, the proposed transferee, is a corporation organized under the laws of the State of New York, is domesticated in the State of New York and has submitted satisfactory evidence of compliance with the requirements of all applicable State laws as necessary for the operation of Project No. 13.

(3) Approval of transfer, upon compliance with the conditions set forth herein, of the license for the project to the proposed transferee will not be inconsistent with the public interest.

*The Commission orders:*

(A) The transfer of the license for Project No. 13 from Henry Ford and Son, Incorporated to Niagara Mohawk Power Corporation is hereby approved, effective as of the effective date of the acquisition of the project by Niagara Mohawk, subject to Section 9.3 of the Commission's Regulations under the Federal Power Act, and subject to the further condition that the net investment in the project shall not be increased on account of the transfer: *Provided, That,* the transferee shall be subject to the conditions and obligations of the license and to all of the provisions of the Act to the same extent as though it were the original licensee for the project.

---

[3] See Regulation 18, Section 4, February 28, 1921; Notice of Proposed Rulemaking Hydroelectric Project Licenses: Calculation of "Net Investment" Under Section 3(13) of the Federal Power Act, issued January 20, 1966, p. 4 (31 F.R. 1079).

(B) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Federal Power Act, and failure to file such an application shall constitute acceptance of the license for Project No. 13 by Niagara Mohawk. In acknowledgment of the acceptance of such license, this instrument shall be executed in triplicate on behalf of Niagara Mohawk Power Corporation and shall be returned to the Commission within 60 days from the date of issuance of this order accompanied by a certificated copy of the deed of conveyance or other instrument evidencing transfer of the property under license, together with evidence of the recording thereof.

Commissioner Ross *dissenting.*

Ross, *Commissioner dissenting:*

Despite what might be considered a fairly successful and well-written statute, the Federal Power Act has always contained certain difficult areas for the Commission to implement. Two such provisions have been Section 3(13), dealing with net investment, and Sections 10(d) and 10(e), dealing with excess earnings and excessive profits, respectively.

Presently, the Commission has outstanding a proposed Rule in Docket No. R–297 which seeks to clarify net investment as set out in Section 3(13) of the Act and the relationship of 10(d) thereto. However, somehow during the years, Section 10(e) has never really surfaced except in the earlier years when it was the subject of various rules and regulations which were incorporated into several licenses issued after the enactment of the Federal Power Act; to date, no definitive application of this section has been made by any Commission in a proceeding.

Section 10(e) of the Federal Power Act provides for the expropriation to the Government of excessive profits until the States had made provisions for preventing such excessive profits or until the period of amortization provided in Section 10(d) was established. As such, a separate proceeding, not necessarily related to a final accounting at the termination of the license period, was envisioned.

Accordingly, Regulation 18 was adopted by the Commission on February 28, 1921, and provided for the expropriation of excessive profits, after a hearing, from industrial licensees and public utility licensees in states without any regulation. Where a state had created an agency and authorized it to regulate rates for power "developed, transmitted, or distributed within such state by public service or other corporations, or by persons or associations, for sale and use of public service," it was presumed that the state had made provision for preventing any excessive profits in accordance with the statute.

Section 4 of Regulation 18, dealing with industrial licenses provided that "the Commission may determine the fair value of the power so used and from such value determine the profits of such licensee and whether and to what degree such profits so determined are excessive and may require the licensee to pay to the United States any and all such excessive profits." The fair value of power ascribed to the industrial licensee for these purposes was not to exceed the price at which the licensee could obtain an alternate source of power.

In June of 1921, Regulation 18 was amended in several ways, one amendment being a proviso that the amounts to be paid by *industrial* licensees under Section 10(e) was not to exceed "the amounts which would be paid into amortization reserves * * * were such regulation applicable to the projects and properties named in Section 1 hereof."

Although Regulation 18 did not define excessive profits the Commission's first annual report for the fiscal year ending June 30, 1921, construed 10(e), or excessive profits, as profits which were "so unreasonable or extortionate that the drastic procedure of expropriation is justified." Contrary to the policy expressed in Regulation 18, the Commission seemed to view its 10(e) responsibilities for public utilities in states without regulation as one of reducing the rates charged by such public utilities so that "excessive profits will not be earned rather than to collect such profits as charged to be paid into the Federal Treasury."[1] With regard to the private industrial licensees, however, the Commission assumed that it would expropriate these as provided for in the Act.

A review of the history of Section 10(e) clearly shows that the early Commissions were well aware of the existence of the section; however, for various reasons, no Commission has ever clarified the role of Section 10(e) in any proceeding. The fact of the matter is, the present case presents an ideal opportunity for the Commission to set straight the confusing history of Section 10(e). More than that, under the terms of the transfer the majority is approving here, Niagara Mohawk, a public utility company, will have to assume all the liabilities of the Ford Company, an industrial licensee, including its Section 10(e) obligations, if any. There has been no formal proceeding to determine the extent of Ford's obligations under 10(e). The majority has made no findings and sets forth no figures or rationale to support its conclusion that there are no Section 10(e) liabilities in this case.

Rough calculations I have made on the data available not only to me but to the majority indicates that the alternative cost of power to the licensee Ford over the first 20 years of the license ranged from 19 mills to 9 mills per kilowatt hour. Ford's costs, however, ranged anywhere from an alleged 5 mills to the 10 mills it reported to the Commission. The difference between costs and alternate power represents sizable amounts of money. A difference of one mill per kilowatt hour between the licensee's "costs" and alternate power over the first 20 years of the license from the project would amount to over $450,000. Whether any of the amounts that properly could be attributed to Ford would be found to be excessive profits, I don't know. However, I feel it is the duty of the Commission to set out clearly the way in which it found no excessive profits so the industry may be aware of possible liabilities with regard to Section 10(e). To do otherwise would be to defeat the aims of the legislators of the Power Act who sought to develop the Nation's water resources by protecting the financial integrity of hydro projects yet at the same time to see that the people as a whole would be the beneficiaries of the Nation's water resources. To enable licensees to assume they have no liabilities because of prior inaction by the Commission is misleading; yet the Commission cannot avoid its duties under the Act or vitiate what Congress intended. Sooner or later the Commission must decide. The effect of the majority's decision in this case, in effect, is a side-stepping of an issue that should no longer be ignored. Because the public will be the direct recipient of any excessive profits under Section 10(e) and because those licensed by the Commission have a right to be apprised of their potential liability under Section 10(e), I would set the matter of Section 10(e) profits for Green Island for hearing.

---

[1] First annual report of the Federal Power Commission, p. 62.

As to excess earnings under Section 10(d) of the Act, I feel that the resolution of R-297 should be determinative of the ultimate obligations of the licensee. Settling that matter in this proceeding seems to me to predetermine the issues presented by that rulemaking and could possibly jeopardize the economic feasibility of the transfer from Ford to Niagara Mohawk.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## NIAGARA MOHAWK POWER CORPORATION, DOCKET NO. E-7260

### ORDER AUTHORIZING ACQUISITION OF FACILITIES

(Issued June 27, 1967)

Niagara Mohawk Power Corporation (Niagara Mohawk), filed an application on November 26, 1965, pursuant to Section 203 of the Federal Power Act seeking authority to acquire from Henry Ford and Son, Incorporated (Ford) the Green Island Hydro Electric project licensed as F.P.C. Project No. 13.

Niagara Mohawk is incorporated under the laws of the State of New York and qualified to do business in that state with its principal place of business at Syracuse, New York and is engaged primarily in the business of generating, purchasing, transmitting, selling and distributing electric energy in Upstate New York.

Ford is incorporated under the laws of the State of New York and qualified to do business in that state and it is a fully-owned subsidiary of the Ford Motor Company and operated Project No. 13 to provide power for the manufacturing facilities of the parent company located near the project.

The Green Island project which Niagara Mohawk proposes to acquire is located on the Hudson River in Albany County, New York, and was licensed by the Federal Power Commission in 1921. The installed capacity of the project is approximately 8,000 horsepower and consists of four 2,000 horsepower hydraulic turbines each of which drives a 1000 kw D.C. generator and an 800 kva A.C. generator. Niagara Mohawk proposes to acquire these facilities for a cash consideration of $100,000. As of December 31, 1965, the facilities had an original cost of $1,818,045.00 and had an accumulated provision for depreciation of $1,277,750.44. Ford has made changes in its manufacturing operations that have eliminated the need for the Green Island project and it has not operated since November 30, 1960. While the project in its present condition is not usable by Niagara Mohawk, it does constitute a convenient hydroelectric development of the type which would economically fit in with Niagara Mohawk's electric needs. After the acquisition Niagara Mohawk plans to apply for an amendment of the license, involving expenditures of about $396,000, to modify the plant in order to restore it to operation. Niagara Mohawk estimates that after rehabilitation the plant will have a net capacity of 5,600 kw and that it will be obtaining this new capacity at a cost of approximately $88.00 per kilowatt. It recognizes, of course, that the license for the project expires in 1971 and is subject to recapture, or relicensing to it or a new licensee, after that date. This fact, however, would not interfere with appropriate capital expenditures to rehabilitate the project to meet the needs of Niagara Mohawk and to make the project compatible with the standards of Section 10(a) of the Act, since under the statutory scheme such expenditures would be added to the net investment of the project.

Niagara Mohawk shall record the acquisition in accordance with Electric Plant Instruction 5 of the Uniform System of Accounts. Paragraph C of Plant Instruction 5 requires that the cost of rehabilitation be accounted for as part of the purchase price. If, after giving effect to the cost of rehabilitation, a credit acquisition adjustment results, the amount shall be credited to Account 108, Accumulated Provision for Depreciation of Electric Plant in Service. If a debit acquisition adjustment results, the amount shall be charged to Account 435, Miscellaneous Debits to Surplus. Niagara Mohawk shall file proposed journal entries to clear Account 102, Electric Plant Purchased or Sold, after all rehabilitation costs have been recorded therein.

In a separate order issued concurrently herewith, *Henry Ford and Son, Incorporated and Niagara Mohawk Power Corporation*, Project No. 13, *supra*, p. 1172, the transfer of the license for this hydroelectric facility from Ford to Niagara Mohawk is approved.

Written notice of the application has been given to the New York Public Service Commission and the Governor of that State. Notice has also been given by publication in the Federal Register on December 9, 1965 (30 F.R. 15241), stating that any person desiring to be heard or to make any protest with reference to the application, should file petitions or protests on or before December 20, 1965, with the Federal Power Commission, Washington, D.C. 20426. No protest, petition or request to be heard in opposition to the granting of the application has been received.

*The Commission finds:*

(1) Niagara Mohawk, a corporation, is a public utility within the meaning of Section 203 of the Federal Power Act subject to the jurisdiction of the Commission as heretofore described and set forth in the Commission's order issued May 25, 1961, *Niagara Mohawk Power Corporation*, Docket No. E-6990 (25 FPC 1025).

(2) By the proposed transaction, Niagara Mohawk will merge or consolidate its facilities subject to the jurisdiction of the Commission with those of Ford, another person within the meaning and subject to the requirements of Section 203 of the Federal Power Act.

(3) The proposed merger of the facilities of Ford with those of Niagara Mohawk, as described above, and subject to the provisions of this order will be consistent with the public interest as expressed in Section 203 of the Federal Power Act.

(4) The period of public notice given in this matter is reasonable.

*The Commission orders:*

(A) The proposed merger of the facilities of Ford with those of Niagara Mohawk, all as described above, is authorized and approved upon the terms and conditions and for the purposes set forth in the application subject to the provisions of this order.

(B) Niagara Mohawk shall record the proposed transaction herein authorized as provided above.

(C) This authorization shall expire unless the transaction herein authorized and approved is consummated within 90 days of the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, extensions or determinations of cost, or any matter whatsoever now pending or which may come before this Commission or any other regulatory body and nothing herein shall be construed as an acquiescence by this Commission in any estimate or determination of cost or any valuation of property claimed or asserted.

Commissioner Ross *dissenting* for reasons set forth in his dissent in Project No. 13, Henry Ford and Son, Incorporated, *et al.*, issued June 27, 1967 *supra*, at p. 1174.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## UNITED NATURAL GAS COMPANY AND IROQUOIS GAS CORPORATION, DOCKET NO. CP66-349 AND TENNESSEE GAS PIPELINE COMPANY, A DIVISION OF TENNECO INC., DOCKET NO. CP66-420

### ORDER AMENDING ORDER ISSUING CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 27, 1967)

On April 12, 1967, United Natural Gas Company (United) and Iroquois Gas Corporation (Iroquois) filed in Docket No. CP66-349 a petition to amend the order issued by the Commission August 31, 1966, 36 FPC 566, by extending the time in which the facilities authorized may be completed from January 1, 1968, to January 1, 1969, all as more fully set forth in the petition to amend which is on file with the Commission. United and Iroquois request the extension of time for the completion of the authorized facilities in order to enable them to study the possibility of purchasing an existing pipeline instead of constructing the proposed pipeline.

On April 3, 1967, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), filed in Docket No. CP66-420 a petition to amend the order issued by the Commission August 31, 1966, by authorizing Tennessee to deliver additional volumes of natural gas to Iroquois for an additional calendar year, 1968, all as more fully set forth in its petition to amend.

Tennessee is presently authorized to transport and deliver quantities of natural gas to Iroquois for use in its Buffalo-Niagara Falls distribution area for a period of one year commencing January 1, 1967, pending the construction of natural gas facilities authorized in Docket No. CP66-349 by which Iroquois would be able to purchase natural gas from United at the New York-Pennsylvania state line and transport said gas to Iroquois' Buffalo load center. Due to the delay in construction, Iroquois has requested Tennessee to transport natural gas for it during the calendar year 1968. Tennessee will transport said gas during the months of January, February, March, April, November and December 1968. Due to Iroquois' increased customer requirements for the year

1968, it requests a greater peak day volume and maximum annual quantity than authorized for 1967. The rendition of this service will not result in a material change in Tennessee's average cost of service and will not require any additional facilities. The maximum daily and maximum annual quantities of natural gas requested by Iroquois are 90,000 Mcf and 8,580,000 Mcf, respectively, and the parties have agreed on a fixed annual transportation charge of $418,000.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the petitions to amend has been received.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued August 31, 1966, in Docket Nos. CP66-349 and CP66-420 should be amended as hereinafter ordered.

*The Commission orders:*

(A) The Commission's order issued on August 31, 1966, in Docket Nos. CP66-349 and CP66-420 is amended by extending the time in which the facilities authorized therein shall be completed from January 1, 1968, to January 1, 1969, and by authorizing Tennessee to deliver additional volumes of natural gas to Iroquois for an additional year, 1968. In all other respects said order shall remain in full force and effect.

(B) Tennessee shall make an appropriate rate filing covering the service authorized.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## CONSOLIDATED GAS SUPPLY CORPORATION, DOCKET NO. CP67-328

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 28, 1967)

On May 5, 1967, Consolidated Gas Supply Corporation (Applicant) filed in Docket No. CP67-328 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities in order to establish a new delivery point for the sale and delivery of additional volumes of natural gas to the New York State Electric & Gas Corporation (New York Gas), an existing customer, for resale and distribution in the Town of Newfield and environs, Tompkins County, New York, all as more fully set forth in the application.

Specifically, Applicant proposes to construct and operate a tap on its 30-inch Line No. 1 and 20-inch Line No. 31 in the Town of Newfield and to construct a measuring and regulating station for the sale and delivery of natural gas to New York Gas at the connection of Lines Nos. 1 and 31 with facilities to be constructed by New York Gas.

New York Gas has executed a new service agreement with Applicant dated April 25, 1967, which includes the delivery of gas at the proposed Newfield connection.

The total estimated annual and peak day natural gas requirements of the Town of Newfield in the third year of proposed operations are 38,000 Mcf and 438 Mcf, respectively.

On July 13, 1966, New York Gas received a franchise from the Town of Newfield authorizing the aforementioned natural gas distribution service and on December 6, 1966, the New York Public Service Commission approved said franchise.

The proposed natural gas service to New York Gas will be rendered by Applicant pursuant to its existing FPC Rate Schedule CR-5 which provides for a rate of 44.4 cents per Mcf during a 36-month development period and 49.33 cents per Mcf thereafter.

The total estimated cost of Applicant's proposed project is $10,150, which cost will be financed from funds on hand.

After due notice, no protest, petition to intervene or notice of intervention has been filed.

At a hearing held on June 22, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Consolidated Gas Supply Corporation, a West Virginia corporation with its principal place of business in Clarksburg, West Virginia, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of May 26, 1942, in Docket No. G-100 (3 FPC 151).

(2) The facilities hereinbefore described and as more fully described in the application in this proceeding are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) The construction and operation of the proposed facilities and the transportation and sale of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(6) The certificate hereinafter issued should be conditioned upon Applicant's filing with the Commission an appropriate revised service agreement with New York Electric & Gas Corporation in accordance with the Commission's Regulations under the Natural Gas Act.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued authorizing Applicant, Consolidated Gas Supply Corporation, to construct and operate the proposed facilities for the transportation and sale of natural gas as hereinbefore described and as more fully described in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized by paragraph (A) above shall be constructed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act by January 1, 1968.

(D) The certificate issued by paragraph (A) above is conditioned upon Applicant's filing with the Commission an appropriate revised service agreement with the New York Electric & Gas Corporation in accordance with the Commission's Regulations under the Natural Gas Act.

## EAST TENNESSEE NATURAL GAS COMPANY

### ORDER ALLOWING SUPERSEDING SERVICE AGREEMENT TO TAKE EFFECT

(Issued June 28, 1967)

East Tennessee Natural Gas Company (East Tennessee) filed a revised Exhibit A to its service agreement with Colonial Natural Gas Company (Colonial) dated December 1, 1966, which reflects a reduction in Colonial's contract demand from 9,400 Mcf per day to 5,000 Mcf per day beginning December 1, 1966. By letter-order issued February 3, 1967, the Commission accepted the filing with the condition that East Tennessee in future rate proceedings include "revenues derived from sales to Colonial Natural Gas Company based upon volumes utilized by the Commission in prescribing rates for East Tennessee in Opinion No. 488, 35 FPC 534, or actual volumes sold whichever are larger."

East Tennessee by letter dated February 16, 1967, informed the Commission that it was unable to accept the condition and in the alternative suggested the following: "If, in the future, all or any portion of the years 1967 through 1970 are included in any test year in a rate proceeding involving East Tennessee, the volumes of gas delivered off the Virginia extension to be utilized by the Commission in prescribing rates for East Tennessee shall not be less than the volumes of gas set forth by the Commission in Opinion No. 488." The Knoxville Utilities Board, *et al.*, by letter dated February 25, 1967, protested the language proposed by East Tennessee, stating that (1) by specifying volumes of gas delivered rather than revenues East Tennessee would appear to be allocating its actual costs based on jurisdictional volumes including the volumes for Colonial set out in Opinion No. 488, (2) by not computing revenues and expenses on the same Colonial volumes East Tennessee would shift costs to jurisdictional customers from non-jurisdictional customers, (3) by limiting the condition to volumes of gas delivered off the Virginia extension rather than sales to Colonial only, East Tennessee is attempting to utilize the expected growth in sales to Roanoke to offset the subsidy to Colonial and further, (4) by limiting the condition to only the calendar years 1967 through 1970 East Tennessee would attain an effective moratorium from any rate review until at least well into 1968.

To evaluate the validity of Knoxville's contention it is necessary to review briefly the history of the Virginia extension and its impact on East Tennessee's rates. These facilities were certificated in Docket No. CP64-21 as set out in Opinion No. 435, 32 FPC 158. There the Commission authorized East Tennessee to construct and operate a 138-mile pipeline extending from Bristol, Virginia-Tennessee to the City of Roanoke, Virginia. By means of these facilities, East Tennessee was authorized to sell natural gas to Roanoke Gas Company in the amount of up to 7,700 Mcf per day and to Colonial up to 17,800 Mcf per day, their third year requirements. Knoxville intervened in these proceedings neither endorsing nor opposing the project, but seeking to assure that the costs attributable to the new service in Virginia are not collected from the customers in Tennessee. The Commission in its Opinion No. 435 adopted this principle and ordered East Tennessee to file with this Commission each year for five years after the commencement of operations a report of all of its direct costs and expenses of the new service and the revenues resulting therefrom and to furnish these data to resale customers upon request. From the beginning of Colonial's operations its purchase from East Tennessee lagged behind that which had been anticipated in Opinion No. 435 and Colonial has not yet developed its distribution system to the extent that was anticipated. Full realization of Colonial's project is now anticipated in 1970.

The facilities authorized resulted in the development of a new rate zone on the East Tennessee system. In that zone (Zone 3), as in all others, it would be inappropriate to develop allocation factors based upon individual customer volumes rather than the aggregate volumes sold in the zone. Allocation factors would and should be appropriately based upon total jurisdictional volumes in the zone, not volumes delivered to any individual customers. Further, the Commission historically has used annual and peak day sales volumes in the development of allocation factors. Therefore, the deletion of the term "revenues" from the original condition will have no adverse effect upon Knoxville. To hold East Tennessee to the development of allocation factors based upon the specific volume to any one customer within any one zone would create undue discrimination. For this reason, we believe it is appropriate to adopt the phraseology proposed by East Tennessee. Thus costs would be allocated to the new zone based on the estimated third year volumes set out in Opinion No. 488 and the failure of that zone to return revenues equal to that allocated cost would be borne by East Tennessee. However, at such time that the volumes purchased by all the customers in the new zone exceed the third year estimates in Opinion No. 488, East Tennessee and all customers on its system would benefit. Knoxville's proposal would require that all benefits of growth in Roanoke's requirements redound to the benefit of the customers in the other zones while East Tennessee alone bears the total burden of Colonial's failure to purchase the volumes estimated in Opinion No. 488. We believe that East Tennessee's suggested condition preserves the integrity of Opinion Nos. 435 and 488 and provides the assurance to Knoxville that it would not be saddled with the costs attributable to the new service in Virginia which was certificated in Docket No. CP64-21. To assure such preservation, however, it would appear that Knoxville has appropriately suggested that the time factor which may be utilized in the test year should be enlarged. For that reason we shall include the year 1966 in the rate condition hereinafter set out.

*The Commission finds:*

Good cause has been shown that the 30 day notice requirement provided in the Commission's Regulations under the Natural Gas Act be waived with respect to the proposed superseding service agreement applicable to the sales of natural gas by East Tennessee to Colonial, and that such service agreement be allowed to take effect as of December 1, 1966.

*The Commission orders:*

(A) The 30-day notice requirement provided in the Commission's Regulations under the Natural Gas Act is hereby waived with respect to the revised Exhibit A filed December 1, 1966, to its service agreement applicable to the sales of natural gas by East Tennessee to Colonial and that service agreement as revised is hereby allowed to be effective as of December 1, 1966, subject to the following conditions.

(B) The foregoing acceptance is subject to the condition that in the future, in event all or any portion of the years 1966 through 1970 are included in any test year in a rate proceeding involving East Tennessee, the volumes of gas delivered off the Virginia extension to be utilized by the Commission in prescribing rates for East Tennessee shall be not less than the volumes of gas set forth by the Commission in Opinion No. 488.

(C) The letter-order issued February 3, 1967, with respect to that service agreement is hereby vacated.

(D) Nothing contained in this order shall be construed as a waiver of the requirements of Section 7 of the Natural Gas Act, nor shall it be construed as constituting approval by this Commission of any service, rate, charge, classification, or any rule, regulation, or practice affecting such service or rate; nor shall this order be deemed as recognition of any claimed contractual right or obligation affecting or relating to such service or rate.

(E) This order is without prejudice to any findings or orders which have been or may hereafter be made by this Commission in any proceeding now pending, or hereafter instituted by or against East Tennessee.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## THE MANUFACTURERS LIGHT AND HEAT COMPANY, DOCKET NO. CP67-262

### FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT AND ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 28, 1967)

On March 13, 1967, as supplemented on May 11, 1967, The Manufacturers Light and Heat Company (Applicant), filed in Docket No. CP67-262 an application pursuant to Sections 7(b) and 7(c) of the Natural Gas Act for permission and approval to abandon certain natural gas facilities and for a certificate of public convenience and necessity authorizing Applicant to construct and operate certain natural gas facilities, during the calendar years 1967 and 1968, to assure continued dependable service to existing markets in Pennsylvania and West Virginia and provide for normal growth of these markets as well as to make more efficient use of its facilities, all as more fully set forth in the application as supplemented.

Applicant seeks authorization for the following projects in 1967 and 1968:

(1) abandon and remove 7.11 miles of 8-inch pipeline and replace with 7.15 miles of 10-inch pipeline in Beaver County, Pennsylvania.

(2) abandon and remove 7.86 miles of 10-inch pipeline and replace with 8.50 miles of 12-inch pipeline in Lawrence and Butler Counties, Pennsylvania, and

(3) construct 0.89 miles of 6-inch pipeline and 0.16 miles of 2-inch pipeline.

(4) abandon 5.70 miles of 6-inch pipeline and 1.05 miles of 4-inch and 6-inch pipeline in Wetzel County, West Virginia.

The total estimated cost of Applicant's proposed construction is $682,000, which cost will be financed through the issuance and sale of promissory notes or common stock to Applicant's parent company, The Columbia Gas System, Inc.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on June 22, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, and supplement thereto submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, The Manufacturers Light and Heat Company, a Pennsylvania corporation having its principal place of business in Pittsburgh, Pennsylvania, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of December 29, 1944, in Docket No. G-593, *et al.* (4 FPC 821).

(2) The facilities proposed to be abandoned by Applicant as hereinbefore described and as more fully described in the application are used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and such abandonment is subject to the requirements of Subsection (c) of Section 7 of the Natural Gas Act.

(3) The proposed abandonment of the aforesaid facilities by Applicant is permitted by the public convenience and necessity and permission and approval thereof should be granted as hereinafter ordered.

(4) The proposed construction and operation of facilities by Applicant as hereinbefore described and as more fully described in the application will be used in the transportation of natural gas in interstate commerce and are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(5) The aforesaid proposed construction and operation of facilities, are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(6) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder .

(7) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) Permission for and approval of the abandonment by Applicant of the facilities hereinbefore described, as more fully described in the application are granted.

(B) A certificate of public convenience and necessity is issued to Applicant, authorizing the construction and operation of facilities as hereinbefore described, all as more fully described in the application and supplement thereto.

(C) The certificate issued by paragraph (B) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(D) Applicant shall advise the Commission of the date of abandonment of the facilities as authorized in paragraph (A) above within ten days of such abandonment.

(E) The facilities authorized shall be completed and placed in actual operation, as provided in paragraph (b) of Section 157.20 of the aforesaid Regulations by October 1, 1968.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## PACIFIC GAS AND ELECTRIC COMPANY, PROJECT NO. 187

### ORDER MODIFYING LICENSE EXHIBIT H

(Issued June 28, 1967)

On March 8, 1967, Pacific Gas and Electric Company, licensee for Bullards Bar Project No. 187, filed an application for modification of Exhibit H of the license by adding thereto a notation appearing on a print of Exhibit H filed with the application.

Exhibit H is a location map which shows the location of the Bullards Bar Project. It was approved as part of the license for Project No. 187 to serve in lieu of Exhibit J. Exhibit H, however, indicates project boundaries for hydroelectric developments in addition to the Bullards Bar Project authorized in the license. Such other project boundaries, which embrace both Government and private lands, are not necessary for and are not utilized by the Bullards Bar Project. The licensed Bullards Bar Project utilizes the lands shown on license maps, Exhibits K-1-a and K-2-b, FPC Nos. 187-30 and -30) and provided the basis for assessing annual charges under the license for the occupancy of Government lands by the project.

In the above circumstances, the licensee requests that a notation be made on license Exhibit H for the purpose of indicating that the only lands presently being utilized by the project are those shown on the license Exhibit K maps.

*The Commission finds:*

It is appropriate in administering Part I of the Federal Power Act to modify license Exhibit H in the manner requested by the licensee for Project No. 187, and the Exhibit H with the notation thereon should be approved as part of the license for the project.

*The Commission orders:*

(A) Exhibit H (FPC No. 187–12) of the license for Project No. 187 is hereby modified by adding to the bottom thereof the following notation, and as so modified is hereby approved as part of the license for Project No. 187:

> Pursuant to licensee's letter dated March 6, 1967 [filed March 8, 1967] the project boundary is hereby clarified and confined to the area utilized by the project as depicted on approved [license] maps, Exhibits K-1-a and K-2-b (FPC Nos. 187–30 and–31).

(B) The lands not depicted on the Exhibit K maps mentioned in paragraph (A) above are hereby excluded from the license for the project.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## CITY OF PETERSBURG, ALASKA, PROJECT NO. 2521

### ORDER EXTENDING PERIOD OF PRELIMINARY PERMIT

(Issued June 28, 1967)

Application was filed on April 5, 1967 by the City of Petersburg, Alaska, permittee of the proposed Thomas Bay Project No. 2521, for a one-year extension of the period of the permit. The permit was issued for a period of two years, effective as of September 1, 1965.

The permittee advises that the extension of the period of the permit as applied for is desirable to complete its studies and file an application for a license.

*The Commission finds:*

It is appropriate for the purposes of the Federal Power Act to grant the requested extension of the period of the permit.

*The Commission orders:*

The period of the permit for proposed Project No. 2521 is hereby extended through August 31, 1968.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## TRANSCONTINENTAL GAS PIPE LINE CORPORATION, DOCKET NO. CP67-322

### FINDINGS AND ORDER AFTER STATUTORY HEARING PERMITTING AND APPROVING ABANDONMENT

(Issued June 28, 1967)

On May 1, 1967, Transcontinental Gas Pipe Line Corporation (Applicant) filed in Docket No. CP67-322 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon a 200 horsepower skid-mounted booster station designated as No. 31, together with appurtenant meter station, located in the San Miguel Creek Field, McMullen County, Texas, all as more fully set forth in the application.

The facilities were installed pursuant to a "budget-type" certificate covering field booster compressor facilities and appurtenant equipment issued April 27, 1962 in Applicant's Docket No. CP62-103, 27 FPC 853.

The facilities presently serve as a means of taking into Applicant's system "flash vapor" natural gas purchased from Humble Oil & Refining Company (Humble), Sinclair Oil & Gas Company (Sinclair), Atlantic Richfield Company (Atlantic) and Forest Oil Corporation (Forest). As a result of realignment of production and processing facilities within the field, Humble now desires to process these flash vapors and has agreed to compress all processed volumes prior to the entry of the gas into Applicant's system. Thus, Applicant no longer requires the facilities for the purpose for which they were installed, and Humble has agreed to purchase the compressor station in place for $28,600.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on June 22, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Transcontinental Gas Pipe Line Corporation, a Delaware corporation having its principal place of business in Houston, Texas, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued May 29, 1948, in Docket No. G-704 (7 FPC 24).

(2) The facilities proposed to be abandoned, as hereinbefore described and as more fully described in the application herein, are used in the transportation and sale of natural gas in interstate commerce subject to the jurisdiction of the Commission, and such abandonment is subject to the requirements of Subsection (b) of Section 7 of the Natural Gas Act.

(3) The proposed abandonment of the aforesaid facilities is permitted by the public convenience and necessity and approval therefor should be granted as hereinafter ordered.

*The Commission orders:*

(A) Permission for and approval of the abandonment of the facilities hereinbefore described, as more fully described in the application in this proceeding, are granted to Applicant.

(B) Applicant shall advise the Commission of the date of abandonment of the facilities as authorized in paragraph (A) above within ten days of such abandonment.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## UNITED GAS PIPE LINE COMPANY AND NATURAL GAS PIPELINE COMPANY OF AMERICA, DOCKET NO. CP67-315

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 28, 1967)

On April 27, 1967, United Gas Pipe Line Company (United) and Natural Gas Pipeline Company of America (Natural), filed in Docket No. CP67-315 a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the exchange of natural gas, all as more fully set forth in the application.

Specifically, Applicant seeks authorization to modify facilities so as to convert an existing point of interconnection in Polk County, Texas, from solely a sales point to both a sales point and an emergency exchange point. The exchange will be on a gas for gas basis, and will be covered in the gas exchange agreement to be filed by United and Natural as special rate schedules to their respective tariffs.

The Commission in its order issued May 18, 1962, 27 FPC 997, in Docket Nos. CP62-121 and CP62-134 authorized United, among other things, to install facilities and deliver up to 50,000 Mcf of natural gas per day to Natural at the Polk County interconnection (to be converted into an exchange point). In Docket No. CP62-175 United was authorized (August 14, 1962) to increase its daily deliveries to Natural to 75,000 Mcf per day. Through the proposed facilities natural gas will normally be sold to Natural, but in an emergency increased volumes would be delivered to Natural or the flow could be reversed to permit deliveries by Natural to United. Under emergency exchange conditions the total volume to be received by Natural (200,000 Mcf per day) would include United's authorized sales volume of 75,000 Mcf per day.

Applicant's estimate that the cost of modifying United's metering facilities will be $7,070, and cost of Natural's side tap facilities will be $3,300, which will be defrayed from their respective company funds on hand. United will own, operate and maintain the metering facilities.

After due notice, no petition to intervene, notice of intervention or protest to the granting of the application has been filed.

At a hearing held on June 22, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, United Gas Pipe Line Company, a Delaware Corporation having its principal place of business in Shreveport, Louisiana, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order of November 10, 1942, in Docket No. G-232 (3 FPC 863).

(2) Applicant, Natural Gas Pipeline Company of America, a Delaware corporation having its principal place of business in Chicago, Illinois, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of November 7, 1958, in Docket No. G-9966 (20 FPC 694).

(3) The proposed construction and operation of facilities and exchange of natural gas as hereinbefore described, and as more fully described in the application and exhibits in this proceeding, are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(4) The aforesaid construction and operation of facilities and emergency exchange of natural gas are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(5) United and Natural are able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural

Gas Act and the requirements, rules and regulations of the Commission thereunder.

(6) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon United's and Natural's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to United and Natural in this proceeding, authorizing the construction and operation of facilities and the emergency exchange of natural gas as hereinbefore described and as more fully described in the application and exhibits in this proceeding, subject to the jurisdiction of the Commission upon the terms and conditions of this order .

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon United and Natural's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) The facilities authorized shall be completed and placed in actual operation, as provided by paragraph (b) of Section 157.20 of the aforesaid Regulations within 6 months of the date on which this order issues.

(D) United and Natural shall file within 30 days after the issuance of this order the exchange agreement dated March 2, 1967, as a special rate schedule to their respective FPC Gas Tariffs.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## ALABAMA-TENNESSEE NATURAL GAS COMPANY, DOCKET NO. CP67-218

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 29, 1967)

On January 31, 1967, Alabama-Tennessee Natural Gas Company (Applicant) filed in Docket No. CP67-218 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities in order to render additional natural gas service to certain existing resale and industrial customers beginning with the 1967-68 winter season and continuing thereafter, all as more fully set forth in the application.

Applicant proposes to construct and operate approximately 2.1 miles of 10¾ inch O.D. pipeline loop in Limestone County, Alabama, paralleling its existing 10¾ inch main line in that area and completing the looping of its main line system in the State of Alabama. Applicant further proposes to construct and operate approximately 0.5 mile of 6-inch lateral pipeline loop in Colbert County, Alabama.

The proposed 0.5 mile of 6-inch lateral will extend from Applicant's Muscle Shoals Check Meter Station to the present beginning point of its existing 6-inch Ford Lateral and will parallel the existing 4-inch line which presently serves both Muscle Shoals Natural Gas Corporation (Muscle Shoals), a resale customer and Ford Motor Company (Ford), an industrial customer. This proposed lateral will enable Applicant to operate more efficiently by separating deliveries to Ford and to Muscle Shoals.

Applicant proposes to deliver a total additional volume of 4,650 Mcf of natural gas per day to 9 existing customers, 1,590 Mcf of this volume to be delivered to 6 of its resale customers[1] and 3,060 Mcf to be delivered to 3 of its industrial customers.[2]

The proposed additional sales of natural gas for resale will be made under existing rate schedules on file with the Commission and the proposed additional direct sales will be made under contracts previously filed with the Commission.

The total estimated cost of Applicant's proposed project is $130,000, which cost will be financed from current earnings and short-term bank loans.

After due notice, no protest, petition to intervene or notice of intervention has been filed.

At a hearing held on June 22, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application and exhibits thereto, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Alabama-Tennessee Natural Gas Company, a Delaware corporation having its principal place of business in Florence, Alabama, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order issued July 2, 1948, in Docket No. G-585 (7 FPC 251).

(2) The facilities hereinbefore described and as more fully described in the application in this proceeding are proposed to be used in the transportation and sale of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof and the transportation and sale of natural gas by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The construction and operation of the proposed facilities and the transportation and sale of natural gas by Applicant are required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (b), (c)(1), (c)(3), (c)(4), (e), (f) and (g) of Section 157.20 of said Regulations.

(5) The certificate hereinafter issued should be conditioned upon Applicant's filing with the Commission, in accordance with the Commission's Regulations under the Natural Gas Act, appropriate revised service agreements with those customers to whom increased natural gas service will be rendered pursuant to the authorization contained herein.

---

[1] Decatur, Russellville, Sheffield and Tuscumbia, Alabama; Selmer, Tennessee and Muscle Shoals Natural Gas Corporation.

[2] Amoco Chemicals Corporation, Reynolds Metals Company and Ford Motor Company.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to Applicant authorizing the construction and operation of the facilities and the transportation and sale of natural gas as hereinbefore described and as more fully set forth in the application in this proceeding, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c) (1), (c) (3), (c) (4), (e), (f) and (g) of Section 157.20 of such Regulations.

(C) Transportation of natural gas by Applicant for direct sale to Amoco Chemicals Corporation, Reynolds Metals Company and the Ford Motor Company shall be limited in Mcf per day to 960, 16,500, and 3,400, respectively, in accordance with Applicant's proposal herein.

(D) The facilities authorized shall be completed and placed in actual operation and transportation and sale of natural gas authorized in paragraph (A) above shall commence as provided by paragraph (b) of Section 157.20 of the Commission's Regulations under the Natural Gas Act within 6 months from the date of this order.

(E) The certificate issued by paragraph (A) above is conditioned upon Applicant's filing with the Commission, in accordance with the Commission's Regulations under the Natural Gas Act, appropriate revised service agreements with those customers to whom increased natural gas service will be rendered pursuant to the authorization contained herein.

(F) This certificate shall not entitle the industrial customers to whom firm deliveries are authorized herein to any priorities to additional gas for meeting any future increases in their requirements at the expense of firm resale customers desiring additional gas to meet any future increase in their requirements.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## COLORADO INTERSTATE GAS COMPANY, DOCKET NO. CP67–265

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 29, 1967)

On March 16, 1967, Colorado Interstate Gas Company (Applicant) filed in Docket No. CP67–265 an application and a supplement thereto on May 3, 1967 pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale of natural gas on a short-term basis to Panhandle Eastern Pipe Line Company (Panhandle), all as more fully set forth in the application and supplement.

Applicant seeks authorization to sell and deliver to Panhandle on an interruptible basis such daily volumes of natural gas as Panhandle may require and as Applicant may have available for a term ending one year from the date of initial delivery. Panhandle anticipates that its purchases will average 15,000 Mcf of natural gas per day during the term of the agreement. Applicant is not required on any day to deliver quantities of natural gas in excess of 20,000 Mcf of natural gas per day. Panhandle will pay a commodity charge of 15.5 cents per Mcf of natural gas for all volumes delivered by Applicant.

Sales are to be pursuant to a signed contract, dated February 13, 1967, which will be filed as Rate Schedule X-32. The contract provides for fully interruptible sales of up to 20,000 Mcf per day for a term of one year from the date of initial delivery.

Applicant proposes to make deliveries at two existing interconnections one in Grant County, Kansas, the other in Hutchinson County, Texas.

After due notice, no protest to the granting of the application has been filed. The State Corporation Commission of Kansas filed a notice of intervention on April 3, and a supplement thereto on April 7, 1967 but does not request a formal hearing or object to Applicant's proposals. Similarly the petition to intervene filed by Panhandle Eastern Pipe Line Company on April 13, 1967 does not request a formal hearing or object to Applicant's proposals.

At a hearing held on June 22, 1967, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the application, supplement and exhibits in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Colorado Interstate Gas Company, a Delaware corporation having its principal place of business in Colorado Springs, Colorado, is a "natural-gas company" within the meaning of the Natural Gas Act, as heretofore found by the Commission in its order issued June 5, 1945, in Docket No. G-294 (4 FPC 936).

(2) The proposed sale of natural gas, as hereinbefore described and as more fully described in the application and supplements and exhibits in this proceeding are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) The aforesaid proposed sale of natural gas is required by the public convenience and necessity and a certificate therefor should be issued as hereinafter ordered and conditioned.

(4) Applicant is able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act, and the requirements, rules and regulations of the Commission thereunder.

(5) Public convenience and necessity require that the certificate issued hereinafter and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act, and particularly the general terms and conditions set forth in paragraphs (a), (c) (3) and (e) of Section 157.20 of such Regulations.

*The Commission orders:*

(A) A certificate of public convenience and necessity is issued to Applicant, authorizing the sale of up to 20,000 Mcf per day of natural gas for a period of one year from the date of initial delivery as described herein and as more fully described in the application and supplement filed in this proceeding, subject to the jurisdiction of the Commission, upon the terms and conditions of this order.

(B) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (c)(3) and (e) of Section 157.20 of such Regulations.

(C) The sales and deliveries authorized in paragraph (A) above shall commence as provided in paragraph (b) of Section 157.20 of the aforesaid Regulations within 30 days of the issuance of this order.

(D) Applicant shall make appropriate tariff filings reflecting the sales and deliveries authorized herein.

(E) The interruptible service authorized herein shall be curtailed or interrupted to the extent required to meet existing or future contracted maximum delivery obligations of Colorado Interstate Gas Company for firm service to its customers.

---

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## SOUTHERN NATURAL GAS COMPANY, DOCKET NO. CP67-296

### FINDINGS AND ORDER AFTER STATUTORY HEARING ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 29, 1967)

On April 11, 1967, Southern Natural Gas Company (Applicant) filed in Docket No. CP67-296 a "budget-type" application as supplemented on April 28, 1967, pursuant to Section 7(c) of the Natural Gas Act as implemented by Section 157.7(b) of the Regulations under the Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities for the transportation of natural gas in interstate commerce, all as more fully set forth in the application.

Specifically, Applicant proposes to construct during the twelve-month period commencing August 7, 1967, and to operate routine gas purchase facilities necessary to enable it to take into its certificated main pipeline system natural gas purchased from independent producers or other similar sellers authorized by the Commission to make a sale to Applicant for resale in interstate commerce.

The total estimated cost of Applicant's proposed construction will not exceed a maximum of $1,000,000, with no single project exceeding a cost of $500,000. Applicant proposes to finance said costs from cash on hand or from funds available from current operations.

Because the total maximum expenditure proposed for a single project exceeds the limitations prescribed by Section 157.7(b)(1)(ii) of the Regulations under the Natural Gas Act, Applicant requests waiver thereof.

After due notice, no protest, petition to intervene or notice of intervention has been filed herein.

At a hearing held on June 22, 1967, the Commission on its own motion received and made part of the record in this proceeding all evidence, including the application and exhibits, submitted in support of the authorization sought herein, and upon consideration of the record,

*The Commission finds:*

(1) Applicant, Southern Natural Gas Company, a Delaware corporation having its principal place of business in Birmingham, Alabama, is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission in its order of October 6, 1942 in Docket No. G-296 (3 FPC 822).

(2) The facilities hereinbefore described, as more fully described in the application in this proceeding, are proposed to be used in the transportation of natural gas in interstate commerce, subject to the jurisdiction of the Commission, and the construction and operation thereof by Applicant are subject to the requirements of Subsections (c) and (e) of Section 7 of the Natural Gas Act.

(3) Applicant is able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(4) Good cause has been shown for waiver of the cost limitations imposed by Section 157.7(b)(1)(ii) of the Regulations under the Natural Gas Act.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Applicant should submit within 60 days after the expiration of the authorization granted hereinafter, a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(6) Public convenience and necessity require that the certificate hereinafter issued and the rights granted thereunder be conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(7) The authorization hereinafter granted should be limited to construction during the 12-month period commencing August 7, 1967, and the total expenditures for facilities to be constructed thereunder should be limited to a maximum of $1,000,000, with no single project to exceed a cost of $500,000.

*The Commission orders:*

(A) Upon the terms and conditions of this order, a certificate of public convenience and necessity is issued authorizing Applicant, Southern Natural Gas Company, to construct during the 12-month period commencing August 7, 1967, the proposed facilities hereinbefore described, as more fully described in the application in this proceeding, and to operate such facilities only to take natural gas supplies from producers who have received authorization from the Commission to sell natural gas to said Applicant.

(B) Applicant shall submit within 60 days after the expiration of the authorization granted by paragraph (A) above a statement in compliance with subparagraph (3) of Section 157.7(b) of the Commission's Regulations under the Natural Gas Act.

(C) The cost limitations imposed by Section 157.7(b)(1)(ii) of the Regulations under the Natural Gas Act are hereby waived in this proceeding.

(D) The certificate issued by paragraph (A) above and the rights granted thereunder are conditioned upon Applicant's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in paragraphs (a), (e), (f) and (g) of Section 157.20 of said Regulations.

(E) The authorization granted in paragraph (A) above is limited to construction during the 12-month period commencing August 7, 1967, and the total expenditures for facilities to be constructed thereunder are limited to a maximum of $1,000,000, with no single project to exceed a cost of $500,000.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

### ORDER INITIATING PROCEEDINGS, CONSOLIDATING PROCEEDINGS AND SETTING THE PROCEEDINGS SO CONSOLIDATED FOR HEARING

(Issued June 29, 1967)

Tennessee Gas Pipeline Company, the interstate pipeline division of Tenneco Inc., (Tennessee)[1] has applied, in Docket No. CP66-269, for a certificate of public convenience and necessity authorizing the construction and operation of 2.63 miles of pipeline facilities to connect reserves in the Bastian Bay Field, Plaquemines Parish, Louisiana, with its interstate pipeline transmission system. Pan American Petroleum Corporation (Pan American) has applied, in Docket No. CI66-910, for a certificate of public convenience and necessity authorizing the assignment of certain leasehold interest in developed acreage in the Bastian Bay Field. Each of these applications has been filed pursuant to our mandate in Opinion No. 413, 30 FPC 1477 (1963), rehearing denied, 31 FPC 241 (1964).

The Bastian Bay acreage involved in each of the applications was acquired by Pan American between 1954 and 1959 through its acquisition of twelve oil, gas, and mineral leases in what was then undeveloped acreage. By 1960 Pan American had succeeded in proving all of the acreage covered by the twelve leases and on December 1, 1960, it consummated a "Lease Sale Agreement" and an "Assignment and Conveyance" whereby it assigned to Tennessee its rights in the twelve leases, together with its wells, equipment and related personal property on the acreage affected, for a purchase price, subject to redetermination, of $159,463,500. Tennessee paid $9,427,104 at the time and agreed to pay the balance in seventeen annual installments. The contract provided for a redetermination of the gas revenues, which had been agreed by the parties at the time of contracting to be 759,350,000 Mcf at 15.025 psia, between 1969 and 1973 at the request of either party and for the adjustment of the purchase price upon such redetermination.

The assignment of leases was subject to certain reservations. Pan American (1) retained its rights in minerals other than natural gas, oil, and other petroleum liquids; (2) retained its rights in the leases below the bottom of the deepest presently known productive horizons; (3) reserved, as a production payment, all proceeds received by Tennessee from the sale of oil produced on the leased acreage, such payment to terminate when 85% of the recoverable reserves have been produced; (4) reserved a similar production payment for proceeds received by Tennessee from the sales of separator liquids, permitting the deduction by Tennessee of its costs and expenses associated with such sales; and (5) retained the right to process all gas produced from the assigned leaseholds (including that attributable to the royalty interests) for the discovery of natural-gas liquids, with Tennessee to be reimbursed at 21 cents per Mcf for plant and fuel losses.

---

[1] Formerly Tennessee Gas Transmission Company. By order of July 20, 1966, 36 FPC 137. we permitted the amendment of Tennessee's pending application to reflect the change in corporate name which previously had been effected.

Prior to the assignment Pan American's wells had not been connected to an interstate pipeline. Following the sale Tennessee installed 2.63 miles of 12-inch connecting line for which it here seeks certification. Gas from the Bastian Bay leaseholds has flowed into Tennessee's system since February 3, 1961.

Tennessee's construction of connecting facilities was undertaken pursuant to a budget certificate issued to it on January 6, 1961, in Docket No. CP61–106, pursuant to an application for facilities "to relieve applicant of the time and expense of preparing numerous relatively minor certificate applications, and the Commission and its staff of the burden of processing such routine applications." The application made no reference to Tennessee's acquisition of Bastian Bay reserves nor did it disclose Tennessee's intention to rely on the issuance of a budget authorization to connect any such reserves. As the budget application appeared routine and as no petition to intervene or protest had been filed, we granted the application, 25 FPC 129.

Subsequently, on April 6, 1961, having learned of the attachment by Tennessee of the Bastian Bay reserves, we reopened the proceedings in Docket No. CP61–106 to determine (1) whether the budget-type certificate therein issued covered the 2.63 miles of line connecting the Bastian Bay reserves with Tennessee's interstate system and (2) the cost to Tennessee of the reserves so acquired. On March 21, 1962, in Docket No. CI62–1034, we directed Pan American to show cause why it should not be found to have made a jurisdictional sale of natural gas to Tennessee. The show cause order thereafter was consolidated with the reopened Tennessee docket.

Following hearing the Commission, in Opinion No. 413, held, as to Tennessee, that the budget-type certificate did not cover the construction and operation of the 2.63 miles of connecting line noting that "the very size and cost of these reserves will necessarily have a material effect on Tennessee's rates." 30 FPC at 1486. Accordingly, the Commission concluded that the authorization of the connecting facilities without close scrutiny would be inconsistent with the mandate of CATCO (*Atlantic Refining Co.* v. *P.S.C. of N.Y.*, 360 U.S. 378.) This part of Opinion No. 413 was affirmed in *Tennessee Gas Transmission Co.*, v. *F.P.C.*, 340 F. 2d 100 (CA10). As to Pan American the Commission, although declining to determine the precise nature of the sale until such time as an appropriate application is filed, held that the Pan American-Tennessee leasehold assignment constitutes a jurisdictional sale of natural gas. Pan American and Tennessee were given six months from the date of the issuance of our order to file for appropriate Section 7 authorizations and the pending applications were filed pursuant thereto.

The royalty portion of the reserves at issue, as the Examiner found following the prior hearing, equals more than 25% of the total volume which Tennessee will receive from the leases, 30 FPC at 1491. Pursuant to its obligation under the lease assignment Tennessee negotiated separate contracts with the royalty owners whereby it agreed to pay the royalty owners for such interests at the rate of 22.5¢ per Mcf, plus reimbursement for the Louisiana severance tax of 2.3¢ per Mcf until January 1, 1962 and 25¢ per Mcf plus severance tax reimbursement (or 27.3¢ per Mcf) thereafter. Thus, it appears that the royalty owners have departed from the usual royalty situation and instead have elected to take their gas in-kind and negotiate their own sales. In the circumstances it would appear that these royalty owners have engaged in the jurisdictional sale of natural gas in interstate commerce for which sales the authorization of this Commission should have been obtained. Accordingly, we are hereby directing the following named royalty owners either to file, within forty-five days from the issuance of this order, for appropriate Section 7 certificates or to show cause why they should not be required to obtain such certification:[3]

The Delta Development Company, Inc.

Joan B. Fasterling Meyers
Edith Fasterling McGee and Kenneth McGee

We note that in addition to the aforementioned, the State of Louisiana and one of its local subdivisions (the Buras Levee District) are among the royalty owners of the acreage at issue. But Section 2(6) of the Natural Gas Act would seem to exclude such political entities from the definition of "natural-gas company" and thus exempt them from the necessity of obtaining this Commission's authorization prior to effectuating an interstate sale. However, in view of the fact that this Commission already has made clear its concern with the cost to Tennessee of the Bastian Bay reserves we would expect that both the State of Louisiana and the Buras Levee district will be most interested in the course of these proceedings and we would welcome their participation as interveners.

Since the application of Tennessee and Pan American raise common questions of law and fact we are consolidating them for hearing. Similarly, since the applications or responses to be filed by the aforementioned royalty owners are intimately related to each of the pending applications it is appropriate to consolidate those proceedings as well.

Timely petitions to intervene in Docket No. CI66-910 (the Pan American application), have been filed by Long Island Lighting Co., Consolidated Edison Company of New York, Inc., Brooklyn Union Gas Company, Consolidated Gas Supply Corporation, the East Ohio Gas Company, Lake Shore Pipe Line Co., and the Peoples Natural Gas Company, The Manufacturers Light and Heat Company, The Ohio Fuel Gas Company, United Fuel Gas Company, and Tennessee Gas Pipeline Company, a division of Tenneco Inc. In Docket No. CP66-269 (the Tennessee application), timely petitions to intervene have been filed by Public Service Electric and Gas Company, United Fuel Gas Company, The Manufacturers Light and Heat Company, The Ohio Fuel Gas Company, Consolidated Gas Supply Corporation, The East Ohio Gas Company, Lake Shore

---

[3] It should be clear that our action here in no way prejudges the pending proceeding of *William Harvey Denman, Trustee, et al. v. J.M. Huber Corporation*, Docket No. RI67-113, *et al.* In Denman the question is whether the Commission has jurisdiction over a landowner's royalty interest in natural gas leaseholds under traditional transactions where the royalty owner makes no independent contract for sale of his interest but instead receives a fixed percentage of the receipts the producer secures when he sells the gas.

**Pipe Line Co., The Peoples Natural Gas Company, The Brooklyn Union Gas Company, and Pan American Petroleum Corporation. Each of the timely petitions to intervene will be granted.[3]**

**These proceedings should be expedited by the holding of a pre-hearing conference to clarify the position of the parties and limit the issues. Since hearings have already been held on the underlying Bastian Bay transaction, the prehearing conference should also explore the extent to which the record in the prior hearings could be used in this case. The Examiner may allow the incorporation by reference of evidence from the prior proceeding in this proceeding and limit the presentation of the parties to the correction or supplementation of the prior record.**

***The Commission finds:***

**(1) It is necessary and appropriate in the public interest and to carry out the provisions of Sections 4, 5, 7 and 16 of the Natural Gas Act to direct Delta Development Company, Inc., Moise W. Dennery, Charles William Fasterling, Gertrude Jackman Fasterling, John Bernard Fasterling III, The Louisiana Land and Exploration Company, Joseph McCloskey, Joan B. Fasterling Meyers and Edith Fasterling McGee and Kenneth C. McGee to file, within 45 days of the issuance of this order, for appropriate certificates authorizing the sale by them, in-kind, of their royalty interests in gas in the Bastian Bay field to Tennessee, or show cause why they should not file for such certification.**

**(2) It is necessary and appropriate in the public interest and to carry out the provisions of Sections 4, 5, 7 and 16 of the Natural Gas Act to consolidate for hearing the proceedings heretofore initiated against the aforementioned royalty owners and the applications of Tennessee and Pan American.**

**(3) The granting of the above-mentioned petitions to intervene would be be in the public interest.**

***The Commission orders:***

**(A) That the Delta Development Company, Inc., Moise W. Dennery, Charles William Fasterling, Gertrude Jackman Fasterling, John Bernard Fasterling III, The Louisiana Land and Exploration Company, Joseph McCloskey, Joan B. Fasterling Meyers and Edith Fasterling McGee and Kenneth C. McGee, within 45 days of the issuance of this order, file appropriate applications for certificates authorizing the sale, by them, in-kind, of their royalty interest in Bastian Bay reserves to Tennessee or show cause why they should not be required so to file.**

**(B) That the proceedings hereby initiated against the aforementioned royalty owners and applications of Tennessee and Pan American are consolidated for hearing.**

**(C) That the above noted petitions to intervene are granted.**

**(D) That a prehearing conference shall be held in a hearing room of the Federal Power Commission, 441 G Street, N.W., Washington, D.C., on September 25, 1967, at 10:00 a.m., for the purpose of limiting the issues, effectuating factual stipulations and for such other purposes as may seem appropriate to the Presiding Examiner.**

**(E) Following the prehearing conference, the Presiding Examiner shall give notice of the date of hearing and shall prescribe such other procedures as he deems appropriate in the disposition of these proceedings.**

---

**[3] The Long Island Lighting Company, in addition to its timely intervention petition in the Pan American docket, filed an untimely intervention request in the Tennessee docket. In view of an order herein consolidating those dockets Long Island Lighting will be permitted to participate fully with respect to each of the applications.**

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## TEXAS EASTERN TRANSMISSION CORPORATION, DOCKET NO. G-12446; CONTINENTAL OIL COMPANY, DOCKET NO. CI66-890; SUN OIL COMPANY, DOCKET NO. CI66-891; M. H. MARR, DOCKET NO. CI66-892; GENERAL CRUDE OIL COMPANY, DOCKET NO. CI66-919

### ORDER CONSOLIDATING PROCEEDINGS AND SETTING MATTERS FOR HEARING

(Issued June 29, 1967)

The Continental Oil Company (Continental), the Sun Oil Company (Sun), M. H. Marr (Marr) and the General Crude Oil Company (General), have applied for certificates of public convenience and necessity authorizing the assignment of certain leasehold interests in developed acreage in the Rayne Field, Arcadia Parish, Louisiana. Texas Eastern Transmission Corporation (Texas Eastern) has applied for a certificate of public convenience and necessity authorizing the construction and operation of a 2200 horsepower compressor station and 22 miles of 14-inch pipeline to transport natural gas from the Rayne Field to Opelousas, Louisiana, where the gas would be delivered into its interstate pipeline system. Each of these applications is before us pursuant to our mandate in Opinion No. 378, 29 FPC 249.

The initial transaction which gave use to these applications took place on February 1, 1957, when Texas Eastern executed conventional twenty-year gas sales contracts with Continental, Sun, Marr and General, purchasing their natural gas production in the Rayne Field at an initial price of 23.9 cents per Mcf, including 1.3 cents per Mcf for reimbursement of state taxes. In April 1957, Texas Eastern applied for a certificate authorizing it to connect that production to its interstate pipeline system. Shortly thereafter each of the producers applied for certificates authorizing the sale of their gas to Texas Eastern. On April 15, 1958, the Examiner issued his initial decision wherein he recommended the grant of unconditional certificates to each of the applicants. However, before the Commission could act on the exceptions but after the decision of the Court of Appeals for the Third Circuit in *Public Service Commission of New York* v. *Federal Power Commission*, 257 F. 2d 717, affirmed *sub nom. Atlantic Refining Co.* v. *Public Service Commission of New York*, 360 U.S. 378 (the "CATCO" case), the producers cancelled their original contracts with Texas Eastern and, in September 1958, Texas Eastern filed a petition to reopen the hearing and to amend its application.

A new plan was then formulated under which Texas Eastern agreed to acquire the leasehold interest in the reserves which the producers had formerly committed under the standard gas purchase contracts. To effectuate the plan, Continental, Sun, Marr and General, on December 4, 1958, entered into a contract (designated "Lease Sale Agreement"), with Louisiana Gas Corporation, an intermediary created by Texas Eastern for this transaction. Texas Eastern, by agreement with Louisiana Gas, had the right to acquire and did acquire, title to the "Lease Sale Agreement".

Under the agreement the producers conveyed their leasehold rights to gas down to the base of the Nodosaria "A" Sand at a depth of from 13,650 to 13,980 feet, together with wells and related equipment, but reserved their "leasehold" rights to the oil and other minerals, except gas and condensate, below the Nodosaria "A" Sand. The producers also retained the right to receive, as "production payments", all proceeds from the sale of the condensate in excess of the costs of operating the leasehold, including processing expenses. Continental, which previously had operated the field for itself and the other producers, was to continue to conduct all operations, including drilling, developing and managing the wells and well equipment. A management agreement so providing was signed on July 27, 1959.

Consideration for the conveyance was $134,595,700, of which $12,420,500 was paid in cash and the balance in promissory notes payable in sixteen annual installments (ending in 1975). If gas production exceeds a specified amount payment of the notes, at Texas Eastern's nomination, may be accelerated (in inverse order of maturity) in accordance with a prescribed formula.

Although the exact amount of recoverable reserves in the Rayne Field is a matter of controversy, they are admittedly substantial; Texas Eastern's exceeds 900,000,000 Mcf. Recently, by supplement to their pending applications, the producers have filed an undertaking in which they guarantee minimum reserves of 830,648 MMcf at 14.73 psia and 60° F., agreeing to reimburse Texas Eastern in the amount of 20.220¢ per Mcf for any reserve deficiency below that amount providing such deficiency is not attributable to bad management on the part of Texas Eastern.

The Commission granted Texas Eastern's request to reopen the proceeding in order to consider the lease sale plan, and on June 23, 1959, 21 FPC 860, issued an unconditional certificate to Texas Eastern for its proposed facilities. On June 27, 1959, the transfer of the gas rights under the leases was completed and Texas Eastern began to receive gas from Rayne Field, gas which it has since transmitted and sold at wholesale in interstate commerce. However, on review, the Court of Appeals for the District of Columbia Circuit set aside the certificate order and remanded the case for further proceedings. *Public Service Commission of New York* v. *Federal Power Commission*, 287 F. 2d 143. The court held that, regardless of the form of the transaction, the Commission was required to consider fully the reasonableness of the acquisition costs to the pipeline.

On remand, and following a hearing at the conclusion of which the Examiner found that the average cost to Texas Eastern would be 24.34¢ per Mcf at 15.025 psia and recommended that a certificate to it be conditioned upon the inclusion of Rayne Field gas in the pipeline's cost of service at an initial price of 18.5¢ per Mcf, the Commission decided that it had jurisdiction over the "in-place" sale of the Rayne Field gas reserves but concluded that it was not in the public interest to certificate the transaction then before us for we were not satisfied that the unit cost of the gas was reasonable or that it could be determined with reasonable accuracy. Rather than deny outright Texas Eastern's application the Commission afforded it and the sellers an opportunity to revise their contractual arrangements so as to furnish assurance that the transactions, already partially consummated, would be consistent with the public interest.

The parties were given six months, following the completion of judicial review, "to work out new arrangements in the light of the requirements of the Natural Gas Act and our discussion * * *." 29 FPC at 257. Following affirmance by the Supreme Court of the Commission's holding that the assignment of the leaseholds constituted a jurisdictional sale of natural gas subject to the jurisdiction of this Commission, (*United Gas Improvement Co.* v. *Continental Oil Co., et al.*, 381 U.S. 392) Continental, Sun, Marr and General filed applications pursuant to our mandate. Texas Eastern has chosen to proceed upon the application which it filed on April 22, 1957 as amended on December 5, 1958.

Since the applications of Continental, Sun, Marr, General and Texas Eastern raise common questions of law and fact, we are consolidating them for hearing. Timely petitions to intervene were filed in Continental, Sun, Marr and General dockets by The Manufacturers Light and Heat Company, The Ohio Fuel Gas Company, Consolidated Gas Supply Corporation, The East Ohio Gas Company, The Peoples Natural Gas Company, The River Gas Company, Philadelphia Electric Corporation, Consolidated Edison Company of New York, Inc., Texas Eastern Transmission Corporation, Public Service Electric and Gas Company, Philadelphia Electric Company, Brooklyn Union Gas Company, and The Philadelphia Gas Works Division of The United Gas Improvement Company. The Public Service Commission of New York and The Long Island Lighting Company did not move to intervene in the General docket but did in the others. Nevertheless, in view of our action consolidating the proceedings they will be permitted to participate fully with respect to each of the applications, as will each of the parties already permitted to intervene in the Texas Eastern docket.

These proceedings should be expedited by the holding of a prehearing conference to clarify the position of the parties and limit the issues. Since hearings already have been held on the underlying Rayne Field transaction, the prehearing conference should explore the extent to which the record in the prior hearing could be used in this case. The Examiner may allow the incorporation by reference of evidence from the prior proceeding in this proceeding and limit the presentation of the parties to the correction or supplementation of the prior record.

*The Commission finds:*

(1) It is necessary and appropriate in the public interest and to carry out the provisions of Sections 4, 5, 7 and 16 of the Natural Gas Act to consolidate for hearing the Continental, Sun, Marr, General and Texas Eastern applications.

(2) The granting of the above-mentioned petitions to intervene would be in the public interest.

*The Commission orders:*

(A) That the application of Continental (Docket No. CI66-890), Sun (Docket No. CI66-891), Marr (Docket No. CI66-892), General (Docket No. CI66-919) and Texas Eastern (Docket No. G-12446) are consolidated for hearing.

(B) That the above-noted petitions to intervene are granted.

(C) That a prehearing conference shall be held in a hearing room of the Federal Power Commission, 441 G Street, N.W., Washington, D.C., on October 22, 1967, at 10:00 a.m., for the purpose of limiting the issues, effectuating factual stipulations and for such other purposes as may seem appropriate to the Presiding Examiner.

(D) Following the prehearing conference, the Presiding Examiner shall give notice of the date of hearing and shall prescribe such other procedures as he deems appropriate in the disposition of these proceedings.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## TEXAS GAS TRANSMISSION CORPORATION, DOCKET NO. CP61-123

### ORDER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 29, 1967)

On May 15, 1967, Texas Gas Transmission Corporation (Petitioner) filed in Docket No. CP61-123 a petition to amend the order issued by the Commission in said docket on February 8, 1965, 33 FPC 196, by authorizing Petitioner to construct and operate approximately 3.82 miles of 26-inch pipeline and thereby conform the certificate to the actual installation, all as more fully set forth in the petition to amend.

The above-mentioned order authorized Petitioner, *inter alia*, to construct and operate approximately 5.31 miles of 26-inch pipeline loop between its Hardinsburg, Kentucky, Compressor Station and its Jeffersontown, Kentucky, Compressor Station. By the instant filing, Petitioner seeks authorization for the construction and operation of 3.82 miles of 26-inch pipeline loop which it has already installed to complete the aforementioned pipeline loop. The actual installation required a loop segment of approximately 9.13 miles and Petitioner inadvertently proposed to install only 5.31 miles of the 9.13 mile segment. This proposal was authorized by order issued February 8, 1965. Petitioner's operating department was unaware of this omission and constructed the correct length of the segment. Thus Petitioner installed approximately 3.82 miles of 26-inch pipeline for which it had no authority.

The total actual cost to Petitioner of the approximately 9.13 miles of 26-inch pipeline was $882,343 of which the estimated cost of the 5.31 mile segment was $511,665.

After due notice, no protest, petition to intervene or notice of intervention has been filed.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued in the instant docket on February 8, 1965, be amended as hereinafter ordered and conditioned.

*The Commission orders:*

(A) The Commission's order issued on February 8, 1965, in Docket No. CP61-123 is amended by authorizing Petitioner to construct and operate approximately 9.13 miles of 26-inch pipeline loop in lieu of the 5.31 miles of 26-inch pipeline loop authorized therein.

(B) In all other respects the certificate issued in the subject docket shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor Jr., Charles R. Ross, Carl E. Bagge and John A. Carver, Jr.

## UNITED FUEL GAS COMPANY, DOCKET NO. G-10658

### ORDER FURTHER AMENDING ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

(Issued June 29, 1967)

On May 12, 1967, United Fuel Gas Company (Petitioner) filed in Docket No. G-10658 a petition to amend the order issued in said docket on September 18, 1956, 16 FPC 978, as amended by the orders issued October 27, 1964, 32 FPC 1221, and March 31, 1967, 37 FPC 703, authorizing an extension of one month in the period during which increased daily deliveries may be made, on an interruptible basis to one of its industrial customers all as more fully set forth in the petition to amend.

By the order issued in the instant proceeding on September 18, 1956, Petitioner was authorized to deliver a maximum of 35,000 Mcf of natural gas per day to E. I. du Pont de Nemours Company (du Pont), Belle, Kanawaha County, West Virginia. By the amending order issued October 27, 1964, Petitioner was authorized to increase its deliveries to du Pont to a maximum of 60,000 Mcf per day.

On March 31, 1967, Petitioner was authorized to deliver to du Pont for the period from April 1, 1967, through October 1, 1967, a maximum daily quantity of 70,000 Mcf in order that du Pont may effectuate certain changes in its plant facilities.

Petitioner now states that it inadvertently mis-stated the interim period during which the increased deliveries were required, and that the customer actually requested such increased volumes for the period April 1, 1967, through October 31, 1967. Petitioner requests further amendment of the Commission's amending order, issued March 31, 1967 so as to terminate the interim authorization on October 31, 1967, in lieu of the existing termination date of October 1, 1967.

Due notice of the filing of the petition to amend and opportunity for hearing thereon have been given by publication in the Federal Register on May 25, 1967 (32 F.R. 7650). No protest, petition to intervene, or notice of intervention has been filed in the proceeding concerning this amendment.

*The Commission finds:*

It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the Commission's order issued September 18, 1956, as amended October 27, 1964, and March 31, 1967, in Docket No. G-10658 be further amended as hereinafter ordered.

*The Commission orders:*

(A) The Commission's order issued September 18, 1956, as amended October 27, 1964, and March 31, 1967, is further amended so as to authorize Petitioner to transport and deliver up to 70,000 Mcf of natural gas daily on an interruptible basis to du Pont to October 31, 1967, in lieu of October 1, 1967, as presently fixed.

(B) The certificate order issued in Docket No. G-10658 is amended on the express condition that the increased interruptible service authorized herein shall be curtailed or interrupted to the extent required to meet existing or future maximum contract obligations of Petitioner for firm service to its customers.

(C) In all other respects said order shall remain in full force and effect.

Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge

## INDEPENDENT PRODUCERS OF NATURAL GAS—ANTI-TRIGGERING CONDITIONS IN CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY, DOCKET NO. R-329

### ORDER NO. 352

### ELEVENTH AMENDMENT TO STATEMENT OF GENERAL POLICY NO. 61-1

(Issued June 30, 1967)*

The Tenth Amendment to the Commission's Statement of General Policy No. 61-1** provided that all permanent certificates issued with respect to applications filed after April 15, 1965, would contain substantially the following condition:

> No increase in rate shall be filed prior to ---------- at any price which would exceed the ceiling prescribed for the given area by paragraph (d) of the Commission's Statement of General Policy 61-1, as amended.

The moratorium period in the above condition extended to January 1, 1968, for all areas except the South Louisiana and Oklahoma areas where a July 1, 1967, date had previously been established.

In view of the pending expiration of these moratoria periods, we think it appropriate for the same reasons set forth in the Tenth Amendment to revise paragraph (d) of the Commission's Statement of General Policy No. 61-1 to preclude any rate increase filing above the anti-triggering levels set forth therein until January 1, 1970, in all permanent certificates issued with regard to applications filed on or after July 1, 1967. Applications filed prior to July 1, 1967, will remain subject to the provisions of the Tenth Amendment. (§ 2.56 (d)(1), (2)).

Any applicant wishing to demonstrate that the price specified in the Policy Statement is not a triggering rate or otherwise wishing to contest the propriety of the condition will be permitted to do so, upon filing a timely request. In such situation, the application will be set for formal hearing and, if the producer wishes to commence operation pending such hearing, he must comply with the provisions of section 157.28 of the Regulations under the Natural Gas Act governing temporary authorizations.

*The Commission finds:*

In view of the fact that this Statement of Policy does not prescribe any course of action on the part of any person but merely sets forth the Commission's contemplated course of action, notice under section 4 of the Administrative Procedure Act (5 U.S.C. 553) is not required and the Statement may be made effective upon issuance.

*The Commission*, acting pursuant to authority granted by the Natural Gas Act, as amended, particularly sections 4, 5, 7, and 16 thereof (52 Stat. 822, 823, 824, 830; 15 U.S.C. 717c, 717d, 717f, 717o), *orders*:

(A) Effective upon the issuance of this order, § 2.56, Part 2, Statements of General Policy and Interpretations, Chapter I of Title 18 of the Code of Federal Regulations, is amended by adding thereto a center heading and two new subparagraphs (3) and (4) to paragraph (d), as follows:

---

*Published in the Federal Register on July 7, 1967 (32 F.R. 9955).

**Promulgated by Order No. 296, Docket No. R-273, issued April 5, 1965 (33 FPC 682, 30 F.R. 4670).

**[Eleventh Amendment]**

**§ 2.56 Area price levels for natural gas sales by independent producers.**

* * * * * * *

**(d) *****

**(3) All permanent certificates of public convenience and necessity granting applications filed on or after July 1, 1967, will contain a condition, substantially in the language set out in subparagraph (4) of this paragraph, precluding any filing of an increased rate at a price in excess of those designated in the table referred to in subparagraph (1) of this paragraph, prior to January 1, 1970, unless at the time of filing such certificate application, or within the time fixed in the notice of application for filing protests or petitions to intervene, the applicant indicates in writing that it is unwilling to accept such a condition in which event the application will be set for formal hearing to determine, *inter alia*, whether any grant of certificate shall be so conditioned.**

**(4) Standard anti-triggering condition: "No increase in rate shall be filed prior to January 1, 1970 at any price which would exceed the ceiling prescribed for the given area by paragraph (d)(3) of the Commission's Statement of General Policy No. 61-1, as amended."**

**(B) The Secretary shall cause prompt publication of this order to be made in the Federal Register.**

---

**Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge**

## PUBLIC UTILITY DISTRICT NO. 1 OF SNOHOMISH COUNTY, WASHINGTON AND CITY OF EVERETT, WASHINGTON, PROJECT NO. 2157

### SUPPLEMENTAL ORDER

**(Issued June 30, 1967)**

**Pursuant to the Commission's order of May 19, 1967, 37 FPC 957, as amended, a hearing was convened in Seattle, Washington on *inter alia* water releases in the Sultan River, project inspection and consideration of repairs to project structures. Testimony of witnesses for the joint licensees at pages 76, 77, 86, 87 and 123 of the record makes it clear that repairs to Culmback Dam outlet tunnel, one of the project structures, may be safely deferred until next year. However, conditions of the downstream diversion dam utilized in water supply to the City of Everett are such that repairs are immediately necessary this year in order to avoid danger of structural failure and subsequent serious impairment of the City's water supply system.**

**To meet the above conditions by accomplishing necessary repairs to the diversion dam this summer, staff, joint licensees and petitioners State of Washington Department of Fisheries and Game, recognized the need for certain minimum water releases during the period of repair to preserve fish life. The understanding of the joint licensees and petitioners is reflected in an agreement dated June 15, 1967, pages 239 and 240 of the record.**

**Following execution of the June 15, 1967 agreement the hearing was recessed by the Presiding Examiner to permit joint licensees to begin immediate plans for making repairs as soon as possible to the diversion dam and to provide the minimum water releases for fish (Tr. 240-241).**

**Counsel for the Public Utility District at page 237 of the record noted that the June 15 agreement was made with the understanding that it would not prejudice the rights of the Public Utility District or City with regard to future water releases when repairs are made at Culmback Dam and/or the City's diversion dam in 1968 or beyond.**

***The Commission finds:***

**It is necessary and appropriate for the purposes of the Federal Power Act, the Commission's Regulations thereunder and the license for Project No. 2157 to order as hereinafter provided.**

***The Commission orders:***

**(A) Further hearings in this proceeding are continued for a period of 120 days.**

**(B) The Commission's order of May 19, 1967 requiring continuation of present flows is modified in accordance with the terms of the June 15 agreement of the joint licensees and petitioners which is hereby incorporated by reference in its entirety, so as to provide a temporary minimum flow of water for fish during the period the diversion dam is under repair.**

**(C) Joint licensees shall submit within 21 days from the date hereof for Commission consideration revised Exhibit L drawings reflecting the proposed repairs or modification of the diversion dam facility.**

---

**Before Commissioners: Lee C. White, Chairman; L. J. O'Connor, Jr., Charles R. Ross and Carl E. Bagge**

## ROCHESTER GAS AND ELECTRIC CORPORATION, PROJECT NO. 2584

### ORDER ISSUING LICENSE (MAJOR)

**(Issued June 30, 1967)**

**Application was filed on March 24, 1966, by Rochester Gas and Electric Corporation (Applicant) of Rochester, New York, for a license under Section 4(e) of the Federal Power Act (Act) for constructed Project No. 2584, known as Station 26 Project, located on the Genesee River in the City of Rochester, Monroe County, New York. No lands of the United States are affected by the project.**

**The project, originally constructed in 1903, contained a single generating unit of 425 horsepower capacity. This unit was replaced in 1922 by a 500 horsepower unit. In 1952 a new powerhouse was placed in operation containing a generating unit having a capacity of about 4,000 horsepower. Construction of the new powerhouse commenced in October of 1950 and completion was accomplished in October of 1953.**

**The Secretary of the Army and the Chief of Engineers have approved the plans of the project structures affecting navigation pursuant to Section 4(e) of the Federal Power Act.**

**The Department of the Interior, in reporting on the application, recommended for inclusion in any license for the project terms and conditions in the interests of fish and wildlife and recreation as set forth in attached Form L-3, and a special condition, designated as Article 33, providing for future modifications of project facilities and operation as may reasonably be necessary in the interest of improving water quality conditions within the project, following completion and review of water quality studies by Federal agencies in the Lake Ontario Basin.**

Exhibits L-1 and R-1 (FPC Nos. 2584-4 and -5, respectively) which we are approving as part of this license, show two low weirs to be constructed in the Genesee River by Applicant under a proposal to the City of Rochester in connection with the latter's Genesee Crossroads Urban Renewal Project to provide scenic pools where at times the river bottom is exposed. However, since the weirs are being included in this license as part of the project works, and the project boundary shown on Exhibit K (FPC No. 2584-2) does not encompass the areas within the river which are to be occupied by the weirs and the reflecting pools, we are by Article 34 providing that the licensee file a revised Exhibit K to include within the project boundary the two weirs and reflecting pool areas.

In Docket No. E-7154 (32 FPC 48, 49), (July 7, 1964), the Commission found that the Genesee River from above the Rochester Gas and Electric Corporation's project works * to its mouth at Lake Ontario is a "navigable water of the United States" within the meaning of Section 23(b) of the Federal Power Act. The Commission's finding, and order based thereon, were sustained on April 6, 1965 by the United States Court of Appeals, Second Circuit, insofar as the Commission's finding and order related to the reach of the Genesee River occupied by Project Nos. 2582, 2583 and 2584. *Rochester Gas and Electric Corporation* v. *Federal Power Commission*, (344 F. 2d 594-599, cert. denied, 382 U.S. 832). Docket No. E-7154 was initiated by a petition for declaratory order filed by applicant on March 2, 1964.

For the reasons set forth in our April 25, 1962 Opinion No. 357 (27 FPC 830), the license herein granted shall have an effective date of October 1, 1950, since neither a declaration of intention nor a timely application for license was filed with respect to the 1950 construction, and a termination date of December 31, 1993.

The Department of the Interior has advised that the National Register of historic sites, established under the provisions of Public Law 89-665 (80 Stat. 915), lists two historic landmarks within the City of Rochester. Neither of these landmarks is affected by the subject hydroelectric plant.

*The Commission finds:*

(1) Project No. 2584, is located on navigable waters of the United States.

(2) Applicant is a corporation organized under the laws of the State of New York, and has submitted satisfactory evidence of compliance with the requirements of all applicable State laws insofar as necessary to effectuate the purposes of a license for the project.

(3) Public notice of the filing of the application has been given. No protests or petitions to intervene have been received. No conflicting application is before the Commission.

(4) The project does not affect a Government dam, nor will the issuance of a license therefor, as hereinafter provided, affect the development of any water resources for public purposes which should be undertaken by the United States.

(5) Subject to the terms and conditions hereinafter imposed, the project will be best adapted to a comprehensive plan for improving or developing a waterway or waterways for the use or benefit of interstate or foreign commerce, for the improvement and utilization of water-power development, and for other beneficial public uses, including recreational purposes.

---

*Comprising three hydroelectric projects (Project Nos. 2582, 2583 and 2584) located on the Genesee River within 6 miles of its mouth in Lake Ontario, and one hydroelectric project (Project No. 2596) located on the river about 65 miles above its mouth.

(6) The installed horsepower capacity of the project hereinafter authorized for the purpose of computing the capacity component of the administrative annual charge is 4,000 horsepower, and the amount of annual charges, based on such capacity, to be paid under the license for the project, for the costs of administration of Part I of the Act is reasonable.

(7) The following described Exhibit R conforms to the Commission's rules and regulations and should be approved as part of this license:

Exhibit R, consisting of 11 typewritten pages titled "Statement Respecting Public Utilization and Recreational Uses"; a copy of a certified resolution of the Council of the City of Rochester dated March 9, 1966; and seven photographs, all filed March 24, 1966, and

Exhibit R-1, Sheet 1 (FPC No. 2584-5) titled "Recreational Facilities—Station 26 Area" also filed March 24, 1966.

(8) The exhibits designated and described in paragraph (B) below conform to the Commission's rules and regulations and should be approved as part of this license.

*The Commission orders:*

(A) This license is hereby issued to Rochester Gas and Electric Corporation (Licensee) of Rochester, New York, under Section 4(e) of the Federal Power Act (Act) for a period effective as of October 1, 1950 and terminating December 31, 1993, for the continued operation and maintenance of Station 26 Project No. 2584, located on the Genesee River in the City of Rochester, Monroe County, New York, and affecting navigable waters of the United States, subject to the term and conditions of the Act which is incorporated herein by reference as a part of this license, and subject to such rules and regulations as the Commission has issued or prescribed under the provisions of the Act.

(B) Station 26 Project No. 2584 consists of:

(i) all lands constituting the project area and enclosed by the project boundary or the licensee's interests in such lands, the limits of which are otherwise defined, the use and occupancy of which are necessary for the purposes of the project; such project area and project boundary being shown and described by certain exhibits which form part of the application for license and which are designated and described as follows:

Exhibit J: (FPC No. 2584-1) Showing—General Map of Project Area.

Exhibit K: (FPC No. 2584-2) Showing—Detail Map of Project Area and Boundary.

(ii) project works consisting of: (1) a reinforced concrete intake structure located upstream from the New York State Barge Canal's Court Street dam; (2) a concrete penstock about 260 feet long; (3) a tailrace about 590 feet long and 40 feet wide; (4) a 323-foot baffle wall from the powerhouse to Court Street Bridge; (5) an indoor powerhouse containing a single unit with rated capacity of 3,000 kw; (6) two 4,150 volt underground cables, approximately 1,800 feet long; and (7) appurtenant facilities: the location, nature and character of which are more specifically shown and described by the exhibits hereinbefore cited and by certain other exhibits which also form part of the application for license and which are designated and described as follows:

| Exhibit L Sheet No. | FPC No. 2584- | Showing |
|---|---|---|
| 1 | 3 | Section of intake, penstock and powerhouse. |
| 2 | 4 | Location plan and section of proposed weirs. |

*Exhibit M:* Consisting of two typewritten pages entitled, "General Description of Equipment" filed with the Commission March 24, 1966,

(iii) all other structures, fixtures, equipment or facilities used or useful in the maintenance and operation of the project and located on the project area, including such portable property as may be used or useful in connection with the project or any part thereof, whether located on or off the project area, if and to the extent that the inclusion of such property as part of the project is approved or acquiesced in by the Commission; also, all riparian or other rights, the use or possession of which is necessary or appropriate in the maintenance or operation of the project.

(C) This license is also subject to the terms and conditions set forth in Form L-3 (Revised September 1, 1966) entitled "Terms and Conditions of License for Constructed Project Affecting Navigable Waters of the United States" (36 FPC 971), which terms and conditions, designated as Articles 1 through 31, are attached hereto and made a part hereof, and subject to the following special conditions set forth herein as additional articles:

*Article 32.* The Licensee shall pay the United States the following annual charge, effective October 1, 1950:

> For the purpose of reimbursing the United States for the cost of administration of Part I of the Act, a reasonable annual charge as determined by the Commission in accordance with the provisions of its regulations, in effect from time to time. The authorized installed capacity for such purpose is 4,000 horsepower.

*Article 33.* The Licensee shall, following completion and review of water quality studies now being conducted by Federal agencies in the Lake Ontario Basin, install such facilities or modify project operations as may be necessary in the interests of improving water quality conditions in the Genesee River as may be ordered by the Commission upon its own motion or upon recommendation of appropriate Federal or state agencies, after notice and opportunity for hearing and upon findings based on substantial evidence that such facilities and modifications are necessary and desirable and consistent with the provisions of the Act.

*Article 34.* Within two years following the issuance of this license, revised Exhibit K shall be prepared and filed in accordance with Commission regulations to include within the project boundary the recreation lands and facilities (including two low-level weirs in the Genesee River) shown on Exhibit R approved herein.

(D) The Exhibit R described in finding (7) above is hereby approved as part of this license.

(E) The exhibits designated and described in paragraph (B) above are hereby approved as part of this license.

(F) The Licensee shall within 90 days from the date of issuance of this license, file in accordance with the provisions of Section 11.20(a)(4) a statement under oath showing the gross amount of power generation for the project in kilowatt-hours for each calendar year commencing October 1, 1950.

(G) This order shall become final 30 days from the date of its issuance unless application for rehearing shall be filed as provided in Section 313(a) of the Act, and failure to file such an application shall constitute acceptance of this license. In acknowledgment of the acceptance of this license, it shall be signed for the licensee and returned to the Commission within 60 days from the date of issuance of this order.

[illegible]

## APPLICATIONS OF PRODUCERS OF NATURAL GAS FOR CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY DISPOSED OF DURING THE PERIOD OF JANUARY 1, 1967 THROUGH JUNE 30, 1967; SERVICE BEGINNING SUBSEQUENT TO JUNE 7, 1954
